

# AN EXTRAORDINARY OFFER TO AGENTS.

We want Live, Energetic and Capable Agents in every county in the United States and Canada, to sell a patented article of great merit, *on its merits*. An article having a large sale, paying over 100 per cent. profit, having no competition, and on which the agent is protected in the exclusive sale by a deed given for each and every county he may secure from us. With all these advantages to our agents, and the fact that it is an article that can be sold to every house-owner, it might not be necessary to make an "Extraordinary Offer" to secure good agents at once, but we have concluded to make it to show, not only our confidence in the merits of our invention, but its salability by any agent that will handle it with energy. Our agents now at work are making from \$150 to \$600 a month clear, and this fact makes it safe for us to make our offer to all who are out of employment. Any agent that will give our business a 30 days' trial, and fail to clear at least \$100 in this time, *above all expenses*, can return all goods unsold to us, and we will refund the money paid for them. No other employer of agents ever dared to make such offers, nor would we if we did not know that we have agents now making more than double the amounts we guaranteed, and that but two sales a day would give a profit of over \$125 a month, and that one of our agents took 22 orders in one day. Our large descriptive circulars explain our offer fully, and these we wish to send to everyone out of employment who will send us one cent stamps for postage. Send at once and secure the agency in time for the boom, and go to work on the terms named in our extraordinary offer. We would like to have the address of all the agents, sewing machine solicitors and carpenters in the country, and ask any reader of this paper to send us at once the name and address of all such they know. Address at once

RENNER MANUFACTURING CO., 216 Smithfield St., Pittsburgh, Pa.

## W. B. BRAGG,

PRACTICAL MILLWRIGHT.

Contracts taken for the Building and Re-fitting of Mills on

### SHORT, MEDIUM, OR SYSTEM OF ANY LENGTH.

(Successor to SHIMER & CO.)

**MILTON, PA., U.S.**

FIG. 1—A NEW CUTTER.

THIS diagram represents a bit (D) in the position it occupies when making a cut (the bit 'C') which follows to complete the work is given in outline. This explains the division of cut and the free and easy working of the Tool. The bits are arranged in upper and lower series, and secured to a Head having seats alternately inclined for the purpose of giving the side clearance to their cutting points. This

FIG. 2—CUTTER NEARLY USED UP. A. R. Williams, - - - Toronto

GROOVE HEAD.

explains why these bits hold their shape and turn

out standard work until used up; the entire circle of bit being too cutting edge—see Figs. 1 and 2. The Head carries its weight low down and in line of cut, and runs like a Top.

SELLING AGENT,

## The PATENT EXHAUST STEAM INJECTOR,

WORKED BY EXHUST STEAM ONLY.

The most economical boiler feeder in existence and at the same time the simplest and most durable. Superceden both pumps and feed-water heaters, and by condensing the exhaust steam, removes the back pressure, and consequently increases the power of the engine; utilizes a power heretofore thrown away; works automatically at a steam pressure of less than half a pound. The exhaust steam, in passing through the Injector, heats the feed-water to a temperature of 190 degrees, F., thus effecting a saving over any other Injector of from 15 to 25 per cent. in fuel.
