

# The Nova Scotia School of Horticulture.

Open Each Year from November 1st to May 1st.

This school now opening upon its tenth year's work, offers a liberal and thorough course to those students desirous of obtaining a complete and practical education in Horticulture and its kindred branches. The course in Botany is a strong one, comprising systematic and physiological botany with a thorough course in Bacteriology.

A school that is to the farm boy what the city academy or the business college is to the town boy who is to devote himself to a trade or profession.

A well equipped green house and laboratories with microscopes and bacteriological apparatus of the latest designs make the work thorough and practical.

The following chief points of advantage present themselves:

- |  |  |
|--|--|
| <b>1st</b> —Free Tuition to all Students.  | <b>2nd</b> —Situated in a University Town with good influences.                                |
| <b>3rd</b> —Library and Reading Room containing the best literature of the present time. | <b>4th</b> —The Nova Scotia School of Horticulture is the only free one of its kind in Canada. |

A visit to the institution and a thorough inspection of the work is solicited. Those desirous of attending should write for further information to

F. C. SEARS,

Director.
