

SOUVENIR

“WHAT is its distinctive feature?” you query. It has many, which put it easily in the lead—the “topliner” in the list of Canadian-made stoves—it’s the great domestic helper, the necessary servant of every household; but the point that has made it truly famous is the “aerated oven” idea, and it has produced this among many of its now satisfactory results: Meat cooked in the aerated oven is better

cooked than in an ordinary ventilated or closed oven, because it retains all its richness and nutriment. It cooks through and through, produces sweet, juicy viands, which are tasty and toothsome, and easily digested—as in roasting, so in baking—does bread to rich nut-brown, cakes come from it feather-light, and with its perfect ventilation you are always ensured a pure, sweet, wholesome oven. Souvenirs are perfectly made, economical on fuel, and great heaters. Write for booklet, telling you all about the aerated oven idea.
