

FOUND AT LAST

The Antidote for Cancer.

Abbott Myron Mason claims the discovery of a permanent cure for Cancer.

Many testify to the benefits of this wonderful medicine.

Success has crowned the life-long efforts of Abbott Myron Mason in his search for an antidote for cancer. For ages eminent physicians have believed that an antidote existed, but were unable to find it. (After investigating thousands of cases of cancer, and studying the history of this terrible disease, a powerful vegetable agent was discovered which proves to be a permanent cure for cancer.)

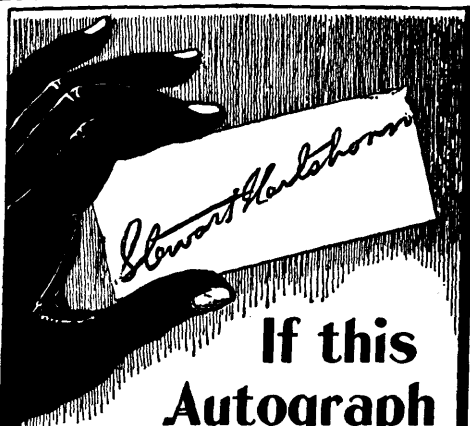

The "Vitalia Remedies," as the discovery is called, cure cancer by removing the cancerous germs from the blood. They also restore the vital powers of the whole system, rebuild the tissues of the body and strengthen the nerves.

This remedy has passed the experimental age, as very many people in the United States and Canada gratefully testify. To any case of cancer the "Remedies" are a great relief, and unless far gone the patient can have assurance of a permanent cure. Send for our book, which explains the treatment and gives testimonies of many happy men and women who have been restored to health by the "Vitalia Remedies."

This company has opened Branch Offices in Canada, and will give or mail free a 130-page book containing valuable information about this wonderful home remedy.

Examinations and consultations without charge at the office every week day between 10 and 4 o'clock.

Address or call on the Abbott Myron Mason Medical Co., Department C. M., 577 Sherbourne St., Toronto.
