between that town and Riviere du Loup. Wood stoves are fast giving way to coal stoves between the first named points, and it is probable that the same fact will be observale so soon as this superior coal can be in troduced along the line between Moneton and Riviere du Loup; The Intercolonial Railway uses this coal ely for all locomotives and station The coal is mined in the most approved

anner to insure its freedom from stone and e-clay; the round coal is then put over a reen, which separates from it all the du and small coal; the latter is then put thro an elaborate steam rotary screen, which produces two sizes of small coal, known as "Stove" and "Nuts," which are perfectly pure coals and entirely free from dust. The superior quality of the "Round" coal being fully established, attention is particularly drawn to the "Stove" and "Nuts;" the former may be used in grates alone or mixed with the "Round," many prefer it alone; the latter is unsurpassed for cooking steves, payable half yearly on the first day of July with the "Round," many prefer it alone; the latter is unsurpassed for cooking steves, or for small engines. The coal ignites very quickly and burns freely, thereby insuring a quick heat with but a small consumption of fuel, which is particularly desirable in summer; in winter, and when large rooms are to be heated, you have simply to add to the quantity used in summer for heating the boiler or the pot, and a lasting and economical fire is the result.

The Osservatore Romano, a clerical P. M'PEAKE, organ, has published an article with vres whereby it was sought to change the form of election of Parish priests DRY GOODS and the Pope. This article appeared to have been caused by the fact that a petition on the subject addressed to the Italian Parliament reached the hands of his Holiness. Among the signa-

A SCRAP BOOK .- Every farmer should keep a book in which to paste agricultural scraps. Every one, in reading a paper, will see a number of things which he will wish to remember. He will perhaps see suggestions, the value of which he will desire to test, or hints which he will want to be governed by in future operations. And yet, after reading the paper, he will probably never see it again. In such a case all the valuable articles will be lost. To prevent such a loss every reader Queen Street, should clip from the papers such
