

Assistant-Demonstrators, { L. A. DAVIS,
JENNIE GRAY.

Lecturer in Topographical Anatomy. . . B. E. MCKENZIE.

Anatomy is taught in the most practical manner possible, and its relation to Medicine and Surgery fully considered. The lectures are illustrated by the fresh subject, moist and dry preparations, sections, models and plates, and drawings on the blackboard.

The department of *Practical Anatomy* is under the direct control and personal supervision of the Lecturer on Anatomy, assisted by his staff of Demonstrators.

The methods of teaching are similar to those of the best European schools, and students are thoroughly grounded in this branch.

Every student must be examined *at least* three times in each part dissected, and no certificate is given unless the examinations are satisfactory.

Special demonstrations on the Brain, Thorax, Abdomen, Bones, etc., are frequently given.

The dissecting-room is open from 8 a.m. to 6 p.m. daily.

The Demonstrator will be present from 10 to 12 a.m. at least four days in the week, and one of the Assistant-Demonstrators will be present at other times.

Normal and Pathological Histology and Bacteriology.

Lecturer, GEORGE ACHESON.

Assistant-Demonstrators, . . . S. P. BOYLE, E. J. IRVINE.

The course in Pathology will comprise—

1. Lecture demonstrations on Elementary Pathology to students of the 3rd year.
2. Lecture demonstrations on advanced Pathology to students of the 4th year.
3. Fifteen demonstrations yearly of at least two hours length in Pathological Microscopy to students of both years.

Gross specimens will be presented as frequently as possible.

Each student will be provided at the commencement of the session with a microscope, and a number of slides, cover glasses, staining reagents, etc., and assigned a table and locker—for all of which she
