At the Rotary Club luncheon yesterday at noon R. Fraser Armstrong, town manager of Woodstock, who was a guest of the club, gave an interesting address on the town manager system. A vote of thanks was tendered the speaker.

The office of McLean, Holt & Co., Ltd., Albion street, were entered and a typewriter stolen. The break was not discovered until Monday morning. The entry was made through a back window, but the robber went out through the front door, leaving it open. The police were notified.

The Windsor chapter of the I. O. O. F. gave a most delightful dance last night in the Masonic Hall, West St. John. It was a St. Patrick's day celebration and everything was in keeping with the occasion. Streamers of green and white and many shamrocks were used most effectively as decorations. Each of the

nineteen dances had an Irish name and was danced to Irish music. An orchestra provided the excellent programme. The reception committee consisted of Mrs. A. C. Smith, Mrs. J. B. Smith and Miss Gertrude Lawson, the regent. Mrs. F. C. Scott was the convener for the dance and the other members of the committee were Miss Maud Cunningham, Miss Natalie Rendle, Miss Edith Cunningham, and Miss Irene Munnally.

A farewell service to Adjutant Laura Clark was held at No. 1 Corps Citadel, Charlotte street, last night. Sergeant Major Sparks, Commandant Sheard, Ensign McInerney and Mrs. Adjutant Uraski spoke of the good qualities of Adjutant Clark, who was matron of the Evangeline Home and Hospital in this city.

The concert party of the R. M. S. McInerney gave a pleasing entertainment in the G. W. V. A. Hall last evening, with Mr. Barlet, ship's purser, in the chair. BUILDING UP DEFENCE IN ST. PIERRE CASE

At the trial at Edmundston, yesterday, of William St. Pierre, charged with the murder of Miss Minnie Stevens, the defence produced witnesses to testify that the accused was at home at the time it is contended he committed the murder. His brother-in-law swore that St. Pierre was in the house at the time the prosecution is endeavoring to prove he did the deed, and fixes the time positively by the fact that he had his watch in his hand taking his wife's pulse when he heard St. Pierre talking to his mother. His brother-in-law's name is Hoodoy. Another fact set up by the defence was the presence in town that day of two strangers, who appeared the following afternoon. Leo Gillespie, then manager of the hotel at which the two men stayed, testified that they had come to the hotel and registered and had supper. They went out in the evening and returned about 10:20, though he did not see them until breakfast time the next morning. One of the chamber maids had called his attention to the fact that there were blood on the sheets of the bed in which they slept.

GERMANY SETS RECORD IN OUTPUT OF DYES

London, March 15.—A special correspondent of The Daily Chronicle who recently returned from Germany writes: "The German dye industry has scored another record. Before the war German production of dyestuffs was 185,000 tons. Last year the amount was 145,000 tons, the biggest amount ever produced in one year in the whole of the industry's thirty years of history. "But the record has been broken during the months of January and February of this year. In January the total production was 18,000 tons and the amount rose in February to 18,000. Presuming the monthly production remains for the rest of the year at the February figure, Germany will this year produce 178,000 tons of dyestuffs. It is not too much to say that the figure will be a good deal nearer a quarter of a million tons.

"I learn that the dye concerns have decided on a big spurt. Never have they been so efficiently organized, never so well provided with capital and never so determined. Though they turn out between four and five hundred different shades of dyes, they are concentrating mainly on the making of those for which there is and will most likely be the greatest demand. The cost of production is still very low—about a quarter of the British figure.

"Early in the summer it is hoped to have completed large stocks of the colors most in demand, and the financial position of the dye concerns will permit of those stocks being sold at extremely low figures for the express purpose of conquering foreign markets.

"Germany's two great dye opponents are Great Britain and the United States, and it is the markets there she has set her heart, or rather her brain, upon, in spite of restrictions, for she thinks she will be able to overcome these.

"An intensive campaign is being organized and will be opened in a few months. Already the German dye industry is doing very well in the Far East and South America, in both of which regions sales have even now surpassed the pre-war figures."

IROQUOIS ALLEGED TO BE DISSATISFIED

Syracuse Dispatch Says They Are Seeking Asylum in New York.

Syracuse, N. Y., March 15.—More than 8,000 Iroquois of the Six Nations, residents of the Brant grant in Ontario, have asked Dr. Earl A. Bates of this city, an adopted chief, to appeal to President Harding for asylum in Indian reservations in New York state.

A great council meeting of the chiefs of the Six Nations will be held this week at the Onondaga Reservation to outline a plan of action. The Indians in Canada, it is claimed, have been ordered to take out citizenship papers in the Dominion within thirty days. The situation may bring to a head the long continued negotiations between the Indians, the state and federal governments as to the future of the tribes in the United States.
