We have recently hadthe opportunity of reading a large number of letters, written mostly by business men in various parts of the parts of the current half year, payable on the lat of June, when an annual meeting will be a cust and the part of the written mostly by business men in various parts of the written mostly by business men in various parts of the written mostly by business men in various parts of the written mostly by business men in various parts of the written mostly by business men in various parts of the written mostly by business men in various parts of the written mostly by business men in various parts and the written mostly by business men in various parts of the written mostly by business men in various parts of the written business. The accounts vary very much, as they never the the march western counties of time of the written would be supposed to afford for woolens. This seems to be due not only to the over-sanguinc calculations of traders, but partly to the mild characy for woolens. This seems to be due not only to the over-sanguinc calculations of traders, but partly to the mild characy for woolens. This seems to be due not only to the over-sanguinc calculations of traders, but partly to the mild characy for the writter, but one part of the writter of the writter of the writter, have recently had the opportunity ding a large number of letters, an mostly by business men in vari-

Cancer.

From the London Medical Institute.

Abnormal Growths, Ulcers, Tumors, Cancers' Excrescences, and all growths of malignant or non-malignant characters, are due to a diseased or scrofulous condition of the blood. Our first object, then, is to extract the cancer and administer medicines which radically remove cancerous growth, tumers, and all forms of sorofula, thereby preventing the formation or return of that formidable dark of the formation or return of that formidable disease when once removed. Many have been dismissed from the Institute permanently cured. We will here mention that the same system of treatment is practised at the London Medical Institute the principal several years ago, and all that was introduced and adopted by those cured by him at that time have remained entirely free from any returning symptoms. The day is fast approaching when the knife will be looked upon as a barbarous, injurious and dangerous mode for treatment, and when medicines will be more skilfully applied to meet the denands of nature. Poisoneus ingredients are sometimes used, which, by absorption, destroy the healthy qualities of the blood instead of purifying it, which is most important and necessary in cancerous Clow disease. Having devoted many years of exeful observation to the nature and treatment of cancer, we have perfected our system of effectually and speedily curing cancer, by the combining remedies that possess in their action a powerful and healthful influence upon the blood, and operating specifically as a local application. One great object is to avoid giving pain, but where positive action is required (as in some cases) to kill the disease rapidly, the patient may be completed to suffer a little inconvenience.

But the first the late of the blood digest the content of t Cancer.
From the London Medical Institute.

cancer.

Cancers have been partially removed by the knife or by the application of plasters or salves in the hands of inexperienced persons, but some portions of the roots and virus being left a renewed growth of cancer is invariably the result. We cure many cases that have been thus treated, and at one time pronounced oured. Epithelial cancer by such methods is seldom if ever even benefited. Our system is entirely successful if M. F. McTaggart,
Principal.

THE Druggists have just received a supply of Dr. Wheeler's Celebrated Chemical Food and Nutritive Tonic, the Compound Elixir of Phosphates and Calisays. This preparation has been in use in private practice for fifteen years, and is confidently recommended to the public as the most elegant and reliable tonic in use for building up constitutions that have for a long time been suffering from Chronic Wasting Diseases, depending upon poor Wasting Diseases, depending upon poo-lood. It perfects nutrition by aiding the digestion and assimilation of food, and thereby building up and vitalizing all the organs and tissues of the body. In disease peculiar to women, and in delicate child ren, it supplies a want long felt by the phy-scien, of a safe and agreeable remedy tha may be taken for a protracted period with out any possibility of injury, or of becomin repugnant to the patient. Sold at \$1.
