**The Evening Chit-Chat**  
By RUTH CAMERON

A man who signs himself "A Bachelor" has just written to ask me to settle a wager which a friend has made with him, to the effect that I am man.

Just think of it.

My little letters have received the highest compliment from a man—he actually thinks they show sufficient intelligence to have been written by one of his own sex.

As "A Bachelor" puts it—"my friend insists that the writings which appear above your signature must emanate from a masculine mind."

I suppose I ought to be very grateful, but I am not.

On the contrary I think that is just the kind of compliment that a woman should resent—the kind that flatters her personally at the expense of her sex.

I heard a man and woman arguing the subject of woman's suffrage the other day.

The man said, "I haven't a doubt YOU could vote just as intelligently as any man. But you are an exception. There are not many women with your brain and common sense."

And the woman said, "I suppose you think that I will be pleased by that flattery, but I am not. You can't buy me off with a bit of flattery to let you disparage my sex."

I wanted to say, "Hurrah!"

I think that is exactly the attitude that every woman ought to take. Never allow a man to disparage your sex unchallenged, no matter how

much personal flattery he may use to sugar coat his disparagement with. It isn't loyal.

One great reason why men have kept the position of masters, economically and socially, which they have so long held, is that they have always stood by each other.

Do you know one reason why women have begun to realize what a terrible menace immorality is to their home life and to demand a single standard of morality for both sexes? It is because there are now so many women physicians who are explaining these things to their sex.

In by-gone days when all the physicians were men, they stood by their sex and covered up and glossed over the sin of their brothers, even when it was wrecking homes. When a woman was made an invalid simply because her husband had "sowed his wild oats," she was kept in entire ignorance of the cause of her suffering, and perhaps her own daughter was exposed to the same danger.

These things are beginning to be different now and I think there will be an even greater change in the next few generations.

Of course this is a case where loyalty was unjustifiable, but it shows what loyalty can do.

No woman should be contented even if she herself is mentally and socially and economically her old master's equal, unless she believes that her whole sex is on the high road to becoming the same.

And no woman should be pleased when a man, no matter how highly he professes to reverence her, adopts a slighting attitude towards her sex.

And now Mr. "A Bachelor," after that little talk have you any further doubt that little sex I belong?

*Ruth Cameron*

**A Poor Weak Woman**

As she is termed, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.

Every woman ought to know that she may obtain the most experienced medical advice free of charge and in absolute confidence and privacy by writing to the **World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.** Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.

The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.

**IT MAKES WEAK WOMEN STRONG.**

**SECK WOMEN WELL.**

The many and varied symptoms of woman's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (306 pages), a newly revised and up-to-date Edition of which, cloth-bound, will be mailed free on receipt of 50 one-cent stamps to pay cost of mailing only. Address as above.

**HOUSEHOLD NOTES.**

If fancy shaped croutons are used for garnishing, touch the under side with white of egg. They will then stay in place.

An old toothbrush or nailbrush is excellent for cleaning silver, but the final polishing should be done with camellia skin.

Macaroni, prepared in any of the various ways in combination with cheese, butter and tomatoes, is very nourishing.

Ten stale macaroons, mixed with stiffly whipped cream and sprinkled with pistachio nuts, makes an easily improvised dessert.

Meat loaf of chopped veal or beef can be made just before baking.

A variety may be secured by baking potatoes with a slice of bacon inside. The bacon is put into a hole made by an apple corer.

A French dainty possible from canned goods is sliced French goose liver, served on lettuce with either French dressing or mayonnaise.

A few tiny pieces of lemon rind added to a cream sauce for oysters, fish or lobster, give a decidedly piquant and dainty flavor.

Few skins can stand glycerine, and it should never be used without being diluted. Otherwise the skin will become dry and parched.

Washing soda should not be used upon china, as it will take off the gilt. Try clear hot water, but not hot enough to crack the china.

A few drops of paraffin added to the shoe blacking will impart a good polish to damp shoes and also help to preserve the leather.

When running dates, figs or raisins through the food chopper, add a few drops of lemon juice to prevent the fruit from clogging the chopper.

To make a tough steak tender, rub it on both sides with vinegar and olive oil, thoroughly mixed, and allow it to stand for two hours before cooking.

If table silver is placed in hot soap-suds immediately after being used, and dried with a soft clean cloth, much of the work of polishing will be saved.

A tasty salad is made of chopped celery, seasoned with chopped mint and mayonnaise. Put between slices

**At Last an English Chemist Has Discovered How to Grow Hair.**

**MCMURDO & CO. HAVE IMPORTED IT.**

In England the ladies have entirely abandoned wearing hats, which is due entirely to this new discovery. It has been proven that Henna leaves contain the ingredients that will positively grow hair. That they contain this long-looked-for article is proven every day.

The Americans are now placing on the market a preparation containing the extract from Henna leaves, which is having a phenomenal sale.

This preparation is called **SALVIA**, and is being sold with a guarantee to cure Dandruff and to grow hair in abundance. Being daintily perfumed, SALVIA makes a most pleasant hair dressing. McMurdo & Co., your druggist, is the first to import this preparation into St. John's, and a large, generous bottle can be purchased for 50c.

For sale by dealers everywhere.

Of bread, it makes a dainty supper sandwich.

To revive root vegetables that have withered, slice off the end of each and lay in cold water. In a few hours they will be as hardy and healthy as ever.

Always lower the temperature of the oven somewhat fifteen or twenty minutes after a roast has been placed in it. This will insure that the juices will be retained.

Water may be added to the beaten white or beaten whole egg used for dipping croquettes. The proportion is a tablespoonful for the white and vice as much for the whole egg.

Brown bread, cut into thin slices and spread with strawberry jam or each marmalade, and covered with a layer of cream cheese, makes novel and delicious luncheon sandwiches.

A dry shampoo of cornmeal is very cleansing if properly done. The meal should not be allowed to get too close to the scalp, and should be brushed out with a gentle, lifting stroke.

**When Your Watch Gets Magnetized.**

Very often a traveller on one of our electric railways discovers after a few days that his watch is losing a half-hour a day, or more, from becoming magnetized by the dynamo. At the newer stations where the most modern machines are used there is not so much danger from these "stray" magnetic fields as there is around older types of machines.

The apparatus used by jewellers for correcting this trouble consists of an elliptical piece of soft iron with a hole in the centre large enough to admit the watch to be inserted. Over the iron are wound a number of layers of fine insulated wire. Alternating current is sent through the wire, and if there is none handy an additional device, known as a polarity changer, must be used with direct current.

With very little trouble and no expense anyone may demagnetize his watch by a simpler method. Take a heavy thread or a light string, about 10 feet long, and tie the ring of the watch to it. Hold the string with one end and turn the watch around until the string is twisted about fifty turns. Allow the string to unwind, and as the watch revolves pass it slowly back and forth about two inches above the fields of a motor or dynamo, not smaller than a quarter horse-power, while the machine is running. Great care must be taken to keep the watch revolving constantly while it is over the motor.

**A Deaf Man's Courtship**

The "Deaf Times" prints a story of two men who were seen talking on their hands on the top of an omnibus. Their conversation ran thus:—"I want your advice."

"I shall be happy to oblige you."

"Well, you know, I'm in love with Mabel. At last I made up my mind to propose to her. Last night I made the attempt."

"And she refused you?"

"That is what I am coming to. I don't know whether she did or not. You see, I was somewhat embarrassed, and the words seemed to stick on my hands. And there she sat, as demure as a dove. Finally my fingers stuck together, and I could not say a word. Then Mabel got up and lowered the gas."

"Well?"

"Well, what is bothering me is this: Why did Mabel lower the gas to encourage me and relieve my embarrassment, or so that she could not see the talk and stop my proposal?"

**ONE BIG SALE**  
—OF—  
**WHITE, FANCY COSTUME MUSLINS,**
