

condition attended by excruciating pain, but I was agreeably surprised and my patient gratified at the results obtained from these tablets.

I have also had pleasing results from these tablets in both acute and chronic rheumatism. All physicians know how intractable is sciatic rheumatism, but the last few cases I had, I prescribed these tablets and I am sure they lessened the duration of the disease. To relieve pain in its incipency will often abort an inflammatory disease. This preparation certainly has quite a large field of usefulness, and the doctor who once uses it will seldom resort to any other anodyne.

The medical profession have been woefully deceived in Aphro-

disiacs and the treatment of sexual weaknesses.

The celebrated Professor, J. U. Lloyd, after careful research, published some time ago the truth concerning Damiana.

Resume: "Damiana was introduced to American medicine under a misunderstanding of its nature. It is *not* a medicine, but yielding to hot water, a pleasant tea-like beverage, used by the poorer classes exclusively, *innocent* of the attributes under which it has been forced to masquerade."

In *Pil Orientalis* (Thompson) see advertisement of Immune Tablet Co., Washington, D. C., the profession have a reliable aphrodisiac of 15 years standing, indicated in most cases of Impotency and Sexual weaknesses.

THE TREATMENT OF NASAL CATARRH

BY

JOHN A. HALE, M.D.

Alto Pass, Ill.

FOR years I used various remedies and met with varying success, until tiring of one remedy after another I relied solely on Potassium Permanganate in weak solutions as a nasal douche, but a review of some points in this paper will show why I always sought for something else. Glyco-Thymoline has usurped the place of the permanganate solution in my armamentarium, and after sufficient trial, established faith, implicit faith, in its specific therapeutics for this condition. A knowledge of its essential constituents and their therapeutic action only tends to strengthen a belief in its specificity. Caution is necessary in the selection and use of remedies, but a fair trial has proven no untoward inconvenience emanating from the use of this remedy. Meanwhile the therapeutic results are gratifying and the good effect of Glyco-Thymoline can be easily verified by a trial, when conclusions will be the result of practical truths only.
