OPTOMETRIST

OP—TOM—E—TRIST

"A SAVER OF EYESIGHT"

You may have noticed that I talk more about "Eyes" and "Eyesight" and "Service" than I do about glasses. This is because optometrists have something more important than glasses to talk about. Any optical place is supposed to have eyeglasses and not carpeles and furniture. Optometrists naturally attach more importance to what you want when your eyes trouble you—which is COMFORT and SATISFACTION and QUALITY and SERVICE. That's what you get from competent optometrists. Glasses are tools, which, properly and scientifically handled, bring comfort and satisfaction. Should you require glasses we can supply them from \$1 and upwards.

C. E. DAVIDSON

OPTOMETRIST and JEWELER MARRIAGE LICENSES ISSUED

PEERLESS FENCE

Now is the time to drop in and book your order for the coming season and get in on our first carload, as indications are that Fence Wire is likely to be scarce.

Have a look at our line of Mitts and Gloves. Prices from 50c to \$1.25.

LUMBER is advancing in price every day, and if you intend to build next spring it will pay you to draw your materials home this winter as we have bought before the raise.

McPHERSON & CLARKE

PLANING MILL LUMBER YARD COAL & WOOD

District and General.

Miss Katie Hastings of Bothwell died suddenly of pneumonia last week. John Chalmers, a resident of Stratford for fifty years, died on Monday, aged 76 years.

John Seane, a well-known land surveyor of Ridgeway, died on Saturday, aged 84 years.

Miss Annie Laura Stoking of Newbury and George Murray Hill of Bothwell were married last week.

The Hensall Observer has ceased publication, owing to the high cost of material and scarcity of labor.

Mrs. George Reid, one of the oldest residents of Brooke township, died last week, at the advanced age of 97.

Andrew McWilliam, of Vonda, Sask., purchased 38 horses in Dunwich, which he shipped to the West last week.

Allan Welch of Oran marketed 16 live hogs, 8 months old, at \$13.25. They weighed 100 lbs., realizing \$530, or \$33.12 apiece.

Henry Askin, an aged Bear Creek Indian, died a few days ago near Dutton, where the family were living during wood-cutting.

Fifty five per cent. of the pupils in the primary and first grades of Sarnia public schools are reported by the inspector to be suffering from defective eyesight.

James Shuart, a prominent pioneer of the Bothwell district, died January 1917, at the age of 84 years, and the remains were interred in the Johnston cemetery in Euphemia.

The following officers have been appointed for Crinan cheese factory for 1917:—Salesman, G. P. Mathison; secretary-treasurer, J. A. Mathison; auditor, Duncan McEachern.

The death occurred at the home of her daughter, Mrs. Wm. Campbell, 5th concession, Aldborough, of Mrs. Bessie Campbell, widow of the late Duncan Campbell, in her 87th year.

That Prince Edward Island farmer who sent out documentary evidence that he received 65 cents per bushel for his potatoes has made the work of explaining prices unusually difficult.

Wm. Powell, a native of Euphemia township, died at his residence in Brooke, near Watford, on January 27th, in his 76th year. Mrs. Gage and Mrs. Robinson of Newbury are sisters.

Death came very suddenly to Donald Leitch McLean at his home on the 10th concession, Brooke. He had lived there all his life, and been a prominent member of various societies. He was 64 years of age.

A quiet wedding was solemnized in Chatham on Saturday, January 27, when Christina V., only daughter of Mr. and Mrs. Wm. McDonald, of Chatham, was united in marriage to Chas. J. Ellison of Chatham.

The Mennonites of Hague, Saskatchewan, have forwarded to Canada a contribution of \$1,400 as a mark of their appreciation of the peace and quietness guaranteed to them by the Government.

On account of the refusal of the Watford council to comply with the request of the Chalmers Company for a 5 per cent. increase on all electricity used, the town is likely to be without lights until the installation of hydro.

The Orangemen of Middlesex county propose to celebrate in Preston on July 12 this year, if suitable train arrangements can be made, otherwise a monster gathering will take place in London. The Essex Orangemen will celebrate in Chatham.

In Chatham on Wednesday, January 31st, Rev. Mr. Dickie, pastor of First Presbyterian Church, united in marriage Miss Eliza Jane Price, fourth daughter of Mr. and Mrs. Thomas Price, North Bothwell, and Warren D. Miller of Euphemia.

Reeve Archie Blaikie, of Westminster township, the newly elected warden of Middlesex county, was presented with a silver service and a glass water set in the dining-room of the Hotel Harrison, London, the gifts of the host and hostess, Mr. and Mrs. Louis Romer.

A western publisher says:—"We had been of the opinion that we had raised the price of this paper, but by comparing it with the price of food necessities we find it lower than before. Last year we charged two bushels of potatoes for a year's subscription to The Enterprise, and this year we get only one bushel."

An unusual discovery was made when some hunters near Ruthven fired into a big flock of crows in the snow. Not one of the birds moved, and when the men approached it was found that the birds were frozen stiff and had been dead for some time. Thousands of the crows have been here this winter, and it is supposed that those found, failing to find food, became too weak to fly and perished.

Courts by correspondence alone does not seem to be very satisfactory. A Detroit lady had her expectations badly shattered when, by marrying a man at Grand Junction, Col., she found that the lovely home he promised her was a box car furnished by her railway to its station in the north.

After ten days' life in the box car, funds arrived from her parents in Detroit, and she returned home.

Anglican Presbyterian Church, Oran, has a membership of 226, representing 60 families. During last year three were added to the roll and one was removed by death. The financial report for 1916 shows the amount raised for all purposes to have been \$1,088.02, divided as follows:—Congregational, \$857.57; budget, \$122.75; W. M., \$108.80; B. K., \$10.00; Y. P. C., \$140.82; and church school, \$20.00.

It is only necessary to read the testimonials to be convinced that Holloway's Corn Cure is unequalled for the removal of corns, warts, etc. It is a complete eating-salad.

EPHRAIM HORTON KILLED

Was Member of 135th Battalion, and Enlisted at Glencoe.

The first casualty to be reported in the 135th Battalion of Wardsville. His parents, Mr. and Mrs. J. Horton, were officially notified yesterday of his having been killed in action on February 5th. This indicates that those members of the 135th Middlesex Battalion who were drafted into other divisions in England and sent over to France have already been in action. Private Horton enlisted in "D" Company at Glencoe and was in training here last winter. He was billeted at the home of W. R. Sutherland.

Howard McLean and H. Niven were appointed pathmasters in divisions 18 and 28 respectively.

Council adjourned to meet Monday, March 5th, 10 a. m.

HARRY THOMPSON, Clerk.

Annual Public Meeting of Patriotic Society.

At a joint meeting of the town council and executive of the Patriotic Society, it was decided to hold the annual meeting in town hall on Friday evening, Feb. 16th, at 8 o'clock. The treasurer will give a full report of all money received and paid out for their different purposes for the year 1916.

Business of importance will be considered and the election of officers for 1917 will take place.

It is expected that the citizens will be out in good numbers. Red Cross societies are specially invited, and every one interested in the cause for which our brave boys are fighting.

J. N. Currie, E. M. Doull, President. Secretary.

A. E. Sutherland, Treasurer.

Guarding Sarnia Tunnel.

Owing to the existing war crisis, the staff of guards at the Port Huron entrance of the St. Clair tunnel has been increased, six more guards being added as a precaution against any possible damage on the part of sympathizers.

Twelve guards have been on duty for the past few months, six on the day shift, and six on the night shift. In addition to the guards, a number of blood-hounds are kept in leash in the vicinity of the portal, and it is understood that they are turned loose in the inclosed night.

The guards at the Sarnia portal are still on duty, and maintain a strict watch for prowlers. The tunnel powerhouse on Military street, Port Huron, is under guard, the watchmen being armed for any emergency.

Death of Thomas A. Ardies.

We have to record the death at Mayfair on Thursday, the 1st instant, of Thomas A. Ardies, an old and highly respected resident of this community.

He was born at the city of New York on September 26th, 1836, and was engaged as a boy in one of the stores in the city. At the outbreak of the American war he enlisted with the 84th Regiment of New York under Captain Trybell and saw service in several important engagements, in which he received a severe wound, for which he had been drawing a pension during the latter years of his life.

On July 12th, 1875, he and his mother and his wife moved to Canada and took up their residence on lot 8, in the first range south of the Longwoods Road in Ekfrid township, where he resided to the time of his death.

During the declining years of his mother and his wife, Sarah Gurney and Julia Brawley, he devoted himself to taking care of them, and showed them marked kindness and attention during their long illnesses.

In 1911 he married Bertha Wells, by whom he is survived. In American politics he was a Democrat, and in Canadian politics a staunch Liberal.

He was a kindly, generous neighbor and will be greatly missed in the community, where he was widely known.

He was a faithful member of the Covenanted Baptist Church and took great interest in the meetings held in connection therewith. Since the establishment of his home in this community, his house was an open house to those attending the various services in connection with that Church. He enjoyed the confidence and esteem of a wide circle of acquaintances and will be especially missed at the gatherings in connection with the Church to which he gave his time and his energies most unselfishly.

Would Eliminate Party Patronage

E. M. Macdonald has given notice of a resolution in the Commons which will put the test Sir George Foster's declaration of last session that the patronage system should be abolished, and which will find a responsive note throughout the country. The resolution is as follows:

"That in the opinion of this House the prevailing system of party patronage constitutes a menace to honest and efficient government, incites to great waste of resources and extravagance in its application to expenditures and appointments for military purposes, greatly injures the proper fulfillment of our duty to the nation, tends inevitably to corrupt and lower the tone of the public morals, and should be forthwith eliminated from our Federal administration."

PAINS LIKE THE POOR, ARE ALWAYS WITH US.—That portion of a man's life which is not made up of pleasure is largely composed of pain, and to be free from pain is a pleasure.

Simple remedies are always the best in treating bodily pain, and a safe, sure and simple remedy is Dr. Thomas' Electric Oil. You cannot do wrong in giving it a trial when required.

Metcalfe Council.

Meeting of Metcalfe council, Feb. 5th, 1917. Members all present. Minutes read, approved and signed.

Moved by Campbell and Denning, that the Dispatch be paid \$5, printing by-laws Murby drain, \$5.50, two hundred 2c post cards and printing same. C. Chapman, \$1.25, binding assessment roll: M. McIntyre, \$2.50, wood for half; Joe Blackmore, \$0.50, 1. 1916.

Moved by Denning and Campbell, that by-law No. 227 be passed as read a third time, and that C. Freer be appointed auditor in place of A. McLean.

Moved by Denning and Hawken, that the auditors' report be adopted, and that C. Freer be paid \$8, services as auditor, and R. Foster \$8.35 (\$8 services as auditor and 35c for stationery).

Howard McLean and H. Niven were appointed pathmasters in divisions 18 and 28 respectively.

Council adjourned to meet Monday, March 5th, 10 a. m.

HARRY THOMPSON, Clerk.

Appeal For Disabled Soldiers.

The following appeal has been received by local patriotic societies from Miss Kennedy, hon. secretary of the London Red Cross Society:

The great war is now well on into the third year, and back to Canada are coming the men who in the prime of health and strength went out to fight for freedom. They are coming back broken and disabled, and many of them victims of the terrible scourge of tuberculosis.

The Government is erecting at Byron Sanatorium special buildings where a number of these unfortunate heroes may receive care and treatment, and the London Branch of the C. R. S. C. has undertaken the furnishing and equipment of these buildings at a cost of at least \$15,000.

While this is distinctly Red Cross work, it is a special object, and the society counts on the generosity of its contributors throughout Western Ontario to aid in this magnificent work.

A contribution of \$500 enables the society or individual to name a room. These rooms are to accommodate from four to six patients and the buildings altogether will accommodate some 120 patients.

It is not well worth while to have a share in restoring these men to health and strength and enabling them to again take their places in the world, instead of allowing them to return to their homes to be a source of contagion to their families and the community at large?

If your society or any individual therein wishes to contribute any sum to this fund, kindly communicate with the treasurer or the corresponding secretary of the London Branch. Please make all cheques or money orders payable to the Red Cross Society.

Glencoe Public School.

Kilmartin Cemetery.

The annual meeting of the Kilmartin Cemetery Company was held at Burns Church, Moss, Feb. 5. Chairman, Dr. Fraser Smith; secretary, John McNaughton.

The auditor's report was read and adopted. The treasurer's report was received and adopted. Received from all receipts, \$370; expenditure, \$340; balance on hand, \$27.

Moved and seconded, that all plot holders be assessed \$2.

Would plot holders please be kind enough to hand in their contributions by postal order, registered letter or marked cheque, for the ensuing year, and oblige the trustees—David Leitch, Hugh A. McAlpine, John R. McLaughlan; auditor, Neil Munro; treasurer, A. L. Munro.

It is only necessary to read the testimonials to be convinced that Holloway's Corn Cure is unequalled for the removal of corns, warts, etc. It is a complete eating-salad.

CONVICTION QUASHED

Appeal of John L. McIntyre Sustained by the High Court.

Toronto, Feb. 14.—The Appellate Division yesterday quashed the conviction of John L. McIntyre, of Moss township, who was found guilty in November last of having "unlawfully killed and slain" his daughter, Irene McIntyre, aged 22 years, on April 7th, 1916, by failing to provide medical care and proper food during her last illness. The young woman died shortly after giving birth to a child. She was feeble-minded, and had for some time been in a very poor state of health. When McIntyre's conviction was secured the presiding judge granted a stated case, and it was upon this stated case that the conviction was quashed.

Will Seek Farm Help.

John Farrell, Immigration Agent, has opened an office in Port Huron with the object of attracting young Americans to this country to assist farmers. Mr. Farrell says the need of the farmers is very much greater this year. He expects to sign up at least 1,000 men, which is twice the number signed up last year. Farmers in need of help should get in touch with Mr. Farrell.

No. 5 Literary.

Owing to the unfavorable weather conditions on Thursday the attendance at the literary, No. 5, Ekfrid, was not so good as on former occasions. Nevertheless all report a good time. The debaters all deserve credit for the way they acquitted themselves at this their first attempt at debating in public. The debate, "Resolved that the country has more advantages than the city," was upheld by Willie Gardiner and Charlie Squire, while Will Gates and George Huston took the negative. The referees, Miss Blanche Coulthard, Andrew Strachan and Ross McEachern, decided in favor of the negative by two points. The program also included piano selections by Miss Jennie McRae, a song and also a morthorough selection by Campbell McRae, recitations by Margaret Gates, Viola Squires and Anna Belle Gates, speech, Mr. Twiss; song, D. H. McRae. Walter Squire helped out nicely with several selections on his gramophone. D. S. McEachern occupied the chair, and the committee for a week from to-night consists of Miss Sadie McKellar, Miss Maggie Baxter, Mac McAlpine and Walter Squire. The debate for to-night will be "Science vs. Religion." Speakers are D. S. McEachern, Dave McIntyre, John McNabb and Andrew Strachan.

A Wee Bit Weary.

One thing that gives the local editor a weariness of the spirit—aye, 'gods his goat.' Week after week, year in and year out, he praises the liberality of his community towards the church, missionary and patriotic funds; details the socks and shirts sent to the front, then the long letter that comes from the soldier who finds your name in the toe; records little Annie's and little Willie's progress at school; tells you when and where the next pie social or chicken supper invites you to shell out for the Red Cross; says nice things about Johnnie's recitation and Mary's piano performance at the last literary; buys a ticket for the next "quilt drawing"; faithfully records the address and presentation "as a slight token of regard" from Neighbor Jones or the school m'am leaves for a "new sphere of labor," and last of all writes and prints a glowing epitaph when you pass over to the Unknown. Yes, though the editor does all this, and does it cheerfully, he has known the same community to pocket thirteen dollars and fifty cents for its hogs, fifty cents for its eggs, and fifty cents for short-length cull stove-wood in a time of coal famine—and, when there is a small bit of printing to be done, hike off to some far-away town, seeking a cheap-skate to do the job. Aye, "Consistency, thou art a jewel."

Wants \$13,000 Damages.

Chatham, Feb. 10.—George Aaron Annett, reeve of Euphemia township, who was recently discharged from the asylum at London, where he had been confined for some time as a result of alleged mental derangement, has issued writs against six Kent county men, claiming a total of \$13,000 damages, as a result of their part in the legal proceedings which resulted in his being placed in the institution for care.

The defendants, whom he claims were guilty of misrepresentation, unprofessional duplicity, and issuing misleading affidavits in invoking the lunacy act on him, are W. R. Hickey, K. C. of Bothwell, and Wilson, Pike & Co., barristers, of this city, from whom he claims \$3,000; the Merchants Bank of Bothwell for \$5,000; Dr. T. K. Holmes of this city for \$2,000; W. Moorehouse of Euphemia township, for swearing to untrue affidavits, \$1,000; and A. D. Graham, of Bothwell, for similar affidavits, \$2,000.

The plaintiff is handling the case himself.

Patriotic Fund

Contributions for Red Cross, Patriotic and other similar funds may be handed or forwarded to the local treasurer at the Transcript office, or they will be acknowledged in these columns and forwarded to proper headquarters. The need is great; give as liberally as you feel that you can.

THROUGH THE DARK SHADOWS

Or The Sunlight of Love

CHAPTER XXI.—(Cont'd.)

"I both can and will," was the quiet answer. "But, come, let us seek a more retired spot."

He drew her almost forcibly out of the recess into the shadow of some palms, as Adrien Leroy, with a partner on his arm, approached the alcove.

"Oh! Mr. Leroy," said Lady Chet-

wold as they passed, "can you tell me who this latest arrival is?"

"I have not seen her," said Adrien rather wearily; his eyes were bent on Lady Constance, who had left him and was now dancing with Lord Standon.

"Oh, there she is!" exclaimed his voluble little companion. "Such a magnificent Cleopatra, isn't she?"

She drew his attention to a tall lady who was looking rather anxiously and constrainedly about her.

Her dress certainly deserved the name of magnificent. It was made for the greater part of apricot-colored satin, with gauze and tulle chifon full over it; from the shoulders was suspended a long train of imperial purple velvet, on which was embroidered in dull green, various Egyptian symbols. Her jewels too, which were abundant, consisting chiefly of diamonds and large emeralds, made her a regal, though almost theatrical figure.

Yet, as her eyes met the steady regard of Adrien's, she looked nervously round as if to make her escape.

Lady Chetwold felt Adrien give a slight start, and looking up, she saw that his lips had grown stern, and even through the mask detected the angry gleam in his eyes.

"Do you know her?" she whispered.

"Yes!" he said. "But it would be a breach of confidence to betray her, Lady Chetwold."

At the close of the dance he surrendered the little lady to her next partner, and went in search of the Cleopatra.

He soon espied her, seated in one of the recesses, and strode across to her. She started to her feet as Adrien approached, then sank back into her chair, she looked up at him defiantly.

At that moment the band struck up the music for the cotillon, and the mass of colors shifted in dazzling movement, as, amid the rustle of silk and the ripple of laughter, the dance commenced.

Adrien was engaged to Lady Constance for it; but in the height of his anger he had forgotten the fact.

"Ada!" he exclaimed in a low voice full of suppressed indignation. "What is the meaning of this intrusion?"

"You've no business here."

"No business here! Oh, haven't I?" she answered harshly, her bosom heaving, and her bejewelled hands clenching.

"No," he continued, standing in front of her so that she should not be seen by the dancers. "You know that as well as I do. How did you come?"

"On my legs," retorted the lady defiantly. "They're good for something else besides dancing in your theatre, Adrien. You're an unfeeling brute to speak to me like that after the way you've treated me. Do you think I'm going to be thrown aside like a worn-out glove, just because you want to marry that grand swell of a cousin?"

"Silence!" said Adrien in a tense whisper, and grasping her arm almost savagely. "Keep your mask on, and come with me. If you are discovered, I will not answer for the consequences."

She rose sullenly, but abashed by his unusual vehemence, for never yet had she seen him moved from his polite calm; and opening the door at the end of the room, he led her away from the brilliant ball-room.

"Now," he said as he closed the door and removed the mask from his face. "What does this mean? There is something more in your presence than I can understand. Whether marry or not, it can be nothing to you, Ada; you have the money which is all you care for."

"No I haven't," she retorted loudly, "and you know it."

He held up his hand with a gesture of contemptuous command.

"Speak quietly, if you can," he said, "or I leave you at once. Do you mean to tell me you have not received the deeds?"

"I do," she replied sulkily. "It isn't to use your carrying it off in this high-handed way. I want to know how it is to be conveyed to me. You promised me that you'd make me an allowance of a thousand a year, and give me the theatre when you left me. Well, you've left me right enough, but where's the money? That's what I want to know."

"I gave the deed to Jasper," said Adrien, looking down upon her with defiance, and vaguely wondering how he could ever have endured such a woman near him.

"You gave it to Jasper, did you?" said Ada, pulling or rather tugging off her mask sulkily, as she spoke.

"Hang me if I didn't think so all the time!" she exclaimed with a sudden change of tactics. "That Jasper's a thief, I heard you say something about these deeds, and Jasper told me long rigmorose that you wouldn't sign them. Whether that's true or not, Heaven only knows. Jasper's a bad one, and he's sold me out. He's got the coin, and I'll split on him, as I threatened. No, it's no use your trying to make me hush up, I will speak out. I'll show you what a fool he's made of you, you who have been so careful to him; I'll tell you a thing or two as will open your eyes a bit wider than they are now. I'll—"

"Be quiet!" said Adrien. "Not another word—there is some mistake. Jasper has forgotten, or has some reason for not giving it to you. He shall explain directly I can reach town. You shall have the money and the theatre, that I promise you; you know I have ever broken my word yet. Now you must go. Every moment you stay increases your danger. My father is old-fashioned, perhaps, but he would punish this as the greatest insult, and would punish it severely. You are no fool, Ada. How could you have done such a thing? Hush! slip on that domino. He pointed to a black mask, cloak, and rang the bell. "Get away as quickly as possible," he went

on as, now thoroughly subdued, she put on the cloak. "You shall have the money, I swear it."

On the servant entering, he hastily gave directions for her to be driven to the station; then without another word to her, he returned to the ball-room, just as his father's voice was heard inquiring for him.

"Ah; there you are, my boy. I wondered if anything had gone wrong. Are you ill?" he gazed keenly at Adrien's pale, unmasked face.

"No, sir, it is rather hot though in this dress," he returned hurriedly, hating even the very semblance of a lie. "I believe Constance is waiting for me," he continued. "Ah, yes, there she is. The ball is going off well, don't you think so?"

"No, sir, it is rather hot though in this dress," he returned hurriedly, hating even the very semblance of a lie. "I believe Constance is waiting for me," he continued. "Ah, yes, there she is. The ball is going off well, don't you think so?"

"Yes," he said, "your friends are pronouncing it to be a success. Mr. Paxhorn declares it is a vision of the period. But Constance is waiting."

His father nodded.

Replaced his mask, Adrien made his way to his cousin, who, as usual, was surrounded by a small group of courtiers.

She glanced up at him as he approached, and with a smile to the rest, took his proffered arm. As he looked at her sweet face, a thrill ran through him at the purity of her beauty—so great a contrast to that of the woman he had just dismissed that he loathed the very thought of ever having touched her hand. In that moment, the love he bore Constance welled up passionately in his heart, refusing to be suppressed, and again he tore off the velvet mask.

When the girl raised her calm eyes to his face, the ardent look in his startled her, and she determined to at least listen to any explanation he wished to give her.

"Where have you been, Adrien?" she said gently. "I thought you had forgotten me."

"No," he answered sharply, "that would be impossible; but I was called away. Do you care for this dance? Or would you give me just a few moments with you alone on the terrace?"

"Yes, if you like, Adrien," she said gently. "I am really tired now, and longing for the air."

"Come, then," he said; and catching up a silk wrap that lay on one of the seats, he threw it tenderly over her.

Together they passed out on to the terrace, and seemed to have slipped into another world, for rest a contrast was the peaceful moonlit valley beneath them to the brilliant, heated ball-room they had just left.

As the curtain door swung behind them, Jasper Vermont, alias Mephistopheles—his secret costume now changed to ordinary evening dress, and covered with a long black domino, similar to that which Ada had donned—shot a sharp glance after them; then with a sinister smile, he left the room by another exit, and made his way to the garden.

Keeping well within the shadow of the trees and shrubs, he crept down, directly under the terrace where Adrien had led Constance; here, motionless and scarcely breathing, he listened with eager ears.

"It is hot," said Constance, removing her mask, and letting the wrap fall back from her shoulders.

All the more reason you should be careful," said Adrien, replacing it gently.

She smiled, as she gazed up at him. "You look very tired, and so do I."

"This ball has been a strain on you, has it not?"

"Not more than usual," he returned. "At any rate, it will be my last for some time."

"Your last?" she echoed, looking up at him with wide, startled eyes.

"What do you mean, Adrien?"

"I am going away after to-night," he said hoarsely; for the sight of her beauty was goading him almost to despair.

"Going away!" she hardly breathed the words; her face had paled in the moonlight, till it looked almost unearthly. "Why?"

(To be continued.)

roll the paste all round it, pressing the ends together, and prick the top. Put on a greased tin, bake in a hot oven for twenty minutes and serve hot.

Plain Omelet—One ounce of cornstarch, two eggs, three-quarters teaspoonful of milk, one-half teaspoonful of pepper and made mustard, one teaspoonful of salt, one-half to one ounce of butter or lard. Separate the yolks from the whites of the eggs. Beat up the yolks in a small basin. Add a pinch of salt to the whites and beat to a very stiff froth. Blend the cornstarch with a little of the milk to a smooth cream. Stir in the rest of the milk and the yolks. Add the seasoning. Stir in the whites of the eggs with a whisk, mixing well. Put the butter into the omelet pan, allow it to get hot, then pour in the omelet. Cook the omelet as usual, but before turning put in the broiler under the gas jets for a second to set slightly, as this keeps it from falling flat. Serve at once on a very hot dish. If the cornstarch is omitted from this recipe it will require three eggs instead of two and so the addition is a very decided economy these times when eggs are such prohibited luxuries.

Cheese Pudding—Two ounces of cornstarch, one pint of milk, one-half ounce of butter, four ounces of grated cheese, one-half teaspoonful of salt, pepper and made mustard. Mix the cornstarch with a little of the milk to a smooth cream. Bring the rest of the milk to the boil and stir the cornstarch into it. Add the other ingredients. Boil for ten minutes, stirring all the time. Pour into a well-buttered pie-dish and bake in a very slow oven till a nice brown on the top, or brown before the fire. This is a nourishing and appetizing dish and one which appeals to men.

Another method of using cornstarch is in the preparation or reheating of vegetables, onions, cauliflowers, artichokes, carrots, turnips, almost anything, cooked as usual then put in a

fireproof dish covered with cheese sauce and baked in a quick oven for ten minutes make a delicious supper dish.

MOTHER SEIGEL'S SYRUP

The proof of Mother Seigel's Syrup is in the taking. That is why former sufferers, whose vitality was being sapped by Indigestion, say it is just excellent for stomach, liver and bowel troubles. Thanks to Mother Seigel's Syrup, they are now strong and well.

IS EXCELLENT FOR

If you are afflicted by Indigestion or other disorders of the stomach, liver and bowels take Mother Seigel's Syrup regularly for a few days; long enough to give it a fair chance to make its beneficial influence felt. Then note the improvement in your appetite, your strength, your general condition.

HEADACHES, BILIOUSNESS, CONSTIPATION, INDIGESTION.

The smallest bottle of Syrup contains three times as much as the 50c size.

How To Do Things.

A few drops of oil of lavender poured into a glass of very hot water will purify the air of a room almost instantly from cooking odors, and is especially refreshing in a sick-room.

If a little sausage is left over from breakfast, it will add flavor if broken up fine and mixed with the bread-crumbs to put on top of baked macaroni or scalloped potatoes or baked beans.

If you are fond of pumpkin pies and have no pumpkins, have you ever tried substituting carrots? Cook and prepare them the same as you would the pumpkin, and you'll find it hard to tell which is the better.

Don't fret because you haven't the time to keep a variety of fancy things baked up. The health of your family will be far better if you give them plenty of well-prepared plain foods, such as vegetables, meats, eggs, bread and butter, and fresh fruit or sauce for dessert.

In many homes there is a great hunt when any pattern is wanted. Next time you are in town step into the stationery store and get a package to big manila envelopes. Put one pattern in one of these and write on the outside what it is; and so on, till you have them all filed away. Then set these envelopes up on edge in some drawer. Ten cents will cover the cost and save many hours of hunting and lots of vexation.

When one has only materials enough for a little stock, it still pays to make it. It is very easy to cover this findings from steak, chops or chicken, one or all three, with cold water, and allow this to simmer two or three hours. If the result is not more than a cupful of stock, even that will materially add in nourishment and flavor to a can of soup or in the preparation of stews, gravies and vegetables.

Redpath SUGAR

"Redpath" stands for sugar quality that is the result of modern equipment and methods, backed by 60 years experience and a determination to produce nothing unworthy of the name "REDPATH".

"Let Redpath Sweeten it."

How to Measure Recipe Accurately

Over the kitchen table of one housewife there is a small shelf on which rest half a dozen cook books, a card cabinet with her tried recipes and other hints.

"Why do you need an additional cooking recipe cabinet with all those cook books?" she was asked curiously. "Because there doesn't seem to be any one standard way of measuring that all the authors of cook books use," she explained. "One will give some measurements in pounds, another in cupsful, another in pints, and I actually have one cook book that really has some fine old recipes—only it mixes measurements. In a single recipe I read about a cup of one thing, a dash of another, a pound of something else and a pint of still another ingredient. And, to cap the climax, I am asked to add seasoning to taste!"

More and more housewives are following the plan of keeping a personally prepared card cabinet of recipes that have been tried and found pleasing. And one of the great advantages of such a recipe system is that you can write your measurements in one standard way—the way you find best. If you prefer to measure something by the cupful, half-cupful, and so on, it will save much fussing and possible confusion if you enter all your recipes in the standard way. Or if you like to weigh everything—which is the absolutely accurate method, although it takes more time than any other—enter all your recipes in this manner.

Here is a standard table showing how you can transfer one measurement from another. Paste this on a card and hang it over your work-table in the kitchen:

Table of Corresponding Weights and Measures

In one pound—Two cupfuls of any liquid, two cupfuls of butter, two cupfuls of sugar, four cupfuls of flour, three cupfuls of other meal, ten medium sized eggs.

In one ounce—One tablespoonful of liquid, one heaping tablespoonful of butter, one heaping tablespoonful of lard, one heaping tablespoonful of sugar, two heaping tablespoonfuls of coffee, two heaping tablespoonfuls of flour, two heaping tablespoonfuls of powdered sugar.

In one pint—One pound of any liquid, two cupfuls of any liquid, four gills of any liquid, sixteen tablespoonfuls of liquid.

An old-fashioned saying, "a pint's a pound," is easily remembered, and often helps one in quickly determining correct measurements.

BREAD

BIG, wholesome, nutritious loaves, of delicious nut-like flavour, downy lightness and excellent keeping qualities.

Look at That!

Housewife's Corner

Cornstarch is Valuable.

Why do we not make a more general use of cornstarch? As a rule few cooks employ it for anything but occasional puddings or for thickening sauces or soups, while it could with advantage take part in a thousand and one dishes and add its nourishment to the other ingredients. For example, you can substitute cornstarch for part of the flour in making cakes and biscuits, and you will be surprised to find how much lighter and more digestible they will become. In cold weather cornstarch is especially valuable because, being a pure starch food, it supplies the body with heat and energy. Of course, like every other starchy food, it requires careful cooking, for there is nothing more indigestible than insufficiently cooked starch, but with that proviso there can be nothing better in the way of food.

When mixing the flour and cornstarch for cake use not more than one-quarter of the starch unless of course, you are using a recipe which gives it as one of the ingredients, and then you have the benefit of the experience of others and the proper proportions have already been worked out.

The following recipe may give you some suggestions on the matter:

Sausage Rolls—Two ounces of cornstarch, six ounces of flour, eight ounces sausage, one-quarter teaspoonful salt, four ounces shortening, butter, oleomargarine or vegetable butter, cold water, a few drops of lemon juice. Blanch and skin the sausages. Mix the cornstarch, flour and salt together and rub in the

shortening. Make into a stiff paste with the cold water and lemon juice, turn on to a floured board and roll into a thin paste. Fold in three and turn half way round so that the open ends are to and from you, then roll out again and repeat four times, at the third and fourth turnings dusting over with flour. After the last folding roll out to about an eighth of an inch thick and cut into pieces about four or five inches square. Wet the edges of the paste all around, put a piece of cooked sausage in the middle

and the ripple of laughter, the dance commenced.

Adrien was engaged to Lady Constance for it; but in the height of his anger he had forgotten the fact.

"Ada!" he exclaimed in a low voice full of suppressed indignation. "What is the meaning of this intrusion?"

"You've no business here."

"No business here! Oh, haven't I?" she answered harshly, her bosom heaving, and her bejewelled hands clenching.

"No," he continued, standing in front of her so that she should not be seen by the dancers. "You know that as well as I do. How did you come?"

"On my legs," retorted the lady defiantly. "They're good for something else besides dancing in your theatre, Adrien. You're an unfeeling brute to speak to me like that after the way you've treated me. Do you think I'm going to be thrown aside like a worn-out glove, just because you want to marry that grand swell of a cousin?"

"Silence!" said Adrien in a tense whisper, and grasping her arm almost savagely. "Keep your mask on, and come with me. If you are discovered, I will not answer for the consequences."

She rose sullenly, but abashed by his unusual vehemence, for never yet had she seen him moved from his polite calm; and opening the door at the end of the room, he led her away from the brilliant ball-room.

"Now," he said as he closed the door and removed the mask from his face. "What does this mean? There is something more in your presence than I can understand. Whether marry or not, it can be nothing to you, Ada; you have the money which is all you care for."

"No I haven't," she retorted loudly, "and you know it."

He held up his hand with a gesture of contemptuous command.

"Speak quietly, if you can," he said, "or I leave you at once. Do you mean to tell me you have not received the deeds?"

"I do," she replied sulkily. "It isn't to use your carrying it off in this high-handed way. I want to know how it is to be conveyed to me. You promised me that you'd make me an allowance of a thousand a year, and give me the theatre when you left me. Well, you've left me right enough, but where's the money? That's what I want to know."

"I gave the deed to Jasper," said Adrien, looking down upon her with defiance, and vaguely wondering how he could ever have endured such a woman near him.

"You gave it to Jasper, did you?" said Ada, pulling or rather tugging off her mask sulkily, as she spoke.

"Hang me if I didn't think so all the time!" she exclaimed with a sudden change of tactics. "That Jasper's a thief, I heard you say something about these deeds, and Jasper told me long rigmorose that you wouldn't sign them. Whether that's true or not, Heaven only knows. Jasper's a bad one, and he's sold me out. He's got the coin, and I'll split on him, as I threatened. No, it's no use your trying to make me hush up, I will speak out. I'll show you what a fool he's made of you, you who have been so careful to him; I'll tell you a thing or two as will open your eyes a bit wider than they are now. I'll—"

"Be quiet!" said Adrien. "Not another word—there is some mistake. Jasper has forgotten, or has some reason for not giving it to you. He shall explain directly I can reach town. You shall have the money and the theatre, that I promise you; you know I have ever broken my word yet. Now you must go. Every moment you stay increases your danger. My father is old-fashioned, perhaps, but he would punish this as the greatest insult, and would punish it severely. You are no fool, Ada. How could you have done such a thing? Hush! slip on that domino. He pointed to a black mask, cloak, and rang the bell. "Get away as quickly as possible," he went

on as, now thoroughly subdued, she put on the cloak. "You shall have the money, I swear it."

On the servant entering, he hastily gave directions for her to be driven to the station; then without another word to her, he returned to the ball-room, just as his father's voice was heard inquiring for him.

"Ah; there you are, my boy. I wondered if anything had gone wrong. Are you ill?" he gazed keenly at Adrien's pale, unmasked face.

"No, sir, it is rather hot though in this dress," he returned hurriedly, hating even the very semblance of a lie. "I believe Constance is waiting for me," he continued. "Ah, yes, there she is. The ball is going off well, don't you think so?"

"Yes," he said, "your friends are pronouncing it to be a success. Mr. Paxhorn declares it is a vision of the period. But Constance is waiting."

His father nodded.

Replaced his mask, Adrien made his way to his cousin, who, as usual, was surrounded by a small group of courtiers.

She glanced up at him as he approached, and with a smile to the rest, took his proffered arm. As he looked at her sweet face, a thrill ran through him at the purity of her beauty—so great a contrast to that of the woman he had just dismissed that he loathed the very thought of ever having touched her hand. In that moment, the love he bore Constance welled up passionately in his heart, refusing to be suppressed, and again he tore off the velvet mask.

When the girl raised her calm eyes to his face, the ardent look in his startled her, and she determined to at least listen to any explanation he wished to give her.

"Where have you been, Adrien?" she said gently. "I thought you had forgotten me."

"No," he answered sharply, "that would be impossible; but I was called away. Do you care for this dance? Or would you give me just a few moments with you alone on the terrace?"

YOUNG FOLKS

Nannie Goat and the Cake.

One night, just as Billy Bumpus sat down to tell his daughter, Nannie Goat, a story, he heard a voice calling, "Father! Father!" He went to the head of the stairs and Mrs. Bumpus whispered something in his ear. Then he went back to tell Nannie the following story:

"Once upon a time there were two little goats who had very good smellers."

"You mean noses," interrupted Nannie Goat.

"Yes," continued her father. "Two little goats with wonderfully good noses, who could smell a piece of cake about two miles off."

"One of the little goats had a mother who used to make cake for her, and she never, never refused to give the little goat some of the cake which she had baked."

"One day, what do you think happened?"

"I cannot imagine," said Nannie Goat, all aglow with curiosity.

"Well," said Billy Bumpus, looking very crafty and stroking his whiskers, "the two little goats smelled the cake which one of the little goat's mother had made and both of them waited until the cake was done and had been set out on the kitchen window shelf to cool, and then—"

"I know the rest of the story," said Nannie Goat, sitting bolt upright in bed.

"So does another little goat friend of yours, Miss Jemima Goat." Then he added, "I think both of you ought to have a spanking."

"I think so, too," said Nannie Goat, "but before you spank me I really would like to tell mother how good that cake was. I think it is wonderful that you selected such a good cook for a wife. The cake was delicious. You know good cooks are scarce nowadays."

"You are a dear, sweet daughter," said Billy Bumpus, as he gave Nannie a great big hug.

"I'm ready for you to spank me," answered Nannie as she turned over.

"I guess, not to-night," said her father, the tears coming into his eyes.

"But it is always a better plan to ask for things first than to be found out afterward, as you cannot fool anybody but yourself."

"Then, Daddy, will you give me another piece?"

"Of course! Of course, my dear," replied Billy, as he scooted downstairs and into the pantry where he found Mrs. Bumpus.

"I guess our dear daughter has learned a lesson," he said, as he kissed his wife. "May she have another piece of cake?"

"Yes," replied Mrs. Bumpus, with a smile, "and so may her father."

—

AUSTRALIA'S NEW AUTO TIRE.

Made of Native Fibre and Pronounced Bullet, Nail and Glass Proof.

A new kind of automobile tire—"the homing"—has appeared in Australia. It is made of a native fibre. The need that gave rise to its contrivance, how it is made, and how used, are described in the Weekly Bulletin, Canadian Department of Trade and Commerce, as follows:

"As in other countries of vast distances and comparatively few travelling facilities, the advent of the motor car in Australia has, to a very considerable extent, solved the difficulties of transportation. In many parts of the country the roads are merely bush tracks or overland stock routes, on which herds of cattle are driven long distances to the city markets or coastal freezing works."

"The rough nature of the country over which the cars travel and the excessive heat often experienced have made the cost of rubber tires a serious item in maintenance, thereby causing many experiments to obtain a substitute for rubber at a moderate cost. The invention and recent perfection of the Australian 'homing' tire is claimed to have solved the problem of producing an emergency tire at a comparatively small cost. Tests with tires made of various kinds of fibre were made, with the result that coir fibre was found to be the most suitable for the purpose because of its lightness, cheapness, resilience, and durability. The greatest difficulty was to discover a method of joining the ends of the rope to make a complete circle of the same size, but eventually a new splice was invented, and the tire as now sold in Australia is perfect of its type."

"When first placed on the market the 'homing' tire was sold as an emergency tire in case of a puncture or blow-out, but it proved so satisfactory that in the country districts of some of the States the rope tires are frequently used on all the wheels of motor cars, particularly for station or ranch work and over rough and stony country."

"The tires are bullet, nail, and glass proof, and if a speed of sixteen miles is not exceeded it is claimed that they are almost as soft riding as pneumatic tires. It should be understood that the 'homing' tire takes the place of both inner tube and cover, being attached to the rim by four or five straps."

In Siam the musical scale is an equal division of the octave into seven parts and music never is written, but learned by ear and handed down traditionally.

The Business of Being a Boy

is a strenuous employment. Sturdy boys and girls are not built out of books alone. The best food for growing youngsters is **Shredded Wheat**, the whole wheat food that builds healthy tissue, good bone and develops sound teeth and healthy gums. For breakfast or any meal, with milk or cream. Delicious with preserved fruits.

These patterns may be obtained from your local McCall dealer or from the McCall Company, 70 Bond Street, Toronto, Ontario. "Dept. W".

FREEZING OF WATER PIPES.

A Solution Has Been Discovered to Prevent It.

A mixture which is declared to have proven successful in preventing water pipes from freezing is described by Thomas W. Benson as follows:

"To a solution of thin boiled starch add sawdust until the mixture forms a thick paste. A fine sieve may be used to clear this sawdust from lumps."

"Heavy cord is first wrapped around the pipe, spacing the turns about one-half inch. A one-fourth inch layer of the mixture is smeared on and allowed to dry; then a second layer is put on and smoothed up. The string acts as an anchor to make the coating adhere to the pipe closely. Whitewash or paint may be used to give a finish for inside pipes, but for outside work cover the coating with hot tar. If it is desired to have a very neat covering wrap the sawdust coating with cloth or canvas, applying it in narrow strips like a bandage."

—

but I'm a-goin' to wash them clothes."

And dashing in, he led his companions in a charge to victory.

—

FLORA OF THE ANTIPODES

Great Forests of Australia Filled With Sunshine and Flowers.

One readily understands why the Australian loves his trees, says the National Geographic Magazine. The groves of giant eucalyptus form pictures never forgotten, and the scent of the wattle brings a homesick feeling like the smell of sage to the westerner.

The flora is not only beautiful, it is unique, and has no counterpart in other lands. Of the 10,000 species of plants, most of them are purely Australian, and are unknown even in New Zealand. The general impression one gets of Australian forests is their total unlikeness to anything seen elsewhere.

The great forests of timber trees are not damp and shaded and all of one species, but are well lighted and filled with other forests of shorter trees. In places the woods consist of large widely spaced trees surrounded only by bunch grass, and even in areas where water is not to be found on the surface for hundreds of square miles true forests of low trees are present.

Forms which may be recognized as tulip, lily, honeysuckle and fern take on a surprising aspect. They are not garden flowers, but trees, and the landscape of which they form a part reminds one of the hypothetical representations in books of science of a landscape of Mesozoic time, a period antedating our own by millions of years.

The trees are indeed those of a bygone age. In America and Europe shadowy forms of fossil leaves of strange plant species are gathered from the rock, and studied with interest; in Australia many of these ancient trees are living. The impression that one is looking at a landscape which has forever disappeared from other parts of the world is so vivid that the elms and maples and oaks in some of the city streets strike a jarring note.

MAN'S WORK.

How a Boy's School Learned to Live Up To Their Motto.

In the hills of northern Georgia the Berry School for Boys believes in doing whatever needs to be done. Its motto is, "Be a lifter, not a leaver."

But the position that it holds and the ideals that it maintains were not attained without a struggle. In The Men of the Mountains, Mr. Arthur W. Spaulding tells the story of one of the first crises in the history of the school.

The mountain boy was ready to plough in the fields, chop in the woods, hammer on the house; he was not wholly off his ground in milking the cows, cooking his food and making his bed; but there were some things required of him that were too obviously woman's work. The first Monday Miss Berry summoned her young guard of mountaineers for their first lesson in laundering. The laundry was a wash tub under a tree.

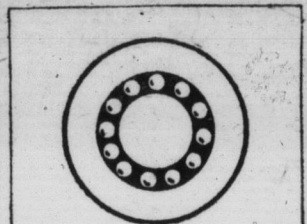

"Now, boys," said Miss Berry, "we are going to wash clothes. I will show you how. Then each boy is to wash his own garments."

There was silence, an electric silence, while the mountaineers considered. Then their spokesman, a tall, strapping young fellow, said, "No, ma'am! I ain't never seen no man do no washin', and what's more, I ain't goin' to do it."

Calmly Miss Berry played her last card. "If you will not do the washin'," she said, "you may watch me while I do it for you."

Into the tub went her round, white arms. It was her first washing, likewise. Up and down "sloshed" the clothes over the washboard; up and down bent the back of the gentle washerwoman. The boys stood sheepishly regarding her. Exhausted, she finally straightened her aching back and leaned in weariness against the tub. The chivalry of the mountaineer asserted itself at last.

"I ain't never seen it done," declared the boy who had spoken before,

MICA AXLE GREASE

IF FOOD DISAGREES DRINK HOT WATER

When food lies like lead in the stomach and you have that uncomfortable, distended feeling, it is because of insufficient secretion of the stomach combined with acid and food fermentation. In such cases try the plan now followed in many hospitals and advised by many eminent physicians of taking a teaspoonful of pure, bi-carbonate of soda in half a glass of water, as hot as you can comfortably drink it. The hot water draws the blood to the stomach and the bi-carbonate neutralizes the acid and stops the food fermentation. Try this simple plan and you will be astonished at the immediate feeling of relief and comfort that always follows the restoration of the normal process of digestion. People who find it inconvenient at times to secure hot water and travellers who are frequently obliged to take hasty meals poorly prepared, should always take two or three five-grain tablets of Sloan's Liniment after meals to prevent fermentation and neutralize the acid in their stomach.

—

Rheumatism attacks the "outside" man. Pains and aches stiffen his joints and muscles and reduce his efficiency. At the first twinge get Sloan's Liniment, easy to apply, it penetrates without rubbing and soothes the soreness.

After that long drive or tedious wait in the cold rain apply Sloan's Liniment to those stiff fingers, aching wrists and arms.

For gout, neuralgia, toothache, bruises, sprains, cold feet, it is promptly effective. At all drug stores, 25c, 50c and \$1.00.

—

Sloan's Liniment KILLS PAIN

—

Reward of Virtue.

"Father, gimme a good lickin' and make me cry," was the astonishing request little Jimmy made one day.

"What makes you want such an absurd thing?" inquired father.

"You'll hit me and I'll holler with all my might and mother will wipe my face with her apron and give me a penny and I'll buy candy," came the logical rejoinder.

Minard's Liniment Cures Garget in Cows.

Welcome, Little Stranger!

An interesting event occurred in the household of an eminent scientist not long ago. The professor, like most professors, is very absent-minded.

The new arrival was announced by the nurse to the professor, who chanced at the time to be in his study, very much absorbed in some abstruse calculation.

"Professor," said the nurse, very proudly, "it's a boy."

The professor looked up half understandingly.

"Well," said he, "ask him what he wants."

Contentment is not only better than riches—it is riches.

Minard's Liniment Cures Colds, Etc.

FENCING THE HIGHWAYS.

A Conspicuous Evidence Of How Canada Is Being Rapidly Settled.

In a journey to-day across the Dominion, one is impressed by the miles of farm fencing, particularly in the far west. It seems but a day when the vast stretches of our Western territories from Manitoba to the Coast were one wide field. To-day, for hundreds of miles, in any direction you travel, railroad and other property is substantially fenced; it shows to what extent these vast areas have come under cultivation either for crops or stock. No better evidence of substantial growth could be had. It is also a tribute to the quality of fencing to be had of Canadian manufacturers.

They Made Him A Different Man

What B. Draper Says of Dodd's Kidney Pills

His Troubles Were Numerous and of Long Standing. But Four Boxes of Dodd's Kidney Pills Drove Them All Away.

Sedley, Sask., Feb'y 12th (Special.) "Dodd's Kidney Pills made me a different man." The speaker was Mr. Benjamin Draper, well known and highly respected here. He is a fine healthy representative of the prairie provinces and he says he owes his health to Dodd's Kidney Pills.

"I was in bad shape all round when I started to use Dodd's Kidney Pills," Mr. Draper continued. "My trouble came from hard work when I was young. My joints got stiff, my muscles cramped and I suffered terribly from a sore back. I was depressed and low spirited, I was always thirsty and I had flashes of light before my eyes."

"I had rheumatism and heart flutterings, my appetite was fitful, my memory was failing and I was troubled with shortness of breath. Four boxes of Dodd's Kidney Pills made me a new man."

Dodd's Kidney Pills cured all Mr. Draper's troubles because they all came from sick kidneys. If you have any of his symptoms Dodd's Kidney Pills will help you.

Alaskan Dogs in Alsace.

When the transportation of supplies through the snow in the Vosges last winter was of urgent importance, the French army authorities conceived the idea of using dog-drawn sledges, and several hundred trained animals from Alaska, northwestern Canada and Labrador were obtained. With the ending of winter, the dogs continue to be useful in another way. In the London Chronicle, Mr. H. Warner Allen, representative of the British press with the French army, tells how they are now being harnessed to two-foot-gauge light railways, which run everywhere behind the front, and they are capable of drawing the heaviest load up the steepest gradient. Eleven dogs, with a couple of men, can haul a load that weighs a ton up the most precipitous slopes of the mountains, and I am told that two teams of seven dogs each could do the work of five horses in this difficult country, with a very great economy of men. Of the three breeds in service, the best is the Alaskan, although he is perhaps the weakest of them all. His courage never fails, and he will work until he drops.

Fairville, Sept. 30, 1902.

Minard's Liniment Co., Limited.

Dear Sirs,—We wish to inform you that we consider your MINARD'S LINIMENT a very superior article, and we use it as a sure relief for sore throat and chest. When I tell you I would not be without it if the price was one dollar a bottle, I mean it. Yours truly, CHAS. F. TILTON.

To Relieve Catarrhal Deafness and Head Noises

If you have Catarrhal Deafness or head noises go to your druggist and get 1 ounce of Farnist (double strength), and add to it 1 pint of hot water and 4 ounces of granulated sugar. Take 1 tablespoonful four times a day.

This will often bring quick relief from the distressing head noises. Clogged nostrils should open, breathing become easy and the mucus stop dropping into the throat. It is easy to prepare, costs little and is pleasant to take. Any one who has Catarrhal Deafness or head noises should give this prescription a trial.

Any druggist can supply you, or a bottle will be sent on receipt of 75c. postal note or money order. Address International Laboratories, 74 St. Antoine St., Montreal, Canada.

AN EXCELLENT MEDICINE FOR LITTLE ONES

Baby's Own Tablets are an excellent medicine for little ones. They sweeten the stomach; regulate the bowels, break up colds and simple fevers, cure constipation and make teething easy. Concerning them Mrs. E. Quinn, Paramo, Que., writes:—"Baby was troubled with constipation and nothing helped him till I began using Baby's Own Tablets. They are an excellent medicine for little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

AUTOINTOXICATION OR SELF-POISONING

The Dangerous Condition Which Produces Many Well Known Diseases.

HOW TO GUARD AGAINST THIS TROUBLE

"FRUIT-A-TIVES"—The Wonderful Fruit Medicine—will Protect You

Auto-intoxication means self-poisoning, caused by continuous or partial constipation, or insufficient action of the bowels.

Instead of the refuse matter passing daily from the body, it is absorbed by the blood. As a result, the *Kidneys and Skin are overworked*, in their efforts to rid the blood of this poisoning.

Poisoning of the blood in this way often causes Indigestion, Loss of Appetite and Disturbed Stomach. It may produce Headaches and Sleeplessness. It may irritate the Kidneys and bring on Pain in the Back, Rheumatism, Gout, and Rheumatic Pains. It is the chief cause of Eczema—and keeps the whole system unhealthy by the constant absorption into the blood of this refuse matter.

"Fruit-a-tives" will always cure Auto-intoxication or self-poisoning—as "Fruit-a-tives" acts gently on bowels, kidneys and skin, strengthens the bowels and tones up the nervous system. 50c. a box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

The Transcript

Published every Thursday morning from THE TRANSCRIPT Building, Main Street, Glencoe, Ontario. Subscription—To addresses in Canada and all points in the British Empire, \$1.50 per year, \$1.00 for eight months; to addresses in the United States, \$2.00 per year—payable in advance.
ADVERTISING.—The Transcript has a large and constantly growing circulation. A limited amount of advertising will be accepted, at moderate rates. Prices on application.
JOB PRINTING.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programmes, cards, envelopes, office and wedding stationery, etc.
Address all communications and make remittances payable to A. E. SUTHERLAND.

THURSDAY, FEBRUARY 15, 1917

Time and Solitude Are Essential in Learning to Think Easily.

An important element in easy thinking is: Opportunity for thought in time and in solitude.

Many of us are "too busy," but with far less productive things, to really live or to really think. One should make time, make solitude for thought. People are often too much continuously together, especially young people. Each individual is separate and requires individual separate thought.

One in general should room by one self or else in some way manage to spend considerable time alone, along the seashore or brook side or in one's room. The gentle exercise of a stroll or of a slow bicycle ride resulting in the attention to itself is our ideal stimulant and occasion for thinking unless the attention wanders too much outwardly. The time should be somehow had in which to be alone.

Schools are oftentimes too crowded to allow their students to think. One can afford as a matter of dollars and cents to take an extra year in school if one can learn to think by doing so. The time so used is a rich and certain investment.

In default of better time a half hour after waking or before rising is a good time to think, and many people have their most productive and original thoughts occur to them thus in the morning and early after a good night's rest.—Dr. G. Van N. Dearborn in Scientific American.

PORSON'S WEAKNESS.

The Drink He Got From Mrs. Hoppner's Private Bottle.

In "Samuel Rogers and His Circle" is this anecdote about Richard Porson, the famous classical scholar and professor of Greek:

When Hoppner, the painter, was residing in a cottage a few miles from London, Porson one afternoon suddenly arrived there. Hoppner said that he could not offer him dinner, as Mrs. H. had gone to town and had carried with her the key of the closet which contained the wine. Porson declared, however, that he would be content with a mutton chop and beer from the next ale house and accordingly stayed to dine.

During the evening Porson said, "I am quite certain that Mrs. Hoppner keeps some nice bottle for her private drinking in her own bedroom, so pray try if you can lay your hands on it." His host assured him that Mrs. H. had no such secret stores; but Porson insisting that a search should be made, a bottle was at last discovered in the lady's apartment, to the surprise of Hoppner and the joy of Porson, who soon finished its contents, pronouncing it to be the best gin he had tasted for a long time.

Next day Hoppner, somewhat out of temper, informed his wife that Porson had drunk every drop of her concealed dram. "Drunk every drop of it!" cried she. "Heaven above, it was spirits of wine for the lamp!"

THE HIGH COST OF LIVING.

Steps Being Taken by Government to Relieve Situation.

The Government have under consideration a number of suggestions of means for relieving the situation created by the upward march of food prices. The best of these suggestions are to be embodied in an order-in-Council to be passed under the War Measures Act, regulations adopted in this way being immediately operative. In other words, by taking action under the powers conferred by the War Measures Act, it will be possible to afford relief at once, without waiting for a session of Parliament and the passing of new legislation.

In so far as the rise in food prices results from the natural operation of the law of supply and demand, there is little that the Government can do, but action is possible and, it is understood, will be taken, to prevent the inflation of prices by artificial means, such as the cornering of supplies and the storing of large stocks for speculative purposes.

The order-in-Council under which means of meeting this situation will be provided, has not been prepared. Its probable contents as outlined will be a set of machinery which will facilitate action by municipalities. For instance, there will be a clear definition of what is to constitute illegal manipulation of the food market, and there will be provided a direct method under which a municipality may proceed in case of a violation of the new regulations.

It is considered likely also the Government will establish a system of inspection, under which the amount of stock of various foodstuffs in the country may be checked up from time to time. This will operate effectively, it is believed, to prevent the hoarding up of food stocks by speculators. The Ministerial sub-committee appointed recently is considering the proposed regulations and an official announcement will be forthcoming very soon.

Provide Girls for Farms.

Some important changes and amendments have been made by the Department of Education for the school year of 1916-17. The regulations governing the issuing of certificates to young men of the High and Continuation schools and Collegiates who enlist as they now stand, will permit the student to write upon his examination before Easter, and get his certificate for admission to the Normal schools or Faculty of Education without completing the school year. Under the former system, where the examination was not held, the student had to depend upon the recommendation of the principal or complete his year at special classes after his term of service in the army expired. Such an arrangement will still apply to students who enlist before the Easter examination.

The new regulations permit High School Entrance Boards to free from examination and grant certificates to boys and girls preparing in Forms IV, V, and VI of the Public or Separate schools for junior graduation diplomas or junior High school entrance certificates. In the same way, certificates will be granted to pupils of the fifth form for senior graduation diplomas, senior High school entrance, and entrance to the Model schools, or in the High and Continuation schools for entrance to the Model and Normal schools or Faculty of Education.

The whole reason for these conditions is that school girls may be allowed time to help on the farm, and in this way relieve, to some extent, the pressure of work caused by the enlistment of the men. The main requirement is that the pupil, before securing a certificate in the new way, must show that he or she has been employed on a farm in Ontario during the summer.

A Daring Canadian Airman.

Lieut. Ernest Hicks, who has just received the Military Cross, has done remarkable things. He brought down two enemy machines and drove back over the lines three others. On one occasion he came down to 800 feet and bombed trains. Lieut. Hicks is a Canadian, and it is barely four months since he made his first flight. He crossed to England with the Princess Patricia's Regiment, and was wounded in the Ypres fighting. When he recovered he was transferred to the Flying Corps, and the London correspondent of The Manchester Guardian tells us of his latest experience. About 20 miles behind the German lines he engaged two enemy machines, and in the worry he "forgot Archie" and did not dodge, and a big piece of shrapnel pierced his tank and the exhaust caught fire. He landed home as hard as he could, expecting every moment his machine would go "bust" and his end would come. But he held on, although partly blinded, and by great luck got a glimpse of a wood he knew, and made a lucky landing, tearing his burning clothes from him. There was tremendous luck in this escape, but what iron nerve and spirit of steel to have carried on and won through! Many of our airmen have been in such inconceivable straits as these and carried on. "After the war," says The Guardian, "no one will have the foolishness to go to Troy or Agincourt or Dumas' novels when they want to speak of heroes."

In Dr. Johnson's Seat.

An American tourist visiting the famous old Fleet street inn, the Cheeshire Cheese, sat down in what is reputed to be Dr. Johnson's chair. "Do you know," said the cicerone, impressively, "that you are now sitting in Dr. Johnson's chair?" "I'm sorry," said the American, and he got up.

Getting More Petrol.

Petrol allowances on a much more generous scale are to be granted to private motorists and to motorcyclists in England. The new regulations permit all owners of private cars to have a minimum of 15 gallons a month for the six months November to April on making application for that quantity.

THE MERCHANTS BANK OF CANADA

JOINT ACCOUNTS

This is the most convenient form for a bank account. Forms may be obtained for this purpose on request. Accounts may be opened in two or more names, without bother or expense. Enquire at our office for further particulars regarding this excellent feature of a bank account. Why not give your wife an interest in your affairs by opening a joint account in both names? She will appreciate it and will have ready money in case anything should happen you.

CHEVROLET

\$695 f. o. b. Oshawa

Valve-in-head Motor Electric Lights and Starter Full Equipment

Here is the car that has reached an unassailable position. No adverse criticism can injure its reputation. It is now sold on every continent. What is your motive in paying more for a car? Bear in mind your \$200 to \$1,000 extra goes only to pay for increased fuel, tire and oil-burning capacity, without any additional convenience or comfort.

THE CHEVROLET IS A 1917 CAR

It is a combination of up-to-date ideas. You are not buying anything antique, but on the other hand the most economical car in existence, regardless of price. This goes to show that they do not stick to any principle of construction when they think they can get a better one.

It is the result of W. C. Durant's 16 years of motor building experience. If you are familiar with automobile history you will not require any other guide in your purchase beyond this statement.

The many added improvements more than compensate for the small raise in price.

ing up as much of their houses as possible. Many are burning wood as a matter of necessity when they can obtain it at a reasonable price. Warmer weather, now among the probabilities, will do much to relieve the situation.

The Junior Red Cross Society urges everybody to save newspapers, scrap papers (clean), magazines, book government publications of all kinds (all covers to be removed). These may be left at any time at the library at Mr. Leitch's. Please note—(1) The papers and magazines securely, each in separate bundles, and scrap papers in bags; (2) kindly bring in accumulations as soon as possible.

PERSONAL AND SOCIAL

—Bill George of Sarnia spent Sunday at his home here.

—Tom Siddall of Cairo is spending a few days in Glencoe and vicinity.

—Mac Linklater of Swift Current spent Sunday at D. P. Mitchell's.

—Lorne Wilson of Edmonton is renewing acquaintances in Glencoe.

—Mrs. Wm. Watterworth is visiting Mr. and Mrs. Ernest Gosnell at High-gate.

—Mac Leitch of St. Thomas spent Friday with his mother, Mrs. Mary Leitch.

—Orvin Ramsey is around again after being ill with typhoid fever for some time.

—J. C. Elliott, M. P. P., left for Toronto Monday evening for the opening of the Legislature.

—Mr. and Mrs. John D. Anderson of Olean, N. Y., are visiting their daughter, Mrs. A. E. Sutherland.

—Wm. Thomson, who went to Florida on Jan. 3rd for the hope of getting relief from a protracted illness, is not, we regret to learn, making any improvement.

—Mr. McMahon of Conquest, Sask., who has been visiting friends in this vicinity for some time, is leaving this week to make a visit at his former home at Creemore before returning to the West.

—Miss Annie Davison returned to her home at Fergus on Friday morning. Prior to leaving Glencoe Miss Davison was tendered several social functions as a mark of esteem.

Among these, Mrs. (Dr.) McIntyre had an evening at cards on Wednesday, when presentation of club bag and piece of cut glass was made and a complimentary address read, and on Thursday afternoon Miss Margaret Stinson gave a young folks' tea and handkerchief shower in her honor.

Help for Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passages tenaciously. Dr. J. D. Kennedy's Asthma Remedy is daily curing cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Choice table butter at Mayhew's. Milk for sale at W. A. Currie's house.

Young calf for sale.—Neil McAlpine, Glencoe.

Row Douglass will do custom sawing at Robert Abbott's this spring. 52

Two colts for sale. Apply to Mrs. Neil McLachlan, 323 Davis St., Sarnia.

For shoes, rubbers and men's wool socks go to Saxon's. Repairing a specialty.

House and lot on corner of Victoria and Symes streets for sale. Apply to Mrs. J. A. Carruthers, Route 1, Glencoe. 53

Pasture farm to rent, 100 acres, being lot 8, con. S. Moss. Apply to J. A. Carruthers, Route 1, Glencoe. 53

Seed oats, O. A. C. No. 21 seed barley, and clover seed for sale.—J. B. McKellar, lot 21, second range north, Ekfrid. 53

Found—a whip. Owner can have it by proving property and paying expenses. Apply to J. W. Hammett, Newbury. 53

For sale—O. A. C. 72 oats, \$1 per bushel; Longfellow flint and golden corn, \$2 per 70 lbs.—Lewis Watterworth, Wardsville. 57

Cross-cut circular saw: newly toothed and in first class shape, 28 1/2 inches diam., too small for my machine. Snap—Frank I. Abbott. 57

Being from business sale still on A further cut on balance of stock. All new goods at about 25 per cent. below wholesale price. Get your share while the getting is good.—W. A. Currie & Co. 57

If anyone calls you a hog feel your self honored. Look at the price of them.

It seems that the speculators but not the hens are laying for the egg consumers.

No sooner does a woman resolve to practice economy than her mind goes galloping after spring hats.

Germany is in the position of the small boy who puts his hand in a quart sizer and grabbed so many sweets he couldn't get it out again.

A young man was recently heard complaining to a young lady of the "fierce price" his new boots were. She said: "Well, you know you could wear tan ones and the government would pay for them."

One dose of Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are non-injurious in their composition, and while in some cases they may cause vomiting, that must not be taken as a sign that they are non-effective, but as an indication of their effective work.

Secretaries of lodges and societies are requested to send us in for publication a list of their new officers when elected.

Subscriptions to all daily and weekly papers taken at the Transcript office. Don't take a chance on a raise in price; subscribe now.

Fifty cents will pay for The Transcript four months; \$1.00 eight months; \$1.50 one year. If to the United States, add one cent a week for postage.

All Things Must End

And our 8th Annual Stock-taking Sale will close in 9 days

Enormous Reductions in CLOTHING

E. MAYHEW & CO.

And by the end of those nine days we will have performed our mission we set out to accomplish. Between now and then we are going to open the eyes of everyone. We are going to make you pause to ask yourself the question "How do they do it?" Values are not considered now in our eagerness to complete our message. One thing you are sure of—You'll always know us as the Cyclone Price Cutters. Remember, big values can be found in every department of our big store. Come! You'll have reason for regret if you delay.

All Winter Goods must be sold

Are you going to take advantage of the golden opportunity? Are you spending your money to best advantage? Why not save money and buy your goods at the Mayhew store during the February sale.

Women's and Children's Coats

Every coat in the store to be cleared out at precisely half price. Women's Coats from \$2.98. Children's Coats from \$1.95.

Every day brings new arrivals of Spring Goods

Goods that we were fortunate enough to buy many months ago, therefore avoiding the big advances in prices, thereby saving our customers many dollars. And you should see the swagger style to all the new things.

New Wall Papers for spring now in. Call in and inspect them when in town. We take great pleasure in showing goods.

NOTE HEADS, BILL HEADS, LETTER HEADS, MEMOS, STATEMENTS.

ENVELOPES, CIRCULARS, CATALOGUES, BOOKS, LABELS, SHIPPING TAGS.

Farm Crop Queries

Conducted by Professor Henry G. Bell.

The object of this department is to place at the service of our farm readers the advice of an acknowledged authority on all subjects pertaining to soils and crops.

Address all questions to Professor Henry G. Bell, in care of The Wilson Publishing Company, Limited, Toronto, and answers will appear in this column in the order in which they are received. As space is limited it is advisable where immediate reply is necessary that a stamped and addressed envelope be enclosed with the question, when the answer will be mailed direct.

Henry G. Bell.

Summer Pasture
F. J. R.—My pastures played out just when milk was selling best last summer. Can you suggest any way of keeping up summer pasture?
Answer:—I would advise you trying the O.A.C. temporary pasture mixture. It is:—

Oats 51 lbs.
Early Amber Sugar
Cane 30 lbs.
Common Red Clover 7 lbs.

88 lbs. per Acre.
Prof. Zavitz says to sow this early in May. The oats and Early Amber Sugar Cane seed can be drilled in through the regular grain drill and the clover seed through the grass and clover seed division of the drill. At Guelph they found this pasture ready for cattle pasturage late in June. This pasture carried more than one steer to acre, and in 1911 was successfully used for milk cows.

Potato Yields Low on Account of Blight

G. B.—My potatoes were a failure last year. So were those of my neighbors, to a large extent. They were planted about the middle of May and seemed to come along well till early July when they seemed to die down. Some went up single stalks which were short and weak. I scarcely got back seed. What was the matter, and how can I get better crops next year?

Answer:—Without seeing the field or sample of the crop, it is impossible to say with exactness, what the trouble was. From your description I am assuming that it was the deadly Late Blight disease of potatoes. This disease sometimes sweeps down upon what looks to be a healthy field and

destroys great areas in a short time. Moist weather is best for the spread of Late Blight. It is usually indicated by the development of indistinct, dark, watery spots on the leaves. As the disease develops the leaves turn a sickly brown color and the disease may extend to the branches of the plant. The rotting potato tops give off a characteristic disagreeable odor. Late Blight is a fungus disease which winters in the stored potatoes. It sends its threads up through the inside of the potato plant and blossoms on the surface of the potato leaves, giving off millions of spores or seeds. These are easily blown about by the wind and in damp weather they stick to moist potato vines and leaves and attack new plants.

The cure or preventive is to spray the potato crop with Bordeaux mixture or some commercial fungicide just as soon as the first leaves are well spread out and continue spraying till the crop begins to ripen, giving in all 5 to 7 sprayings. Bordeaux mixture is made of 5 lbs. of copper sulphate, 5 lbs. of quick-lime and 50 gallons of water. The 5 lbs. of copper sulphate should be dissolved in 5 gallons of water and the 5 lbs. of lime should be dissolved in another 5 gallons of water, then the two should be lumped into a clean water-tight barrel and 40 gallons of water should be added.

The solution of sulphate of copper and lime is deadly to the spores or seeds of the Late Blight disease.

If there is a small infection anywhere near your farm, it will spread very quickly during damp, warm weather. Late Blight stops growth and causes dry rot in the stock that is dug. The biggest and best potato growers on this continent always spray their potatoes to control this disease.

Hogs

Cold floors can not be covered deep enough with straw to make the hogs comfortable. He is a great rooster and will get clear down to the bottom of his straw bed. So cement or stone floors are not so good as plank.

Old-fashioned hog-pens had altogether too much light on one side, being all open to the weather. Then they went to the other extreme and were shut up, close and dark. Windows are just as good for the hogs' health and comfort as they are for yours and mine. Money spent for window-glass for hog houses is money well invested. Just watch the porkers as they lie where the sunshine comes in good and warm. Then is when they are putting on fat.

Salt and sulphur and charcoal should be kept in every pig-pen and pig yard so the pigs can help themselves. This is a corrective and a preventive of worms.

Do not confine the brood sows in a small dark pen. Give them plenty of room, and a yard to go out to every fine day. Brood sows must have exercise to insure strong healthy litters of pigs.

Whatever makes the feed taste better increases its value as growth ration for pigs.

The Dairy

It is hard cash sifting out of the pocketbook if the liquid manure is not saved by absorbents, or by being drained from tight floors to a cistern outside the stable.

Be sure that the rats are not robbing the cows of their grain.

Keep a good cat in the barn, and give it warm milk in its own dish—and keep the dish clean.

Comfort is the key-note to success. No cow can be comfortable if half

starved and cold.

Cows sometimes get so smart that they can lift the latch of their stanchions with one horn. Pretty good argument for a sawing match. If you do not resort to that measure, fasten the latch down tightly every night and tie it.

If a cow has to be taken any distance, it is far cheaper in time and in beef to carry her on a wagon or sled, using a pair of horses, than to drive or lead her unwillingly.

The barn should be as quiet as a Quaker meeting. Many men get into the habit of yelling at the stock without being conscious of it, and keep the animals stirred up when they should be quiet for their own and their owner's good.

Sheep Notes

Fine wool is more scarce right now than it has been in years. It may be more so a year from now. Stands us all in hand to do what we can to meet the demand.

It is no joke to say that there is more clean money in a pure-bred sheep than in a scrub. The why and the wherefore are not half so important to know as the actual fact.

See to it that you have the pay as soon as the meat man has the sheep or lambs. He gets his pay down when the moment the goods are delivered. He should not ask you to wait. Many have done that and are waiting yet.

Be sure the sheep quarters are dry and cheery.

A cold, dark, damp place for sheep is death to them.

The sheep barn should be bottle tight with the proper ventilation, with big doors opening to the south.

These doors should be open on pleasant days, so the sheep can exercise in a sheltered yard.

Sheep do not mind cold when there is no draft, and the fold is dry and tight.

CANADIAN ORDER OF FORESTERS HAS SPLENDID RECORD FOR 1916

WILL READJUST ITS RATES

Society Proposes to Place Its Business on a Basis of 100 Per Cent. Actuarial Solvency.

The Canadian Order of Foresters has had a record possibly without parallel in the history of Fraternal Insurance Associations operating in Canada. This Society was instituted in 1879. In 1885 it enacted a table of monthly assessments which has been in force from that time down to the present without a single change. During that period all other Fraternal Insurance Societies, it is claimed, have found it necessary to revise rates, until this Society stands as the only prominent institution operating upon a remarkably low schedule of rates. In 1916 the Society paid out in death claims over \$726,000.00. Notwithstanding this large payment, it added to the Insurance Fund, for the year, over \$422,000.00. The balance standing to the credit of the Insurance Fund on the 31st of December last was \$5,628,343.00. In spite of this most unusual record, the Society decided to have a most thorough and comprehensive investigation made of its actuarial standing. This course was thought wise on account of the legislation passed by the Ontario Legislature at its last session. The Legislature in 1916 passed an Act which requires that all Fraternal Insurance Societies shall, on or before the first day of April, 1918, file a report with the Registrar of Friendly Societies, which report shall contain a valuation of all its Insurance Certificates in force on the 31st December, 1917. This report must not only show the Insurance Liability which the Society has undertaken to pay, but also the Assets which the Society has available, in the way of accumulated funds, and future assessments for the payment of the Insurance Liabilities as they accrue.

The object of this state-ment is to show the degree of actuarial solvency which each Society has as of December 31st, 1917. The Act provides further, that at the end of each three-year period after 1917, a similar statement of valuation shall be filed in order to ascertain whether or not the Society has maintained its degree of actuarial solvency.

The object of the Act is, that where a society shows at the end of the first three-year term that it has not maintained its degree of actuarial solvency, it shall elect to take term insurance, which will entitle them to carry their present insurance at their present rate until they have attained the age of sixty years. Members between the attained ages of forty-six and fifty-five, inclusive, may elect to continue the present amount of their insurance, at the present rates, as term insurance for a period of fifteen years. Those members who are between the attained ages of fifty-six and sixty-five, inclusive, can carry their present insurance at their present rates for ten years. Term protection of members between the attained ages of seventy to seventy-six gradually decreases from nine years at the age of seventy to three years at the age of seventy-six and over.

The second option insures to all members no matter when admitted, when they attain the age of seventy, the right to pay up insurance for amounts set out in the schedule prepared by the Actuary, where such members do not desire to continue to pay the life rates. This schedule entitles the members from sixteen to eighteen to paid up insurance for \$300 at the age of seventy, which amount gradually decreases as the attained age of the member increases.

The adoption of the proposed readjustment will place the Society on a basis of 100 per cent. actuarial solvency, and enable it to maintain its splendid position in the world of Fraternal Insurance.

Mr. Landis, of Nashville, Tennessee, for the purpose of investigating the actuarial standing of the Society, has been advised by the Ontario Legislature of the National Fraternal Congress, and has been prominently identified with the drafting of all bills dealing with Fraternal Insurance legislation. Mr. Landis is also the author of eight books on insurance, which are accepted as authorities to-day.

The Actuary has found that during its whole experience of thirty-six years, the Canadian Order of Foresters has had an exceptionally favorable mortality experience. Because of this exceedingly favorable mortality experience, and the large amount of accumulated funds, Mr. Landis has been able to prepare unusually favorable monthly assessment rates, which will enable the Society to provide the payment of all future claims. These rates of assessment, as compared with rates deduced from other mortality tables, is very high to the advantage of the members of the Canadian Order of Foresters.

In constructing a mortality table on the experience of the Society, Mr. Landis has eliminated the first five years of membership duration. The object of this course is in order to insure the death rate under more nearly normal conditions than would be possible in taking the first five years of duration into consideration. During the first five years there is a gain from recent medical selection. He has recommended a schedule of rates, which, based upon the report which will be filed as of the 31st December, 1917, should show more than 100 per cent. of actuarial solvency, because of margins of safety which may be classified as follows:—

First: There would be gains from actual interest earned in excess of 4 per cent., which is the amount the Actuary fixes as the basis of calculation. As a matter of fact, the average

MURAD CIGARETTES

Everywhere Why?

The blending is exceptional

Interest earned by the Society, upon its Insurance Fund, as at present invested, is 5.44 per cent. As the securities held by the Society are mostly for long terms, there should be a substantial gain on interest account.

Second: There would be a saving from a lower death rate by reason of the fact that the first five years of membership has been eliminated by Mr. Landis in constructing his mortality table.

Third: There would also be gains from accumulation forfeited through lapses. No allowance was made for such gains in fixing the schedule of rates.

Fourth: There would be a surplus in contributions owing to the fact that, after eliminating the first five years of membership, the Actuary loaded the tabular rates by an arbitrary sum to make assurance doubly sure.

Notices of motion have gone out to the membership providing for readjustment, and this legislation will be considered at the next meeting of the High Court of the Order in June.

The rates for members who are now in the Order start at sixteen, with a monthly assessment of 65c; at twenty the rate is 65c; at thirty, 85c; at thirty-five, \$1.08; at forty-five, \$1.53, with gradually increasing rates for the older ages. The rates for new members start at sixteen, with a rate of 65c; at twenty, 75c; at thirty, \$1.02; at thirty-five, \$1.23; at forty, \$1.52; at forty-four, \$1.83.

Two options are given to those who are already members of the Order. One option provides that all members who are between the attained ages of sixteen to forty-five, inclusive, may elect to take term insurance, which will entitle them to carry their present insurance at their present rate until they have attained the age of sixty years. Members between the attained ages of forty-six and fifty-five, inclusive, may elect to continue the present amount of their insurance, at the present rates, as term insurance for a period of fifteen years. Those members who are between the attained ages of fifty-six and sixty-five, inclusive, can carry their present insurance at their present rates for ten years. Term protection of members between the attained ages of seventy to seventy-six gradually decreases from nine years at the age of seventy to three years at the age of seventy-six and over.

The second option insures to all members no matter when admitted, when they attain the age of seventy, the right to pay up insurance for amounts set out in the schedule prepared by the Actuary, where such members do not desire to continue to pay the life rates. This schedule entitles the members from sixteen to eighteen to paid up insurance for \$300 at the age of seventy, which amount gradually decreases as the attained age of the member increases.

The adoption of the proposed readjustment will place the Society on a basis of 100 per cent. actuarial solvency, and enable it to maintain its splendid position in the world of Fraternal Insurance.

Mr. Landis, of Nashville, Tennessee, for the purpose of investigating the actuarial standing of the Society, has been advised by the Ontario Legislature of the National Fraternal Congress, and has been prominently identified with the drafting of all bills dealing with Fraternal Insurance legislation. Mr. Landis is also the author of eight books on insurance, which are accepted as authorities to-day.

The Actuary has found that during its whole experience of thirty-six years, the Canadian Order of Foresters has had an exceptionally favorable mortality experience. Because of this exceedingly favorable mortality experience, and the large amount of accumulated funds, Mr. Landis has been able to prepare unusually favorable monthly assessment rates, which will enable the Society to provide the payment of all future claims. These rates of assessment, as compared with rates deduced from other mortality tables, is very high to the advantage of the members of the Canadian Order of Foresters.

In constructing a mortality table on the experience of the Society, Mr. Landis has eliminated the first five years of membership duration. The object of this course is in order to insure the death rate under more nearly normal conditions than would be possible in taking the first five years of duration into consideration. During the first five years there is a gain from recent medical selection. Your Problems

Conducted by Mrs. Helen Law.

Mothers and daughters of all ages are cordially invited to write to this department. Initials only will be published with each question and its answer as a means of identification but full name and address must be given in each letter. Write on one side of paper only. Answers will be mailed direct if stamped and addressed envelope is enclosed.

Address all correspondence for this department to Mrs. Helen Law, 75 Castle Frank Road, Toronto.

Mrs. G. H.:—May I ask three questions? 1. How can I open a fruit sealer that refuses to unscrew? 2. What will prevent mustard from drying up? 3. Is it possible to make a fireless cooker at home?

1. Set the jar upside down in sufficient hot water to cover the metal rim and in a minute or two it will unscrew with ease. 2. Mix with vinegar, add a little salt, and it will keep fresh for several days. 3. Take a packing-box with well-fitted cover on hinges. Fill box with hay well packed down, leaving hole in the centre for saucepan, fill a sack with hay and place on top of saucepan, and close lid. A granite pail with a close-fitting lid and a handle is the best cooking utensil for use in a fireless cooker.

Miss Polly:—1. When a girl introduces a man to a married couple whose name should be mentioned first? 2. Should a letter of introduction be sealed and how should it be delivered?

1. You should introduce a man to your married friends in this wise: "Mrs. Blank, may I present Mr. Brown", and "Mr. Blank, this is Mr. Brown". 2. It should be unsealed. If a letter of introduction is written for a woman who is moving to another city she, on her arrival, mails it, together with her card containing her new address, to the person to whom it is addressed, who thereupon calls on the new comer. If a man has a letter of introduction to a woman he may call and deliver it in person.

Mrs. W. J. M.:—1. What is the best way to treat a kitchen floor? 2. What color scheme would you advise for a girl's bedroom with a large south window?

1. Clean the floor with a good floor polish. 2. What color scheme would you advise for a girl's bedroom with a large south window?

gentle pat occasionally make the horse more tractable and serviceable. One great reason for boys leaving the farm is that Willie's colt grows up to be papa's horse.

Never strike an animal when you are angry, nor when he is. If you do not, you will never strike him. This advice is as good when applied to striking a man in anger.

On His Estate. Willie—What sort of a man is he? Gillis—Well, if he had a country estate he'd have the Katydids saying "Katy done it," before a week was up.

longer in Winter than in Summer, provided the shoes keep in condition. Many a man has become bankrupt by thinking he could make his fortune in horses, when as a matter of fact there was no horse in him. To succeed with horses a man must love horses, he must have a lot of horse sense and he must be willing to study and learn.

Something wrong when a horse eats his own bedding. Leave out the straw and use sawdust or some such thing; then correct the ration. Give a better, all-round line of feed.

A quiet voice of approval and a

Health

Headache in Children.

The healthy child has no headaches, and ought not to know the meaning of the word until it is well into its teens. Nevertheless, headache is not very uncommon in children, and it does not always receive the attention from parents or physicians that it deserves. In children under three years of age it is difficult to recognize headache, for they cannot describe their symptoms, and can only cry violently or else lie very still and resent any attempt to move them.

Habitual or frequent headache in a child is generally an indication of some constitutional fault; he may have a gouty or nervous inheritance, or he may be run down or anemic. The latter condition often affects older children as they approach the period of adolescence.

Another common cause of habitual headache in children of school age is eyestrain; that comes from too long evening, and is absent during vacations and on Saturdays and Sundays. Chronic nasal catarrh is also a cause of headache. That form differs from the eye headache in being constant or else in coming on irregularly—in the morning as often as in the evening.

Another cause of headache, less frequent in children than in adults, is autointoxication, due to intestinal torpor, an inactive liver, or worms. In searching for the possible cause of obscure headaches, the teeth also, which sometimes begin to decay very early, must not be forgotten.

The onset of acute disease, such as one of the contagious fevers of childhood, is almost always announced by severe headache in the forehead.

The place of the headache is sometimes, although not as a rule, an indication of its cause. In general, pain in the forehead or over the eyes is due either to anemia, autointoxication, affections of the nose or eyestrain; pain in the temples or the sides of the head is caused by ear troubles or decayed teeth; eyestrain and ear inflammation some times cause pain in the back of the head; and the pain of anemia and autointoxication is likely to be in the top of the head as well as in the forehead. Youth's Companion.

Warning to the Constipated. City dwellers are told that canned and manufactured foods are largely responsible for the appalling lethargy of the digestive tract so universally prevalent. But why is the patent laxative found on the farmer's medicine shelf?

It must be from neglect of nature's call, for, surely, with an abundance of succulent vegetables, apples, raw and baked, with other fruits in season, and above all, bran—that "broom of the intestines," to be had for daily use in muffins and breakfast foods—a remedy for constipation is at hand in every farmer's family. By taking an intelligent interest in these foods it is easy to energize the family, and energy brings a big reward.

The first requisite for the clear vision which wins success in any undertaking, is bodily fitness. It is true that great deeds have been done by the handicapped, but we believe investigation would show that no great creative work was ever done by a person with a habitually clogged alimentary canal. There should be a sharp realization that if the waste of the body is not evacuated as soon as the nutriment has been absorbed, these processes of absorption will keep working and will take up virulent poisons, which should have been ejected, and return them to circulate their deadly influence throughout the system, dulling the power of thought and action.

NEW KIND OF SHOE SOLES. They Are Made of Scrap Leather by an English Patent.

A new and recently patented method of manufacturing soles for shoes from scrap leather is described in a report made to the U.S. Department of Commerce by Consul H. M. Byington, Leeds, England. While he does not give details concerning the process, Mr. Byington says it is claimed that the soles thus produced are non-suction, non-slipping, and waterproof, and can be made at much lower cost than the ordinary leather sole. It is also possible to use the method in building heels.

"It is also claimed," Mr. Byington goes on, "that the novelty of the patent may be enhanced by an ingenious arrangement of strips of rubber attached to a thin layer of canvas, the rubber strips fitting into the interstices of the leather sections. This is said to give a pleasing resiliency to the step of the wearer and to do away with the aching of the feet, sometimes produced by purely rubber soles."

Yesterday is the time you should have begun some of the great things you are going to do to-morrow.

In the United Kingdom there are at most two and a quarter million men and women engaged in making cannon and projectiles. The supply in some lines, such as the eighteen-pounder field gun, is now greater than the need, and production is slackening. If the war is not won lack of munitions will not longer be a valid excuse.

The Doings of the Duffs.

The Transcript.

THURSDAY, FEBRUARY 15, 1917

Newbury

James Armstrong, one of Newbury's early settlers, passed away at noon on Friday. Deceased was born on a farm adjoining the village 74 years ago and had lived here ever since. He never married, his nephew Alex, and family making their home with him. For years he was in the cattle business and a Mason, and was well known. The funeral services were held on Monday afternoon in Christ church, Rev. J. Hale conducting them. Six nephews were pallbearers. Interment in Oakland cemetery. Two brothers, Hugh and Robert, are the only ones left of the large family.

Tomorrow (Friday) evening is the date for the meeting of the ratepayers, which the council has called. The subject of the continuance of the electric lights will be discussed. The high cost of fuel has made it necessary to make some change. The meeting is important and should be well attended. It would be well, indeed, to go back to the old times of dark streets, dark stores, dark homes. Come along with a good suggestion, somebody.

Pte. Hubert Connelly spent the week-end with his grandmother here.

Among those from a distance who attended the funeral of the late J. J. Armstrong on Monday were Charlie Armstrong and wife of Windsor, Wm. Clark and wife of Puce, Harvey Ralph and wife of London.

Albert Grant and Reinford Merner of Windsor spent the week-end here.

Born—12th inst., to Mr. and Mrs. Cecil Dobbyn, a son.

Councillor R. H. Moore and Mrs. Moore entertained the dramatic club on Friday evening at their home.

Mrs. Fletcher returned home from London on Friday after visiting her daughter, Mrs. A. J. Walker.

The Women's Institute will hold their monthly meeting on the 21st at the home of Mrs. Stephen Fennell. All the ladies are requested to be present. Roll call—"A current event."

Pte. Alex. Humphries was unable through illness to come to Newbury to receive the presentation of money raised for him at the recent play. The money will be forwarded to him instead.

The Women's Institute held a very successful evening on Feb. 7th. J. C. Elliott, M. P. P., and Mrs. Coutts of Thamesville were present and both gave very excellent addresses. Mrs. Coutts' talk, "The story of the needle," was particularly interesting. The proceeds of the evening were for patriotic work.

The many friends in this vicinity of Mr. and Mrs. W. W. Carter of Elora will regret to learn of the death of their eldest daughter, Mary Alberta, in her 10th year.

Wardsville

During the past year the Wardsville Relief Association has sent \$100 to Duchess of Connaught Hospital; \$50 to Ramsgate Hospital; prisoners of war fund, \$20; Belgian Relief fund \$10; Soldier's Comfort fund, \$25; \$5 monthly for support of Canadian war prisoner, besides spending \$100 a month in yarn. Also a large box of pyjamas, absorbent cotton, gauze and other surgical supplies were shipped, besides innumerable pairs of socks. Fifteen gift boxes were sent overseas Christmas time. Soldiers' comfort boxes have been placed in the local stores and bank, with the hope that friends may drop their loose change therein. As the call for socks is so urgent, the ladies of the Relief Association are giving all their spare time to knitting and intend sending one pair of socks a month to each of the boys who have gone out from Wardsville and vicinity. Preparations are being made for a "white elephant sale," to be held in the near future.

The Wardsville Choral Class under the able leadership of Mr. Werner, is meeting two evenings in the week. During the latter part of March the class will present the cantata "Queen Esther."

The monthly meeting of the local auxiliary of the W. M. S. was held on Feb. 8th at the home of Mrs. King. A most interesting and profitable program was enjoyed by a large representation of the auxiliary members. The quarterly official board joined the ladies at the tea hour.

The annual meeting of the public library board was in the reading room on Feb. 9th, and the following officers were elected: President, Miss Gardiner; secretary, Miss Sheppard; treasurer, Mrs. Blott. Thirty new books have been added recently to the library, which now contains about two thousand volumes.

Mrs. G. Brown of Bridgen is visiting her aunt, Miss E. Dykes.

Mr. and Mrs. J. Benner left last Thursday for their home at Port Arthur.

Mrs. C. Wilson spent a few days last week with Mrs. J. McPherson of Aldborough.

Mrs. O. J. Glenn spent a few days last week in London.

Miss Lulu Turk visited friends at Woodgreen last week.

C. Miller of the Home Guard, London, spent a few days last week at his home here.

A CAREFULLY PREPARED PILL.—Much time and attention were expended in the experimenting with the ingredients that enter into the composition of Parmelee's Vegetable Pills before they were brought to the stage in which they were first offered to the public. Whatever other pills may be, Parmelee's Vegetable Pills are the result of much expert study, and all persons suffering from dyspepsia or disordered liver and kidneys may confidently accept them as being what they are represented to be.

ADVERTISING RATES.—Cards of Thanks, In Memoriam Verses, Complimentary Addresses, 5 cents per line, minimum charge 50c; notices of entertainments to be held, also notices of Lost, Found, Wanted, or For Sale, 1c per word each insertion, minimum charge 25c—all to be prepaid.

Appin

The Appin Women's Institute will hold their regular monthly meeting Thursday afternoon, Feb. 22nd, at Mrs. Jones'. All members and those interested in Red Cross work are expected to be present.—J. I. Macraut, secretary.

The last meeting of the Mutual Im. Society, held Thursday, Feb. 9th, was a great success, the hall being crowded. The program consisted of music, recitations and a debate, each part being well rendered and was pleasing to the crowd. The next meeting will be held in the Town Hall Feb. 20th, for which a good program is being prepared.

There are a number of ladies taking a course in cutting, sewing and dress-making in the Orange Hall.

R. E. C. McDonald is doing a great business these days, the store being well crowded with customers and the sales are large.

The Appin Branch of the Red Cross have shipped to Hyman Hall for the month of January 19 grey flannel shirts and 13 pairs of socks. They have purchased \$25 worth of yarn and two pairs (152 yards) of grey flannel and hope to have the most of this worked up for February. The cutting committee met at the home of Mrs. King and cut out 15 shirts. Anyone wishing to help in this most necessary work can get either yarn or sewing from Mrs. John Jones or Mrs. John Macfie. Don't forget the boys at the front these cold days.—Red Cross secretary.

Good seed oats for sale, \$1 per bushel.—Wm. R. Eddie, Ekfrid.

FERGUSON'S CROSSING.

The Ferguson's Crossing Needle Club held a very successful bazaar at J. D. McBride's store on Tuesday afternoon, Feb. 6th. A large crowd was in attendance and everyone present spent an enjoyable afternoon as well as a profitable one for the society. The proceeds from the sale of articles amounted to \$23.70, while the ten-cent tea made \$7.80. Besides this, the society wish to acknowledge donations from D. P. P. Wm. R. Eddie, Mrs. J. D. McBride, and Mrs. McKellar, amounting to \$2, making a total of \$34.30. The society has just received a large shipment of yarn, part of which it was decided to have knit by machine. Anyone wishing to do hand knitting may get the yarn from Mrs. McBride.

WALKERS.

Some winter. Eh!

Keep up, farmers. January is gone! February is a short month, and there's always a little pickin' in March.

Miss Mae Munroe left for Detroit on Saturday.

Mrs. Fletcher is visiting her daughter at Poplar Hill.

Some of our boys are about to don the khaki.

A number from here attended the box social in No. 9, Mosca. All report a good time.

J. R. Gardiner of Inwood was here Wednesday night and organized a beet growers' association.

Don't forget the play, Feb. 23rd, in aid of the Red Cross.

Alex. Blain is visiting under the parental roof.

Jim Patterson is home for a few days.

Melbourne

The ladies in our village and vicinity are busy knitting and sewing for the soldiers at the front. The Patriotic Society have arranged to purchase more material in order that the good work may be kept up.

Rev. Mr. Nichol of London occupied the pulpit in the Methodist church on Sunday.

The Epworth League anniversary services, which were held last night, were well attended and Rev. Wm. Vance delivered two excellent sermons on E. League work.

The Masonic Lodge here served an oyster supper in the lodge room to the members and their friends on Wednesday evening. Mr. Nichol of London occupied the chair. Addresses were given by Rev. Wm. R. Vance, and E. L. Frost, manager of the Union Hotel. The Melbourne Quartette, Miss Alice Wellman and A. D. Brown supplied the musical part of the program.

Miss B. C. Buchanan has closed her millinery parlors until the spring season opens, and left this week to visit her sister in Campbellton before attending the Detroit millinery openings.

The Caradoc township Sunday School convention was held in Cook's church, it being the 25th since its organization. There are 20 schools included in the association, 204 teachers and 1,447 pupils.

This convention was well attended, and the guests were royally entertained by the Cook's and Sutherland's people. The day was exceptionally fine and nothing was lacking to make the convention one of the best held in the township. Addresses

were given by Rev. W. A. Brenner of St. Thomas on "Faithful personal work in the Sunday School." Rev. H. H. Bingham of London took for his subject "Visions," and Rev. D. C. McGregor "The importance of teaching missionary work in the schools." Mr. Bellamy of Mt. Brydges was appointed president for next year, and Miss Campbell of Melbourne secretary. The next convention will be held in the Presbyterian church, Delaware. Owing to severe illness the pastor, Dr. Rayson, was unable to be present. The choir of the church did excellent service.

Strathburn

Mrs. Annie Currie left last week for Cass City to see her father, Mr. Crandall, who is very sick.

Wm. Gould has been on the sick list for the last two weeks and is no better.

Will Siddall arrived home from Detroit last week.

Will Quick of Glenora was busy last week putting up ice for D. H. McTae.

Mrs. W. G. Poole is some better, after a severe sickness.

Monday, they say, was the coldest day this winter, registering 25 below.

Bert Gould, Jack Lamont and John Gould were busy last week putting up ice.

Fred Simpson sold a horse last week for a good figure.

Charlie Kook has arrived home from Chicago.

Recruiting figures for all Canada in January totalled 8,000, an increase of about 2,000 over the December total.

Kilmartin.

At a meeting of the Red Cross Circle at Burns Church, Mosca, it was agreed that a very hearty vote of thanks be extended to Miss N. Farrell and the pupils of S. S. No. 17 and the friends who assisted them in the entertainment at Napier for so generously devoting their part of the proceeds to this Circle for Red Cross work.

Burns church Red Cross shipped on Feb. 9th 10 grey flannel shirts; total value, \$33.00. The meeting at Mrs. Smith's was largely attended and contributions amounted to \$13. Ten lbs. of yarn were given out and 18 flannel shirts were sewed. The next meeting will be held on March 7th at Mrs. Alex. D. McAlpine's, Metcalfe.

Will Moore has returned to Walker-ville after spending some time at his home here.

The marriage takes place at Alvinston today (Wednesday) of Malcolm Secord of Detroit, formerly of this place, and Miss Ada Rilett of Alvinston.

Mrs. John H. McFarlane of Detroit is spending the week with relatives here.

Miss Dell McIntyre and Miss Sarah McLachlan, who have been ill, are both recovering.

Muncie Red Cross Society held its monthly meeting last week, and received 60 pairs of socks from the members of the society. There were twenty pairs of socks from three houses. A few men here have taken to knitting, and are doing their share of the work.

Grain Much Better Filled

H. RICHARD, Dorchester, Ontario, says:—I used Homestead Bone Black Fertilizer on four acres of oats last Spring with very good results. The field consisted of ten acres of sod, half of which had been manured the previous year, while in meadow, and we applied the fertilizer 200 pounds to the acre to the balance of the field. The growing crop showed much better growth all through the season where the fertilizer was used than where it was not.

Good for 25 per cent. Gain

GEORGE W. ADDY, Ethel, Ontario, says:—This is to certify that I purchased some Homestead Bone Black Fertilizer last Spring from your agent, Mr. J. K. Baker, and I am well satisfied with it. I used it on our oats and I believe if I had sown it on the whole field I would have had 25 per cent. more grain.

30 Bushels Wheat on Poor Land

JOSEPH MOLLARD, Park, Hill, says:—I used Homestead Fertilizer on my wheat, about 300 pounds per acre, where I have not been able to grow a crop, and wheat on that land will run thirty bushels per acre.

Write Michigan Carbon Works, Detroit, for free book and particulars about their Homestead Bone Black Fertilizer.

Best Manitoba flour for sale at McLachlan's Bakery.

Mother Graves' Worm Exterminator has the largest sale of any similar preparation sold in Canada. It always gives satisfaction by restoring health to the little folks.

Overland

Undoubtedly the Industry's Crowning Achievement

From your point of view this announcement is most important.

For herein we set forth the achievement toward which the Willys-Overland organization has aimed for the last eight years.

This achievement in a word is the completion of the gigantic Willys-Overland organization to a point where a comprehensive line of automobiles can be made and marketed under one head.

This means tremendous economies—much greater than ever before.

This means the elimination of all waste, all lost motion and much greater factory efficiency.

This means an even higher grade of cars at much more attractive prices.

All of which means a substantial saving for you on the next car you buy.

For now and for the first time in the history of the automobile business we as one single organization offer the public a full and comprehensive line of automobiles.

This concentration—this greater efficiency—this more effective means of pulling together is going to set a new standard of low priced high-grade automobile values.

For we operate on the basis of—

- one executive organization
- one factory management
- one purchasing unit
- one sales expense
- one group of dealers

—to plan, produce and sell all Overland, Willys and Willys-Knight models.

Buying power is concentrated. Costs are distributed over all these cars. The savings are enormous.

As a result we are producing cars of exceptional quality—and marketing them at unusually low prices.

Every car is built to a rigid standard of performance, comfort and appearance.

The new models are listed in this announcement. They include Overland models from the snappy comfortable \$930 Light Four to the beautiful Light Six Sedan at \$2220.

They include also the big, handsome Willys-Knights from the Four at \$1800, to the super efficient Eight at \$2730.

These new models establish price records, value records and performance records which we believe will prove to the public conclusively that the vast economies of vast production are the key note and manufacturing secret of the greatest value for the least amount of money.
