COMPARATIVE WORTH OF BAKING POWDERS.

GENERAL BUSINESS

SNOW FLAKE (Groft's)....

ANDREWS&CO."Regal"* BULK (Powder sold loose)... BUMFORD'S, when not fresh

REPORTS OF GOVERNMENT CHEMISTS As to Purity and Wholesomeness of the Roya! Baking Powder. "I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholseome ingredients. It is a cream of tartar powder of a high degree of merit, and does not contain either alum or phosphates, or other injurious substances.

E. G. Love, Ph.D.**. asphates, or other injurious successful Baking Powder is absolutely pure.
"It is a scientific fact that the Royal Baking Powder is absolutely pure.
"II. A. Morr, Ph.D.".

*I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious substance.

HENRY MORTON, Ph.D., President of Stevens Institute of Technology." "I have analyzed a package of Royal Baking Powder. The materials of which is composed are pure and wholesome. S. Dana Haves, State Assayer, Mass." The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country.

No other article of human food has ever received such high, emphatic, and universal endorsement from eminent chem.ists, physicians, scientists, and Boards of Health all over the world.

NOTE-The above DIAGRAM illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis an experiments made by Prof. Schedler.

A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound emore than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Royal Baking Powder will convince any

fair minded person of these facts. *While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.
