Cases ended in death! So a recent Canadian investigation showed. These were not cases of infectious diseases—of consumption—of typhoid! They were cases where a person had sustained some slight injury—a cut, a burn, a wireprick—and where the wound, being thought not serious enough for careful treatment, had been neglected. Blood-poisoning and death resulted. When you or your children sustain any injury, ensure against infection by applying Zam-Buk. This balm soothes the pain, stops bleeding, and by destroying all germs prevents blood-poisoning, etc. Hence no time need be lost from work or pleasure by those who use Zam-Buk.
