

## **Mexico City**

Mexico City, the capital of Mexico, is the seat of federal government and the centre of the nation's commerce, finance and the arts. The largest city in the world, Mexico City boasts 20 million inhabitants living in 350 colonias (neighbourhoods) that stretch across an ancient lake bed.

Mexico City is built on the ruins of Tenochtitlan, the ancient Aztec capital. Reminders of past civilization pervade the city, particularly at the Templo Mayor excavation and the Anthropological Museum at Chapultepec Park.

Mexico City's richness of cultures is reflected in its diverse activities and opportunities.
