TECHNICAL SCHOOL REGISTRATION THIS WEEK

Fall Term Opens Tuesday, Sept 4th

The school office will be open for registration and consultation in regard to courses each afternoon and evening until the opening of school.

For some years the attendance has been the largest of any educational institution in Western Ontario and the advance registration this year indicates that the September opening will find a greatly increased enrolment.

The school maintains a well organized placement department which has developed into the largest employment bureau in Western Ontario. Local and district employers depend on the Tech employment service to select for them reliable help with special training for their requirements. This service has been found so satisfactory that graduates of the Tech have the first chance of securing the most desirable positions in the city and throughout Western Ontario.

The Commercial Courses are the only commercial courses provided by the London Board of Education. They are designed to provide a good academic secondary school education, combined with a thorough training for office work and mercantile positions.

The students, by actual use, become acquainted with the most modern office appliances and equipment. The graduation diploma of the school certifies to a very thorough preparation for business life. There is a constant demand for graduates of the school in financial institutions, bond houses, insurance company head offices and general business and mercantile offices of the city and district.

The simplified staggered class organization which was introduced into the school to relieve the over-crowding has proven both popular and successful. The convenience of students and parents has been considered. Students, under the system in vogue in the Tech are not required to attend more than eight periods a day in two groups of continuous periods. Provision is made for a common lunch period in the centre of the day. All first year students attend between the hours of 9.00 a.m. and 4 p.m. thus making no change in their regular school day.

On account of the large enrolment parents and pupils are advised to register at the school before the opening day, September 4th.
