Wall Street Industrials Are
Active With New High
Records Reached

NATIONAL BREWERIES
FEATURE IN MONTREAL

Wayagamack Adds 3.14
Points Advance to Gain
of Five Yesterday

NEW YORK, Feb. 26.—Stock prices
worked moderately higher at the opening
of today's market as buying orders
were distributed among a variety of
representative industrial issues. New
high records were established by
American Locomotive and Maxwell
Motors A. Other motor shares, including
Chandler, Moon and Continental, were
active in reflection of automobile
merger reports. American Can mounted
2 1/2 points.

Breweries Featured.

Montreal, Feb. 26.—National Brew-
eries featured the early morning trading
on the local stock exchange today, be-
ing easily the most active issue, and
dropping 2 1/2 points to 88 1/2. The
strong point was Wayagamack, which
advanced 3 1/4 to 51 1/4, following yester-
day's jump of five points. Less than a
hundred shares were sold during the
first 10 minutes. Other leaders were
quiet, and practically unchanged.

Cable Transfers.

MONTREAL, Feb. 26.—Cable trans-
fers 476.

Current Events

NEW YORK, Feb. 26.—Bank of Eng-
land rate unchanged at 4%.
Tidewater Oil regular quarterly \$1.
Payable March 31.
Domestic crude oil production up 12-
600 daily in week ended Feb. 23.
Pete Maro, January surplus after
charges, \$441,624, against \$1,110,825 in
1924.
Reading Co. January net operating
income \$1,485,082, against \$1,110,825 in
1924.
N. Y. Canners year ended Dec. 31, net

after federal tax, \$894,104, or \$6.64 on
common, against \$8.29 in 1923. Will offer
additional common at \$2.50 a share
in relation of one for every five.
Jewel Tea, year Dec. 31, 1924, 123.49
a share preferred, against \$117.14 in 1923.

Brokers' Opinions

NEW YORK, Feb. 26.—Block Maloney:
—There will be plenty of chances for
good trading in stocks, but it is a sel-
ective market. Numerous industrials
look like further downward adjust-
ment, while some rails should work
higher. The market will not run away,
but will be two-sided.
Hornbloom: Analyzing the market
in detail we find aggressive buying
and underlay in it. Quiet accumu-
lation is proceeding in the oils, and an
extension of movement in high-priced
dividends. These movements should grow in intensity
as the present phase of the advance
unfolds, and it should mean increasing
public participation before and of first
week in March.
Clark Childs:—It may be generally
said that outlook is good for steel, rub-
ber, oils and copper concerns.

GET ALONG WELL IN
CONSTRUCTION WORK

Contractors Expect Infirmary
Wing Ready by April 1.
Court House Progresses.

Work on both the Court House
and the new wing of the St. John
Infirmary is going forward speedily.
John Mooney, of the firm of H.
Mooney & Sons, contractors for the
Infirmary wing, said that the plaster-
ing in the building was all com-
pleted, and the painting was also com-
pleted. The laying of hardwood
floors was the chief of the work that
still remained to be done. He ex-
pected all of the work would be fin-
ished by April 1.

The new wing extends almost to
CHURCH street and is three stories high
with an outpatient department in
the basement. It is of brick con-
struction with Nova Scotia sandstone
for trimming and has accommoda-
tion for 43 beds in small wards. A
private room except that the building is
110 feet by 33 feet and at present there
are about 25 men at work there. F.
Neil Brodie is the architect.

The Court House, the rough coat
of plastering is on and the work still
to be done includes the finishing coat
of plaster, the laying of the wooden
floors and the linoleum and the in-
stalling of the permanent window.

The windows now in place in the
building are those which will be
used for the winter sashes but the
use of panes will be used for the
same in the permanent windows. In
the renovation of the Court House
the old plaster was found to be
as strong as ever and were not
touched in any way except that the
plaster on the walls was renewed
and metal laths were installed in-
stead of wooden laths.

MONUMENT TO
LOYALISTS ON
FORT HOWE HILL

Professor W. F. Ganong Sug-
gests It in Lecture on
History

RESEARCH IN N. B.
BEING CARRIED ON

Hopes to See Archives Build-
ing Established in
St. John.

That there should be a monument
erected on Fort Howe in memory of
the Loyalists was a suggestion made
by Dr. W. F. Ganong, a native of St.
John, but now of Smith College, North-
ampton, Mass., in an address of inter-
est given at Netherwood School at
Rothesay.

Dr. Ganong is professor of botany
and director of the botanical garden
at Smith College. He spoke on Tues-
day night before the University
Women's Club of St. John, which met
at Netherwood at the invitation of
Miss Ganong, principal of the school
and brother of the speaker of the eve-
ning. Dr. Ganong is a recognized anti-
quary on New Brunswick history and
is at work on a complete historical
record of the province at present.

Research Goes On.

He spoke of the diversity of New
Brunswick history, saying that the his-
tory of this province was a cross sec-
tion of the history of America from the
time of the Indians to the present day.
He pointed out that that research in
history was by no means finished and
that the Canadian archives, the finest
on excellent work in historical research
at the present time.

Fort La Tour.

Coming down to the defence of Fort
La Tour, the speaker held that nothing
had yet been discovered which gave
positive proof of the exact site of
the fort, although indications, he
believed, pointed to Portland Point as
the site.

The expulsion of the Acadians he
thought had been largely misunder-
stood, and he said it was a real or
supposed military necessity. Referring
to the boundary dispute between the
United States and Canada, he said he
had been forced to the opinion that the
United States was legally entitled to
the St. Lawrence valley, and he be-
lieved that had it not been for Sir
William Alexander's idea of making
the St. Croix the boundary, Canada's
southern boundary would now be the
45th parallel.

Loyalist Monument.

Dr. Ganong dealt briefly with the
period of settlement when about 1500
New Englanders came to New Brun-
swick, and a number of Scotch settle-
ments were established around the
Bay of Fundy, and he went on to tell
of the Loyalist immigration as the
most important event in the founding of
the province. The 9,000 or 10,000 Loyal-
ists who had settled the most accessible
lands, had established the government
and had New Brunswick separated
from Nova Scotia. He thought a
worthy monument should be raised to
the Loyalists on Fort Howe.

He spoke next of the large immigra-
tion from England, Scotland and Ire-
land which began in 1820 and which
soon doubled the province's population.
About the same time the French were
allowed to return to the province, and
settled along the north shore. The
great agricultural activity of 1860-70
brought the
