Classy Horses.

Possesses every feature of a bar shoe—yet much lighter. The spring steel plate takes the place of the old-fashioned bar—furnishes a larger bearing surface for the frog. Then it protects the heel—the one great advantage. You know how quickly all other so-called pads become when subjected to water, snow or slush, allowing the petile into the pad and bear on the corn or tender spots, This spring steel plate coming next to the hoof with an even, firm ressure, overcomes this fault and positively relieves all soreness, enderness, bruises or corns.

The Walpole affords the horseshoer an opportunity to regulate not only the frog, but sole and wall pressure to suit every individual foot. The rubber is unexcelled for its holding qualities on ice or wet surfaces—wood, stone or
