GREAT POWER PLANTS

STRIKING FEATURES OF WORK
BY ENGINEERS.

Queenston-Chippewa Power Development is Well Under Way and One Interesting Detail is the Reversal of the Flow of the Welland River—Power Will Be Available Next Year.

SOME novel features mark the new Queenston-Chippewa power development on the Canadian side of the Niagara river, now well under way. One detail is the reversal of the flow of the Welland river, whose present mouth, where it runs into the Niagara, will become an intake. Niagara water will flow up the Welland for four miles and a half, and then through a nine-mile canal to Queenston at the edge of the cliff that marks the limit of the present Niagara gorge and the site of the falls in a former geologic age. Here will be the power plant, utilizing a fall of over three hundred feet to the level of Lake Ontario. The horse-power developed will be 300,000, but not all of it can be used without shutting down some of the power in the older Canadian plants. Otherwise, the limit of flow assigned to Canada by international agreement would be exceeded. Our quotations are from an article in the Engineering News-Record (New York), which we quote and condense:

"Work on the new hydro-electric development at Niagara Falls, which the Hydro-Electric Power Commission of Ontario started in 1918, is progressing at an expected rate of speed. Some little difficulty has been met in holding the slope in the deep cuts in the earth overburden, but this has not caused serious retardation, and the prospect now is that power will be available in 1921.

"As at present designed, the plant will develop 300,000 horse-power with a flow of 10,000 cubic feet per second or a development of 30 horse-power for each cubic foot per second. The old Niagara river power plants developed from 12 to 15 horse-power per second-foot, the new Ontario Power Company's development on the Canadian side about 17, and the new Hydraulic Power Company's development on the American side about 20.

"The project comprises four and one-half miles of river canalization and nine miles of power-canal dug in the dry. The river canalization is in the Welland river, whose direction will be reversed from its present mouth up to the canal intake, where the control works will be built. The canal extends across high land beyond the Niagara gorge to the power-house, which will be built at the foot of the gorge at the river elevation. Water will be delivered to the power-house by penstocks laid on the slope of the bluff.

"The river-channel section is being excavated by dredge and cableway, to provide sufficient waterway. Canal excavation is largely through rock with a heavy earth overburden. The first one and a quarter miles of the canal just beyond the river is in earth section; the remainder is in rock with the exception of a short earth section opposite the Whirlpool, where an old gorge, probably a former bed of the Niagara river, drops the rock bottom so deep as to make it impossible to found the canal on rock.

"At a distance of about 2,400 feet from the river the canal widens out into a forebay 1,000 feet long and 200 feet wide at the intake gate. The penstocks are of riveted steel plates 14 feet in diameter and about 450 feet in length and extend down the steep bank of the gorge and the river from the forebay to the power-house. No surge tanks or standpipes will be required.

"The work at present may be divided into that on the river, that on the canal proper, and that on the power-house. In the Welland river a dredge is working up from the mouth of the Niagara river and has reached the Michigan Central Railway bridge, about a half mile from the mouth. This dipper dredge is spilling into scows which are being taken out into the Niagara river and dumped. A cableway excavator farther up the river has done a certain amount of work, but is now operating at full capacity. Between 3,000,000 and 4,000,000 cubic yards of earth is the total excavation in the river. About one-quarter of this has been removed.

"The larger part of the work in the canal has been done, beginning at the forebay end. The forebay itself is practically completed and channelers and drills are working in the rock cut between the forebay and the end of the earth overburden excavation. The construction railway is completed, all except a

short section at the upper end and is in operation carrying trains of earth and rock cars to the spoil dump, which is on a spur two miles to the west of the canal-line.

"Two of the big concrete bridges, those carrying the St. Catharines and Thorold Railway and that carrying the Wabash Railway, are completed. The twin bridges carrying the Grand Trunk and the Michigan Central are under way, the foundations being all done at this time. At the power-house site the whole face of the cliff has been stripped and a construction railway is being built down to the river edge from a connection to the main-line road, about a mile below the power-house site. A steam-shovel has been worked along about fifty feet above the river level and is engaged in excavating the power-house site."

FLAX-GROWING IN CANADA.

Industry Has Shown Signs of Reviving Since the War.

The carefully considered effort which is being made by the Provincial Government of Ontario to encourage the cultivation of flax in the northern part of the province is a welcome evidence of foresight. For there is a very considerable shortage of flax in the world's markets, and the oil sources of supply are, for the time being, at any rate, seriously curtailed. Thus, in the days before the war, and for some time after its onset, great quantities of flax came from Russia, whilst Belgium and Holland also made considerable contributions. To-day, Russia is practically out of the market, and the supplies from Holland and Belgium are still limited. This condition has, of course, obtained for some time past, and, two or three years ago, when the demand for linen for airplane wings and other war purposes was making heavy calls on the linen production capabilities of the Allies, Canada applied herself seriously to the question of increasing the flax production of the country. To this end the Government promised a fixed price for the crop, and a bounty, running from two to nine cents a pound, to the spinner for the finished yarn. The authorities, moreover, suffered no delay in the matter. With characteristic energy they established a complete plant at Regina, Saskatchewan, for the extraction of the fibres from the flax, and arranged for the carrying out of a series of experiments in spinning, in Kitchener, Ont. The idea of the Canadian Government was, of course, not only to establish an industry which would help to meet the war needs of the Allies, but one which might be developed, after the war, to the increasing advantage of the Dominion as a whole.

Now flax is essentially the crop for the small holder. There is, it is true, really no limit to the scale upon which it can be grown, but the process of hand weeding, to which it so readily responds, makes flax a crop particularly adapted to the kind of labor generally available on a small holding. It is for this reason, no doubt, amongst others, that the Ontario Government has adopted the scheme, just referred to, of encouraging flax growing in the northern part of the province. Under this plan, various mills in older Ontario, will supply seed to be distributed among selected settlers in the north country, in quantities sufficient to plant two or more acres, whilst the settler when he has harvested his crop, to return to the mill an amount of seed equal to that which was sent to him. It is proposed then to compare the northern seed and fibre with the product grown from similar seed in the older districts, and if the results prove satisfactory, the Government is prepared to take still further steps to encourage cultivation.

Ultimately it is hoped to establish in Canada a complete linen trade, on a large scale, and not merely to cultivate flax for export. There is, however, to-day an immediate market for exported Canadian flax, not only for the sake of the linen which may be made from it, but for the sake of its many greatly needed by-products, such as linseed oil and cake.

Canada's Helium Gas.

Helium gas rising out of the ground in Alberta and other parts of Western Canada, and now used, in some localities of that country, to do the family cooking, may one time be carrying Britain's lighter-than-air flying machines in all parts of the world. It has been stated that there is enough of this gas, which makes a satisfactory substitute for the highly inflammable hydrogen commonly used for airships, to supply the entire British Empire for many years. The wells in Western Canada are the only sources of the gas in the Empire. Its weight-supporting ability is 90 per cent. that of hydrogen. Aviation is occupying a good deal of attention in Canada, and this natural supply of the filler for gas bags of dirigibles promises to advance interest in air navigation.

Wentworth Holstein Breeders Meet

The Holstein Breeders of Wentworth County met on Saturday last at the Department of Agriculture in Hamilton. The main business in hand was to consider the possibility of holding a consignment sale at Hamilton. The first step taken was to find out if enough suitable animals were forthcoming. On a canvas of the members present it was found that it would be a comparatively easy matter to select enough good animals for a creditable sale.

It was the unanimous expression of the members that only the best animals were to be consigned. On the suggestion of Chas. M. Flatt a prominent Holstein judge in the person of Mr. Stevenson of Ancaster was recommended as the judge to inspect the cattle before they are consigned. By this method only animals suitable for foundation stock will be offered, and buyers will be able to benefit from the services of an expert judge free of charge. While the sale will be widely advertised, it was felt by the members that it will be a special opportunity for new breeders to secure guaranteed animals at their own price, and it is hoped that many of the cattle will go into the hands of Wentworth breeders.

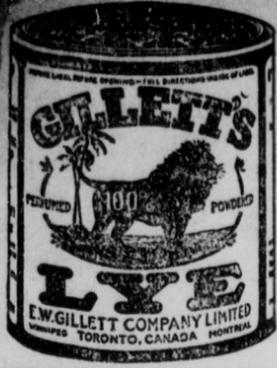

It was decided to sell the cattle subject to the tuberculin test at the purchasers option. As the date considered for the sale was late in November it was too soon to make any definite arrangements.

A meeting will be held on April 10th when it is expected there will be a complete list of animals to be sold. In the meantime the publicity committee will get busy in order to put Wentworth on the map as a Holstein centre.

Among those present and active at the meeting were: President, Hiram Dymont, Dumas; Chas. Gage, Ancaster; Gordon Brown, Ancaster; Mr. Lemon, Lynden; Walker Drummond, Waterdown, and others.

C. P. R. Farm Lands

We would call your attention to these lands, the last block of good virgin farm land in Western Canada, which marks the end of wholesale prices for virgin lands in the Prairie West. News of this block being opened up is being advertised through out Europe and the United States. The American farmers have been quick to see the opportunities offered in the past, and will see this opportunity as quickly as any. It is there fore up to those in Eastern Canada to make arrangements to visit the West and see these lands at the earliest possible opportunity. Those who act now and secure some of these lands will reap the benefit of quicker increase in value than at any period in the past, and the land will pay for itself from crops in a few years. The C. P. R. are offering you a farm on payment of one-tenth of the purchase at time of sale, and no other payments of principal for 4 years except interest. The balance of principal is extended over a period of 16 years. Those who do not wish to improve the land at once may purchase land on the 10 year contract, one-tenth cash and balance in nine equal payments. Write for information to J. E. Hess, Dist. Sales Agent Royal Bank Bldg., Brantford.

SCIENTIFIC ODDS AND ENDS.

Grain inspectors must know the exact amount of moisture in specimens submitted and a machine has been made to determine this in a 30-minute test.

The field of the farm tractor is constantly extending. A circular saw is now rigged up to it revolving horizontally and a large tree is cut down in a few minutes.

The United States leads the world in electric steel furnaces, having over 300 at the present time. This country produces more than any other country.

The distribution of photographic records will be a notable feature of the coming presidential canvass in the United States. To a great extent they will take the place of "stump speakers."

The varying level of the Mississippi which has long been a handicap to the maritime development of New Orleans, is about to be overcome by a fixed level ship canal and harbor.

Damage done to farm machinery through exposure amounts to \$1,000,000 annually, according to an estimate made by experts at the Agricultural College of the University of Wisconsin.

An electrical lamp has been developed in Europe which virtually consists of a metallic arc inside of a sealed bulb containing attenuated helium and neon gases. The wire anode terminates so closely to the edge of the hemispherical iron cathode that the current is discharged across the gap spontaneously. The rays have an orange hue and are only

Keep Your Health TO-NIGHT TRY Minard's Liniment for that Cold and Tired Feeling, Get Well, Keep Well, Kill Spanish Flu. by using the OLD RELIABLE. MINARD'S LINIMENT CO., Ltd. Yarmouth, N. S.

slightly acidic, making the lamp useful in photographic dark rooms. It is also recommended for use in mines and other places where inflammable gases may be present, because breaking of the bulb instantly extinguishes the light.

Saving Germany to Save Europe.

(New York Sun.) As important to all Europe as to Germany, in the world sense even more important is the British determination, related by one of our London staff correspondents, to scrap the treaty's indemnity clauses.

No one need think that the British are unduly tender for anything or anybody German. If nothing else were at stake Great Britain might be content to let the race which brought upon the world unspeakable butchery and immeasurable destitution stew in its own juice. But however cold the British heart might be to the present misery of the Germans, the British head knows that the great Teutonic nation go down to irreparable ruin without dragging down France, Italy and Belgium, perhaps even Britain.

British common sense knows that blood cannot be squeezed out of a stone. But that is not the only question. British economic sense knows that France and other financial wrecks on the Continent can be saved only by saving Germany, the greatest worker of them all and capable, if there is a living chance, of being the greatest producer of them all. If the peace terms permit Germany to produce and out of that production to accumulate a surplus in excess of what the workers need to feed and clothe themselves and otherwise to lift themselves out of their industrial mire, Germany can contribute by exactly that quantity of surplus pro-

duction to the restoration of dismantled industries, crippled businesses and weakened energies of the Continental Allies. Germany, under such conditions, can be as well their bulwark against Red Bolshevism in Russia and Anarchism on any of her own borders. Germany thus can be made both to protect and nourish those she has wronged and mutilated.

But if Germany is stripped of the tools with which to work, of the material with which to produce, of the means with which to distribute production, Germany never will pay the indemnity because Germany never will be able to pay it.

And that will not be the worst of it. Germany, instead of becoming a child of France, Italy and Belgium against economic chaos and human incendiarism, can herself become a volcano bursting with the powers of crime and evil.

France's bitter passions, natural enough after all she has suffered, have blinded her eyes to the greater dangers threatened to her own safety and to the world's safety by a Germany turned raving by a policy of the Allies which could only sow the winds to reap the whirlwinds.

England of the cooler brain and wider vision sees in drastic modification of the indemnity not what is better for Germany so much as what is better for France and for Europe. Great Britain, in her steady way of meeting terrific issues and her big way of doing things in stupendous crises, sees that the best hope of saving France is to save Germany.

WHEN BABY IS CROSS

Mothers, when your baby is cross—when he cries a great deal and no amount of attention or petting cheers him—something is the matter. It is not the nature of little ones to be cross and peevish—the wild child is a happy child. Give him a dose of Boby's Own Tablets and he will soon be well again. The Tablets are a mild but thorough laxative which regulate the bowels and stomach; banish constipation and indigestion; break up colds and simple fevers and relieve the other minor ills of little ones. Concerning them Mrs. Oscar Bedard Ste. Sophie, Que., writes:—"Baby's Own Tablets are an excellent remedy for constipation. They relieved my little one when nothing else would and I can strongly recommend them to all mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

DRIVES THEM INSANE.

Dr. Arlington, headmaster of Eton, recently told a meeting that the experiment of letting boys at the college write with the left hand to develop the right side of the brain was hurriedly discontinued when an eminent scientist stated that if they developed both sides of the brain at once they became idiots.

Sir James Crichton-Browne, the famous mental specialist, has given his views on this statement as follows:—"Dr. Arlington has acted wisely in putting a stop to a foolish experiment at Eton which would never have been sanctioned by any one with a little sound physiological knowledge."

"The order to use the left hand equally with the right, has, I believe, been all but universally evaded. Had it been observed only mischief would have been done."

"Dexterity is deeply imbedded in the brain—the Palaeolithic flint workers were right handed, and it is not to be shifted by a few school exercises."

"Ambidextral culture, useful perhaps in respect to some few special movements in some especially employed persons, must on the large scale end in confusion."

"Lord Lieter, the great surgeon, while a student, realizing that ambidexterity would be useful in his calling, diligently practiced it, but ultimately gave it up, as he found he was losing in the right hand more than he was gaining in the left."

"Ambidexterity is common in idiots. The hand centre in the brain is linked up with that of articulate speech, and it is with the right hand paralysis that speech is lost in a right-handed man and with left hand paralysis in one that is left-handed."

Minard's Liniment Relieves Neuralgia THE CHICKADEE. (London Advertiser.) Piped a tiny voice near by, Gay and polite, a cheerful cry, "Chick-chickadee!" Saucy note, Out of sound heart and merry throat. As if it said, "Good-day, good sir!" "Fine afternoon, old passenger!" Happy to meet you in these places, Where February brings few faces!" Introducing himself by singing to all the world his cheery little nan the chickadee is one of the most winsome of winter birds. Friendly, fearless, interested, he can be won

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss E. L. Doxey, graduate nurse, of 3220 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

very easily to the intimacy of the window board, and the shy acceptance of food from the hand or even at times from the lips. Not the least wonder he is so loved and sought. Frank W. Chapman says: "In addition to the calls which have given him his name, he utters also a clear, high whistle of two or three notes. It is so musical, so sad and plaintive, so filled with tender sentiment, that it is difficult to believe such a matter-of-fact fellow as the chickadee seems to be can be its author. When, on a winter's morning, I heard it floating through the woods, as a boy, I used to fancy that perhaps it was Jack Frost, with an icicle for a flute."

The inquisitiveness of the chickadee asserts itself when he answers one's whistle, and by degrees comes closer to investigate his human friend J. C. Middleton, of the Ridgeway, London, whose lawn is surrounded with evergreens, has among his bird friends twelve chickadees. These have become such chums that the least whistle brings them to feed from the little boxes of food that Mr. Middleton invariably carries in his pockets for just such hungry little feathered folk. The winning of a wild bird's confidence is perhaps a special privilege given to certain people, but so happy are the results of training that the chickadee watch familiar doorways for food from sometimes a stranger, and to know the magic touch of tiny, clinging feet on one's hand is to feel oneself in league with the fairies and wool sprites. Then to note the wonder of the pale buff breast, the glossy black crown and brilliant dash of glowing black immediately beneath the bill, to study the folded wings edged with the frailest fluff of down, is to see into the Great Heart of the woodland world. Careless of the cold, contagiously cheerful, irresistibly winsome in his attempts to sing his optimism into the heart, the chickadee is worth cultivating as a sunny little friend for a wintry day.

Does It Hurt You to Bend Over?

This is a Sign of Kidney Weakness, But Can be Quickly Cured

Don't give up! You can be cured and made well again. That backache and dragging weariness can be stopped for all time. Those sharp attacks when bending over, and that lameness in the morning can be overcome. Each ache and pain due to kidney weakness will disappear quickly once you start to use Dr. Hamilton's Pills, a marvellous remedy long ago made famous by its strange healing effect upon the kidneys and liver. Don't wait till that dragging pain in the loins grows worse. Start the cure to-day. Delay will mean swelled ankles and limbs, sharp rheumatic pains in the muscles and joints, and other painful symptoms as well. If you are always tired, have continuous headache, dizzy spells and specks before your eyes or ringing noises in the ears—these are common symptoms that warn you of the immediate need of Dr. Hamilton's Pills of Mandrake and Butternut. Sold in 25c boxes.

AN IDEAL LIFE.

Tiny Bay Island, Utilla, Lazy Man's Paradise.

Life in the Isle of Utilla is described in The Oregonian as an existence of unbroken ease. There are no worries or ceaseless struggles for your daily outflakes. Nature takes care of all that. Utilla's place on the map would be hard to find, but it's worth discovering. Away off in a southern sea, never heard from before and but little known it comes to the knowledge of the Pan-American union that here have Americans found a home that others enjoy when they are dead. "We call it a lazy man's paradise," says the message from this land of delight, "not that the inhabitants are necessarily indolent, but simply because a large amount of labor is superfluous. Nature provides for nearly all our wants here as in most tropical countries. Farming is our principal occupation, yet there is not a plow on the island. Frost is unknown and extreme heat is never experienced. Ninety degrees in the shade would be an unusually high

PROPERTIES FOR SALE.

GENTLEMAN'S HOME IN THE SUBURBS of Tillsonburg is offered for the sacrifice price of \$15,000, could not be built to-day for \$20,000. Two acres ground, combination barn and garage, house solid brick construction, 3 stories, cut stone foundation, some hardwood floors, hot water heat, 6 ornamental mantels, electric light and gas, excellent decorations and fixtures, plate glass windows, avenue of maples, numerous ornamental trees, shrubs, property is in first class condition and repair. Owner will take city property or fruit farm in exchange. J. D. Biggar, 235 Clyde Block, Hamilton, Ont. (Regent 83).

temperature. Our grade schools are of high standard, attendance being compulsory 10 months in the year. American textbooks exclusively are used and social life could not be distinguished from that of the United States.

Utilla is one of the Bay Islands, a string of six verdant keys in the Bay of Honduras, an arm of the Caribbean sea, which were discovered by Columbus in 1502. They were then thickly populated by native Indians who became slaves. The islands now are inhabited wholly by English-speaking people.

In 1852 settlers on the island petitioned the governor of Belize to administer them as a British colony. This was done until 1960 when the island was ceded to Honduras. "The change somewhat discouraged the people at first," says the letter, "but they soon learned that the laws of Honduras were equally just and allowed all the privileges in the pursuit of life and happiness enjoyed under British rule. The administration of the present governor, R. Barahona Mejia, whose headquarters are at Roton, the capital, is giving general satisfaction."—New York Times.

Minard's Liniment Cures Burns, Etc.

ASBESTOS.

Something About a Canadian Product.

Although Canada is the great producer and exporter of asbestos, that article, which is yearly coming into wider use, is found in many parts of the United States. There are deposits in Maryland and Virginia within a few miles of Washington, and many of the deposits of this country are worked on a commercial scale. Despite this, however, the American industries dependent on asbestos rely on the Canadian mines or the Canadian quarries for their supply.

Asbestos is a curious substance that has been known for many centuries. Many of the peoples of ancient times used it, and it was sometimes wrought into soft and flexible cloth, which was used as a shroud for the dead. There are many varieties, and a large number of common and descriptive names have been applied to these varieties. Ligniform asbestos, popularly called "mountain wood," is a variety presenting an irregular filamentous structure like wood. Other varieties are popularly called rock cork, mountain leather, fossil paper and fossil flax.

Asbestos in modern times has come to be very extensively manufactured into incombustible cloth, gloves, felt, paper and other articles of common use, and is much used as a covering to steam boilers and pipes. In the manufacture of gas stoves, and mixed with metal pigments, it is employed as a paint for wooden structures, roofs, partition: and the like to render them fireproof or fire-resistant.

It is found in most parts of the world, chiefly in connection with turpentine. Scientifically, it is described as a highly useful mineral, a fibrous variety of several members of the horn blend family, composed of separable filaments, with a silky lustre, the fibres sometimes being delicate, flexible and elastic and at other times stiff and brittle.

Minard's Liniment Cures Dandruff.

PREPAREDNESS.

(London Tit-Bits.) Green—"What on earth do you want with that sheet of postage-stamps? Why, you've got a hundred there!" Grey—"Well, you see, I've just completed a poem and I may—send it to more than one editor."

A COMPLIMENT.

(Birmingham Age-Herald.) "You used to pay me many pretty compliments before we were married," said Mrs. Dibbs, with a pout. "You women are certainly hard to please," growled Mr. Dibbs. "Didn't I tell you these pork chops were done to a turn?"

Minard's Liniment for sale everywhere

The faculty of imagination is the great spring of human activity, and the principal source of human improvement.—Dugald Stewart.

Spohn's Distemper Compound logo and text: Early spring brings with it COUGHS, COLDS, DIS-TEMPER. Be prepared. Give your horse Spohn's Distemper Compound at the first sign of a cough. Better still, give it as a preventive before he shows signs of sickness. "SPOHN'S" acts equally well as preventive or cure. By reason of its germicidal qualities, it expels the disease germs, abates fever, restores appetite, and condition. Sold by druggists. SPOHN MEDICAL COMPANY, Goshen, Ind., U.S.A.

Pass this general female tonic along, they will be grateful. A general tonic for women, growing womanhood, child bearing, change of life, etc. Sold at all Druggists or sent direct in plain wrapper on receipt of price, \$1.00 per box.

Have You Ever Thought of This? — That a Cup of

"SALADA" TEA

properly infused, is one of Nature's greatest blessings as a harmless stimulating beverage.

ASQUITH HOT IN CRITICISM OF PRESENT IRISH CONTROL

British Rule Now More Reactionary Than Within Living Memory.

London Cable—Former Premier Asquith, who was recently re-elected to the House of Commons for Paisley, spoke scathingly last night of Irish conditions before the "Eighty Club," of which he was re-elected president. Never in the memory of the oldest club members, he said, had the methods of Government in Ireland been so reactionary, or denial of the elementary principles of civil and political liberties been so complete, so defiant, so insolent, as to-day. He charged that a very large proportion of the crime in Ireland was due to the senseless policy of the present Government.

While he and the Liberal Party were pledged not to apply coercion to Ulster, they were equally pledged to the Home Rule Act now on the statute books, and he would think himself worse than a traitor if he asked the Irish people to accept any form of self-government less than was contained in that act.

The great obstacle to frank and friendly co-operation between Great Britain and the United States, he asserted, was Britain's failure to apply to Ireland the principles they had both agreed at the Peace Conference were the governing principles of civilization.

Referring to Turkey, the former Premier declared that the massacre in Cilicia ought to be the last chapter of Ottoman rule.

SEES AMERICA FOR ULSTER. Belfast Cable.—Sir Edward Carson, the Ulster Unionist leader, in an address to the Ulster delegation, which has just returned from a visit to Canada and the United States, said he had been kept informed of the movements of the mission throughout,

and had come to the conclusion that the whole of America, "barring the hyphenated Irish, who are in conspiracy with the hyphenated Germans," was on their side.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

BRITAIN WAITS ON FRANCE, ITALY

London Cable—The continued postponement of the Allies' decision with regard to Constantinople is attributed in Peace Conference circles here to the hesitation of France and Italy, neither of which countries, it is asserted, has definitely answered Great Britain's invitation to co-operate in occupying the city.

Italy is credited with maintaining a reluctance to participate in any drastic action, and to be receiving the support of a section of the French politicians, notably, M. Barthou, former Foreign Minister.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

NEW SCHEME TO FINANCE HUNS

Berlin Cable—A proposition which is advocated in the German financial press as an alternative scheme to an Allied loan is outlined by the correspondent of the London Times as follows:

Leading groups of industry, agriculture, banking and trade, with the assistance of the Reichsbank, to form a credit union—the Allgemeine Credit Gemeinschaft—this credit union to raise credits by fixed interest—six to eight per cent. bonds for a long term, guaranteed by the industries concerned.

The bonds, it is hoped, might be taken up by American banks and the capital or industries thereby secured.

A Witness Testifies SHE WAS WEAK AND NERVOUS

Brimpton, Ont.—"About five years ago I began suffering with woman's trouble. I became all run-down, weak and nervous, and was so completely down and out that I could not do anything, could scarcely dress myself. I had the doctor and took other medicine but without getting better until I began taking Dr. Pierce's Favorite Prescription and his Golden Medical Discovery. It was only necessary for me to take about three bottles when I was completely restored to health and strength and I have been in better health than I ever was before. I have had no use for medicine since, but should I need it I would take these same remedies, knowing them to be excellent."—MRS. HARRY KNIGHT, Jessie St.

OWES HER LIFE Ft. Saskatchewan, Alta.—"It is with great pleasure that I write the following and I hope it will help the many sufferers who do not know the good Dr. Pierce's medicines would do them if they would try them. "In regard to my condition, I will say that I suffered from childhood from a very weak back; I had the misfortune of having spinal meningitis when I was one year old and until I was 13 I did not see a well day, but a very kind lady told my mother about Dr. Pierce's Favorite Prescription and she got a bottle to try it. It did me so much good that mother got me 6 bottles. Recently I happened with a car accident and hurt my back badly. My doctor gave me up and said I would not live, but I still stuck to Dr. Pierce's Favorite Prescription and to my surprise in three weeks I was out of bed and better. I owe my life to it and nothing else, and shall never be without it. "If any sufferer wishes to write I will answer with pleasure."—MRS. NOEL BARTHELOMEW.

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its actions.

DR. WARD The Specialist

79 NIAGARA SQUARE, BUFFALO, NEW YORK.

Men, Are You In Doubt

As to your trouble? Have you some skin eruption that is stubborn, has resisted treatment? Is there a nervous condition which does not improve in spite of rest, diet and medicine? Are you going down hill steadily? ARE YOU NERVOUS and dependent, weak and debilitated; tired mornings; no ambition—lifeless; memory gone; easily fatigued; unstable and irritable; lack of energy and confidence? Is there falling power, a drain on the system? Consult the old reliable specialist.

SYMPTOMS OF VARIOUS AILMENTS

Weak and relaxed state of the body, nervousness, despondency, poor memory, lack of will power, timid, irritable disposition, diminished power of application, energy and concentration, fear of impending danger or misfortune, drowsiness and tendency to sleep, unrefreshing sleep, dark rings under eyes, weakness or pain in back, lumbar, dyspepsia, constipation, headache, loss of weight, incontinence. Dr. Ward gives you the benefit of 25 years' continuous practice in the treatment of all chronic, nervous, blood and skin diseases. The above symptoms, and many others not mentioned, show plainly that something is wrong with your physical condition and that you need expert attention.

Men, why suffer longer? Let me make you a vigorous man. Let me restore your physical condition to full manhood. Don't be a weakling any longer. Make up your mind to come to me and I will give the best treatment known to science—the one successful treatment based on the experience of 25 years in treating men and their ailments.

Dr. Ward's Methods Unrivalled, Thorough and Permanent

Do you realize that you have only one life to live—do you realize that you are missing most of that life by ill health? A life worth living is a healthy life. Neglect of one's health has put many a man in his grave.

I have been telling men these things for many years but still there are thousands of victims who, for various reasons, have not had the good sense to come and get well.

Specialist in the treatment of nervous conditions, nervous exhaustion, backache, lumbar, rheumatism, stomach and liver troubles, skin diseases, catarrh, asthma, rectal troubles, piles, fistula and blood conditions.

OFFICE HOURS: 9 a.m. to 5 p.m. Sundays—10 a.m. to 1 p.m. FREE CONSULTATION EXAMINATION.

Before beginning treatment you must make one visit to my office for a personal physical examination. Railroad fare will be considered as part payment of fee. Canadian money accepted at full value.

79 Niagara Square, Buffalo, N. Y.

S. AFRICAN DUTCH REPUBLIC OR LOYAL BRITISH COLONIES?

Controlling Airships.

For some time experiments have been carried out in various countries with the object of controlling aircraft from the ground, and a French machine succeeded recently—on a prescribed course with certain specified detours—in covering a distance of 180 kilometers (about 110 miles), and in landing when required, at a certain airbase. A similar machine has been developed in the United States which, according to a recent statement of Secretary of War Baker, can travel without a pilot some 100 miles and land close to a designated post.

These Pills Cure Rheumatism.—To the many who suffer from rheumatism a trial of Parnee's Vegetable Pills is recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and they will speedily give evidence of their beneficial effects.

Get the Best.

No artisan tackles his job without proper tools. The average housewife is afraid to spend money on the most useful tools, preferring to spend her health and temper. A comparatively small sum will buy patent bucket and mop, a polish mop, carpet sweeper, vacuum washer and light portable steps. Kneeling on camp floors, lifting heavy wash tubs and straining to reach high shelves mean huge doctor's bills and much suffering.

Aluminum pans and earthenware caseroles make less work and easier and better cooking. Dainty china is often more interesting to look at and easier to clean than silver.

Make your kitchen attractive. You will enjoy washing pretty cookery—platin, dull pot are not inspiring.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms are literally ground up and pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are tonical and health-giving in their effects.

A FINAL ARGUMENT.

She (to dentist lower)—"Mother will not believe that I come here about my teeth so often." He—"I will send her a bill to-morrow."

NOT SO SHOCKING NOW.

Edith—ever dream of appearing in public in your night dress? Isn't it awful! Maud—it used to be before our ordinary clothes got so shabby.

A Power of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own that other oils cannot pretend to, though there are many pretenders. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Elections in Union of South Africa To-day May Settle Big Problem.

London Cable—(By the Associated Press)—Parliamentary elections, held to-day in the Union of South Africa, will, it is believed, decide the fate of the Government held by Jan Christian Smuts, which is contending against strong Dutch Nationalist elements, aided by the Labor party. The result may decide whether Cape Colony, the Transvaal, Orange Free State and Natal are to continue British, or are to form a South African Dutch Republic, under its own flag, and with an elected President.

Anti-imperial forces have recently been strengthened by being joined by many who were influenced by charges that Yorkshire spinners have been profiteering at the expense of South African wool growers. The high cost of living has also been made a campaign issue, and the racial longing of a section of the Boers to be rid of British domination has been brought to the front by politicians.

Separation, it is believed, would meet with strong opposition from the British Government. Nationalist sentiment is said to be so intense that in some instances families have been divided over this issue, which is a survival of the old struggle which has been going on between the Dutch and the British since the Netherlands ceded Cape Colony to Great Britain in 1814. Present conditions are viewed with concern, because of the attitude of the Labor party, this being the first time the anti-British Boers have been joined by an part of the British population.

She Tells Just Why They Are So Popular

MRS. OAKES SPEAKS IN PRAISE OF DODD'S KIDNEY PILLS

She had severe backache before using Dodd's Kidney Pills but now she says she is quite well again.

Hastings, Ont., March 15th. (Special)—Among the women in this section who are shouting the praises of Dodd's Kidney Pills is Mrs. John Oakes, one of our highly respected residents. Nor does Mrs. Oakes fail to give the reason.

"Before using Dodd's Kidney Pills," she states, "I suffered with severe backaches. Now I am quite well again."

"I am highly pleased with Dodd's Kidney Pills. They have given me the best of satisfaction."

In those last two sentences Mrs. Oakes gives the reason why Dodd's Kidney Pills are so universally popular with the women of Canada. They give satisfaction. Women in all parts of Canada are every day stating that they suffered from kidney ills and found relief in Dodd's Kidney Pills.

If you haven't used Dodd's Kidney Pills ask your neighbors about them. They have been in use in Canada for more than a quarter of a century and have earned a place in the family medicine chest almost everywhere.

During the influenza epidemic the spectators at one of the leading picture houses were sprayed at each performance.

SUN LIFE ESTABLISHED NEW LANDMARKS in 1919

New milestones in the progress of the SUN LIFE ASSURANCE COMPANY OF CANADA were passed in 1919.

Applications received.....over \$100,000,000.00

THURSDAY, MAR. 18, 1920

LOCAL MENTION

Miss Buchanan is confined to her bed with tonsillitis.

Mr. Albert Higginson left on Saturday last for the West.

Mr. W. G. Spense has been confined to his home with a severe attack of tonsillitis.

Mr. James Rutledge left today on a two weeks trip to the West where he intends purchasing a farm.

Miss Mabel Alton, of the Buffalo Homeopathic hospital, spent the week end at her home here.

Two returned soldiers were in the village on Wednesday looking for suitable quarters for a biscuit factory.

H. Vance, L. Slater and A. Mullock attended the dance at the Hamilton Collegiate on Friday evening last.

Mr. Hugh A. Drummond has purchased the residence of Mr. Stewart Gallagher on Dundas street and will shortly move to the village.

Friends of Mrs. D. Ribson will be pleased to learn that she is progressing favorably and expects to return to her home in about a week.

The Ladies Choral Club concert last Wednesday evening in the Methodist church was a very successful affair in every way. A large audience greeted the entertainers.

Messrs. Kitching & Son will continue their Undertaking business here. The report circulated by the Hamilton papers that they were giving up their Waterdown business was without foundation.

The Women's Missionary Society of the Methodist church will hold their annual Missionary service on Sunday, March 28th at 3 o'clock in the afternoon, when Rev. Capt. A. D. Robb, of Dundas, will officiate. A hearty welcome is extended to all who may wish to attend.

The ladies of St. Thomas church held a very successful euchre party on Wednesday evening in the Assembly hall. The ladies first prize, a handsome clock given by Mrs. Cook, was won by Mrs. J. C. Langford, the first prize for men, an ebony hat brush, went to Mr. Dawson. Consolation prizes were awarded to Miss Irene Langford and Fred Metzger.

Evangelistic Campaign

On Sunday March 21st the Irish Evangelist, Mr. Jos. Robinson, and his daughter a noted soloist, lately arrived from Ireland, will commence a series of services under the auspices of the local churches. The campaign will begin with a union service in the Presbyterian church on Sunday morning at 11 o'clock, and in the evening at the Methodist church at 6.45 o'clock, commencing with a song service led by the massed choirs. These services are part of the Forward Movement campaign and the Inter-church committee have invited the noted Irish evangelist to co-operate with the local ministers in special services of sermon and song where every member of the family will be made welcome, and the hope is that in this great family gathering we may help each other to take this line of trenches as we did the money objective where we went over the top so gloriously. Come one and all and help us.

MORTGAGE SALE

Under and by virtue of the powers contained in a certain mortgage which will be produced at the time of sale, there will be offered for sale by

AUCTION SALE

by S. Frank Smith, Auctioneer, at The American Hotel in the Village of Waterdown, on Monday the 5th day of April 1920, at the hour of One o'clock in the afternoon, the following property:

ALL AND SINGULAR that certain parcel of land in the Village of Waterdown in the County of Wentworth containing by admeasurement eighty-two perches and one-half perch be the same more or less being composed of a part of the lands formerly decreed by Court of Chancery to belong to one Charles Sealey and may be known and described as follows, that is to say: COMMENCING where a post has been planted on the easterly side of Mill Street five chains eighty-seven links and two thirds of a link north west from the intersection of the north west side of Dundas Street and the easterly side of said Mill Street in the said Village of Waterdown, thence in a course north west along the easterly side of said Mill Street one chain eight links and one third of a link more or less to the south east side of Mill Road, thence in a north easterly direction four chains seventy five links and three fourths of a link more or less to south west side of the tail race leaning from Grist Mill formerly owned by one George Rymal, the said parcel of land having a frontage of one chain and eight links and one third of a link, and a depth of four chains seventy five links and three-fourths of a link more or less, the said land is situated in block number fifteen and being lot number eight according to a map or plan of survey made by J. W. Tyrrell, P. L. S.

On the above described land is said to be situated a substantial two-story stone dwelling house and factory with out-buildings.

The property will be sold subject to a reserve bid.

For terms and conditions of sale apply to

Kerr, Thomson & McFarlane

DEATHS

WREACKS—At Millgrove on Wednesday, March 17th, 1920, Elizabeth Carrol Wreacks in her 39th year. Funeral from her late residence on Saturday, March 20th at 2 p. m. to Anglican cemetery, Waterdown, for interment. Kindly omit flowers.

Aldershot

We are sorry to have to chronicle three deaths in this neighborhood all in two weeks. Those who are left to mourn have our deepest sympathy.

Mrs. W. A. Emery is visiting at St. Catharines for a short time.

Mr. and Mrs. Thos. Humphreys of Hamilton, spent Sunday last with relatives here.

Miss Ethel Turner has returned to her duties after attending the funeral of her grandfather at Fergus last week.

Mr. Wm. Reid has completed his contract at St. Matthew's church.

Since the snow and ice disappeared from the Cement Highway the traffic has greatly increased, and it will be well for the speed cop to keep his eagle eye on some of the autos which have been shut up all winter and are feeling good now.

Greenville

Mrs. A. Baker, and daughter Etta, are visiting friends in Penn.

Mr. and Mrs. Russel Mann leave for their new home in Swift Current Sask. on Monday next.

Mr. Lewis E. Lightfoot, of Broadview farm, died here on Monday. The funeral will take place Saturday to Grove cemetery, Dundas.

Mrs. Jackson, while in Brantford attending the silver wedding anniversary of her sister, had the misfortune to fall and injure her arm severely.

Mr. and Mrs. W. Taylor spent Sunday in Hamilton at the home of Mr. Herb. Days.

Mr. Herb. Morden gave a birthday party on Friday evening last.

LAYING A CABLE

A Costly and Troublesome Operation.

When we reflect that the world is served by no less than 1,050 distinct telegraph cables, sunk beneath the waters, costing £120,000,000, and that nearly the whole were made in London and belong to British capitalists, it may be worth while to consider for a moment the operations involved, says Answers.

First, the route of the proposed cable must be determined. In most cases this can easily be done by reference to the existing charts. If, however, no reliable charts of the region exist, a special surveying expedition is sent out to determine a path for the cable.

The object is to secure, at the least possible depth below the surface, a fairly level platform, free from ridges, which might chafe and cut the cable; and from hollows or ravines, across which the cable might not be able to support its own weight. At the same time, it is of the utmost importance to have the cable route as short as possible, for every extra mile means an expense in round numbers of \$1.00.

Then the cable has to be made. This is a very long business. First there are the copper wires—forming

the conductor of electricity—which are covered with four distinct coatings of gutta percha. Over this are wound two layers of tape—sometimes metallic tape is used where attacks from insects are feared. Then come two layers of Russian hemp. After this comes a covering of steel wire. And over all these are two coatings of very strong canvas ribbon, coated with a mixture of pitch and gutta percha. The average rate of cable making is three miles a day from each set of machines, or, say twenty miles a day from the whole factory. The cable near the shore is protected by additional thicknesses of steel wire to prevent injury from anchors, etc.

As fast as the cable is made it is coiled down in immense tanks of water and tested continually to see if its electrical condition is perfect. When complete, the cable is coiled away on board the ship that is to lay it in its ocean bed.

Cable ships are twin-screw steamers

Catarrhal Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces.

ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE. All Druggists 75c. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

ASTHMA

Templeton's RAZ-MAH Capsules are guaranteed to relieve ASTHMA. Don't suffer another day. Write Templeton, 142 King St. W., Toronto, for free sample. Reliable druggists sell them at \$1.04 a box. 70

of very great size, with their holds occupied by immense circular tanks. A very large number of men are carried—fishermen and the like—at low rates of pay, for the rough heavy work; while for the electrical and navigating work a large staff of highly paid officers are carried.

All being ready, the cable ship proceeds to the point where the laying of the cable is to begin. The shore end is landed, spliced on to the deep sea portion, and connected up to a set of instruments in a hut on the shore. Part of the electrical staff is left in this hut, and a series of signals is passed to and fro between the ship and the hut all the time that the cable is being paid out. As the cable often is two thousand miles long, it may be imagined that unmitigated attention is necessary on the part of the electricians.

Meanwhile the ship is steadily proceeding onward to her destination at the rate of five miles an hour. It is not possible to go faster, or else it would endanger the lives of the men in the cable tanks, who are handling the cable and seeing that it runs out freely. The work, of course, proceeds night and day. Meanwhile the electricians take their turns at testing the electrical qualities of the cable, and exchanging signals with those on the shore.

At last the farther shore is reached, and the second shore-end spliced on and landed.

Landing these shore-ends is very disagreeable work. It may be that on a ship to strip and wade up to one's neck in water infested with sharks while carrying or dragging the heavy cables ashore.

The Death Warrant Delivered

No defence can be offered when you apply Putnam's to a sore corn—the offender has to die. Nothing so certain to quickly cure corns as Putnam's Corn and Wart Extractor; try Putnam's, it's free from acids, and painless. 25c bottles sold by all dealers.

VEGETABLE FOOD.

It Gives Health When Cooked Properly.

Fresh vegetables, served freely, mean vigor and freedom from sickness for those who eat them. They keep the blood as it should be and the whole body in good condition. A second helping will be asked for if the vegetables are cooked so they are refreshing and palatable. Vegetables just out of the garden taste best when simply cooked—

steamed, boiled or baked—and served with a little salt, butter, milk or cream. Often a heavily seasoned sauce covers up the more desirable vegetable flavor.

Overcooking of vegetables impairs their flavor. Very delicate flavors are destroyed, while vegetables with very strong flavors, such as cabbage or onions, become disagreeably strong if cooked too long. Overcooking also destroys the attractive color of some vegetables.

Cook summer vegetables as soon after they are gathered as possible, in order to preserve the flavor. If they must be kept over keep in the ice box or some other cool place.

Let wilted vegetables soak in cold water or freshen them. If vegetables

Cook's Cotton Root Compound.

A safe, reliable regulating medicine. Sold in three degrees of strength—No. 1, \$1; No. 2, \$3; No. 3, \$5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor.)

must stand after paring, cover with cold water to prevent wilting and discoloration.

Before cooking put head vegetables and greens in cold water for one hour with a tablespoon of vinegar to remove insects, then wash very carefully.

Drain all boiled vegetables as soon as tender—they become soggy if allowed to stand undrained after cooking. The water drained off may be saved for soup stock.

Most vegetables are better when cooked in a small amount of water because a part of the mineral salt dissolves out into the water and is lost if the water is thrown away. Cook whole when possible.

Tender spinach or lettuce leaves require no added water for cooking. If thoroughly washed enough water will cling to the leaves to prevent burning.

Delicately flavored vegetables should be steamed or cooked slowly in a small amount of boiling water until tender and the water boils.

Strongly flavored vegetables may be cooked uncovered in a large amount of rapidly boiling water, and the water changed several times during the cooking.

Starchy vegetables should be put on and cooked in a sufficiently large amount of boiling water to cover them. Boil gently and keep kettle covered.

The time required for cooking vegetables depends on the kind, size and age of the vegetables. Judgment must be used in deciding when they are quite done but not overdone.

Spanking Doesn't Cure!

Don't think children can be cured of bed-wetting by spanking them. The trouble is constitutional, the child cannot help it. I will send to any mother my successful home treatment, with full instructions. If your children trouble you in this way, send no money, but write me to-day. My treatment is highly recommended to adults troubled with urine difficulties by day or night. Write for free trial treatment.

Mrs. M. Summers WINDSOR, Ontario

THE NUTHATCH.

(London Free Press.)

Shrewd little hunter of woods all grey,
When I meet on my walk of a winter day—
You're busy inspecting each cranny and hole
In the ragged bark of you hickory bole;
You intent on your task and I on the law
Of your wonderful head and gymnastic claw!

Perhaps of all the winter bird friends the nuthatch is most interesting, not because he wants to be chums as does the friendly little chickadee, but owing to the unique and distinctive man-

Cause of Early Old Age

The celebrated Dr. Michalekoff, an authority on early old age, says that it is "caused by poisons generated in the intestine." When your stomach digests food properly it is absorbed without forming poisonous matter. Poisons bring on early old age and premature death. 15 to 30 drops of "Seigel's Syrup" after meals makes your digestion sound. 10

ner in which he roams where he will, up or down the trunks of trees, or under and over its branches. There is impudence and daring in the very length of his bill and the tilt of his head as he lifts it on a downward journey of a tree to peer at one with inquisitiveness and disinterested curiosity. He is timid about accepting the hospitality of the window feeding board, and makes many experimental visits before he decides to partake of the feast outspread. His food consists largely of eggs and larvae of insects and spiders, which he seeks on parts of trees that cannot be reached by other birds. His claws are provided with sharp little hooks that catch in the bark and make it quite as possible for him to run down the trunk of a tree as to climb upward, and very cleverly he avoids snow or ice on the limbs of the trees by running nimbly along underneath.

The nuthatch is a wise provider for a hungry day and has a most surprising habit of carrying food to a nearby tree, and in the holes and crevices of the bark he hides his unneeded food against times of want. This is the origin of his name. He hides nuts in tree trunks, and often inhammering his treasure securely into its hiding

place, he breaks the nutshell with his strong, sharp beak, and perhaps as a reward of his labor tastes a morsel of the meat. It is interesting to note a tree hiding-place of a home nuthatch, with the bark pierced in so many places with bits of food. The colder the day the busier and happier he is, and though there is nothing appealing in his queer little chatter, he has an interest of action and a striking beauty of plumage that make the winning of his notice well worth while. The white-breasted nuthatch has a glossy black crown strongly contrasting the snow-white of the breast and blue-grey upper body and wings, the latter beautifully touched with line of black, and the red-breasted nuthatch, also one of Canada's winter birds, has a rusty tint over his breast and curiously pencilled black lines extending from his bill to the soft grey of his body. These little winter friends are ours to help us pass the grey days of the shut-in season. There is something very beautiful in the knowledge of their presence to "snow-weary hearts and eyes" until the spring sends them into their retreats in the dark cool woods, to make their nests in holes of trees and brood over their nestlings in a secluded green world.

WOOD'S PHOSPHODINE.

The Great English Preparation. Tones and invigorates the whole nervous system, makes new Blood in old Veins. Used for Nervous Debility, Mental and Brain Worry, Dependancy, Loss of Energy, Palpitation of the Heart, Failing Memory. Price \$1 per box, six for \$5. Sold by all druggists, or mailed in plain pkg. on receipt of price. New pamphlet mailed free. THE WOOD MEDICINE CO., TORONTO, ONT.

SUN LIFE SHOWS BIG GAINS IN ALL LINES

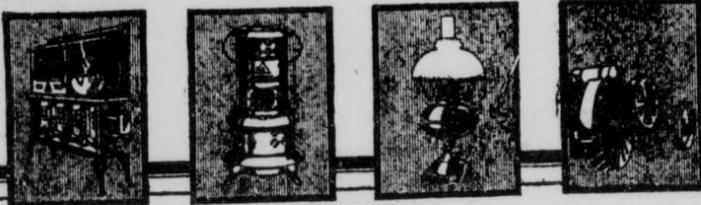

49th Annual Report is Issued, Showing Tremendous Gains in New Business Obtained.

Some new and interesting records in the insurance business were made by the Sun Life Assurance Company of Canada during 1919. The 49th annual report of the company has just been published and shows that the new business actually issued and paid for during the past year was \$86,548,850, being an increase of \$34,957,457, or 67.7 per cent. over 1918. The tremendous business of the Sun Life will be realized when it is stated that applications for new assurances retained during 1919 exceeded one hundred million dollars. The figure creates a distinct record in the insurance business of the Dominion, as no Canadian company has ever before approached this total.

The business in force amounted to \$16,358,462, showing an increase of

\$75,548,805. The assets of the company were increased by \$8,091,089 and now amount to \$105,711,468, while the report shows a net surplus of \$8,037,440 over and above all liabilities and capital stock which indicates the importance attached by the company to safety and protection. The company paid out to policy-holders and their beneficiaries \$12,364,000, bringing the total amount paid out in this connection since organization to \$91,227,532. Another record was made in regard to income with a total of \$25,704,201, or an increase of \$4,043,101 over the previous year.

Owing to the remarkable development in the business of Canada's greatest life assurance corporation, the directors feel that the business in the Dominion is due to enormously expand during the present year.

HIGH GRADE OIL AT LEAST COST

Your heat, light and power needs are best served with Imperial Royalite Coal Oil. Every drop is clean, powerful and absolutely uniform. Imperial Royalite gives you the highest fuel satisfaction and costs no more than ordinary coal oil.

Imperial Royalite Coal Oil meets every test of a perfect oil, allows you full power from tractor or stationary engine. Used in oil heaters and stoves, it burns clean—no smoke or soot—and it's best for oil lamps, too.

You can get Royalite everywhere when you want it. Our unlimited means of distribution assures that.

No coal oil is better than Imperial Royalite, so why pay higher prices?

SIR WILLIAM'S WILL

But Jack, though it must be confessed his heart warmed at the kindly welcome—as whose would not?—shook his head, and Lord Chillingford said gracefully:

"We won't disturb Sir Wilfred; but I hope you will not permit him to go home until I and the many friends of his father have shaken hands with him! I now call upon Mr. Hesketh Carton."

Hesketh had turned as white as a ghost for a moment or two, but he had had time to recover himself, had had time to remember that Sir Wilfred had renounced his marriage with Clytie, that he, Hesketh, was still safe. He came forward quickly, with a pleased expression and a genial smile, and began:

"Lord Chillingford, ladies and gentlemen, my first word must be one of extreme pleasure and gratification at the presence here to-night of my cousin, Sir Wilfred Carton, and to assure him that no one welcomes him more gladly and warmly than I do, and that, but for the duty I owe you, I should ask your permission to omit my speech and allow Lord Chillingford to close the meeting, that we might all have an opportunity of greeting Sir Wilfred."

There was cheer and cries of "Go on, go on!" and he went on with his speech. He had never spoken better; at times he was really eloquent; applause and cheers liberally punctuated his stirring address; in a word, the triumph he had anticipated was fully realized; and when the meeting closed, no one present had any doubt whatever of Mr. Hesketh Carton's success at the poll the next day. The audience did not leave the hall until a vast amount of cheering had been got through—Sir Wilfred's name was acclaimed as loudly and enthusiastically as Mr. Hesketh Carton's—and it was some time before Jack was surrounded by his father's old friends.

Hesketh was, of course, one of the first to shake hands. With amazing self-possession and coolness, he completely ignored their former meeting at Withycombe.

"Your return, my dear Sir Wilfred," he said, "might well have been an earlier one, earlier by many years, but it could not have come at a more fortunate time for me. I regard your presence and your support as just making my return to-morrow certain."

Jack nodded, and shook hands with one and another, Mr. Granger standing by his side as if he had a proprietary right in him. Lady Chillingford came forward from the group.

"You must come with us, Sir Wilfred," she said, with suppressed excitement. "We are going to have a kind of supper; we are all hungry; besides, we all want to talk over this wonderful evening. And I have sent to Bramley Hall for Clytie and Mollie. Oh, yes, I dare say they are tired; but they are young, and have had some time in which to rest, and I want them very badly. You must come, Sir Wilfred. Edward," to her husband, "do let us have the carriage! Now, you won't desert us, Sir Wilfred?"

"Thank you, no, Lady Chillingford," said Jack, in his quiet way. "I shall be very glad to come."

When they arrived at the Grange, the Chillingfords' place, they found quite a large party waiting for them; and Jack was immediately surrounded and made a fuss over. Clytie and Mollie, Lord Stanton and Lady Mervyn, were there, and there was a peculiar expression on Percy's face as he looked on at the welcome accorded to Jack. For the first time during the electoral campaign, Mr. Hesketh Carton seemed to take a secondary place. Clytie and Mollie were in the background with Lady Mervyn and Clytie looked on at Jack's reception with a proud smile in her eyes and quivering on her lips. At last the party settled down to the impromptu supper. Lord Chillingford was in his element, and bubbling over with geniality.

Albert S. Williams, Ltd., 212, Abchurch Lane, London, E.C. 4.

228

"I think we really must drink Mr. Hesketh Carton's health," he said, rising, glass in hand. "I would join with it that of Sir Wilfred Carton, who has returned to us after so long an absence, and who we are also delighted to see; but I leave that toast to younger hands." He glanced at Percy.

They drank Hesketh Carton's health, and he rose and made a neat speech. He was as self-possessed and pleasant as usual; what had he to fear? Sir Wilfred's renunciation of Clytie, and with her the estates and the money in Mr. Granger's hands. All was well. Then Percy rose. He was shy, but through his shyness shone a kind of determination, of firmness.

"Lord Chillingford has asked me to propose Sir Wilfred Carton's health," he said. "I'm not much of a speaker—haven't had the opportunity—but I shall be very glad to do so, if you will allow me to couple with it the health of—his wife, Lady Carton."

There was an intense silence. The company stared from Percy to Sir Wilfred in amazement, curiosity; then they saw Sir Wilfred, who was seated next to Clytie, take her hand and look round proudly, while she blushed and cast down her eyes in confusion. Mr. Granger was the first to recover.

"By Heaven! they are married!" he exclaimed, springing to his feet. "They've cut the Gordian knot! No, they've tied it! Married!"

The word was echoed in tones of astonishment by the rest of the party; voices rose in excited comment; then someone called out:

"Sir Wilfred, Sir Wilfred!"

Jack rose to his feet, urged by Mollie, whose eyes were dancing, who was laughing almost hysterically. He stood for a moment, still holding Clytie's hand, a proud light in his eyes, as he looked round the excited room.

"Yes, you're right," he said. "We are married, Clytie—Miss Bramley—I mean, Lady Carton—and I. How we came to be so long a story! It's a very strange one—we'll tell you some day. But we are married, there's no doubt of that; and we are very happy; at least I am, and I hope she is. Clytie pressed his hand and looked round with a modest pride that thrilled Jack's audience. "We've had no end of adventures—tell you about 'em some day!—but we've come back to Bramley, to the dear old Hall, to settle down there among our friends—her friends, I should say, for I'm a stranger. But I shan't forget, we shan't forget, your kindness. Thank you very much!"

There was no sitting still at the table after that. The company pressed round the young couple, asking excited questions which it was impossible to answer, the men wringing Sir Wilfred's hand, the women crowding round Clytie with exclamations, ejaculations, and endless questions.

Mr. Hesketh Carton, the man who had loomed so largely in the public eye, was quite forgotten. He, too, had murmured his congratulations; but presently he disappeared, stole away almost unnoticed. His brain was burning, he was inwardly raging with fury, the ferocity of balked desire, of thwarted ambition.

Married! The renunciation was not worth the paper on which it was written. Sir Wilfred had returned, Clytie was married; there would be children—of course, there would be children, a son and heir to the estate; Bramley had passed forever beyond his reach. He walked in a kind of dream, a frenzy, to the gloomy house beside the works. He tried to console himself with the thought, the anticipation of his success on the morrow. He had lost Bramley and Sir William's fortune forever; they had gone from him; but something still remained. He would be a member of Parliament to-morrow; a political career still remained to him. He was still proprietor of the Pit Works, was a fairly rich man; there was still a future before him. He tried to console himself with the prospect as he walked through the night to his gloomy house.

He let himself in with his latch-key and went to the little room adjoining the works. His brain was in a whirl, he was shaking with conflicting emotions—disappointment, the loss of Bramley, the marriage of Clytie, the fact that Sir Wilfred, his cousin! the outcast, the prodigal, would be lord of all that he, Hesketh, desired and for which he had risked the galleys. He went to the sideboard, poured out a glass of brandy, and tossed it down his parched throat. Then he paced up and down, his hands wringing behind his back, his face white and working. In the course of his pacing his eye fell on the small square box which Mollie had given him—a souvenir of their travels.

Half-unconsciously, impatiently, he took it up, cut the string, and took the box from its wrapper and opened it. It contained a wine-glass, a wine-glass with the Bramley crest engraved on it. A slip of paper was coiled up in it. With impatient curiosity he took it up and read it.

"From Mary Seaton."

That was all. The glass and the slip of paper fell from his hand and his face grew livid. That was all;

Cuticura Will Help You Have Hair Like This

Touch spots of dandruff and itching, if any, with Cuticura Ointment. Shampoo with Cuticura Soap and hot water.

Scalp Ointment 25¢ and 50¢. Sold throughout the Empire. Cuticura Soap 25¢ and 50¢. Sold throughout the Empire. Cuticura Soap 25¢ and 50¢. Sold throughout the Empire.

but he understood—understood that the glass was the one into which he had poured the poison. But Mary Seaton? How did she know? How had she discovered, detected him? And Mollie, too, knew? She had given him the packet; and he remembered that which he had scarcely noticed at the time, the strange flash in her eyes, the fact that she had not shaken hands with him. Mollie and Mary Seaton—the girl from whom he had detected him, what could it mean to him but danger? The shadow of the gallows, of penal servitude, at least, of disgrace, shame, the terror of a public trial; his vivid imagination saw it all more clearly than can be set down in writing. Shaking in every limb, he fell into the chair, with the denouncing wine-glass almost touching his feet. Exposure, ruin, imprisonment, faced him; little wonder that his soul shivered at the prospect.

The brain works quickly at such a moment; and he remembered that Stephen Rawdon had disappeared, left the country, so he had heard. But Mary Seaton, the girl whom he had ignored, passed over with contempt, must have been in Bramley; or why that damning wine-glass, that slip of paper? He felt like a man treading on quicksand which at any moment might engulf him. At such a moment one thought predominates—that of flight. That was his only chance. He went up to his room and packed a portmanteau. Then he sat down and wrote a note to Doctor Morton, and, packing up and down the room until morning, despatched it.

A few hours later, so early that the workmen on their way from Leabport to the Pit Works, gathered in groups to discuss the astounding news; it was announced that Mr. Hesketh Carton had been suddenly taken ill, and that by the advice of his medical man he was starting at once for the Continent for skilled treatment and perfect rest. Indeed, it was soon discovered that Mr. Hesketh Carton had already started; and to the amazement and dismay of the party, his opponent was returned as member for Bramley.

The excitement, the surprise, threw the whole place into a turmoil; and it may safely be said that only one person was exempt from the frenzy of astonishment which raged like an epidemic through the district. That person was Mollie. She raised her eyebrows and exclaimed with the others; but she was not surprised, and in her heart there glowed that satisfaction which all of us feel when we have outwitted the wrongdoer and utterly vanquished him.

(To be continued.)

DEPENDED ON HIS SPEED.
Excited Traveller—"Can I catch the four o'clock express for Birmingham?"
Railway Official (calmly)—"That depends upon how fast you can run. It started thirteen minutes ago."

Stops Bronchitis Quickly Without Any Medicine
THIS PROBLEM SOLVED WHEN CATARRHOZE WAS DISCOVERED.
Thousands Have Been Cured

You are nothing but a plain simple boob to suffer a day longer from Bronchitis. It's real easy to cure—this has been proved—and again. Relief comes at once when you breathe in the soothing vapor of Catarrhazone. Once its healing, piny essences strike the bronchial tubes, you realize that a powerful treatment is at work.

Irritation can't live in the throat of a person inhaling Catarrhazone. It is so soothing, so warming, so full of concentrated healing power that you get results at once.

Catarrhazone strengthens the weak throat, stops the cough, removes that hacking irritating necessity to clear the throat, makes even the chronic sufferer realize that at last he has discovered a real cure. For coughs, colds, catarrh, and winter ills, nothing in the family could be better than the complete dollar outfit. Small size 50¢, tri-size 25¢, all dealers, or The Catarrhazone Co., Kingston, Ont.

WHEN I GET MARRIED. Small Boys Give Their Ideas of Wedded Life.

"When I get married," he says, "which I shall not do until I can pay for a good home and the necessities of life for my wife and myself, I should go and see that no water ran through the roof and dropped on the beds. I should not like the walls to be damp. When we had been married for a bit, with a kiddie or two toddling about the house, I should soon want them to grow older, so that I should not be awakened in the middle of the night by their screams. I should be a teetotaler, shave twice a week, and smoke two ounces of thick twist a week."

Another boy sees it very simply: "I will be my own master in some things, but in other things I'll let my wife have her own way. My wife and I will have a night off every fortnight. Of course, we shall have some children."

One little fellow does not believe in heiresses. "I shan't get married to a rich lady," he says, "because she will be always wanting dresses that cost a lot of money, and if her wealth grows less and less till she is poor, then I shall have to work very hard to please her. I shall marry a lady that can do house-work and requires no servants—a lady who will agree to do everything I say."

The palm, however, goes to a twelve-year-old who promises to be a husband worth courting. He writes:

"When I get married I shall, I hope, agree with my wife. I shall keep trying to get more knowledge of my work, then I should get better positions in my trade, and that means more money. I think that the more money you get the better it will be for the wife. If I had any children I should try to cultivate a hobby for them. I should give them a money-box each, and allow them something per week to put in their boxes. When they had got enough they could buy what they wanted, provided it was sensible, such as a camera, fretwork, or foreign stamps, or any other hobby. I should build a shed and put them a punch-ball and a few other things in, and make it like a little 'gym' for them. Then I would put a hammock in one end of it, for wife to lie in and watch her little sonnies learn to 'play the game.'"

"If I had any girls I should bring them up with the boys. They could go with them on their madcap adventures, but still I should like them to cultivate that quiet dignity so characteristic of real ladies."

SCIENTIFIC JOTTINGS.

The last gap in the Lincoln Highway is being finished. This consisted of two stretches in Nevada.

An English ship has been equipped by the Royal Navy to make soundings of the air for use in mapping aerial routes.

A silken screen, kept water-soaked while in use, is said to improve the quality of the film pictures projected upon it.

A Government bulletin is authority for the statement that the greatest single factor in the operation of the steam plant is the way in which the exhaust steam problem is handled.

Kingfishers make their nests of fishbones.

Grasshoppers have their ears on their front legs.

Wood-paving for roads was first used in Russia.

The reason why many deaf persons hear better while riding on trains is because the rumbling of the heavy wheels on the track causes the drum of the ear to vibrate, and in this way excites the capacity to hear.

The increasing popularity of motor equipment on the farm was demonstrated recently when one company exhibited a shipment of 80 cars loaded with such machinery. The cars were on the tracks of a big railroad yard and were being shipped to agents in three Western States.

As an economy in theatre operation a machine has been invented for reclaiming rumpled programs which have been discarded by the frequenters of the house at each performance. On their second appearance the sheets are issued as good as those fresh from the printing press.

The newest machine for etching glassware holds the piece by suction while the patterns are impressed upon the surface.

FRANCE IS ALERT.

The task of rehabilitating the French merchant marine has been undertaken in earnest. Already French shipbuilding yards, which were closed down during the war, have 43 cargo boats and two mail passenger liners under construction, while 18 mail steamers, 32 cargo vessels and 17 tugs have been ordered and work on them will commence shortly. Most of these vessels are to be completed in the latter part of this year or early in 1921. All are to be of steel. It is noteworthy also that the average speed of the cargo vessels will be well above 10 knots, compared to the pre-war average for such vessels of about 9 knots, and that the passenger ships will range in speed from 15 to 19 knots an hour.

NEURITIS

So many have Neuritis, that painful inflammation of the nerves. Do not suffer another day. If you are a victim, try

Templeton's Rheumatic Capsules

Nothing else brings relief so quickly and so surely. Send for free sample to Templeton, 142 King St. W., Toronto. For sale at reliable druggists for \$1.00 a box. 66

From this it is apparent that France does not propose to continue indefinitely the dependence on foreign vessels which the war losses forced upon her. The sooner France's merchant marine is restored or brought up to or nearly to its requirements in shipping, the sooner will it be able to cut down substantially the adverse balance in invisible trade through no longer having to pay for the services of foreign-owned ships. In France's present position this is a matter of the greatest importance, and creditors, among whom this country is conspicuous, have occasion to be highly gratified at the energy with which it is being attacked.—From The World's

WORDS TO THE WISE

For Those Who Use Electric Grill, Good Advice.

The electric grill is such a wonderful comfort that we should remember a few important items regarding it. Never forget that the surface of the heating chamber not in use should be closed to avoid heat escaping.

When cooking on top of a three-heat grill the steel reflector grille must be slipped right under the heating chamber, to throw the heat up.

When cooking below the coils the reflector ought to cover the upper surface.

When using the deep pan on top of the stove, this should be covered by the griddle to avoid radiation of heat from contents of pan.

When toasting alone the deep pan should be slipped underneath, where it will be out of the way, and both the upper and lower surfaces of the heating chamber closed tightly by means of the griddle on top, and this pan underneath for dried toast and for quick toast, make it on top the coils, with pan or reflector underneath. It saves current.

POLICE POWER.

Mr. Peck—"Would you mind compelling me to move on, officer? I've been waiting on this corner three hours for my wife."

LOSS OF STRENGTH THROUGH INDIGESTION

THE STOMACH CAN ONLY DO ITS WORK WHEN THE BLOOD IS RICH AND RED.

Indigestion means loss as well as suffering to many people. Loss of strength, loss of time and loss of money follows indigestion and debility continues as long as the indigestion remains. Workers suffer from indigestion because their hours are long, and often they cannot give proper time to meals. Then the appetite becomes fickle, digestion becomes feeble and the blood becomes impoverished. So the general health suffers, languor, nervous troubles and often sleeplessness follows. It is well to remember that the whole system relies upon good blood, and that good blood is impossible unless the digestion is good.

The stomach cannot do its work unless the blood is made rich and red, and so new blood alone can cure indigestion. It is for this reason that a remedy like Dr. Williams' Pink Pills which makes new, rich blood, cures indigestion and builds up the whole system. The great value of Dr. Williams' Pink Pills in cases of the kind is proven by the statement of Mr. H. E. Small, Wingham, Ont., who says:—"The truthfulness of my statement can be proven by scores of my friends and acquaintances. I am a glove cutter by trade and for six long years, have at times been a great sufferer from complication of ills, chiefly due to indigestion. Gas would accumulate on the stomach, causing me great pain. I would bloat up at times and almost suffocate, and often when at work would be overcome by a drowsy oppression which was almost indistinguishable. Finally I began the use of Dr. Williams' Pink Pills, and after taking seven boxes I feel like a new man. The transformation they have made in me is simply remarkable, and while using them I gained thirteen pounds in weight. I may add that I began the use of Dr. Williams' Pink Pills as a result of what they did for a niece, who underwent a critical operation, and who did not regain her strength until she started using the pills. In her case they fully restored her health, and this encouraged me to begin their use, which, as I have already said, a complete restoration of health in my own case."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

OIL is a cheap fuel for cooking—No ashes to clean up. No fires to build. What could be less trouble?

A Florence Automatic with a McClary's Success oven will give you the best bakings you ever produced. No odor. No wicks to bother with. Save fuel, have a cool kitchen. Call and see the Florence in actual operation.

POWER OF PREJUDICE.

The Reason Why People "Don't Like" and "Can't Eat."

To a far greater extent than we admit, or possibly are aware of, man is governed by his prejudices. They cost him more than he knows, for a prejudice is an expensive proposition. In no other respect is this weakness so apparent as in the matter of food. During the reign of the food administration many people were persuaded or beguiled into eating things they had never eaten before and thought they "didn't like." "I'll try anything—once!" was regarded as a liberal-minded concession to the unfamiliar. Yet our likings are almost universally a matter of habit established by repetition. Few of us have taken kindly to caviare, avocado pears, or even olives, on first acquaintance.

When the use of whale meat was first urged upon the public, people laughed and quoted:

He baited his hook with tiger's tails,
And sat on a rock and fished for whales.

Whale meat is purchasable in many parts of Canada, but where is the steward or chef brave enough to place it on a hotel menu? As a matter of fact, there is nothing in the slightest degree objectionable to eye, nose or palate in whale steak, as those unprejudiced may quickly learn. It resembles corned beef—possibly a little less so, and broiled and served with a sauce, either drawn butter or a lemon sauce, is tasty enough for a second helping, once we have overcome our dread of the untried. That this meat will eventually be recognised as a food adjunct is indicated by two large canneries doing a good business on the Pacific Coast and the concessions granted to the syndicate supplying them.

The flesh of the shark is said to resemble that of the sturgeon—the fish that "goes to the Caesar's dish," but its cannibalistic reputation, firmly fixed in the popular mind, is against it. Man's dread of the gastronomically untried is only equalled by his curiosity, which after all gets the better of his fears. Truly, he was a brave man who first swallowed a raw oyster.

Prejudice plays a large part in our food purchases. Take the case of Butter versus Oleomargarine. Experts in the former have been known to fail in ability to distinguish the two, yet we are willing to pay 20 per cent. more for butter than for the substitute. The prejudice against goods from storage helps bolster the cost of living. Were it not for storage facilities butter and eggs to-day would be luxuries for the very rich only. The public was recently reliably informed that storage eggs had proved fresher than fresh eggs. The rabbit would furnish food as well as fur if our "don't like" did not stand in the way. As a matter of fact, our "can't eat" and "don't like" are mainly psychological states fixed in habit and prejudice.

Time Lost In Disputes.

The time lost on account of industrial disputes in Canada during April was much greater than during either March, 1919, or April, 1918. There were in existence during the month 37 strikes, involving 12,415 workpeople and resulting in a time loss of 111,083. Twenty-seven strikes were reported as having commenced during April. At the end of the month 14 strikes affecting approximately 1812 workpeople remained unteminated.

His Difficulty.

At a training camp during the war the officer of the day was making the rounds of the post. It was during challenging time. He seated himself on the corner post of a fence and waited for the sentry. The sentry, a raw recruit from the woods came slowly up and stopped only a few feet from the O. D. After waiting in silence for a few moments the officer asked: "Well, what are you going to say?" "Durned if I know what to say," drawled the recruit. "If you were walking I'd say 'Halt!'"
