The New York Evening Post explains the apparently anomalous incident of a weak stock market and a satisfactory condition of general trade by the fact that railway building has advanced in the past two years in a higher ratio than agricultural production. This is shown very clearly in an article in the Railroad Gazette of September 21 and is confirmed. If confirmed in confirme article in the Railroad Gazette of September 21, and is confirmed, if confirmation were needed, by the recent remarks of Commissioner Fink to the Senate Committee on Labor and Education. The increase of acreage brought under cultivation has been about 2 per cent. yearly since 1879. The increase of population has been about the same, while the increase of railway mileage has been about 9 per cent. yearly.

'Some months ago I was troubled with scrofulous sores (ulcers) on my legs. The limbs were badly swollen and inflamed, and the sores discharged large quantities of offensive matter. Every remedy I tried failed, until I used Aver's Sarsaparallla, of which I have now taken three bottles, with the result that the sores are healed, and my general health greatly improved. I feel very grateful for the good your medicine has done me.

THE Department of Public Works of Can-

ads, being about to resume operations for the improvement of the Channel at the Horse Shoe Shoel, at the entrance to the Miramichi River, will from this date have the Dredge "St. Lawrence" engaged in performing the dredging required and the said dredge will have a number of anchors, lines, and cables for mooring purposes deposited in the Channel and on the flats on either side of the Channel, all of which when put down will be buoyed.

All masters of Steamers are cautioned to keep clear of said buoys, lines and cables, so as to prevent their being taken up and fouled in the paddles or propellors—as the above mentioned moorings will be in place whe ther the dredge is there or not.

As whist working it is not possible to shift or remove the dredge, vessels will be required to give it a wide berth so as to avoid collision and damage.

HAIR RENEWER

was the first preparation perfectly adapted to cure diseases of the scalp, and the first successful restorer of faded or gray hair to its natural color, growth, and youthful beauty. It has had many imitators, but none have so fully met all the requirements needful for the proper treatment of the hair and scalp. HALL'S HAIR RENEWER has steadily grown in favor, and spread its fame and usefulness to every quarter of the globe. Its unparalleled success can be attributed to but one cause: the entire fulfilment of its promises.

The proprietors have often been surprised at the receipt of orders from remote countries, where they had never made an effort for

The use for a short time of HALL'S HAIR RENEWER wonderfully improves the personal appearance. It cleanses the scalp from all impurities, cures all humors, fever, and dryness, and thus prevents baldness. It stimulates the weakened glands, and enables them to push forward a new and vigorous growth. The effects of this article are not transient, like those of alcoholic preparations, but remain a long time, which makes its use a matter of economy.
