POINT DU JOUR, PARISH OF L'ASSOMPTION. THESE truly valuable WATERS are distinguished for the large quantity of Bromine and lodine they contain, and are acknowledged superior to all other Medicinal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them; upon the contrary, they are found to improve and strengthen. The large number of cures effected by the use of the above Waters, enable us to recommend them to the public as an excellent cress. RIMINIAN DESTRUCTION OF PRAISHES, March 1. 1860.

Sig.—Since you are destross to age-crain the effect which the Waters of the Point du Jour Springs have produced on myself. I must inform you, that I have used them methernally at their Source, and have found them inhighly sailubrooms. It was at the ione so affected by the consequences of a severy disease of the Disaster of the Point of the Point

which I was suffering severely. Re prescribed for my relact the Mineral Whites, and I made use of those of inc. Point du Jour, as being the near st. I was at the interso weak, that it was with difficulty I top my feet. However, at the exparation of three weeks, I was restored by using the Waiers. These Viaters are of a gaseous instarc, committing a large quantity of saline particles, and agree, a time in the taste—taken in a large doos they are strongly laxative, but their paggality properties are unattended with gripings—those oven who have been thing being having them they find their appetite increased, and their digestion realism into inconsequence; upon the contact, by using them they find their appetite increased, and their digestion realism that they dident in the same proportion that they had the effect of increasing the united states of the contact them in the same proportion that the altern secretions increased in Fisher contact the single-order moderately a nagreeited, and, instead of the proportion of the ferrous and same unarray systems were increased to proportion in the same cargo manner and greater them.

For myself, who am, perhaps, one of the first that ultided of them in the newspapers, in the year 1828, I can testify, but since then I have had occasion by yearious Misseral Waters, nevertheless I have neved coulted that the pre-rence must be given to those of Point du Jour—having myself had much-experience.

The Proprietors have their Depot established at No. 6, Jacque's Cartier Place, next door to the Hotel of Serafino Glialdi, Eaq. The distance for conveying the Waters to the Depot is so triding that we are enabled to have a constant supply fresh, and are consequently in possession of a better market then any other person. Prices, 73d. per gallon, and 2s. the dozen, (in bottless) Sick persons, unable to pay for it, can have some gratis, by producing a certificate from their Physician, since we are unwilling that any should be deprived of these healing and wonderful Waters, prepared by Providence for his creatures, which are apparently designed for the allevation and cure of many protracted and dangerous diseases.
