There in a sense of moral or intellocinal superority-in fact, I know it doem's. There isn's a particle of ogotism or arreagance in his make-up. The fault is entirely a bad habit, rooted in natural timidity, and for tered by the foolish alcofness of those who stand in awe of the man's dignified and mintly presence. It is an almost ridiculous saturation, when you come to think of it. He is straid to approach us, and we are atraid to appreach him, and yet both parties long to come into closer spiritual touch with one another. The reserved christian is a pathetic fig-ure, more to be pitied than blamed, and yet not outside the province, or the reach of legitimate criticiam and correction. He is indeed like a lump of ice, floating around in any religious body with which he may be connected. The bootless atrocity of the crime was what fascinated us. 'Why,' we asked ourselves, again and "Why," we asked ourselves, again and again, 'should a man whose only purpose was robbery, go out of his way to murder the entire family, thus?" It was the haggard person with the thin chest who had a theory. 'Possibly,' he suggested, in a fearsome whisper, "The follow had barked his shine against bicycles in the front hall ? A CARD.

The Impotent Man of Bethe

The Impetent Man of Betheeds. Jarusslem was plentifully supplied with baths and pools of all sizes, the remains of which had been discovered in modera times. The pool of Bethesda appears to have been formed by a mineral spring, the waters of which contained curative proper-ties considered good for diseases of the rehumatic order : and therefore a crowd of such patients were to be seen in is five porches. What the aspect of the crowd was can easily be imagined by suy one who had seen those, gathered to take advantage of the mineral waters at places like Harrowgate and Strathpeffer. Appar-ently, hewever, the virtues of Bethesda were intermittent, dependent on a moving of the waters which took place at intervale. Such a phenomenon is one unknown in mineral anyings at the present day. Pro-

of the waters which took place at intervals. Such a phenomenon is one unknown in mineral springs at the present day. Pro-feeser Tholuck mentions a place or resort visited by him in Germany, where the water bubbled up at a certain hour owing to a strong escape of the gas with which it was impregnated, and the hour when this took place was considered the tworable one for impregnated, and the noir when this took place was considered the tavorable one for bathing. It was in accordance with the notions of the time that this motion should be attibuted to an angel who came down at a certain hour and troubled the water. a certain hour and troubled the water. But the santences of St. John in which it is ascribed to this cause are an interpolation not found in the best manuscripts and omitt-ed in the Revised Version. Not the Kind of Obest he Thought. An Irish judge was trying a case in which a man was indicted for robbery, and the first witness was the young son of the man whose house had been entered by burglars. He identified the prisoner, and stated that he saw him enter the house and things through Christ strengthening him. This is a lively parable of faith. An un-saved sinner is just as impotent to believe or do anything that is good, but, when he listens to the voice of Christ, everything

I work,' he said. This gives us, like many of his sayings, a glance into the deep work-ings of his mind with the Old Testament Scriptures, in which he saw profound and subtle meanings which had never been seen bafore. Evidently he had been think-ing of the creation narrative in the first chapter of Genesis, where, after six days' work, God rests the seventh day. The rabbis thought that, when the six days' work was done, the Creator's rest mean't idleness, the world being allowed to go for the future by itself. But Jesus saw deeper. Even the rest o' the Creator is a kind ot work. It includes the sustaining of the world in being and
