

THE success of the Mason & Risch Piano is the result of combining *the right intent in building with the right materials built in.* Every scientific resource of this day and hour is appointed to create the *perfect result*; THE PIANO THAT COULD NOT BE BETTER IN *ANY* DETAIL.

Through all the years of our existence, the demand for pianos of our make has steadily grown because of their winning combination of tone, beauty and quality.

They are good pianos to sell.

They are good-selling pianos.
