

Aylmer Superior Level Force Pump

For Hand and Windmill use. Has Six, Eight, and Ten-inch Stroke. Adjustable Base.

Fig. 36.

Fig. 36 represents our Superior Lever Pump, fitted for hand and windmill use. Made in 1 1/4 and 2-inch.

This style of lever and fulcrum has several advantages over the ordinary style; having longer stroke, the power is greater, making it work easier. The handle being wood, they are not so liable to break in frosty weather.

The base is adjustable, admitting of top being raised or lowered to any position desired.

The handle is drilled for three lengths of stroke. Six, eight, and ten-inch stroke.

This is readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross-head on top.

Cylinders capped inside require to be two inches longer to obtain same stroke.

This pump is adapted for all depths of wells; furnished with Iron, Brass Body or Brass Lined Cylinder. You'll never regret placing

one of these pumps on your farm. Write us to-day for prices and illustrated catalogue free.

SYDNEY BASIC SLAG

The Ideal Fertilizer for Renovating Old Pastures

CANADA'S CONSUMPTION LAST SEASON WAS:

	Tons		Tons
Province of Nova Scotia	12,500	Province of New Brunswick	1,200
Quebec	6,000	Ontario	300
Total		20,000 Tons	

The farmers in Ontario are just awakening to the value of BASIC SLAG. What will the figures for that Province be next season? Listen to what an agent in Grenville County writes:

"The five tons of Sydney Basic Slag I sold last season have given such excellent results that I want you to book me for a carload for fall delivery. I am sure I will want over two cars in spring."

We are appointing agents all over Ontario. For further particulars write to:

The Cross Fertilizer Co., Limited, SYDNEY NOVA SCOTIA

Or their travelling representatives—For Eastern Ontario: Mr. A. L. Smith, 220 Alfred St., Kingston. Western Ontario: Mr. N. T. Colwill, Centralia. Niagara Peninsular: Mr. E. Platts, Pelham Corners.

Stock Watering Troughs

PLENTY WATER. THE RIGHT QUANTITY. Correct Temperature. Prevents Disease.

Every stock breeder or feeder desiring a complete outfit and wishing to get the best results from a water system, should put in water troughs in each stall, and have these automatically regulated from the main supply tank by a float or valve in a small barrel or tank properly placed. In this way the stock can always have water and astonishing results are attained from animals having sufficient water when wanted, and of proper temperature.

Trough—Inside Dimensions: Length, 16 inches; width 8 1/2 inches; depth, 5 inches; weight about 20 pounds; screw holes at side. Complete trough includes strainer and coupling for 1/2- or 1 in. pipe. Fuller information and prices given on request.
