

*Dormitory, North Toronto Military Hospital.
Ceilings and Walls of LINABESTOS.*

LINABESTOS FIREPROOF WALLBOARD

Has been used in the above Hospital with very satisfactory results. Being FIREPROOF, MOISTUREPROOF and VERMINPROOF, LINABESTOS is particularly suited to hospital construction. It can be painted or tinted like any plaster wall, and has many important advantages over any other wallboard. LINABESTOS has been used in the hospitals at North Toronto, Whitby, Cobourg, Guelph and Speedwell, and is proving acceptable to architects in many classes of building construction, including churches, schools, residences, hotels, munition factories, etc., etc.

LINABESTOS costs very little more than other boards, and insures a permanent job.

Samples and particulars sent on request.
