WHERE IS THE CONSERVATIVE PARTY?

The Edmonton Journal expresses editorially the pious and patriotic hope that the Province may be defeated in the law suit over the Alberta and Great Waterways money, and that the company may be allowed to go on with its bargain made with the late Government.

THE "AUTOCRACY" OF THE PREMIER

The latest tribute of opposing newspapers to Premier Sifton is that he is an autocrat. What they mean is that he does not tell everything that he knows and intends to do to the first newspaperman who comes along.

It is a frank statement of opinion that the Province will be beaten in the law suit, and a no less candid expression of hope that it will be beaten.

It goes further and tells why the hope is entertained, the Journal thinks the bargain no good one that it is in the interests of the Province to have carried out.

It thinks the bargain made with the company a good bargain, so good a bargain that it will be unfortunate if the Legislature were to annul it.

It says that the carrying out of the bargain would be in the interests of the Province. To that end it hopes that the courts will set aside the act of the Legislature.

opinions that is the stand it tells the world they are taking. Unless and until the party repudiates the impugnation that they approve the bargain, the Journal's stand must be taken to be agreeable to them, and they must share with it responsibility for approving the Alberta and Great Waterways bargain.

The Calgary Herald has not yet relieved Mr. Michener of the edum that he is a member of having withheld information which, if he possessed it, bound him by every obligation of manhood and of public responsibility to move a charge of dishonesty against a fellow-member in the House.

The Herald carries nothing that has smirched the honor of its party leader. All it is concerned about is that Clarke did not get the cash. That is deeply, even vitally, concerned about it that it strives daily for. Just now it is trying to find solace for its pangs in dragging the credit of the Province, it is daily warning the Province, it is daily warning the Province, it is daily warning the Province.

valued citizens. The new comers who are getting out of the right sort, and they are coming to the right country. No country in the world is getting so many immigrants in proportion to its population, and no country is getting so many "aborers" in proportion to its population, and no country is getting so many "aborers" in proportion to its population.

THE TRIPPLING CHARGES. Calgary Alborner.—The charges which have been made against Hon. W. H. Cushing when examined carefully and in detail, still would be regarded as trifling by any investigation. But they are not trifling. The Calgary Herald repeated them last night. Here they are:

The Herald says that Mr. Cushing went to Toronto and Detroit, when a number of his government, to attend a private and religious meeting and charged the government-up with his expenses. That is not true. Mr. Cushing went to Ottawa, Toronto and Detroit on the occasion in question. It was a public business, and he was not on a private business.

Now think of this for a minute. During his tenure of office, Hon. W. H. Cushing spent on behalf of the government something like \$7,000. He was not a man who was a spender. He was a man who was a spender.

Calgary seems to be experiencing an uneven distinction among Canadian cities in having a considerable number of unemployed persons who have not the means with which to tide themselves through the winter, and who in consequence are beseeching the civic officials and charitable associations for relief.

Winnipeg, Jan. 8.—Feature of Montreal market this morning was an advance of 10 1/2 points on Laureate. Opening at 184 1/2 it touched 187 and then made gains to 195. C.P.R. opened at 128 1/2 and fell off slightly at close.

The handy revolver got in some fine work on Christmas eve and Christmas day, remarks the Montreal Star. At Mount Pleasant Baptist church, in Filmer county, Georgia, the pastor shot and killed a "moonshiner." He was assisted by a couple of brothers, also ministers, and also armed. He had not killed the "moonshiner" in the public works in the town, but he would have killed him, for that work was also carrying a revolver and managed to do some damage to one of the assisting clergermen before he was shot.

And that is the other thing that the people of the north and west are talking about in the papers throughout Canada, even to a Toronto religious paper, and accusing the government of "moonshiner" work. The transaction is here and speaks for itself. It is a particularly nice bit of explanation. Mr. Cushing made no secret of the transaction or the people who are trying to bound him out of most of the men and some of the women. It was a straight, open up and down transaction between man and man, and the result is an absolutely clear sheet.

There is no man in public life now who is so much in the hands of the public as Mr. Cushing. He is a man who is so much in the hands of the public as Mr. Cushing. He is a man who is so much in the hands of the public as Mr. Cushing.

A bill is before the United States Senate which proposes that the coal lands in Alaska shall hereafter be leased, not sold. The bill follows the lead of Canada. Four years ago the sale of coal lands in Canada was abandoned and the leasing system adopted. So far as is apparent the change has not tended to discourage the development of coal areas.

His bankers have started action against Sheldon, the former Montreal broker, because he neglected to endorse some securities he turned over to them. The man who "invested" had won savings in his mysterious operations was not the only gullible party. Mr. Sheldon met in Montreal.

President Taft has drawn some critical attention by attempting to define the extent to which drunkenness in or by a man is responsible for a crime. He is a man who is so much in the hands of the public as Mr. Cushing.

When the purpose to kill is formed in a drunken brain, the intoxicated condition rebuts the influence of premeditation necessary in murder of the first degree. Legally this is for wipled out.

TO WIPE OUT 84 BARS. Toronto, Jan. 8.—Returns made to the Ontario Alliance show that local organizations are being organized in 84 bars, while 12 places gave adverse replies, and in 28 municipalities other accounts are in the way of steady improvement. Announcement that the Hamilton system had closed an order for 109 locomotives at a cost of
