Buscellancous.

Habits of He black Bethel, Me., March 12, printed in Forest and Stream, gives the vertice's personal observations of the häbits of the black bear as follows:

—These tool days remind old hunter that the bears are about awakening out of their long winter sleep. They go into den at different the abundance or executively of berries. In general plant, some the source of the habits of the black bear as follows:

—These hot days remind old hunter that the bears are about awakening out of their long winter sleep. They go into den at different the abundance or executively of bearings in the content of the sleep of the complete state of the review of the source of the sour mice, warm bed. They sometimes leave their winter quarters early in the provided states of the forest how them to lay themselves away for six months at a time in a cave in a ledge in the deep recesses of the forest in utter solitude, where the dampness of the forest in utter solitude, where the dampness of the torest in utter solitude, where the dampness of the torest in utter solitude, where the dampness of the torest in utter solitude, where the dampness of the torest only added to the dismal surroundings. They are supposed by the exhaustion of the system is so little that they usually come out in the spring in as good condition as they are very distingtion of the system is so little that they usually come out in the spring in as good condition as they are very little for some time and soprepare themselves by the exhaustion of the system is so little that they usually come out in the spring in as good condition as they are very distingtion of the system is so little that they usually come out in the spring in as good condition as they are very distingtion of the system is so little that they usually come out in the spring in as good condition as they are very distingtion of the system is so little than they are supposed to the dentity of the exhaustion of the system is so little than they usually come out in the spring in as good condition as they are very distingtion and the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are provided, the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to the system is so little than they are supposed to t first bear that comes along. At this time, which is about the first of June in Northern Maine, the bears will stretch up against a fir tree and bite large strips of bark and wood from the tree. Some people supposed this is to obtain balsam to heal their toes which they have sucked all winter, and so made tender. I suppose it is done because they leel cavage, and want to try their teeth. Others suppose it is done to let other bears know that they have been there. The next move they make, after a week or two of this tramping is to traverse second growth land, or where a few years before extension.

whistles together."

NEW GOLD FIELD.

The San Francisco correspondent of the London Times writes of the recent discovery of rich gold mines in British Columbia, which, he says, are likely to prove better fields for the investment of British capital than any of the mines of California or Nevada. A gigantic ledge of gold ore has, according to this authority, been struck at Cariboo, which is stated to be from 20 to 30 feet in thickness and several miles in length. A company in operation have an ore tunnel which averages \$100 to the ton, which far exceeds the proportion on the famous Comstock lode. Other diggings in the same Province are reported to be turning out extremely well, and, as soon as good roads have been constructed, there were the recent discovery of rich gold mines in British Columbia, which is stated to be from 20 to 30 feet in thickness and several miles in length. A company in operation have an ore tunnel which averages \$100 to the diggings in the same Province are reported to be turning out extremely well, and, as soon as good roads have been constructed, there were the recent discovery of rich gold mines in British Columbia, which, he says, are likely to provide the pioneers' report is satisfact-ory.—Montreal Daily Witness.

MARKS OF MATCHES.—To clean off the ugly scratches left on paint by lighting matches upon it cut a sour orange or lemon in half; apply the cut half to the marks, rubbling for a moment quite hard; then wash off with a clean rag, dipping first in water to moisten it and then in whiting. Rub well with this rag, dry thoroughly, and nine times out of ten the ugly marks will vanish. Of course sometimes they are burned in so deeply that they can not be quite eradicated.

Extra Fine Stationery in the little Saskatchewan during this and next year, provided the pioneers' report is satisfact-ory.—Montreal Daily Witness.

other digrings in the same Province are reported to be turning out extremely well, and, as soon as good roads have been constructed thoughout the country, there is pleasing probability of marked development in this direction. What is chiefly wanted is capital to carry on the operations now in hand and to lead new discoversies.

Thirty-six years ago the Samoans were a heathen, barbarous people, without, any written language. The whole population, thirty-four thousand are now a professediv Christian people. Ordinances of religion are observed, and there are schools in severy village. They are a church-going people, both on Sundays and week-days. The Bible has been translated into their language and they have an increasing Christan literature. From Somoa the gospel is believe age to the same province are burned in so deeply that they can not be quite eradicated.

The Chinese are themselves about to work a coal-field. The supersticions which have up to the present time prevented the explorations of one of the largest coal-producing countries in the world have been overcome. A mandarin has permission to form a company to work for coal at about 120 miles west of Cheefoo, and to introduce all modern scientific appliances, and to make a tramway to the sea.

Two thousand eight bundred on a sixty pounds of arrowroot have been contributed by the natives of the New Hebrides Islands, the past year, to help pay for the translation and printing of the Bible in the Aneityum language.

Plant grape vines, for there are and trey have an increasing Christan literature. From Somoa the gospel is being sent to islands beyond, and the voluntary Samoan contributions to the voluntary Samoan contributions to the cause of Christanity average upward of soils and climates, while there is no cause of Christanity average upward of soils and climates, while there is no students are now in the training instituted with less trouble; and yet to some is more commonly neglected by the farming community.

there. The next move they make, after a week or two of this tramping, is to traverse second growth land, or where a few years before extensive forest fires have destroyed the original trees and much down timber is the result. Here they finish up the summer, tearing rotten logs to pieces for the ants and grubs they can find, until berries begin to ripen. The cry of the bear varies according to the circumstances which occasion it. If in a trap,

stances which occasion it. If in a trap, the adult will make a grunt, squeal or coarse noise, very loud and long; if calling their cubs from some distant point where they have left them, the sound is like the voice of a women calling loudly, and if they are merry giving notice to each other while feeding or in company and not far apart, they whistle quite sharp and loud, and if they are merely giving notice to each other while feeding or in company and not far apart, they whistle quite sharp and loud, and if suddenly startled by man or beast, they usually make a loud snort, which is like three or four coarse whistles together." In addition, Mr. C. J. Whellams, who is escorting them to their destination, having the particulars to any sufferer or receipt of a stamp and directed envelope. Address of 320 acres. Mr. Whellams believes several thousands will make for the Little Saskatchewan during this and next year ory.—Montreal Dah.

ACTION FOR SLANDER.

A case was lately tried at Owen Sound, in which Dr. More, of Thornbury, brought an action against Mr. McKenny, chemist and druggist of the same place, for slander. The slander consisted in the statement, openly and repeatedly, made that the death of a patient, under the care of Dr. More, was caused by improper treatment, and that he could prove it in a court of law. The doctor requested him on two different occasions to retract and apologize; this he refused to do, and insisted that the case should go to court and stated that he was prepared to prove ESTABLISHED 1849.

COAL IN CHINA.

China does not seem to be wanting in productive coal fields, though her productive coal fields, though her production annually is put down at the low figure of 3,000,000 tons, one-third of which is anthracite. This certainly is a very small amount to do the warm ing and cooking of 400,000,000 people and we have no account of great areas of forest in that empire to take the place of coal. Northern China is as of forest in that empire to take the place of coal. Northern China is as of the commentioned supply does the work for that country, economy in the use of fuel must be extreme. And yet it is taked to come nentioned supply does the work for that country, economy in the use of fuel must be extreme. And yet it is the commentioned supply does the work for that country, economy in the use of fuel must be extreme. And yet it is taked the place of coal. Northern China is as of the commentioned supply does the work for that country, economy in the use of fuel must be extreme. And yet it is the place of coal. Northern China is as solid in temperature as the Middle States of our Union. Hence, if the place of coal. Northern China is as solid in temperature as the Middle States of our Union. Hence, if the place of coal. Northern China is as solid in temperature as the middle States of our Union. Hence, if the lock up, waiting for a freight house and the lock up, waiting for a freight house and the lock up, waiting for a freight house of fuel must be extreme. And yet it is taked the lock up, waiting for a freight house and the lock up, waiting for a freight house and the lock up, waiting for a freight house and the lock up, waiting for a freight house and the lock up, waiting for a freight house and the lock up, waiting for a freight house and the lo

IN A FEW DAYS, AT

222

The widow of a circus man named a dying request last week in New York, thas her funeral should be as magnificent as wealth could make it. Her wish was respected. The flowers alone cost the sum of \$1,000.

The coffin was made of Spanish silver. She gave \$10,000 to erect a wall about her grave, and the interest of \$1,000 to decorate her tomb, and the balance, \$19,000 to her relatives! Such is the power of human vanity.

Breakers Curred

est may surprise not only the world blunch.

An Illinois lover, anxious to ingratiate himself with every member of his sweet-heart's family, asked her little brother:—

'Does your sister Annie ever say anything about me?'

'Say anything about me?'

'Say anything about you!' yelled the urchin. 'You bet she does. Why, only this morning she said if your shoes had rockers on they'd make nice cradles for Sissy's dolls.'

'I've get something in my pocket to give you when I go away,' said a gentheman to a little girl. 'Then I wish you'd go right off,' was the frank response.
