TUESDAY MORNING, OCT. 25, 1910. MORE HEADWAY TOWARD BET TER STREET CAR SERVICE.

Board did a wise thing yesterday in the double tracking of the Metropolitan Railway on Yonge-street in North Toronto until next February, a month before which date the property owners law calling for annexation to the city. The World has no doubt that the bylaw will be carried and as a consequence North Toronto will then be in with the Metropolitan Railway will be suburban lines that are now within the ity be acquired by the city from the present owners and made part of the city street car system.

There is a little piece of territory between the Canadian Pacific and the Town of North Toronto on the east side Moore Park, which ought to be taken into the city by an ordinance of the railway and municipal board at the same time as North Toronto is taken

streets parallel of Yonge-street in the Humber thru West Toronto Junction his weather. (that was); and two lines north on the four cents, would give a six cent fare in place of a two ticket fare as at present, and in a very short time these fast as they were built and a single fare given. Or if the city was able to buy out the Toronto Street Railway right away they would be made a portion of the local system.

THE ELECTRIC POWER FRAN. CHISE.

Various questions were raised at the abortive interview between the board of control and the representatives of the Toronto Electric Light Company, some of which could not possibly be answered without further advisement. That touching the proposition to buy out the company under the agreement. making some allowance for the unexpired franchise, deserved, however, more consideration than the controllers gave it. It is clear that at the expiry of the agreement precisely the same point will arise as to the physical value, and it is just as easy to have that ascertained now as it will be in 1921. The agreement itself specifies what is to be valued and how the valuation, in default of voluntary arrangement, must be made. There is no reason why the valuation cannot be made at any time just as readily as at the natural termination of the tranchise. The real difficulty comes with the allowance for the unexpired tranchise, and here the effect of civic competition is certainly an element which must be given due weight. If the company is willing to allow itself to be bought out, it should be prepared to indicate the principle on which, in the opinion of its directors, the allowance should be based.

BRITISH POLITICS.

British politics still remain in a conition of suspended animation, which the occasional clamor of the more impatient on either side has not sufficed to restore to vital vigor. On the whole it is evident enough that the ministerialists are for the time being in better shape than the opposition, and are certainly showing greater confidence in their leaders than the tariff reform section of the Unionist party display in Mr. Balfour. As for the mass of the logists looking around for the cause people, they display little interest in of the large number of divorces, and the manoeuvring of the politicians, the reduction in the marriage rate. Trade and commerce are on the crest of a flowing tide, and the labor troubles that loomed ominously a short Fort William is the difficulty of day next. time ago are gradually disappearing. While the round table conference pality. While there may be other deover the constitutional issue is still tails to settle, this point undoubtedly supposed to be in session, scepticism needs attention. We have seen no betas to a favorable result is more pro- ter suggestion than Willport, which is nounced than ever. Its prolonged de-liberations were little to the taste of liberations were little to the taste of

is now at an end, each party has charged the other with responsibility for the renewal of hostilities. But it is doubtful whether the tumult and the shouting will stimulate public interest at the moment. Neither party reveals any violent desire for an early election the from some quarters an appeal has long, and it is recognized that among the possible contingencies that of a January general election cannot be

ELECTRIC LIGHTING RATES. Some days ago The World received self as a ratepayer, stating that he had voted for the hydro-electric scheme, but that on comparing the rates with those of the Toronto Electric Light Company, he had changed

The World submitted the letter to Mr. Ashworth, engineer of the city electric department, and requested that. might be prepared. This was done by Mr. Sweany, and given by him to the evening press yesterday. The figures are of interest and importance to the

The commercial rates are being prepared and will shortly be published.

Yet another scientific process for the dinary wheat sown in spring. In the ordinary case in England, eighteen weeks elapse from the time of planting right up to June, if necessary, before

These roads could be built cheaply enough to carry passengers at a cost price of three weeks and operates by affecting see whether there was now there are particles of three weeks and operates by affecting see whether there was now there are particles and got him to examine my lungs to three weeks and operates by affecting s the germ of the seed and increasing its life force. He thinks that in the future wheat will grow in a manner that can little girl, about five years old, and the In a test made with one grain of barley, 3300 grains were borne by fiftyfour stems. The second bean yielded one bushel, and in the third year forty five and a quarter bushels were produced, all from the original single

AIRSHIPS AND WIRELESS MAN'S NEW AIDS.

World referred the other day to the probability of the airship going a together with the heavy cost of main-long way towards putting an end to taining so large a number of free pathe probability of the airship going a war, by reason of the fact that it would very shortly bring discredit on warships and naval warfare.

Another development is on the way, and that is, that the unexplored por- street, Toronto. tions of the world will soon be explored by the airship. Take the stories of the balloons that landed in northern Canada last week, traveling from St. Louis, a distance of over one thousand miles. It is true, these were ba!loons and were carried by the wind, but the airship is making so much headway that there is now no reason for doubting that next spring will see a lot of them start for the wilds of the Canadian north and explore the country more or less from civilization up to the Arctic circle. And what applies to the unknown portions of North America will apply to Africa, to Asia, and the other unknown portions of the world. Wireless telegraphy will play Mann. an important part in this new develop-

Nor will it be a great while before Captain Peary's claim to have discovered the north pole will be verified by a man in an airship.

Airships and wireless telegraphy are the newest and the most startling of man's new servants.

If the Toronto Electric Light Company really wishes to sell its goods, it \$1; Edward Thetford, rode bicycle on must label them in plain figures. It is sidewalk, \$1; Patrick Mulligan, drove

M. & M. TO BUILD ROAD

Canadian Northern to Construct Alberta and Great Waterways Railway.

EDMONTON, Oct. 24.-(Special.)-That the Canadian Northern is going to take over and build the Alberta and Great Waterways Railway, that stormy petrel of Alberta politics, is confirmed by the return of several parties of surveyors, who have gone over the route for Mackenzie and Mann, presumably to estimate the cost and practicability of the original plans. Settlers along the line say that the Canadian Northern will either purchase it outright or obtain a long lease from the government. Premier Sifton has had several conferences with Mackenzie and Mann.

In the Afternoon Court,

Edward License, a Dundas-street dealer, was remanded for sentence in police court yesterday afternoon for selling an airgun to a minor and fined \$1 and costs for failing to make a record of the sale. The following cases were settled out of court: Stin Pulos by the return of several parties of sur-

cord of the sale. Gas Stock Non-Assessable ? In the court of revision yesterday G. S. Holmstead contended that under clause 7, section 10, of the Assessment Act, which rules that dividends from a manufacturing business are not liable for taxation, Consumers' Gas stock dividends were not assessable. An amendment to the act, however, gives the department the power to assess any company having rights upon the street. In reply Mr. Holmstead claimed that the gas company had no rights on, but under the streets, and that, being a shareholder, he was dou-bly assessed, as the company were already assessed for business tax. But the court confirmed the assessment.

Captain Paid Heavily. QUEBEC, Oct. 24.—Capt. Stroke of the steamer Carmona was fined \$20 and costs this morning for having failed to report 14 cases of contagious diseases he had on his ship coming to Quebec. The whole sum, fine and costs, amounted to \$579.25.
