

## Don't wait until winter and then wish you had a silo—order one today

Everyone nowadays appreciates the necessity of silage for milch cows, beef cattle, or sheep, if they are to be profitably fed. No other feed equals it. No other feed is so economical. You want a silo and need one. You can not save anything by delaying your purchase. Act at once so that next winter you will be prepared to get the most profit from your livestock. The silo will pay for itself before spring. Order now an

### IDEAL GREEN FEED SILO

It will give you longer service, a better quality of silage, and more profit on the investment than any "cheap" silo or silo you can erect from "cheap" material. This has been proved by the experience of many farmers who have tried both. It is simply another illustration of the best being the least expensive in the long run. In better silage, the Ideal will save the difference between its cost and that of an inferior silo the first season you use it.

The time to erect a silo is at hand. Don't wait, or you will be put to extra expense in rushing your silo up in time to fill. If you wait too long, you may have to go through another winter without a silo.

Ask for complete information regarding the Ideal. Our large illustrated catalogue will interest you. A copy will be sent on request. Better still, order your Ideal today. There is no better silo made. You take no chances. Its value has been proved on thousands of Canadian farms.

### DE LAVAL DAIRY SUPPLY CO., Ltd.

## Give The Boy A Chance!

If you live you will; but if you die who will? That is the question.

A boy with a strong body, a strong mind and a strong heart will look out for himself, somehow.

But why expose him to the danger of a long wearing fight with adverse conditions?

In this day of fierce competition a youth needs every advantage available, if he is to secure an honorable position.

A thorough education, and a good start in life can be guaranteed to him by means of an endowment in The Mutual of Canada, payable to the boy if you die, and payable to him also if you live to the date of maturity.

The endowment term may be 10, 15, 20, or any other term of years according to the boy's age now and when the money is likely to be required.

We will adapt the policy to your needs.  
Drop us a line.

## Barrett Money Savers for Farmers

MADE IN CANADA

### Seven short appeals to "horse sense"

ANY man can make money by judicious saving. "A penny saved is a penny earned." Think it over. There are certain things you ought to have for farm maintenance. But don't buy the wrong thing at any price or the right thing at the wrong price. Perhaps right now you are in need of a timber preservative, a lice or fly killer, a durable paint for metal and exposed wood surfaces, a satisfactory cement for quick everyday repairs, a ready roofing that is wear-proof, easy to lay and cheap.

We can fit you out perfectly in these things. The Barrett Money Savers have no superiors. Just glance over the products shown below:

**AMATITE**—Many people object to "rubber roofings" because they are not attractive in appearance. So we made Amatite. We put a mineral surface on Amatite so that it sparkles like crystal in the sun. It won instant popularity. Then, users of Amatite discovered that the mineral surface made it wear well. And when we showed them that Amatite did not need painting, the conquest of Amatite was complete. Users agree that it has no rival in ready roofings.

**CREONOID**—Then there's Creonoid, lice destroyer and cow spray. It's one of the first requisites to the possession of happy, healthy live stock, because vermin-infested stock are only half efficient. Creonoid positively destroys vermin, flies, insects and mites. And it's cheap too, because it's so powerful that a little goes a great way. Spray your cattle and horses with Creonoid. Simply let a fine vapor touch them by spraying. And spray some around the henery, the stable and the piggery. You'll have more milk from your cows, more salable porkers, and more eggs from your chickens.

**EVERJET**—Every farmer should have a good carbon paint on hand. Here's the best ever mixed—Everjet Elastic Paint. Wonderful as a roof paint. It keeps water out, and defies the weather. All over the farm, wherever you have exposed surfaces, you need Everjet. Splendid on farm implements and iron surfaces too, because it expands and contracts to meet weather conditions. Never peels or cracks. Always a sparkling, permanent, protective, black covering. Try some and see for yourself.

**CARBONOL**—a disinfectant—not a disguiser of odors. It does all that carbolic will do and does it *without danger to you*. For cuts or wounds, a solution of Carbonol is the best preventive of blood poisoning. Wonderful on sores of animals. A few drops of Carbonol added to water when house cleaning will kill germs and musty odors. In the sick room it will prevent contagion. Very effective in the stable and hen house. Keeps flies away and deodorizes. You ought to have Carbonol on hand. It is the greatest disinfectant ever made.

**EVERLASTIC ROOFING**—You ought to get acquainted with Everlastic Roofing. The best ready roofing value you can get. It is easily laid without skilled labor. It is inexpensive. And it wears as many a higher priced roofing doesn't know how to wear. This is because every foot of it is honestly and strongly made. Don't have leaky roofs. Use Everlastic on your steep roofed buildings and keep the water on the outside.

**EVERLASTIC ROOFING**

**ELASTIGUM**—The best way to fix little things is to fix them right at first. They never get big then. For the little everyday repairs around the farm, you should have Elastigum. It is a tough, adhesive, elastic cement that fixes leaks, joins or relines gutters, stuffs cornices, refashions chimneys. And it does all these things "for keeps". This wonderful waterproof cement will save you money by keeping the small things small. Have it on hand! A hundred uses.

**WOOD PRESERVATIVE**—The trouble and expense of frequent timber renewals are not known to the man who treats for you because you can apply it by brushing, spraying or dipping. And Grade-One Creosote Oil penetrates more deeply than any other preservative. This means real protection against rot and moisture. Cut down timber expenses. Make your fence posts last twenty years. You can do it with Grade-One Creosote Oil.

For sale by good dealers everywhere. Send for new "Money Saver" Booklet.
