## THIS IS A CEMENT SILO BUILT ON

THE FARM OF

John Louve, Harpley, Ont.

It is hexagonal—that is, 6 corners—and is 10 feet across each way, inside measurement, and  
is 30 feet high.

READ WHAT MR. JOHN LOUVE SAYS ABOUT THOROLD CEMENT:

GRANDBEND, ONT., NOV. 14, 1899.

ESTATE OF JOHN BATTLE, THOROLD, ONT.:

DEAR SIR,—I have this summer built a silo 30 feet high by 10 feet across inside—six corners. It was  
built under the instructions of A. E. Hodgert, your travelling agent and instructor, who understands his  
business thoroughly. I have filled it with corn, and it is a grand success so far as I can see yet. I also  
built a large arch root-cellar in the approach to the barn. It was built by your A. E. Hodgert. The  
arch is 12 x 30 feet. The wall is 12 inches at the side by 14 inches at the top. The root-house and silo  
are getting as hard as stone, and I would advise those who intend building either one to build them of  
cement. My silo is here for inspection, and also arch root-house.

JOHN LOUVE, Harpley.

Estate of John Battle, Thorold, Ontario.

### NOTICES.

**Champion Binders.**—In our issue of March  
15th we called attention to the fact that the  
"Champion" binders, mowers and reapers  
manufactured by the Warder, Bushnell &  
Glessner Co., of Springfield, Ohio, were about  
to be introduced into Manitoba and the North-  
west. We have since learned that the "Cham-  
pion" binder has been manufactured for the  
last two or three years, under patent rights,  
by the Frost & Wood Co., Limited, of Smith's  
Falls. The large and growing sale of their  
binder during the last three years attests to  
the great popularity which it has already  
gained among our Canadian agriculturists.  
The Frost & Wood Co. have sold a large num-  
ber of their binders in Manitoba and the  
Northwest, and they have given the most  
excellent satisfaction, and as a result, the  
many merits of the "Champion" binder have  
already been introduced to our Canadian  
farmers from the Atlantic to the Pacific.

**Steel Land Roller.**—To farm without a land  
roller is to suffer a loss that could easily be  
saved, and to use a hard-running, frail roller is  
anything but satisfactory. It pays to roll new  
seeds and fall wheat, as well as all land in  
preparation for roots and corn, and it seldom  
occurs that it is not an advantage to roll land  
after the grain is sown in spring. Look up  
T. E. Bissell's advertisement in this issue. He  
offers a roller that is hard to beat.

**The Farmers' Binder Twine Co., Limited,**  
Brantford, are out with their prices on binder  
twine for the harvest of 1900. This factory has  
been a real success from start to finish, and  
has made good profits for its many small stock-  
holders by judiciously investing the funds of  
the company, and, at the same time, holding  
binder twine down at prices that defied com-  
petition. See their advertisement in this  
issue, and learn their figures before ordering  
twine for the coming harvest.
