TRAVELER'S IMPRESSIONS.

APPROACHING IN THE UNITED STATES.

de and Financial Matters Leeking Healthier in Canada Than Across the Line—St. Paul Depressed — Winnipeg Reviving—Prospects Brighter in To-route Than in Most American Cities.

decree Pears of 15 Grosvenor-street t returned from a somewhat extend through the Western and North a States and Manitoba. He is a man server of his surroundings. Know-one of The World's Young Men

ressions of his trip. eried Mr. Pears at first hesitate

From what you could gather, what seems be the impression regarding the success of World's Fair?

Well I tell you. The people in and bund Chicago think there is no place like it. But of trouble is you have yet got to pursuade people of the Eastern States and those in rope that this is so. Europeans will not twice before they cross the Atlantic it then travel 1000 miles from the seaboard, what they consider, the wilderness on the action of the McKinley tariff upon manufacturing industries of Europeans will keep out many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites in the other side of the Atlantic as they can be a many exhibites and the can be a many exhibites as a many exhibites and the atlantic as they can be a many exhibites as a many exhibites and the action of the many exhibites are also the can be a many exhibit

the same as we have, but now there are a large number of dwelling houses unoccupied and they are loaded up with property that they cannot sell. There is one man whom I knew who held \$200,000 worth of property and he could not sell one dollar's worth. Being afraid he would be swamped, he bought a revolver and put an end to his existence. People in St. Paul, I can tell you, are discouraged, not knowing when things are going to revive again."

"What is the commercial condition in the States as far as you could glean?"

"Business men are complaining a good deal and they on the whole seem to be hard pressed."

"Why do you think so?" "I'll tell you. About 25 years ago they ad about 15 states with wild lands to bring Now these lands are about exhaused bey have very little more to bring in the next more will be to each

the next move will be to seek other lands. Then a great many will come to our Northwest.

"As to ourselves I think we have got to the point where the United States was 25 years ago. We have the facilities for developing our resources more rapidly and on a firmer basis than ever before. Our population is composed of the very best class of material for nation building. They are more industrious and lack that roughness which characterizes so many of the citizens to the south of us. And we have the best business men. Then we have not the two extremes of population that is so marked in the United States—the very poor and the very rich. We have the brain and muscle but not the big syndicates to crush the workingman down to poverty."

"Then you at least think Canada just as goed a country as the United States."

Our Only Weak Point,
"Indeed I do," he remarked with em-

The Globe and The Mail writing down this country that we would have made a good deal more progress than we have and had a million more to our population. This, to my mind, is our only weak point, and it has led the Americans to believe that we cannot stand without assistance from them. Hence their hostility to us, both politically and commercially. I found that the impression existed among a good many Americans that there was a strong desire for annexation on the part of Canadians, and they consider that the more they try to coerce us the sooner will annexation be consummated. Of course, we all know what has encouraged them to hold these erroneous views. try that we would have made a goo

what has encouraged them to hold these erroneous views.
"Furthermore," continued Mr. Pears, "I can tell you the real estate depression is not by any means confined to Canada. All the eithes in the Western States are in the same boat, and it began with the Baring Bros.' crisis. Milwaukee and St. Louis seem to have been about the only cities in the United States to escape an unhealthy real estate inflation. 'Consequently they escaped the crisis and are steadily progressing."
"What do you think of the condition of affairs in Manitoba?"

Healthy Outlook for Winnipeg. "With regard to Winnipeg I might say "With regard to Winnipeg I might say that all the stores there are rented and there is a big demand for dwelling houses, which I was told could be rented to pay 8 to 10 per cent. on the capital invested. There is a strong faith in the future growth of Winnipeg. The Canadian Pacific Hailway is going to build a new station before long. The company is quietly buying a good deal of property about Portage-avenue, and there is some idea among private citissens that it means to go in there somewhere."

"What did the crops look like?" queried "What did the crops look likef" queried The World, as he rose to go.
"Excellent between here and Winnipeg, although a trifle thin in spots. The general impression is that the crop will be good, but of course there is the usual fear of damage by early frosts."

water and electric light plant, and started the latter on Wednesday night with 21 beacons. The plant is located back of the Town Hall on the west stde of the street and includes an 80-horse power engine and a 30-light dynamo. The one boiler drives the pumps as well. The tank, which holds 80,000 gallons, is 80 feet above the ground on a high hill and gives a splendid pressure. At the lower end of the town it is equal to 82 bs. to the square inch without the pump on.

The Metropolitan Company got their elsecting the dynamo last Friday in a rain storm.

An ew commutator has been put in.

GRATEFUL-COMFORTING EPPS'S COGOA

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the flue properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every fendency to disease. Hundreds of subtle maindies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with bolling water or milk. Sold only in packets by Grocers, labelled thus:

B. & E. PERRIER.

It is a well-known fact that medical science has utterly failed to afford relief in rheumatic cases. We venture the assertion that although Electricity has only been in use as a remedial agent for a few years, it has cured more cases of Rheumatism than all other means combined. Some of our leading physicians, recognizing this fact, are availing themselves of this most potent of nature's forces.
