

# Tires

**A wheel like a man** to stand the wear and strain of travel must be well shod. A wheel to be well shod must be fitted with Tires of sterling worth—Tires that have been put to the severest tests known to modern methods to ensure their stability; Tires that are made of superior stock, and that at every stage of their manufacture have passed through only expert hands; Tires that are at once strong, light and easy running

**Such are the Hartford Single Tube and the Vim Pebble Tread**

Back of this assertion stands our guarantee to make good either of these two Tires which proves defective. If you have a puncture, our repairers are at your service, with no cost to you.
