photography. To take a photo and re-produce it on a plate in raised letters

or printing is no very difficult matter.

SAFEGUARD RELIED UPON "The great safeguard on which the Bank of England relies is the difficulty in imitating the paper, and the water-mark, but that has been overcome, as The English Premier Says They try, the foreign office has moved, and in imitating the paper, and the waterthe watermark was very well done, but with a strong light one can easily photograph the watermark, and that done the way is clear for reproducing it on

The paper is hand-made in the country, and the mark is impressed on the

two rough edges and two smooth. It is act as a missionary as regards the said the bank people know which edges food question."

Scotch, American and foreign banks smile at the fetish of the Bank of England note. They regard it with no reverence. Some years ago a clever for-eigner, whose wealth made him independent of forgery, set to work and made a note that was complete, save Three Hundred of Them Going to for the signature and the amount in the corner. It was perhaps the most perfect of all the forgeries of the last century, yet it was only done out of

on the face and back, done with a machine which has secrets of its own, and then it is printed in five colors. On the chine which has secrets of its own, and then it is printed in five colors. On the face are three colors, with blue predom-inating, and on the back are two, with olue again. Blue baffles the photographer, and is a favorite medium for notes all over the world.

You can hardly conceive of a com-Has Occurred Within the Last Twelve Months.

bination of talent among forgers sufficient to produce a note like that. You want first of all very fine machinery for engraving because photography will cent Tract in Africa. not do it. Hard work will not do. You must have one man to engrave the por-THE SAFEGUARDS INSUFFICIENT traits, another of a different genius who can do the extremely difficult line and lacework; a clever color printer and finely adjusted machinery to place the The Public May Be Easily Imposed who can copy the watermark.

"A banker of wide experience expressed the general opinion of the ex-perts consulted when he said: The Bank of England has been using this note for a very long time, and it would not listen to the idea of changing. It London, Oct. 3. - "The safeguards of is too conservative in this as in its
