sioners at that time, more than eight months ago, read as follows:

Investigated More Than a Year. "It is found after considerable enquiry, extending over a year, that the only way to get rid of discoloration is by a chemical treatment of the water prior to filtration. With this in view, the next procedure was to find the most reliable and effective method of filtering. The choice as to this lies between what is known as the slow between what is known as the slow sand and gravel filter, and the mechanical filter. Saskatchewan, with conditions somewhat similar, has, after doing wonders in taking care of the considerable investigation, adopted interests of the working classes, as, for generally the mechanical process, instance, the old age pension act, which

Mr. Child then went on to point out an upheaval of the working classes is that the third paragraph of the same concerned, it is all foolishness. There posed filtration plant as follows. The plans submitted to you show through a transitional in detail the suggested plant which is change will be for the better." could be made towards reducing cost, market, Mr. Skinner said: contrivances for lessening the attend-
