British Columbia Agency, Limited.

Assay and Analytical Laboratory.

This Department is under the management of J. O'Sullivan, who possesses a technical knowledge which embraces every detail of this intricate profession. He is a chemist of very high order and was for 26 years in the chemical laboratories of Messrs. Vivian & Sons, Swansea, the world-famed smelters. This department issues certificates of assays of ore submitted, which are absolutely accurate, and determine the exact value of metals contained in the ore. The laboratory is replete with all modern machinery and contrivances, and is in every respect a model workshop.

G. A. CARLETON,
General Agent.

JOHN IRVING,
Manager.

The Wilfley Ore Concentrator Syndicate, Limited.

32 OLD JEWRY, E.C. LONDON.

WE CLAIM THE FOLLOWING FOR THE WILFLEY TABLE:

- 1st. It will successfully handle three or four times more material than any belt concentrator made, without any exceptions.
- 2nd. It will save more concentrates in proportion while so doing and will catch any float gold, amalgam or quicksilver which may escape from the mortars or plates.
- 3rd. It will make cleaner and more valuable concentrates, thus saving useless expense for transportation of valueless material, and also reducing the smelting charges.
- 4th. It requires little or no attention when once adjusted, and no expert is required either to adjust or run the machine.
- 5th. It will save much expense in power and room as compared with mills using other concentrators.
- 6th. It has no expensive belts to crack and wear out and no complicated machinery to keep in repair.
- 7th. It is the only sensible plan of concentration, as it successfully treats any kind of materials, which is not true of any style of belt machine.

—CATALOGUE POST FREE—

These tables are displacing belt tables of every make, as shown by numerous letters in our possession.
