NEW INVENTION.

Remarkable Electrical Apparatus for
Examining the Interior of the Human
Body.

From the Philadelphia Press.

One of the newest adaptations of elec-
tric illumination is in the shape of a very
small lamp, which can be introduced into
the stomach, for the purpose of aiding
surgical and dental operations which can-
not be carried on without light and for
which it has been extremely difficult heretofore
to obtain light by mirrors or other
means. The lamp primarily consists of a
delicate glass bulb, from which the air
has been withdrawn and as nearly as
perfect vacuum created as possible. The
bulb varies in shape, being spheroidal,
flat, and compass-shaped, and also
cylindrical, with a conical termination.

Through the thin walls of the lantern run
the conducting wires, connected by a cor-
dular, on which the electricity centres, and
which thus becomes the place of light.

The glass lantern is very small, the cyl-
indrical shaped being scarcely half an inch
in length, and with a diameter not nearly
as great as that of an ordinary lead pencil.

The compass-shaped lamp is about a
quarter of an inch thick, and has a diam-
eter of three-quarters of an inch to an inch,
while the spheroidal seems scarcely larger
than a good-sized pea. The lamp is at-
tached to a handle, from seven to nine
inches long, and about half an inch thick,
through which run the wires connect-
ing with the battery. The handle and
the lamp can be separated, and thus but
one handle is necessary for use with
the different forms of the lamp.

The instantaneous power, and hence the bril-
liancy of the arc of light, can be regulated
by moving along the handle a ring which
contacts with the wires. The handle has
several flanges, and its position can be ar-
ranged in almost any way so as to adapt it
to the shape of the cavity which it is pro-
posed to illuminate. Mirrors can also be
fastened to the lamp and light reflected to
places where the lamp cannot be intro-
duced. To prevent the too great diffusion
of light and the radiation of heat, the
lamp may be partially covered with a hard
rubber or gutta percha case.

When the lamp is placed in the mouth
of a patient every portion of the throat
even to the lowest parts, can be plainly
seen. This will greatly facilitate the work
of surgery and dentistry, and enable an
operator to procure a much more thorough
diagnosis of a case than the use of any
other means previously known. Placed
beyond the teeth, the intense light renders
not only the teeth, but even the gum
above, highly transparent. If the lamp is
used in the ear, no lines will be visible
but the presence of a filling
or of the mere beginning of decay may at
once be seen. When the lamp is placed
within the mouth and the lips are closed,
the entire front structure of the mouth is
brought to view. The bones and the
formations are easily discoverable, and
even the interior of the nasal passages.

In the same way the instrument is of
great value in the treatment of obstetrical
disease, and in studies of the stomach. No
unpleasant sensations are experienced by
patients, even in cases of protracted use,
no other effect being noticeable than that
which follows the drinking of a hot cup of
coffee. Mr. E. T. Starr of Philadelphia is
the inventor.

"Over and over again."

Repetition is admitted as the only way
to impress a truth upon the mind. Ac-
cordingly take notice that Dr. Pierce's
"Pleasant Purgative Pellets," (the original
Little Liver Pills) continue to be wonder-
fully effective in cases of sick and nervous
headache, constipation, indigestion, loss
of blood to the head, cold extremities, and
all ailments arising from obstruction of the
bowel functions. Their action is thorough,
yet gentle, and the ingredients being en-
tirely vegetable, they can be taken with
impunity into the most delicate stomach.

All druggists.

"I am so glad to see the range of my
mind," said a literary woman of my
husband. "It was the brain reply."

"The kitchen range possesses a great deal
more attraction for me."

"The safe, pleasant, and effective
wormer, Mother's Worm Exterminator,
nothing equals it. It procures a
bottle and takes it home."

A Louisville monkey got into a paint
shop and painted himself green. If his
desire was to escape being mistaken for
a bottle he should have chosen some other
color.

Thomas Myers, Braconier, writes:
"Dr. Thomas's Electric Oil is the best medi-
cine I ever used. It always gives satisfaction,
and in cases of coughs, colds, sore throat,
and, immediate relief has been received by
those who use it."

An American exchange says: "The
bank presidents of the country don't want
Canada annexed." Of course they don't.
Where else would they go?

A field of corn—Thomas Sabia of
Edgemoor, says: "I have used Hille-
way's Corn Cure with the best results,
having removed ten corns from my feet. It
is a half-way cure or reliever, but a
complete extirpator, leaving the skin
smooth and clear from the least appearance
of the corns."

Culves can walk as soon as they are
born, kittens as lively as crickets when a
week old, and little chicks have com-
mand of all their faculties as soon as they
break the shell, but a human baby is un-
derly he plews for months, hence nature
gave the baby a soul-racking pair of lungs.

A lady writes: "I have used Ayer's
Sarsaparilla in my family for many years,
and could not keep house without it. For
the relief of the pains consequent upon the
female weakness and irregularities, I con-
sider it without an equal."

An exchange says a man begins to occupy
half a seat when he gets married. This is
true, and after the first baby comes, he
gives to occupy half the outside bed-rail.
And sometimes, when the baby is par-
ticularly restless, he is glad to grab a quilt
and sleep on the floor.

Mr. Peter Vermont, Hochelaga, P.Q.,
writes: "Dr. Thomas's Electric Oil cured
me of rheumatism after I tried many
medicines, to no purpose. It is a good
medicine." Just think of it—your can
relieve the twinges of rheumatism, or the
most painful attack of neuralgia—you can
check a cough, and heal a broken
skin, with a bottle of Dr. Thomas's Electric
Oil, costing only 25 cents.

Yes, a baby is the most dependent of the
animal creation. He is unable to help
himself, but he soon gets over that and
helps himself to everything he can lay
hand to. Sometimes he wants the earth
and tries very hard to get it.

Not a particle of calomel or any other
deleterious substance enters into the com-
position of Ayer's Cathartic Pills. On the
contrary they prove of specific service to
those who have used calomel and other
mercurial poisons as medicines, and feel their
injuries effective. In such cases Ayer's Pills
are invaluable.

Mrs. Minks—No, I had no trouble wean-
ing the baby. He rather seemed to like
the bottle. Mrs. Fink—Oh, the bottle
he darling. Take after his father, don't
you?

\$15,000.00.

"Truth" Bible Competition.

NO. ELEVEN.

THE FINAL ONE.

Closing September 15th.

A NEW PLAN.

For Persons Residing Anywhere
in the World Outside the
City of Toronto.

The Largest List and Most Valuable
Ever Offered by Any Pub-
lisher.

RESIDENTS OF TORONTO INADMISSIBLE.

A SMALL FARM FREE.

SPECIAL CLUB OFFER.

Four Pianos, Three Organs, Silver Tea
Sets, Sewing Machines, Gold Watches,
Silver Watches, and Innumerable
Other Valuable Rewards.

Don't Delay Sending in Your
Answers.

At the solicitation of many friends TRUTH
announces one more—the final—Bible com-
petition. Owing to the fact of so many
valuable rewards going to citizens of To-
ronto, this competition will be open only
to persons living outside the city of To-
ronto. Any one residing in any other part
of the habitable world will be eligible to
compete for these magnificent rewards.

The questions—which are supplied by an
eminent Presbyterian minister—are very
difficult, but the rewards are valuable. We
hope the publisher of TRUTH will meet
with the success his enterprise so richly
merits. Everything he has offered in pre-
vious Bible Competitions has been promptly
and cheerfully handed over to the suc-
cessful ones the moment they are known. We
most heartily commend the paper to our
readers. They will find it all it is rep-
resented to be. Full and complete lists of
all those who gain rewards are given in
TRUTH the week following the close of
each competition. There will be no change,
and no postponement in any way; every-
thing will be carried out exactly as stated.

HERE ARE THE QUESTIONS.

FROM THE PRESIDENT

OF BAYLOR UNIVERSITY.

"Independence, Texas, Sept. 27, 1882.

Gentlemen:

Ayer's Hair Vigor

has been used in my household for three
months.

1. To prevent falling out of the hair.

2. To prevent too rapid change of color.

3. As a dressing.

It has given entire satisfaction in every
particular. Yours respectfully,
W. C. CARR.

AYER'S HAIR VIGOR is entirely free
from uncleanly, dangerous, or injurious sub-
stances. It prevents the hair from turning
gray, restores gray hair to its original color,
prevents baldness, preserves the hair and
prevents its growth, cures dandruff and
all diseases of the hair and scalp, and is,
at the same time, a very superior and
valuable dressing.
