TO EXPECTANT MOTHERS

A Letter from Mrs. Smith Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Trenton, Ont.—"I am writing to you in regard to Lydia E. Pinkham's Vegetable Compound. I would not be without it. I have taken it before each of my children was born and afterwards, and find it a great help. Before my first baby was born I had shortness of breath and ringing in my ears. I felt as if I would never pull through. One day a friend of my husband told him what the Vegetable Compound had done for his wife and advised him to take a bottle home for me. After the fourth bottle I was a different woman. I have four children now, and I always find the Vegetable Compound a great help as it seems to make confinement easier. I recommend it to my friends."—Mrs. FRED H. SMITH, John St., Trenton, Ont.

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and tone up the entire system, so that it may work in every respect effectually as nature intended. Thousands of women testify to this fact.

Here and There

Over a thousand million fish eggs of various species were collected by the hatcheries branch of the Department of Marine and Fisheries during 1921.

Inbound ships from the United Kingdom are averaging 4,500 tons of freight for discharge at Vancouver. Outbound they take about 4,000 tons per vessel. Last year the average outward tonnage was practically the same while the inbound was only about one tenth of what it now is.

Announcement has been made that a Government wireless station is to be erected on St. Paul's Island, which stands in the entrance to the Gulf of St. Lawrence, off the most north-easterly point of Nova Scotia. Two Government wireless engineers have arrived there and are making arrangements for the erection of the station.

One hundred and forty thousand Canadian school boys have been banded into an army of guards to watch for and prevent forest fires in the Dominion this year, according to an announcement made by the Canadian Forestry Association. The new organization, which is known as the Young Canadians' Forest League, will, it is expected, save several million dollars' worth of timber from fire ravages.

That "prospects for increased immigration into Canada are excellent" was one of the most important statements made by E. W. Beatty, K.C., upon his return from an extended tour of England and European capitals. The president of the Canadian Pacific Railway believes Canada is progressing in the matter of immigration, but intensified efforts are essential, he considers, to offset erroneous impressions abroad that Canada does not require new settlers.

A record run between Winnipeg and Quebec was recently made by a special Canadian Pacific train when passengers from the Orient were, through delay caused by landslide, in danger of missing the connection with the C.P.S.S. "Empress of Scotland" at the eastern port. The train covered the 1,579 miles in a little over 36 hours, whereas the schedule time for a run between these two cities is 53 hours. The passengers had crossed the Pacific on the C.P.S.S. "Empress of Russia" and were taking advantage of the 21 day Orient-to-Europe service of the Company.

The United States has invested in Canada \$2,500,000,000, according to the Bankers' Trust Company of New York, which has just completed a survey of Canadian industry and the amount of United States capital invested. Of the total sum invested, \$1,200,000,000 is in bonds, and the remainder in farms, mortgages, small businesses, industrial enterprises, banking and private loans. It is computed that more than 200 branch factories were opened in Canada by United States concerns in 1919, and a great number in 1920 and 1921, and that in 1922 the number of these came to 700.

A collie dog is reported to have saved the life of a London West girl, while accompanying the child to a nearby store. On the way she stopped on the C. P. R. railroad tracks in the path of a westbound flier. Realizing the child's peril, the dog threw himself against her with sufficient impact to knock her clear of danger, and was cut to pieces by the train before he could regain safety.

The girl's mother tried to discourage the dog from going when the daughter started for the store, but he went, and was the means of saving the child's life, and died heroically as a result.

LUMBERING IN SUMMER

A number of the largest lumber companies in the Rivière du Loup district are planning to carry on lumbering operations during the present summer on some of their timbering limits. This is a radical departure from the custom of cutting and hauling the logs during the winter. Heavy snows during the past winter impeded and greatly retarded cutting operations. In the past hot weather has been considered a handicap and summer hauling was supposed to be at a disadvantage as compared with the facilities offered by snow. Modern equipment, however, has made the handling of logs in summer easier than the winter. A saving of timber also results, for stumps can be cut lower in summer.

Begin By Peeling Potatoes

A great hotel man has a son, who was graduated from his university with honors.

It had been understood in the family that the Boy was to follow Father's business; so Boy with his big degree dropped in on Father at the private office.

"Now, Dad I'm ready. I'd like to show some of your managers what modern scientific efficiency can do with a chain of hotels. Learn to it."

"No, Son you won't show my managers anything, just yet. You'll start in the kitchen, peeling potatoes. And when you've mastered the potato end of this business we'll boost you to a meat chopper's job. By the time you've climbed to where my managers are now you'll know something about running one hotel. Meantime, while you go up the ladder, you'll have for spending money and savings exactly what you earn and no more. Do you get me, Dearly Beloved?"

Son is "a good sport." So he got Dad. And already he knows how to skin a potato without wasting any of the pulp. Next month he hopes to be in charge of a meat axe. And another efficient business man is in the making.—The Christian Statesman.

BEING POPULAR

Most people would like to be popular. They would like to be liked but they either do not know the price they have to pay or they are not willing to pay it. To be popular you have to be interested in the lives and problems of other people. You have to listen patiently to them whether you want to or not. It is not enough to show sudden or spasmodic interest in the affairs of your acquaintances. You must show an unflinching interest. The man who never fails to rejoice with others and never fails to sorrow with them pays a heavy price, but he will probably be popular.

THE LUMBER TRADE IS PROFITABLE

The lumber export trade at present has slackened in the American market, and buying is also slow on English account. There has been, this summer, a swing back toward the English market, which will probably receive some lumber that was intended for the American because the latter is not absorbing so much as was expected.

The stocks of spruce are low in both markets, and here as well, but in spite of this fact buyers are cautious. They lack confidence. Shippers are not keen to buy beyond what they believe can be turned over without undue delay.

The lath market is very dull. Industrial activity continues, the lumber will be needed, and stocks are low. The trade is just jogging on. If any large stocks were suddenly thrown on any market, down would come the price for the period of their absorption.

With regard to next winter's output, it is too soon to predict. If the present price of lumber holds until winter, the operators would feel like making a fairly large cut. Of course in the burned area north it will be necessary to cut largely to the logs, but all over the province indications of a healthy activity in lumber operations. This assumption is based on the fact that there is now a producing profit, and the expectation that, with present stocks low, the general industrial activity will so continue as to ensure a market.

The Drunken Autoist

A judge recently sentenced a drunken automobile driver to 3 months in jail. That is pretty stiff medicine but his offence was a serious one. One might as well turn a drunken man loose with a loaded revolver as to let him loose on the highways at the steering post of an automobile. For the latter would be the more dangerous, for drunken men as a rule don't want to shoot. But drunken men as a rule can't long keep out of some kind of an accident on a much frequented highway. There is little that can be said on behalf of the man who tries to mix alcohol and gasoline. Society must act with firmness against such offenders, not so much to punish the offender as to safeguard itself.

The Delorme Case

After a trial lasting five weeks during which no less than 176 witnesses were examined the jury in the case of Rev. Adelard Delorme of Montreal, charged with the murder of his half brother, failed to agree upon a verdict. They stood ten for conviction and two for acquittal. The presiding judge was Sir Francis Lemieux a distinguished jurist who is now in his 92nd year. Mr. R. L. Calder, K.C., a French Canadian conducted the case for the Crown with singular ability and the accused was ably defended by Mr. C. H. Cahan, K.C., and Mr. Allyn Tashereau. The Chief Justice charged strongly against the prisoner, and plainly stated that he had lied to the detectives on more than one occasion. The trial has cost the province of Quebec sixty thousand dollars and the disagreement of the jury means that it will have to be done all over again. The case has attracted much attention throughout the country.

George D. Pratt of New York, owner of a fire hunting lodge at Holmes Lake has sent his own fire pump to Orchard Lake to fight the fire. At these places the fire is burning in the moss being the remnants of old fires. The scarcity of earth in the vicinity makes it necessary to use water.

Bigger, Better Loaf

MANY flours make good bread, but only one flour makes the best bread. Beaver Flour makes a bigger, whiter, more delicious loaf of bread than any other flour, because it is a blended flour. It combines the strength of Manitoba Hard Wheat with the lightness, whiteness and delicate flavor of Ontario Winter Wheat. Also best for cakes and pastry. Ask your dealer for "Beaver."

Something to Consider

Who makes the RANGES sold here and did you ever try to find out the REPUTATION of the foundries back of the ranges on sale? Then did you ever consider the KNOWLEDGE the salesman has of a stove or range while he TALKS to you and you are looking over a range? There is nothing so VOID of SENSE as a person talking RANGE who has not grown up in the business.

When you want a RANGE call and let us REASON a bit with you. We have the finest line of RANGES produced in CANADA. Our prices cannot be trimmed—we know the Business and have no substitute for QUALITY. This is the REASON we have the RANGE business of the entire country.
