

THE KOOTENAY AND YALE LUMBER COMPANY.

It is reported from Rossland, B. C., that at a meeting held on December 1st, the Kootenay and Yale Lumber Company completed its organization by electing the following officers: President, Louis Blue; first vice-president, Peter Genelle; second vice-president, John Genelle; secretary, J. E. Poupore. The intention is to have offices in Rossland and Greenwood. The Rossland office will look after the business in the Trail Creek and Nelson sections, and the Greenwood office after the business of the company in the Boundary Creek country. The company which constitutes the combine is capitalized for \$500,000 in \$1 shares. Of the capital stock \$250,000 goes to Louis Blue and A. Fisher, and the other \$250,000 to P. Genelle & Co. In the property controlled by the combine are eight mills.

Regarding the combine Mr. Blue says: The mills include P. Genelle & Co.'s at Nakusp, capacity 150,000 feet every 24 hours; Genelle & Co.'s plant at Robson, capacity 150,000 feet, my plant at Rossland, capacity 70,000 feet, and my plant at Ymir of 35,000 feet. They will also include the four mills owned by myself and A. Fisher in the Boundary. Their location and capacity is: Phoenix 30,000 feet, Elholt 50,000 feet, Rock Creek 40,000 feet, and Long Lake 30,000 feet. In addition to these the company will erect four mills over the Boundary at points not yet settled. Our reserves are located all over the Arrow lakes and through the Boundary district. We have timber lands under Dominion and provincial grants, as well as by virtue of leases from claim owners and the railway companies. I should say that the amount of timber now standing on our territory is close to half a billion feet.

If there is a leak of steam around the piston rod of your engine, and the packing has been in use for several months, do not take off the gland and put in another ring or two of packing, but clean out all of the old and put in new throughout.

TIE SAWING MACHINE.

Messrs. Kittredge, Smith & Co., of Sherbrooke, Que., have invented a tie sawing machine, which was tested last spring by sawing 27,000 ties for the Q. C. Railway Company. The machine is said to be a complete success, and will make 4,000 eight-foot ties per day, at a cost not exceeding one-half cent per tie, taking the logs from the water and delivering them in a finished condition, with no other handling than passing them to the carrier in the water and two attendants to properly adjust them as the logs are passing through the centring adjusters to the carrying belt, without loss of motion. Parties wanting such a machine may obtain particulars from the above firm, or the Jenckes Machine Co., of Sherbrooke.

"WANTED AND FOR SALE."

Persons having for sale or wishing to purchase a particular lot of lumber, a mill property, timber limits, second hand machinery, etc., in fact, anything pertaining to lumbering operations, will find a buyer or seller, as the case may be, by placing an advertisement in the "Wanted For Sale Department" of the CANADA LUMBERMAN Weekly Edition. Testimonials to the value of this department by those who have given it a trial state that results of advertisements were frequently better than anticipated. The cost is comparatively small. Owners might, with profit to themselves, make use of this method of advertising their stock to a still greater extent.

The Best Excelsior Machine in the World

When two or more knives are run with one belt, all must stop when the belt is stopped to set bits or from any other cause. Our Machine has a belt for each knife, hence but one knife stops at a time. This great advantage should not be overlooked by purchasers. Time is money. Our Machine cuts more excelsior in a given time than any other machine. Get our circulars and prices.
