# Mining Market in Buoyant Mood-Sentiment on Better Plane Porcupines in Calmer Mood

But Tendency is Still Upward ther Advances in Speculative List Reflect Improving Sentiment -Cobalts Comparatively Unchanged, But Firm.

PRICE OF SILVER.

World Office. Thursday Evening, Nov. 2. ward swing in the Porcupines.

which changed hands at from \$39 to \$1.75, an advance from the last previous sale. Hollinger was quiet at a small advance, and Rea held its gain of yesterday fairly well, holding between \$2.82 and \$2.95.

There was nothing new of any account evolved in the Cobalts, trading being quiet and larsely centred in Beaver, and Great Northern. The latter stock scored an advance.

The market thruout was in excellent shape, but was temporarily suffering from a dearth of speculation. With an improvement in public speculation will come a resumption of the upward tend-

PORCUPINE BULLETIN.

PORCUPINE CITY, Nov. 1.—Freezing weather set in to-night. From present indications Crown Chartered
should cut vein on Friday.

Chas. Fox. AT MILLER-MIDDLETON

PORCUPINE, Qct. 31. (From Cur Man Up North)—Development on the Miller-Middleten (privately owned by Timmins McMartin syndicate) will be rushed this winter when the syndicate can get more power than is now syallable. Air will be secured from the Holdinger when that company is in a position to rent power.

One shaft is down 50 feet and crosscitting for 185 feet down at this level. In the cross-cut 45 feet of quartz and sch at mixed were located. The values were exceedingly satisfactory, according to Engineer Robins, who has charge of the work.

An interesting feature is that 33 feet of the sand and clay. Rock was encountered at this depth. The sinking is in the country rock bed at the side of the country rock bed at the side of the work into the higher levels.

The encountering of 45 feet of mixed wein matter that showed values of a satisfactory nature proves only again.

Closing Quotations.

wein matter that showed values of a satisfactory nature proves only again what engineers have contended that the Miller-Middleton to the west of the Hickinger, carries lenses of the same nature as those found on the Hollinger.

Closing Quotations.

Porcupines :-

mature as those round linger.

Work on this property will be started as soon as sufficient power can be secured. All the available power at the Hollinger is in use. Engineer Robins' attention is being given to the ins' attention is being given to the foster 300 35 14 1514 14% the work had to be temporarily drop-ped. Chas. Fox.

GOING DOWN 200 FEET

Shaft Work on Timenins-McMartin
Lots Temporarily Held Up.

PORCUPINE, Oct. 31.—(From Our Man Up North.)—Development of the Timmins-Martin eight lots to the east of the Hollinger was started last summer and only ceased temporarily this week till air can be secured from the McIntyre Mines, with which to operate drills in the shaft now down 15 feet on the McIntyre vein, near the north line of the Dixon claims.

According to Engineer Robins, this shaft will be sunk to the 200-foot level, perception of the Dixon claims.

Chas. Fox.

shaft will be sunk to the 200-foot level, and then a cross-cut run to the south to intersect any veins that may lie hidden in the ridge along Pearl Lake. would not be in a position to know of the showings in the vein which is to be

explored, till the ridge is cut.

Very satisficatory results came from the summer's work. The four Dixon claims in the group will be worked out.

Northern

Party Which Looked Over Porcupine Camp Highly Impressed-Saw Everything Worth Seeing,

picked freely from the cracks in the rocks.

Hours were put in sathering free gold samples, and not a member of the gro p left the ground till he had filled his wallet with Porcupine sequening from the Dome Extension.

Such is the manner in which members of the first brokers' special that ever came to Porcupine enjoyed themes selves. Not miners, but shrewd husnings selves. Not miners, but shrewd husnings men, the rich showings attracted them, and it was gold they demanded. They had heard: they wanted to see.

An Enjoyable Trip.

That the visit was well enjoyed could be seen without askins. Interest on the part of the brokers can best be told by the fact that, when departing, one member of the party. P. B. Lyons of Liberty Building. New York, was left behind to get better acquainted with the good things. Mr. Lyon will remain in the district two weeks.

The special was placed on the Dome Extension siding early in the morning and soon the entire party was out running picket lines to determine veins, bucket riding to the bottom of the main shaft, thoroly examining the red brick buildings, watching the smooth-gilding of the big compressor rods, and

When the Dome Extension property was reported by our superintendent, was left at 3 o'clock that afternoon, the unanimous verdict of the party was gold showings, and runs into No. 1 that "there is gold enough in sight to vein where No. 1 shaft is now going satisfy the cravings of ordinary mortals."

The intention of the company is to the party was reported by our superintendent, is nine feet wide with spectacular free gold showings, and runs into No. 1 that "there is gold enough in sight to wein where No. 1 shaft is now going down as rapidly as possible.

"The intention of the company is to state the state of the company is to state the state of the company is to the company is to the state of the company is to the state of the company is to the company is to the state of the company is to the st

satisfy the cravings of ordinary mortals."

Two hours were spent at the Big Dome. As the splashes of gold along the seams in the rocks were pointed out by the watchman, who preceded the members of the party with a pail of hot water to clear away the clouds of frost on the rocks, exclamations of surprise that Porcupine contained such fabulous wealth were numerous. High-grading for souvenirs was not resorted to here as on the Dome Extension.

As one member put it. "We just wanted to do a great deal of diamond drilling to dear from the values and the tonnage on the property.

"Mr. Norrington, secretary-treasurer of the company, and myself, expect to leave for Porcupine again in the course of a week, to determine the starting up of the Porcupine Reserve.

Trips to the Preston and the Little Pet were on the itinerary. Col. Weatherly came down from his mine to escort the party. Two hours were spent going to be one of the biggest ones of the world.

the party. Two hours were spent going over the big porphyry ridge, looking at the veins, picking out the coarse the world.

free gold from the quartz.

And as the day grew shorter, with darkness coming fast, said another member, "There is nothing to it, As our trip grows in length and time, so do the gold showings grow in value."

Sunday at Pearl Lake Station. Sunday was not a day of rest, for there are good deeds that may be per-formed on a good day. The Pearl Lake section was visited. A blinding snow storm took all the pleasure out of the The Hollinger was looked over carefully. Questions relative to the work were asked freely, and Engineer Robins in every case made it clear as to just what those who are interested in Hollinger might expect in the near fu-

Chunks of rock carrying gold, even richer in values than those exhibited at the Dome, were uncovered and pass-

country. They also saw dozens of buildings completed and ready for occupancy as well as a dozen more in

process of construction.

But the most attractive of all was

linger; and situated on the bend in the ready to pass of the state of Pearl Lake, received a call, satisfactory. It locks good Chas. Fox. Time was passing and the merely "drop in and leave your card" part of polite society was resorted to. Surprise was expressed at the large amount of work accomplished here

## COME IN PRIVATE CARS

Engineers, Brckers, Etc., Going Into

PORCUPINE, Oct. 21.—(From Our Man Up North.)—Special cars are the rule in Porcupine now and following the big brokerage party of 25 who came on Friday, the heads of the Crown Chartered and the Dobie came in Sunday night.

d y night.
Engineer G. E. Farrish of New York, who is to take the place of C. E. Waton of the Dobie, who goes to the Plenaurum, came with the party. Mr. Farish will take hold of the new work

at the Dome, were uncovered and passed around.

Skirting the property to the north, they saw Gillies Lake with Miller's Lake on the west, where a small sized village is already building. They found that 391 men were employed at the mine and that a large number were building.

Shots set off Monday night quartz and so is mixed with free gold were encountered at the 75-foot depth in No. 2 shaft, where work is being pushed to open up the ore body located last spring in the diamond drilling.

Another round of shots should expose more of the yell matter.

and that a large number were building post more of the vein matter.

homes on the Timmins townsite to be-

eement laid.
"That looks like mining." was the comment when it was explained that for fourteen feet in the cross-cut at the machinery would be delivered on crown Chartered the layers of schist the machinery will be the sold apthe ground soon.

The Hollinger Neighbors,
McIntyre, a neighbor mine to the Hollinger; and situated on the bend in the ready to pass over if the showing is

prise was expressed at the large amount of work accomplished here within one short summer.

Pearl Lake Gold Mines afforded much interest for the visitors. They were entertained at luncheon at the Cartwright villa, a magnificent home, recently built on the east shore of Gillies Lake.

Ore bodies were discussed here. Engineer Thomson explained how the ore bodies had been discovered at the 400 and 900 foot depths and just what the company knew they had in the deep company knew they had in the deep company knew they had in the deep months mine were carried away.

Jupiter and Plenaurum, sister mines to the Pearl Lake, that lie to the east, were made flying calls. Darkness prevented long visits and after expressing their delight and admiration for what they had seen in the heart of the rich Porcupine section, the long walk home

Density of the leather trade are maintained, Great Britain will shortly receive a sharp lesson on the subject of tariff reform. The Standard says agents of American boot and shoe manufacturers are secretly placing large orders in the principal hide and skin markets in England and Scotland and Scotland and should their expectations be realized.
