The Understudy of the Sun

McClary's Sunshine Furnace

WHEN Old Sol swings low and far away he appoints an understudy for the purpose of keeping Jack Frost where he belongs—outside.

Years ago McClary's "Sunshine" Furnace, by reason of its marvelous heating capacity and the balmy June air it suffused the house with, was specially appointed Understudy to the Sun. That appointment has been confirmed year after year, and—your "Sunshine" Furnace—Jack Frost's Master awaits your orders for the coming winter.

Remember the past winter—the Frost King was very active—He battered us with a three-months' siege of snow and ice—Almost conquered the thermometer by chasing the mercury out of sight. But he failed to penetrate thousands of homes, because the Understudy of the Sun—McClary's "Sunshine" Furnace—was on the job in the cellars of these homes.

It's easy to keep Jack Frost at a safe distance with the "Sunshine" Furnace. He may storm and rave outside, but there is no place for him within—because the Understudy of the Sun has demonstrated its mastery in the home.

The average furnace is a glutton for coal—it literally burns up money. The "Sunshine" Furnace saves money—earns its cost in a very few years, because it burns coal sparingly. Call on the McClary agent of your locality and ask him to prove that statement true. If he cannot convince you—show you that the "Sunshine" Furnace will cut your coal bills by a very pleasing margin we don't want your order. That's the fairest way we know of doing business—does it appeal to you?

There are a multitude of reasons why the "Sunshine" Furnace does save fuel—reduce coal bills—reasons that will be printed in the following advertisements. Here is one that should make you call on the McClary agent at once—the "Sunshine" Furnace has four radiating surfaces—surfaces that gather up the heat greedily and diffuse it liberally all over the house.

But—you just call on the McClary agent and ask to be shown. If you do not know him write us at our nearest address and we'll tell you.

You certainly owe it to yourself to find out why McClary's "Sunshine" Furnace is called the "Understudy of the Sun."
