Mr. Mills says that Lewiston is get-ting very good advertising as an ideal training place, and that the Butte players are strong on boosting the

WHITE LOOKS FOR PLAYERS.

Baker, the third baseman who wore a Grays Harbor uniform last year; Blexrud, a pitcher, and Wessler, a second baseman, who are sojourning in Ogden, and Lussi, a first baseman who is now in Denver.

In the event of the Provincial Lacrosse league appointing an official referee they could make no better choice than that of Dr. F. L. Bugains of this city. Dr. Buggins is an old lacrosse player himself and knows of the ground up.

Dugdale, the fat magnate of Seattle, wants Kid Parker, who White signed last fall, and wants him badly. Parker is said to be a whirlwind short-stop, and "Dug" has offered to trade "Deacon," a catcher, a pitcher and an outfielder for the nimble lad. The an outfielder for the nimble lad. The kid has been practicing with Seattle, and Dugdale is infatuated with him. White threatens to take the matter up to the high moguls of the national agreement if Dugdale persists in trying to entice his shortstop away from him. White had banked on getting Kid Briseno, the little shortstop, but Tacons and the shortstop, but Tacons and the shortstop away from him. White had banked on getting Kid Briseno, the little shortstop, but Tacons and the shortstop away from him. HOW TO FIND AVERAGES.

How to find the batting record .-Divide the number of base hits by the number of times to bat. Example

—Jones makes 148 hits and was at bat 447 times: 148 divided by 447 equals .331.

How to find the fielding record .-Divide the number of chances ac-being waited to make up the full cepted by the total chances. Example -Jones has 289 chances. He accepts 268 put outs and 15 assists: 283 divided by 289 equals .979.

To find the standing of the club.— Divide the number of games won by the number of games played. Ex-ample—Jonesville plays 137 games and wins 63: 63 divided by 137 equals

To find base running record.-Di-divided by 59 equals .401.

Four Cows Will Earn You MORE Money Than EIGHT Cows Earn You Now

Capital

Tell me to show you how to get over thirty dollars a year more out of each cow you keep. Make

me prove that four cows AND a Capital Separator will actually earn you -YOU, PERSONALLY -more money in cold cash pro ts than an EIGHT-cow herd and no Capital Separator. Don't take my say-so for it. Don't wrap yourself up in your own belief that it can't be done. It CAN be done, and I can PROVE it to you, in a practical, hard - sense fashion, with figures and facts that you won't want to dodge. Write to me and see.

Let's get the thing clear to start with. Here is what I say I can show you: That with four good cows and my method of separating, making butter—and selling butter—you can make more

money in one year than eight cows will make you without my method.

If I do that, -if I do show you a difference of over thirty dollars profit a year on every cow you keep, -then I want to talk business with you. I don't want a cent of your money until you are satisfied that I have made good every word I say and everything I promise. I don't want to sell you a Capital Separator until you ask me to, -I shan't importune you, nor bother you. All I want to know is your name and address, and how many cows you keep. When I get thes: facts, I'll tell you some things you haven't heard before. I'll show you not only why you need a Capital Separator, but why you can make more money by my method of selling butter than you'll make any other way. It won't be all separator talk I'll talk to you. you've read reams of separator argument, but you haven't heard yet about the right way to write to me-address as follows

make butter and the right way to SELL butter, Tell me to tell you about it,—

there's nothing to pay.

Why don't I tell you right here in print? Simply because lam not giving "blanket" advice. What high the good plan for a man in Ontario wealon t work in Manitoba. - and I propose to advise each d fryman according to his location and other vital details. Naturally, I want to sell Capital Separators. I am no philanthropi t. But I will sell them faster because I can tell people how to make them pay,—and that's something new in this business.

I don't care what your experience with dairying has been, nor what with separators. You may have what you think is the best separator there is. Or you may believe, as many do, that there isn't any real profit in dairy-farming. I can show you where you're wrong in either case. Do I get the chance to do that? Will you listen to the mere, sheer, downright facts? Just write to me and say so.

I don't care whether you feel able to buy a Capital Separator or not. It won't be a hard matter, once you get to the buying point, to make terms with me. Some of my friends—I den't consider them merely my customers—take three years' time to pay in. Some of them pay in three months. Doesn't make any difference to me, because I know, and I can prove to you, that my Separator will buy itself the first year you have it. It will save you erough money and trouble, to pay for itself twice over in that time. And I can prove that, too, -just write and ask

I've got a machine here, and a method, that will open your eyes to what there really is in keeping covs for profit. Maybe you are one of the few that know that already. Even if you are, you won't be any the porter for reading what I'll write you. Let me tell you about the easiest separator to run you ever saw, buy, - the separator that skims cleanest and does it easiest, --the one with the really low-down can, --and about the method that makes more butter, makes better butter, and gets better prices for it the whole year round. Just

I will guarantee it for TEN years and give you THREE years to pay for the "PEERLESS" INCUBATOR

Page 13 of my FREE Book tells why the air is always clean inside this one incubator--and why that matters to you

an expert.

Most Incubator-men talk loud about steady Heat and little about Clean Air. I can afford to talk both, and more besides. Because:-

The Peerless is the incubator that hatches with clean air.—the incubator that has real ventilation. Now the quality of air an incubator-chicken gets before it's hatched is far more important than the quantity of food it gets after it hatches.

And many a poultry-for-profit venture has gone to smash by the carbon-dioxide route—bad incubator-air. Carbon-dioxide is a deadly gas every egg gives off asit hatches. Open the ordinary incu-Get this without paying a cent Ask me how bators' door and sniff.-

choking smell is carbondioxide; and it is poison to animal life. There is no smell in a Peerless—the poison is continually flushed out of the Peerless hatching chamber. Remember that for almost 500 hours

that sulfurous, musty

the chick breathes what air seeps through the porous shell. If that air is poison loaded, as it is in badly-ventilated ordinary incubators; that chick is stunted, its vitality impaired, its vigor weakened. It never can thrive as Peerless-hatched chicks, that breathe pure, clean air, do thrive.

Remember, too, that this is only one of fifteen plain reasons why the Peerless incubator not only hatches every chick that can be hatched, but gives those chicks the right start. Every one of the fifteen reasons means the difference between money made and money lost in poultry - raising.

write now. In this Free Book I show you how to start in the poultry business without spending a cent for the mportant part of your outfit. I will make you a partnership proposition that puts the risk mostly on me and leaves the profit wholly for you.

Suppose you send me your address—use a post-
