Men's Clothing---

Ready-to-Wear Fine Overcoats.

Many people experience difficulty in being able to settle upon a clothier they can depend upon. Too many clothing stores cater for transient business—look ahead only to the chance of new customers and don't take proper care of the old. With us it's just the reverse. We buy and sell clothing to hold the old customers, and through them gain new ones, and it is to such careful thought in this direction that our business steadily grows, and the demand for fine clothing increases. This year, so far, is our busiest yet. See our stylish Scotch Tweed Overcoats, single breasted and double breasted, at \$15, \$16.50, \$20 to \$25, and our unequalled Faded Overcoats, at \$25 and \$35.

STEAM HEATED TENTS

FOR CONSUMPTIVES.

Never before in the history of the world has more attention been given than now to that dread disease, consumption. Never has the "tent men" been so widely used. This "tent treatment" is being given a thorough test in several places, notably in Colorado, where the climatic conditions are such that life out of doors is possible for most of the year.

The tents now in use are of North American pattern, so called after a camp of that name, where consumptives have been treated with success. In the Union Printers' Home of Colorado, where ten of these tents are in use, fully fifty per cent. of the patients have recovered health.

These tents are octagonal in shape, as this form has proved the best to resist wind. They are built with a framework as substantial as that of a house, the intersections reinforced with castings, and every part so firmly anchored that they will withstand a wind of one hundred miles an hour. They are covered with the best double filled army canvas, which is not affected by snow or rain.

It is in the arrangement for ventilation that the chief virtue in these tents lies, for this is the all important factor in the outdoor treatment of tuberculosis. The tents have hardwood floors, built a few feet from the ground. Four trap doors, about a foot wide and four feet in length, are at the corners of the floor, and these can be opened or closed at pleasure, a wire screen forming a protection against bugs and insects. Another ventilator is in the peak of the roof. This is managed by a cord.

The tents are attractively furnished with a white front bedstead, rug, chairs and a built-in closet, bureau and washstand. Those in Colorado Springs, where they are considered models of their kind, are the only steam heated tents in the world. The first cost of the installation of this heating apparatus is expensive, but after the pipes are laid, the tents can be built for a little more than one hundred dollars each.

The diet of tuberculosis patients is raw eggs, milk and roast and boiled meats. Other foods are added as the appetite increases and there is better circulation of blood. In all cases, where the outdoor treatment is tried, there is no neglect of sanitary precaution, and care is exercised as much as if the patient were in a house or hospital. Sputum cups are used day and night and all clothing is disinfected.

SUBSTITUTES FOR TOBACCO.
Millions on long cruises sometimes abstain from tobacco. Thence untold very many ingenious efforts to create a tobacco substitute. Tea and coffee make the best tobacco substitutes. They smoke freely in pipe or cigarette, and their taste and aroma are not unpleasant. But they burn the mouth and rack the nerves.

Rope-yarn—the untwisted parts of rope and oakum—is smoked by sailors as a last resort. Bark peeled from the hoops of salt beef and pork barrels is also smoked when the limit is reached. These things smoke abundantly, and the black fumes they give forth from the sailors' mouths are always accompanied by coughs and imprecations. Yet many a desperate sailor has smoked them in the hope of appeasing his tobacco hunger.

All the lower berths are taken, and the ticket-seller. You'll have to take an upper berth.

Of course, grumbled the professor. There's always room at the top—Chicago Tribune.
