Dodge Brothers MOTOR CAR

Winter never fails to bring this car renewed praise.

It is because the starting system and carburetor seem to be almost immune from cold weather troubles. The response is prompt, even on the coldest mornings.

The cord tires, with their safety tread, are also particularly desirable in winter. They not only act as a safeguard against skidding, but greatly reduce the possibility of having to change tires under disagreeable weather conditions.

Close fitting curtains, which open with the doors, enable the owner to drive in comfort the whole year round.
