### A QUARTER OF A MILLION DOLLARS PROFIT ON AN INVESTMENT OF FOUR HUNDRED DOLLARS SOUNDS INCREDIBLE DOESN'T IT? NEVERTHELESS IT IS TRUE

READ THE FOLLOWING EXPERIENCE:

Mr. M of Nova Scotia bought one hundred million German Government 5 p.c. bonds about January, 1924. He paid four hundred dollars for them. When he took delivery of them at the Bank he was very much criticised, the Bank Manager laughed at him and told him that the bonds would make good wall paper. The Bank clerks grinned at him as he carried away the bonds. His friends and business associates laughed at him and took him for a fanatic, his wife criticised, scolded and raged at him for wasting four hundred dollars of good money. Mr. M at last became discouraged and disgusted by his friends jibing at him so he sold his one hundred million bonds, got back his four hundred, but Mr. M --- finds that he is to be laughed at more than ever. Six months after Mr. M- sold his bonds they began to advance in price and it is true that if he had kept these bonds he could have sold them a few months ago for more than a quarter of a million dollars.
