Baking **Powder Proof**

It is an easy matter to determine the relative merits of baking powders by testing them yourself. When baking use Strong's Baking Powder in half the baking, and mark it so that you can identify it afterwards. Do the same with any other good powder in the other half, and mark the results. If you don't think Strong's Baking Powder is best now, you will have no doubt of it after putting it to a practical test. Besides, it only costs half tical test.
