WEDNESDAY, DECEMBER 14TH, 1898. will -The recent discussion in the press reoffice garding the high apple freights charged by mship lines sailing from Halifax, has shown the necessity for establishing competiing i tive lines, if the interests of the fruit growers are to be fairly subserved. They are now apparently at the mercy of the transportation companies and much heavier tolls are being press exacted for carriage from Halifax than from any other important Atlantic port of ship-ment in Canada or the United States. This is not as it should be; the peculiar value of bis not as it should be; the peculiar value of B. M. the fruit growing industry to this province magnifies the evils of the export service, as it now exists, and our people are seeking a remedy. The idea prevails that the govern- day ment, in granting subsidies from the public treasury to steamship lines, is also in a posi-tion to dictate a fair freight schedule. The unpresident is not be supposition is perfectly reasonable, since, if the subsidies are granted for commercial expansion and convenience, the object is partially defeated when transportation companies, protected by those subsidies from natoper ural competition, arbitrarily exact higher charges from their patrons than are compatible with those existing under conditions far less favorable from the carrier's standpoint. The provincial government will no doubt be pe-titioned to prescribe a remedy for a situation even so disastrous to the great fruit growing interests of the province. In Annapolis county the people forsee a certain remedy in the construction of the pro-posed Granville and Victoria Beach Railway, Anna Alfre which would at once place Halifax and St.

Established 1873. The Weekly Monitor,

ISSUED ON WEDNESDAY, At Bridgetown, Annapolis Co, N. S.

M. K. PIPER. Proprietor and Publish JOHN R. PUDSEY, Manager. Terms: \$1.00 per annum in advance.

John steamship lines in active competition and necessitäte equable ocean freights, while terd the shorter haul to Victoria Beach would give shippers from the western end of the Valley a much lighter railway rate. Steamship agents in St. John guarantee that, if this line is built and wharf accomodations provided, they will make Victoria Beach a port of call and take four or five thousand barrels of apples in every outward bound Satu steamer, reserving space between decks for the fruit after the general cargo is made up at St. John. Apples would thus go to a stress regularly through the winter to the Euglish market instead of being dumped in lots of hiere thousand barrels at a time twenty or thirty thousand barrels at a time to glut the market and thus adversely affect the sale of fruit. That increased shipping me

facilities are required is evidenced by the fact that nearly every steamer that has sailed from Halifax this year has left carsailed from Halifax this year has left car-loads of apples on the dock, causing a loss of thousands of dollars to shippers, through next depreciation in value, due entirely to a lack

of shipping facilities. A railway from Mid- of H dieton to Victoria Beach would traverse an John important fruit growing district throughout duction, within a very few years, four fold

be p greater than the crop of to-day and it stands greater than the crop of to day and it stands us in hand to make provision for handling it properly. The value to the apple industry its a of the proposed railway through Clarence and Granville can be readily estimated; its value nap to general trading interests, while not so of the easily calculated, would be enormous, tap-

ping as it would three or four live business towns and running through a district from vac which large exports of live stock, hay, pota-

apied by Mr. Charles Rumsey. was worth \$4,600.

lish, that they may learn more of the ways of their conquerors and render a more use-ful allegiance. Spiritually the aim of the college will be to make good Mohammedans rather than bad Christians. The total fund required, \$300.000, has already here

The process of the service of the service for other spectral for the service for the se

them to better advantage. -Bicycle riding in moderation may be an invigorating exercise, but what must be said of such exhibitions as the ix days' bicycle race that closed last Saturday at New York? Prize fighting, football and kindred sports may be brutal, but in none of these are the refinements of cruelty so lingering or so de morializing as in the six days' bicycle where the contestants deliberately subject themedives to a strain, which must ineritably shorten life and impair usefulness. Law and themselves to a strain which must inevitably shorten life and impair usefulness. Law and dividized sentiment have no moral right to recognize such sport as legitimate.
