

Life in the Boer Camps

Terrible Punishment for a Sentry Found Sleeping while On Duty.

Ingenuity Displayed in Enforcing Good Behaviour in the Commando

From the London News. It is an article of faith with many people that a Boer commando is a mere mob...

The little woman now has tears of blood in prime order, and she lives on the strength of the present instead of worrying about that of the past.

Humor.—When I need a blood purifier I take Hood's Sarsaparilla. It cured my humor and it is excellent as a purgative.

Erysipelas Sores.—After scarlet fever a running sore was left on my nose. Took Hood's Sarsaparilla and it cured me.

Hood's Sarsaparilla Never Disappoints. Hood's Pills cure liver, bile, non-irritating and most cathartic to take with Hood's Sarsaparilla.

The Boer character which crops out sometimes in his methods of dealing out justice to those who have done the thing that seems evil in his sight.

He is a fellow in larger who is not amenable to orders, one of those malcontents who desires to have everything his own way.

and there generally is one of those who obeys in every large gathering of men all the world over—the commandant first calls him up and warns him that he is making himself a pest to the whole commando.

He exhorts him to mend his manners. As a general thing the commandant throws a few slabs of Scripture appropriate to the occasion at the disobedient, and mixes it judiciously with a good deal of worldly wisdom.

or which tending to teach the fellow that he is about as desirable a comrade as a sore eye in a sandstorm. Should the exhortation not have the desired effect, and the offender continue to stir up mischief, the Boer in larger as a rule strikes up mud in the middle of the road.

The commandant sends a guard of young men to gather in the mud, and the offender is made to wade in the mud as a punishment for his disobedience.

From Montreal Witness. Corundum, as the crystalline oxide of aluminum is called, is one of the most interesting of minerals.

It received the name of corundum about one hundred years ago, but the names of its varieties, sapphire and ruby, had been in use from a much earlier time.

The name corindum, or corindum, had been given to it as early as 1714. In the Burma corundum every shade of color is found, but the blue is the most prized.

It is a mineral of great value, and is used in many ways. It is used in the manufacture of abrasives, and in the production of artificial diamonds.

It is also used in the manufacture of jewelry, and in the production of electrical insulators.

"The Mill Cannot Grind with Water That's Past." This is what a fagged out, tearful little woman said in telling her cares and weaknesses. Her friend encouraged by telling of a relative who had just such troubles and was cured by Hood's Sarsaparilla.

aluminum as well as the materials for abrasives, if the secret of its future. In the ten years ending with 1897, its production in the United States has risen from 1,400,000 pounds, valued at \$3,200,000, to 4,000,000 pounds, valued at \$7,200,000.

THE RETURN OF OUR BOYS. What do the maples whisper and say? To the roses blooming around? Who do the mimbling whistlers tell? To the laurels that over them grow?

For joy must be tempered with sorrow, And pride must be chastened by grief. For hopes that are blooming to-day Are withered and faded to-morrow.

VERY "WARM SYMPATHY." From Belleville Times. It was an unfortunate day for Canada when Mr. Tarte was placed in control of the department of public works.

Extensive Discoveries of This Valuable Stone in the Province of Ontario. From Montreal Witness. Corundum, as the crystalline oxide of aluminum is called, is one of the most interesting of minerals.

It received the name of corundum about one hundred years ago, but the names of its varieties, sapphire and ruby, had been in use from a much earlier time.

The name corindum, or corindum, had been given to it as early as 1714. In the Burma corundum every shade of color is found, but the blue is the most prized.
