Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for scanning. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of scanning are checked below.

L'Institut a numérisé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de numérisation sont indiqués ci-dessous.

	Coloured covers / Couverture de couleur		Coloured pages / Pages de couleur
	Covers damaged / Couverture endommagée		Pages damaged / Pages endommagées
	Covers restored and/or laminated / Couverture restaurée et/ou pelliculée		Pages restored and/or laminated / Pages restaurées et/ou pelliculées
	Cover title missing / Le titre de couverture manque		Pages discoloured, stained or foxed/ Pages décolorées, tachetées ou piquées
	Coloured maps /		Pages detached / Pages détachées
	Cartes géographiques en couleur		Showthrough / Transparence
	Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)		Quality of print varies / Qualité inégale de l'impression
	Coloured plates and/or illustrations / Planches et/ou illustrations en couleur Bound with other material /		Includes supplementary materials / Comprend du matériel supplémentaire
	Relié avec d'autres documents Only edition available / Seule édition disponible		Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from scanning / II se peut que
	Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.		certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été numérisées.

BOTANIC BEFRS.

Canadian Orders Solicited.

Worked by Exhaust**g**Steam? Only.

The most economical boiler feeder in existence, and at the same time the simplest and most durable. Supersedes both pumps and feed-water heaters, and by condensing the exhaust steam, removes the back pressure; and, consequently, increases the power of the engine. Utilizes a power heretofore thrown away. Works automatically at a steam pressure of less than half a pound. The exhaust steam, in passing through the Injector, heats the feed-water to a temperature of 190 degrees F., thus effecting a saving over any other Injector of from 15-to 25 per cent, in fuel.

For further particulars apply to

Commercial Summary.

HAMILTON, Ont., intends to spend \$70,000 on new water works pumping machinery.

John McDonough, clothier, of this city, is endeavoring to arrange a compromise with his creditors at 50 cents in the dollar, cash, ..

THE annual meeting of the Niagara River Bridge Company will be held on June 2nd, 1886, at St. Thomas.

ALEXANDER McDonald, general storekeeper, Mountain Grove, Ont., has assigned with liabilities of between \$3,000 and \$4,000. He been in business for several years.

Oris Suaw, general storekeeper, of Perth, N. B., has assigned. His real and personal property is advertised for sale on the 28th proximo.

A. Coxx, general storekeeper, of Tyreonnel, Ont., has assigned. His creditors were entirely in London. The stock was sold on the 20th ulto, at 531 cents in the dollar.

The Bank of Hamilton has declared a dividend of 4 per cent, for the current half year, payable 1st June; the annual meeting willtake place on the 15th June.

All kinds of Glues and Gelatines, Mirror Class and Hair Cloth, Wire and Wire Nails, Gold and Silver Leaf and Bronze.

W. A. Shenwood, general storekeeper, of Brownsviile, Ont., has assigned after a little over three years' experience in business. He sold out his stock on the 26th of last Dec-

D. A. Smith, grocer, of Pairsborough, N. S., has assigned with small liabilities. He was formerly an accountant in the Halifax Banking Co., and had \$1,200 cash capital when he started.

Application has been made for letters patent for the incorporation of the British Columbia and Big Bend Gold & Silver Mining Company; chief office, Winnipeg; capital, \$400,-

G. W. Gilmour, general merchant, at Waterloo, is about to open a wholesale store in Montreal this summer; D. M. Dillon, tailor, has been in business about a year in Waterloo and is now in financial difficulties.

NAVIGATION is now fairly open and the mail steamship "Otter" has started on her first trip to the North shore with mails, passengers and freight. The first steamer from Montreal reached Quebec on the 27th ulto.

Leading Wholesale Trade of Montrealise & garbini

517, 519, 521, 523 and 525 St. Paul Street, - MONTREAL.

IT MAY not be generally known that at least twelve varieties of fish are caught in Lake Superior, whitefish, herring, pickerel, pike, sturgeon, red and common siskewet, small and large brook trout, suckars and perch.

- Mrs. Becker, a struggling milliner, of Newmarket, Ont., has assigned. Three years ago she effected a compromise with her creditors at 60 cents in the dollar, and since then has been barely earning her living.

J. A. Giroux, watchmaker and jeweller, of Granby, Que., has assigned after an ineffectual attempt to effect a compromise with his creditors at 40 cents in the dollar. His liabilities are about \$1,200 and the assets will nominally reach \$1,000.

THOMAS CREAN, a tailor, of Toronto, has for some time past been very slow in his payments. He has been in business for about 12 years, but is said to be somewhat behind the age, and is consequently now compelled to assign.

THOMAS COOPER, general storekeeper, of Thomsonville, Ont., has been compelled to assign. He was originally a tailor in Bolton, and moved to Thomsonville in 1877. Old age and declining business are given as the reasons for his failure.

WE give elsewhere insertion to "Reform's" reply to the communication of "Fair Play" in our issue of last week. Both these letters were published with the understanding that the controversy end there, so far as we are concerned.

CHAS. F. VOSE, wholesale liquor dealer, of Halifax, whose business troubles were noticed last week in these columns has been arrested on the charge of forging the name of W. J. Glenross to a note for \$230, discounted by the Bank of Montreal. Mr. Vose is out on bail.

AT A MEETING of the board of directors of the English Loan Company held in London, Ont, the resolution to wind up the affairs of the company was confirmed, and Mr. J. F. Helmuth was appointed liquidator, and Messrs. Chas. Murray, Geo. C. Gibbons and M. Masuret, inspectors.

D. ARNOTT, dealer in tins, Lakefield, Ont., failed virtually in 1879, but failed to take advantage of the Insolvency Act. He then owed \$3,700 with assets of \$1,000, and has ever since been struggling to pay off his old indebtedness. The effort has been too much and he now seeks relief in an assignment.

WILLIAM CLELLAND, dry goods dealer, Brantford, Ont., has always been considered to be doing a snug business and worth from \$3,900 to \$1,000. Last December he moved into a better stand with increased facilities and so his assignment recently has been somewhat of a surprise to his creditors.

The general freight agents of the Grand Trunk Railway, the Canadian Pacific Railway and the Richelieu & Ontario Navigation Co., have come to an understanding as to the rates to be fixed for freights from competing points which will prevent cutting rates and consequent loss of revenue.

MR. R. W. McLachlan, chief actor under his brother, John S., in the heavy frauds against the Customs Department, recently condoned, was a prominent member of the "Mock Parliament" (M.M.P.) in this city, where, on account of his marked ability, he occupied the position of Minister of Customs.

WHOLESALE ONLY

OFFICE AND REFINERY, ESPLANADE ST., EAST,

TORON TO.

DR. P. TERTIUS KEMPSON and Mr. Zavarr Wilmshurst have purchased the Insurance Times from the trustees of the late Stephen English. The doctor is well known to the insurance fraternity on both sides of the line, and Mr. Wilmshurst has been, it appears, for the last twenty years, the "power behind the throne."

J. A. Germain, dry goods merchant, of Sorel, Que., has succeeded in effecting a compromise with his creditors at 50 cents in the dollar, payable in 3, 6, 9 and 12 months. His liabilities are \$14,000, while the assets were estimated at \$12,000. Germain was formerly a clerk in Montreal, and commenced business for himself in 1872.

Messus. Sweetnam & Hazelton, piano manufacturers, Guelph, assigned last week to their legal adviser, who has called a meeting of creditors for 4th May. No statement lms been published, but rumor states that the liabilities are about \$10,000, and assets about \$3,000, more than a moiety of which is claimed to be preferred for rent.

A correspondent writing from Maitland, N. S., describes a rather amusing affair which took place there a few days ago. A villager was arrested and taken to jail for a debt of \$5. He immediately made an assignment of his property. The total liabilities were only \$14, of which \$5 was to the person taking the action. Assets, nil; costs, \$10.

THOMAS FERGUSON, and his brothers, farmers, of Granby, Que., have contrived to borrow nearly \$16,000 in small sums, distributed over considerable territory, on the security of their real estate. On the 20th ultimo they called their creditors together at Granby and offered a composition of 50 cents in the dollar spread over ten years without interest. The offer will not be accepted.

. H. C. Chartens, dry goods merchant, of Moncton, N. B., has assigned. Liabilities are estimated at \$25,000, and the assets are placed at \$20,000. Unfortunately for his Upper Canadian creditors there are nearly \$10,000 worth of preferential claims and judgements in favor of St. John creditors, which will materially reduce their chances of a dividend. The firm was formerly Charters & Fillmore, who dissolved in 1883, Charters continuing alone.

THE judgment of the Admiralty Court of Liverpool, in the Oregon inquiry was delivered to-day. The decision was in favor of the owners and officers of the steamer on all the questions submitted to the court. The court found, however, that the fourth officer was somewhat remiss in his duties, but not to a sufficient extent to warrant it in inflicting punishment upon him.

REGENT FORTIN, general storekeeper and grist miller, of St. Alexandre, Kamouraska, has assigned. His liabilities are almost entirely in Quebec, and his principal asset is the

grist mill which cost originally \$6,000 and is now valued at \$5,000 but which is subject to a lien on behalf of his brother. He has been almost continuously in hot water and has always been slow in his payments.

THE ENGINEERS and workmen who constructed the great Bartholdi statue of "Liberty Enlightening the World," will arrive in New York from France in May, and commence putting in place this great wonder of modern times which will tower over 320 feet above the waters of the bay. This great statue is a gift from one great nation to another, and will stand for ages to cement the friendship of France and America.

The following statement of the proceeds and expenses of the estate of Joseph Chartrand, of this city, insolvent, is not over pleasant for the creditors:

tents of the Royal Hotel are being sold this week, and the proprietor of the Wellington is advertising a sale on the 11th, 12th and 13th prox. It by no means follows that these houses will be closed, but the business has not been flourishing in that city for some time past. Several changes have taken place in the dry goods trade also, and rumor has it that the grocery business will soon show some new names.

Cable accounts of the report of the Grand Trunk Railway Co., just issued, state that it deals at length with the position which the company now occupies. The decline in net receipts for the past half year amounted to £110,000 stg., and was attributable to depression in trade generally, the recent war in rates, and to the loss of traffic resulting from the epidemic in Montreal. The directors,

however, feel hopeful and consider the company in a good position to secure a full proportion of the general advantages arising from the more peaceful arrangements now established among the American railway system.

ARTHUR TALIOT, general storekeeper, of Scotstown, Que., has assigned with liabilities of about \$2,000. He commenced business in 1885, in partnership with one Picher, whose failure at Lapatrie was chronicled in these columns. The partnership was shortly after dissolved and Picher went to Lapatrie, drawing \$900 out of the firm as his share. In January, 1886, Talbot was burnt out, suffering a loss of about \$1,400, on which the insurance was only \$800. The insurance money was seized by his ex-partner and only recovered after considerable litigation, and this, with the losses incurred at the fire, have brought about his failure.

TEES, WILSON & CO.,

(Successors to James Jack & Co.)

IMPORTERS OF TEAS And General Grocers, 66 ST. PETER STREET, Montreal,

W. Chaig, a well known cattle dealer is reported to have fled to the United States to avoid his creditors. The Clinton New Era says :- The other day, by the merest accident, it was discovered that he had forged the signatures of two well-known business men, as endorsers of a note for \$800, which amount he secured from a farmer of Goderich township, and shortly after this became known, forged paper turned up in all directions and for all amounts. He had borrowed money wherever it was possible to do so, relatives and friends alike being his victims, and the amounts running all the way from \$50 to \$2,800. It is very difficult to find out accurately the sums lost by individuals, but if reports are all true, there are at least half a dozen whose loss will be over \$1,000 each, (one going as high as \$2,800), a large number lose, amounts of from one to six hundred dollars, and it is estimated that when all are known, his liabilities will sum up in the neighborhood of \$20,000.

HAMILTON.

A MEETING of the creditors of M. C. Mullarky & Co. was held last week, at which the larger creditors unanimously refused to accept any compromise. Mr. Mullarky informed the meeting that he had made a voluntary assignment, but this not being satisfactory to the meeting a committee of creditors was appointed to obtain a judicial assignment, which was done, and it is now probable that the estate will be sold by auction. It is said that the large amount drawn out of the firm by Mr. Mullarky was the subject of much unfavorable comment, it being stated that he had drawn at the rate of \$1,000 per month for the last two years and a half, and that furthermore he had withdrawn the sum of \$4,000 within a few days of his failure. The liabilities are placed at \$77,000 direct, \$4,350 secured, \$1,077 privileged and \$78,000 indirect, or in round figures \$162,000, of which \$73,000 is due to their bankers, and \$6,073 to Toronto creditors. The assets consist of manufacLeading Wholesale Trade of Montreal.

tured and unmanufactured stock valued nominally at \$19,357, and book debts amounting to \$19,540, in all about \$66,000. The estate has also a claim upon 935,000 acres of land in Mexico (!) and three hundred dollars worth of paid up stock in a patent.

The famore of Messrs. James Brown & Son, dry goods merchants, of this city, will be heard of with general regret. Mr. Brown has been thirty-five years in business in this city, and has commanded the respect of the entire business community for integrity of purpose. Mr. Brown, jr., when doing business as Brown, Taylor & Co., was forced to the wall through holding forged securities, as will be fresh in the minds of our readers, and was compelled to compromise with his creditors at 52 cents in the dollar; but he afterwards paid his creditors the balance of their claims in full, an

occurrence sufficiently rare to be noteworthy in these times. The assignment is caused sin:nlv by losses to stock during the late disastrous floods, as out of \$31,000 worth of goods in their basement, \$24,000 worth are soaked with water. The liabilities amount to about \$50,000, and the assets, which show nominally a surplus of \$10,000, will depend upon the amount the damaged goods will realize under the hammer. The ereditors of the firm are only seven or eight in number, principally cotton mills, and were offered 70 cents in the dollar, which they refused, demanding 87% cents, a demand which they afterwards reduced to 80 cents. A judicial assignment has been made,

MONTREAL, APRIL 30, 1886.

FREE IMPORTS.

If the signs of the times are to be relied upon, there is a growing conviction among others besides the wage-earning classes in Great Britain that the "cheap loaf" policy of the last forty years has failed of its mission as regards the welfare of the people at large, and that the time has come for a more thorough examination of its merits than any to which it has heretofore been subjected. In a recent number of one of the most influential of the London monthly magazines, Lord Penzance enters boldly into the field of discussion and logically lays have some of the fallacies of the Cobden Club and its supporters, questioning the wisdom of a policy in which Great Britain is alone among the nations after a trial of nearly half a century. A synopsis of his remarks cannot fail to interest the people of Canada,

In the ten years, 1870 to 1880, the industries of all nations show an advance

of 221 per cent. England as yet holds the foremost place, but Europe is losing weight in the balance of labor while the United States—the most thoroughly "protected" country in the world-is rapidly gaining in the race, and the growing colonies of Great Britain are fast following in her footsteps. "Canada indeed," says the writer, "almost, rivals the United States; and it is thoroughly protective." England stands alone among the nations the only exponent of "Free Trade." The French, the Germans, the Italians, our keen-witted cousins the Americans-races that have produced philosophers, calculators and reasoners second to none—have heard the arguments in its favor and watched the operation of the system for nearly half a century and deliberately decline to adopt it. This, says the writer, is no reproach to those who framed the system-for the system has not failed-it has never been tried; it could not be tried without the co-operation of other nations—and they have refused to co-operate. "It is as though a man had learnt his part in a concerted piece of music and were to insist on performing it, though the other performers absolutely refused their co-operation." It is no longer "Free Trade," but "Free Imports," which cannot be upheld by the reasoning upon which the former was preached and accepted:

The arguments addressed in support of his theory are not unknown to us in Canada. It is obvious enough, writes he, that if the people of Great Britain, instead of consuming the products of 'home' labor, consume the goods made by the foreigner, they withdraw in the same degree from the 'home' markets the demand for goods of domestic origin, and directly injure the home producer by lessening the demand for his goods. On the other hand, it is equally obvious that by admitting the successful competition of the foreigner, the price of the article is likely to be maintained at its lowest point, which is a direct benefit to the consumer.

Now the question is which of the two results is of the higher concern to the community-to benefit the producer by securing him a market, or the consumer by securing for him a low price. He next quotes Mongredien, who pithily expresses the general view of the subject as follows: "The trade of the country consists of the "aggregate operations of individual traders, "which are always equal, co-ordinate and "self-balancing, and which necessitate to a "mathematical certainty (excepting bad "debts) an import to every export, and "vice versa." But is it true, he asks, that the foreigner; whose manufactures are admitted free of duty, must be paid, and is in fact paid, by receiving British goods? and he reasonably contends that the causes which regulate the amount of imports and

exports are absolutely independent of each other, the dealer in each country ordering just as many goods as the demands of his market require. The endeavors on the part of ship-owners to obtain cargoes both ways can have but little influence.

For forty years the doctrine that every import necessitates an equal export has held its ground in Great Britain, and yet in all this time the exports in no single year have equalled the imports. In 1880 the imports were 411 millions, the exports 286 millions. All imports must be paid for; they are not paid for in money, therefore they must be paid for in goods; consequently the export of goods must increase with any increase of imports This is the chain of reasoning-which fails when it comes into collision with a contrary result. It is plain that payment is not made by sending out bullion; the export of bullion from England, he thinks, is under ten millions in any given year, and oftentimes the balance is the other way. The actual importer does pay in money—that is, he gives his acceptance at so many months, and when the bill falls due he pays it. When and how, he asks, is it that this money payment, before it arrives in the foreigner's hands, is converted into goods, as stated by the "Free Importers?" What becomes of the acceptance? It is, or may be, transferred from hand to hand by endorsement, or sold and sent abroad. But whoever may be the holder (unless the purchaser become insolvent, in which case the foreigner's goods are not paid for at all, either in goods or money or anything else) the price of the foreign goods is paid in actual money when the bill falls due. And if all foreign imports are paid for in this way there is no ground for the assertion that they are paid for by an equal quantity of goods exported. We shall return to the subject in another number.

AT HOME AND ABROAD.

The chief topic in financial circles during the past week, was the Bank of Montreal dividend. The street was divided in opinion as to whether 1 or 2 per cent bonus should be looked for: some. recalling the promise of the management that all surplus profits after a fifty-per-cent rest was reached, should be given to the stockholders, hoped for the larger figure; others, more prudent, and as the event proved, more prophetic, argued that the unprofitable condition of business generally, the light demand for money in Canada, and the low rates abroad, all combined to make a high dividend most unlikely. There have since been most conflicting rumors as to its earnings, confident estimates varying as much as 3 per cent; which only shows that people are very much in the dark.

Among the other Banks which have recently declared dividends are the Merchants, 3½ per cent, the Imperial and the Bank of Hamilton 4 per cent.

These are all unchanged since last year, and may no doubt be taken as indicating moderate returns in general from banking capital.

With the exception of the casualties by flood, and the drawbacks and delays to trade arising therefrom, the spring is opening out very satisfactorily. The fine weather has stimulated various lines, especially dry goods. It has also set farming operations on foot in good season, and the prospects in that line are very cheering. This is especially the case n Manitoba and the Northwest, where much new ground has been brought into cultivation, and early seeding, which seems to be the great specific against injury by frost in the autumn, has been all but universal. By the middle of April a great breadth of wheat was sown, by the end of the month most of it will be in. This is the first step at any rate towards a successful season, and if a bountiful harvest is reaped the effect on Northwest business generally, and especially on immigration will be very great.

In financial matters we learn that there is an undoubted absorption of floating money constantly going on, while the demands for discounting are steadily maintained. There is, however, no signs of movement in rates, beyond a moderate stiflening in call loans.

The news from New York chiefly turns on the labour troubles, which, in spite of the natural and healthy revival in many branches of trade, are keeping everything at a dead level of dullness.

Incertitude and anxiety as to the outcome are entirely destroying speculative movements, even such mild speculation as is involved in laying in a large stock of goods for the summer's trade. The policy of buying supplies from day to day, and living from hand to mouth, is affecting the wholesale trade. This is the more to be regretted since the spring has opened out most favorably in almost every department of agriculture, and but for the labour troubles a buoyant and hopeful feeling, increasing confidence and enlarging all business operations would undoubtedly have characterized this season.

In money matters the position is but slightly changed. Call loans are made at 2@21 per cent, and there is a tendency to lower rates, owing to the influx of money from the country, but on the other hand the export of gold still goes on, mainly to France, and this may strengthen the home market. The higher rates in London, which have also been brought about by shipments of specie to France, have affected the value of sterling exchange in New

York, increasing the rates for short drawings as compared to long bills.

In England, as already mentioned, rates for money have been higher, the street having for a time come up to the Bank minimum. The latter remains unchanged, but in the open market the best bills are now done somewhat below 2 per cent. The disturbing element is the new French loan of 900 million francs, which is just being placed on the market. The payments made with each application lock up temporarily a large amount of money.

Amid the momentous issues involved in the Home Rule and Irish Land purchase schemes, the English budget has met with a very quiet reception. From the Economist's summary we learn that no changes (beyond one very trifling one) are proposed, that the deficiency for the past year is to be carried as a permanent addition to the floating debt, and that the comparatively slight deficit of about £500,-000 estimated for the coming year is to be met by suspending a portion of the sinking fund payments. The Economist, however, fears a larger deficit than the Chancellor of the Exchequer, since the prospects are that the workingmen are less able than ever to indulge in spirits and tobacco, while the revenue from these articles is estimated at a sum fully equal to the preceding year.

THE ONTARIO MUTUAL LIFE,

The sixteenth annual report of this active Canadian Institution will be found elsewhere, and although the business for the year shows a reduction of about half a million as compared with that of 1884, its character in connection with other features of the statement cannot fail to prove satisfactory to all concerned. For example, the total income shows an advance during the year from \$250,940 to \$273,446. Included in this is Interest of \$33,000, showing an increase of several thousand dollars as compared with the year preceding. In this respect it is assuring to learn that the rate on the company's investments is 63 per cent, especially in these times of cheap money. That the company is maintaining its strength is shown by the increase of over \$100,000 on its total assets, these having attained to more than three-quarters of a million dollars at the close of the year The expenditure is less by \$8,640, the ratio of this item to income being now reduced to 214 per cent, as against 264 per cent in 1884. The generally regarded heavy surplus for distribution among the policyholders is maintained at its former figure, and this after amply providing for death losses, and adding \$107,470 to the company's Reserve. The company is faced with a considerable increase in mortality for the year through the maturing of a

number of large policies, but this does not appear to have exceeded their expectation; the claims for 1884 were abnormally low, and if as a witty judge once remarked, "the chief function of an insurance company is to pay losses," the Ontario Mutual is performing its duty in the premises, and with a promptitude which has always characterized it. The Company is gradually extending its sphere of usefulness throughout the whole of the Dominion, and is probably as well represented in all quarters as circumstances permit. The late President Lincoln once made a pithy remark as to the wisdom of trading horses when crossing a stream, and there is another quotation also somewhat applicable. viz.: "It is better to be off with the old love before we are on with the new." However, these are matters of minor detail and can only, if at all, retard the greater progress of the company in a field requiring influential as well as skillful labor.

EXPERIMENTAL AGRICULTURE.

The encouragement offered to settlers in the newly developed Northwest by the Government and the Canadian Pacific Railway Company has given good results, and throughout the rest of Canada a more active interest has been taken in agricultural pursuits during the past few years. Unaided enterprise may achieve much, but the necessity for following improved methods in this age of competition and progress, has long indicated that if Canada was to make substantial headway, something must be done. Especially was this seen in some of the earlier settled districts where one generation after another has followed antiquated systems of farming.

In 1884 a select committee of the House of Commons was appointed to enquire into the best means of encouraging and developing the agricultural interests of Canada, and it reported in favor of the establishment of an experimental farm. The project, however, was not fully matured, and the necessity for expert testimony led to the appointment of Prof. Saunders, of London, Ont., who was commissioned to visit the more important agricultural colleges and experimental farms on this continent, and enquire into the methods of working. The result of his labors has been embodied in a supplementary pamphlet to the annual report of the Minister of Agriculture, and the writer declares that he has kept in view the actual benefits, either direct or indirect, which such establishments are calculated to confer on practical agriculture, including stock raising, dairying, etc. He has also ascertained what is being done in horticulture, especially in regard to the production of fruit. The subject of forestry has likewise come under observa-

The wise and liberal policy adopted in the United States has borne good fruit. In 1861, Congress being powerfully impressed with the importance of encouraging the development and progress in that country of the two great departments of industry, passed an Act which provided for the endowment of a college of agriculture and mechanic arts in each State of the Union, by making a large grant of public lands for that purpose. The quantity apportioned to each State was equal to 30,000 acres for each senator and representative in Congrees to which such State was respectively entitled by the apportionment under the census of 1860. The Act provided that the whole of the money received from the sale of these lands should be invested in safe securities, and the interest only used for the maintenance of the several institutions. The States were required to furnish the necessary land for the colleges, and no portion of the fund could be spent in the purchase, erection or repair of any building or buildings. These must be supplied by the State or by the liberality of the towns and cities near which the institutions were to be located. In this way the foundation was laid for the providing of a substantial and permanent fund for the maintenance of each college; 9,600,000 acres of land were appropriated, from the sale of which a fund of nearly \$9,000,000 has accumulated, with a considerable quantity of land still unsold. The aggregate of the value of grounds, buildings and apparatus was given in 1882 at \$6,531,844, making a grand total of over fifteen and a half millions of dollars devoted to furthering the development of these industries.

The result of this great national undertaking, after twenty-five years trial, is reported on at length by Prof. Saunders, information being given by him as to the area of land occupied by each institution, the character of the soil, buildings and equipments, the expenditure on capital account, cost of maintenance, etc. Additional evidence is not wanting of the estimation in which experimental work in agriculture is held in the United States, a bill being now before Congress providing for the maintenance by the Federal Government of an experimental station in each State of the Union, by an annual grant of \$15,000 to each station. This, as has been well said, will undoubtedly give a great impetus to experimental and practical work, and by providing the means for more general and extended investigations, agriculture will be materially advanced, the condition of the farmer improved and the agricultural calling accorded, in public estimation, some measure of that dignity and importance to which, as one of the chief elements in national wealth and greatness it is fairly entitled.

As is well known the Ontario Agricultural College, situated in the vicinity of Guelph, is the only institution of its kind in Canada. The farm consists of 550 acres, purchased in 1873 at a cost of \$75,000. The total investment on capital account to the end of 1884 was \$334,016. The average net expenditure on maintenance account for the past four years was \$36,335.47, and on capital account \$27,031.66. The number of students at present attending is 91, In the course of instruction agriculture occupies a prominent place, in connection with lessons on live stock, dairying, aboriculture, chemistry, veterinary science, botany, etomology, English literature, book-keeping, &c. The full course covers a period of two years, each year being divided into four terms, one of which is devoted entirely to work in the outside department. Other organizations which have done good work in Ontario are the Fruit Growers' Association and the Etomological Society, the former of which may be said to have made a testing ground of the whole province by distributing among its members promising truit trees, vines, etc. The latter has rendered eminent service by disseminating among farmers and fruit growers, information regarding injurious insects affecting field and garden crops, with suggestions as to the most useful remedies.

Unfortunately the old Province of Quebee has attempted far less than its sister Province. The local government subsidizes three farms, giving to each \$2,000 annually, besides paying the board of ten students in each school at the rate of \$60. There is an allowance to as many students of \$40 each, which they can earn for themselves by laboring on the farm. Neither of these establishments, howevercan properly be called 'experimental' or 'stock farms.' Very few experiments, if any, have been made; and the stock, although good of its kind, is by no means remarkable. All these provincial schools stand on the same basis exactly. The farm and schools, &c., belong to the Corporation of the College at St. Ann's, Richmond and L'Assomption. They have each but one regular professor-that on agriculture, although a few lectures are given in the course of the year by outsiders. These corporations manage pretty much as they please. A Board of Inspectors is sent annually by the Council of Agriculture to visit the schools, and the grant is paid after the inspection. The individual efforts of Mr. Chas. Gibb. of Abbottsford, Que., in the cause of horticulture, justly deserve recognition. This gentleman shares with Prof. Budd, of Iowa, with whom he travelled to Russia, the credit of having thoroughly investigated the subject of hardy Russian fruits, proving their quality and extreme hardiness. He is now testing 89

varieties of apples, 49 of pears, 10 of cherries and 4 of plums, the greater part of which are from Russia, and others from North Germany and Poland. The Montreal Horticultural Society, which is assisted by a local Government grant, has extended its usefulness over as wide a field as possible and for many years has done a useful work.

In the other provinces, public aid has not been forthcoming to any extent. Some years ago the Government of New Brunswick imported a number of cattle, sheep and swine, and placed about 30 cattle, 40 sheep and 6 swine on a farm, as the beginning of a stock farm. There is no evidence that any experimental work has been undertaken on this farm, beyond stock raising. Fruit growing has received a stimulus in Nova Scotia through the public spirit displayed by the Fruitgrowers' Association of that Province, and the increased exports of Nova Scotia fruits during recent years are said to be due in a great measure to the activity of this useful association. In view of the enormous interests at stake it seems surprising that representative and public bodies, have not, following the example of the United States, devoted more attention and more money towards the advancement of agriculture. In giving testimony as to the work done by the Dominion department, the secretary said :- The first in order in the enumeration of its functions is agriculture. There has, however, been no general vote for the purposes of agriculture. There have been special votes for particular branches - for instance, cattle quarantine and inspection, the gathering of statistice in certain particular cases, and also grants to exhibitions. H-therto, these have comprised the whole functions of the department in relation to agriculture." The progress that has been made, independent of any direct stimulus from the departmeng of Agriculture, is certainly creditable to the farming community and affords strong proofs that the soil and climate of Canada is adapted for still more extended work, In this connection we briefly enumerate the exports of the farm for 1885:-Horses, 12,310, valued at \$1.640,506; cattle, 144,441, \$7,508,043; sheep, 335,207, \$1,264,811; butter, 8,145,310 lbs., \$1,577,428; cheese, \$6,579,834 lbs., \$8,-902,115; eggs, 11,542,703 dozen, \$1,830,632; poultry, \$175,889; fruits, \$640,823.

The report prepared for the government also contains some description of the agricultural colleges, experimental stations and schools of horticulture and forestry in England, France, Germany, Belgium and Russia, showing that all these countries have recognized the importance of conducting experiments and forwarding the great agricultural interest. The following plan, with all necessary details, is submitted:—

"There should be provided one central station situated near the Capital, the dividing line between the important Provinces of Ontario and Quebec, with not less than 400 acres of land, which should serve as an experimental station for these provinces jointly. Here the climate represents the average condition of a large part of the settled port ons of Canada, where all the cereals and many other field crops can be successfully grown, and where most of the best variety of grapes grown in the open air ripen well, and many sorts of apples and other fruits are raised with advantage. At such central point all the different classes of experimental work might be conducted. There should also be one substation for the Provinces of Nova Scotia, New Brunswick and Prince Edward Island jointly, and one each for Manitoba, the North-West Territories and British Columbia. In the Maritime Provinces and in British Columbia 200 acres would probably be sufficient for the purposes of each station, but in Manitoba and the North-West Territories, where land is so abundant and cheap, there should not be less than a section of 640 acres belonging to each station, so that there may be land sufficient to carry on experiments in stock raising and forestry on such a scale as the circumstances of each case may require. With the varying conditions of climate and soil necessarily associated with a stretch of territory covering 4,000 miles, from ocean to ocean, all now accessible by rail; a station on the Atlantic, another on the Pacific, with three intermediate ones, would be absolutely required if the work is to be carried on with reasonable efficiency. It would also be expedient that the government should reserve atsuitable points in the North-West Territories, from the available and unoccupied Dominion lands blocks of one, two or more sections each, for future experimental work in tree-planting. The setting apart of these blocks of land for forestry The setting purposes would not in any case be a loss to the country, since if they should only be planted in part, this would increase the value of the remaining portion, and also that of all the lands in the neighborhood. By adding to the value of adjacent lands they would partly pay for themselves and at the same time prepare the way for extended experimental work, if desired, as soon as young trees were available for the The whole should be under the purpose. control of one head, known as director or chief whose residence should be at the central station, and whose duty it should be to visit the sub-stations as occasion required and in conference with the managers of the sub-stations arrange for the course and character of the work to be carried on at each, subject to the approval of the Minister of Agriculture. This arrangement would ensure desirable uniformity in the character of the performed and prevent the waste which would result from the unnecessary duplication of experiments.'

NEW FAERICS.

A large number of new fabrics, some of them merely variations or improvements on existing styles while others are strikingly original and curious, are now coming before the public. The prevailing craze for bouclé and bourette effects has reince ered a large number of varying styles possible and all the leading makers seem to have vied with each other as to which could produce the most curious and startling effects.

In the fashionable rough mixed suitings, white, soft wool bourette or wick effects are much sought after, the two leading novelties perhaps being a rough suiting in fancy colors, called Bivouac, which has white, soft wool bourette woven into narrow stripes, and a medium weight serge suiting, called Coblentz, which is covered with singularly effective stars of wick on ground of a lighter shade. These fabrics are intended to be braided and bordered with wooden rosary beads.

The latest fashionable monstrosity is a nun's veiling covered completely with a tangle of imitation porcupine quills woven in mohair, and appropriately called "porcupine," the effect being still further heightened by broad bands of color. It has a rough, harsh, unkempt look, but is nevertheless both pretty and effective and has been fairly patronized. It is made of 24 inch width and a plain nun's-veiling of 44 inch width in matching colors is usually purchased with it for the purpose of making up.

Another very pretty fancy in new fabrics is the "Eglantine" or moss suitings, which is a perfectly original texture, having an evenly woven ground in one color, covered but not hidden by a fine moss in some darker or contrasting shade. One typical variety of this fabric showed an earth-colored ground covered with moss of natural line which gave a curiously rich and bizarre effect to the costume. Other varieties for evening wear will have the moss illuminated with cut beads, or dotted with tinsel, which will give the glittering effect so much sought after this season Others again show heavy stripes in moss alternating with lighter surface effects, and it is said goods having curious effects illustrated in moss will soon be offered to the public.

Trapistine is the name of one of the most stylish, though quiet, of the spring fancies. It is a soft-finished material, pretriest in the gray shades, and is intended to be made up in the same manner as the tweeds and cheviots. It will be used extensively for travelling and early seaside dresses. Khayyam cloth, a popular camel's hair serge, introduced first last season, and now shown in all shades, is also a great favorite owing to its ability to resist rain and throw off dust.

A popular fabric showing lace effects and figures in combination with stripes of plush or moiro, and intended to be made up over some plain material, either silk or voiling, is called Dentelle, and in this style are shown some tissues in round, open network of coarse tulle with satin or plain stripes. Etamines with velvet or plush stripes, joined by a woven piece in open

work, are much called for, and a dark moss-green etamine, with broad bands of velvet joined by narrow bands of open work, having a stitching of ruby colored thread, has sild well to the better trade.

The new spring silks show a number of half tints, principally blacs in dark but distinct shades, golden browns having a lustrous golden sheen like burnished brass, and a variety of lovely soft gray shades, this exceptionally beautiful color having proved itself capable of infinite variety. Still it must be confessed that silks are out, the beautiful finish of new woollen goods having temporarily ous'ed them from popular favor, and this result is even more marked in the case of the India and China silks and printed pongees which are now shown in a great variety of colors and printed with the same designs as the satines and cambries. Of course some of these dresses will be worn, but the high colors and startling contrasts will effectually prevent their ever becoming popular in this market.

The popular etamine or canvas goods have been copied in silk, the new fabric being a canvas made of very hard-twisted silk, It will never be much called for though, as at a short distance it could not be distinguished from a cotton canvas, and this drawback prevents its real value from being appreciated by the observer. It is intended for combination with choice striped and brocaded lines.

In all the new fabrics of the season the preference for stripes both in silk and woollen goods and in fancy dress goods of every grade, is most marked. Even in silk goods there is an immense choice of stripes, a novel arrangement of wide stripes of faille and silk plush being, perhaps, the most stylish novelty.

INDIA RUBBER .- A writer in the Boston Commercial Bulletin draws attention to the fact, not generally known, that India rubber is peculiarly subject to decay, and cites the fact that any rubber article, even if unworn, will deteriorate so stendily that, should they ultimately be brought into use, their durability will be seriously impaired. This decay is attributed to oxidation brought about by exposure to light and air, and, in consequence, rubber goods should be preserved always in a case or in a dark room. This steady decomposition is partly due to the nature of the raw material, but principally to the effect of the change in composition owing to the effects of vulcanization, scientific research having shown that pure virgin India rubber is far less liable to undergo decomposition than masticated rubber, and it is further stated that good Para virgin rubber will remain in good condition for any length of time, providing that it is kept at ordinary temperatures and not exposed to direct sunlight. It is the alteration of structure induced by the process of yulcanization

which renders the material so peculiarly susceptible to decay. This process consists in introducing sulphur after the rubber has been previously prepared by mastication and mixing with naptha. The rubber thus prepared is put into ovens and subjected to a temperature of 275°, the sulphur at that heat combining chemically with the rubber and producing the so-called vulcanized rubber. The more it is worked or masticated, or if it should be over vulcanized, the greater liability is there of its afterwards decaying. These few remarks will explain to many people the want of durability in rubber articles which have been long in stock, and will show the desirability of purchasing those, if possible, of recent manufac-

The grain fleet which is now awaiting at Chicago the opening of navigation on the great lakes (according to the Dry Goods Chronicle) is one of the largest ever known. A despatch states that in that port on the 1st April there were thirty-seven steamers and sixty-four schooners loaded with grain. Their cargoes aggregate 5,055,000 bushels, and the probabilities are that this amount will be swelled to 6,000,000 by the time the Mackinaw Straits are free of ice. Of this grain now afloat, 3,569,000 bushels are corn, 917,000 bushels wheat, and 360,000 bushels flaxseed. Charters were made in January at 4 cents on corn to Buffalo, including winter storage; mid-February, 3 cents. Grain vessels are in good demand at 31 cents on corn and 31 cents on wheat to Buffalo.

THE LONDON WOOL SALES .- The series of wool sales in London closed on the 21st ult., and a comparison of the prices obtained compared with those paid at the previous series, shows that Australian and New Zealand greasy wools were fully 1d @ 1d lower, while fleece and scoured showed from 1d to 13d decline. Cape greasy was 4d lower, fleece 4d @ 1d, and snow white 1d lower. The total quantity offered during the sale was 276,000 bales, of which 112,000 bales were purchased for Great Britain, 116,000 bales for the Continent, and 2,000 for America. The remainder, 46,000 bales, were held over, and will be offered at the next series. The tendency of the market was dull and lower.

A contemporary states that the rapid strides which has been made in extending the railway system of the United States within a few years, and the enormous magnitude of the interests affected by the American railway strike, may be estimated from the fact that at the close of 1885 there were 7,000 more miles of railway in the United States than in the entire continent of Europe. The total mileage for Europe at the close of the year was 121,251, and for the United States 128,492 miles, a most striking proof of the rapid advance being made by the United States in commercial and industrial importance.

Provincial Chief of Police Constantine, of istics, that country has only 100 textile unitoba, arrived in this city Wednesday, have custody D. H. Scotl, a well-known deflactories of all kinds, employing about 13,000 hands. The largest cotton mill which is ulter. The prisoner was immediately lodged

and manufactures unbleached cotton for domestic use.

Manitoba, arrived in this city Wednesday, havin custody D. H. Scott, a well-known defaulter. The prisoner was immediately lodged in jail, while preparations were being made to send him to Winnipeg, where he will stand his trial, and he left for that city this morning. He was arrested at Laredo, Mexico, a village on the confines of Texas, and was taken 800 miles through Mexican territory to the coast. There he was delivered up to the Canadian officer, who bore a warrant from the Governor-General of the Dominion for his arrest. To avoid possible trouble with the United States authorities, it was found necessary to bring the prisoner to Canada cia the British West Indies and Halifax. Scott was at one time a very prosperous merchant at Meadow Lea, Manitoba, and filled the position of clerk of the municipality, as well as other offices of trust. His offence is having discounted forged paper at the Merchants and other banks, to the extent of about \$8,000. The management of the affair, so far as it devolved upon Chief Constantine reflects the highest credit upon his skill and capacity. The Merchants bank too, is to be greatly commended by the business community for having gone to so much trouble to punish the defaulter, thereby setting a deterrent ex-

Doon Notes.—Since Messrs. J. & B. Bear, of Doon, Ont., had the telephone put in their establishment last summer, says the Waterloo Chronicle, there is considerable talk of others having it also, and we learn that Messrs. Snider & Webster are getting an instrument put in this week, and will also have one connecting them with German Mills.—J. & B. Bear sent off six of their celebrated buggies on the 18th inst. They have shipped a large number this season.—Mr. Walker has sold out his hotel business at Doon to enter into the flax business in connection with the firm of M. B. Perine & Co.

ample to others similarly disposed.

Garr. Scort, R. N., in charge of the Cauadian fishery protection vessels, was at Yarmouth on Saturday in the "Lansdowne," and intends to skirt the shore. It is said a large number of American fishing schooners are now lying at Eastport, Me., waiting for men to join them. An American schooner called into St. Margaret's Bay with the object of purchasing bait, but the fishermen unanimously refused to sell to her and she was compelled to leave the Bay without it. The bait will be sold to Canadian fishermen at Lamenburg who are waiting for supplies, before setting sail for fishing grounds.

Ir is principally owing to the great scarcity of water and high cost of fuel, that the textile manufacturing industries of Mexico bave not developed as rapidly as they otherwise might have done under more favorable circumstances. According to the most reliable stat-

G. T. R. EMISINGS for week ending '24th inst., exceed those of same week in 1885 by \$23,671.

THE apple trade continues demoralized, there being large supplies available although the season is well on to the close. The same state of affairs exists in the United States, the cause being the exceptionally heavy crops of last season in all the principal sections, save those of New Hampshire. Owing to the large increase of orchards, and the care which has been taken to have them bear in "off years," there are really no such seasons at present, The English crop was only of fair proportions, but the large shipments from this continent caused a low range in prices, on an average about 2/03 shillings less than last season. Thus, Baldwin had an average range of 10@12 shillings this season against 13@15 shillings last season. The total shipments from the beginning of the season to April 5 from Canada and the United States were 867.710 bbls. against 771,946 bbls, the previous year. shipments from Boston have been, this season, 220,906 bbls, rgainst 307,307 bbls, last year. The shipments from New York have been 449,556 bbls. against 249,927 bbls. last season. Canada has shipped 250,000 bbls. in about the same period of time.

The report that an artesian flow of petroleum land been discovered in the southern part of Santa Fe county. New Mexico, between the mining villages of Golden and Wallace, has been confirmed, and samples tested. The oil flows through tubing fifty-five feet down, and the flow is reported to be copious and steady. The crude oil burns freely and with a good flame. Several claims have already been located in the neighbourhood of the well.

ALL THE seeds now sent out by the agricultural department of the United States are tested before they are accepted by the government, and are warranted to germinate it properly planted and treated. Each member of Congress has for distributing 6,000 paper packages of vegetable seed, 500 of flower seed, 300 of tobacco, 20 quarts of sorghum, 20 of corn, 50 of grass, 28 of sugar beet, and 32 of cotton seed.

A SCHEME is on foot, and surveys being made, for a standard gauge milroad from Alpena to Cheboygan, or Duncan City, Mich., with a transfer from the mainland to Bois Blane island, a track across the island, another transfer to northern peninsula, and a milroad thence to Sault Ste. Marie. The Canadian Pacific is said to be the moving spirit in the enterprise.

The oldest merchant vessel afloat is said to be the barque "True Love," of London, 296 tons register. This vessel was built in that city in 1764, making her 122 years old. She is owned by John S. Ward, of London, and is yet in active service.

Meetings, &c.

ANNUAL REPORT, ONTARIO LIFE.

The sixteenth Annual Meeting of The Ontario Mutual Life Assurance Company was held at the head office, in the Town of Waterloo, Ont., on Wednesday, the 14th April, 1886, and, as on former occasions, many influential and representative policy-holders from different sections of the Dominion attended, to the number of about 100.

The President, I. E. Bowman, Esq., having taken the chair on motion, W. H. Riddell, Esq., Secretary of the Company, acted as secretary of the meeting. Notice calling the Annual Meeting having been read, on motion of Alfred Hoskin, Esq., Q. C., Toronto, seconded by Robt. Baird, Esq., Mayor of Kincardine, the minutes of last Annual Meeting were taken as read, and the same thereupon confirmed. The President then read

THE DIRECTORS' REPORT :

GENTLEMEN,—Your Directors submit the following statements as their Sixteenth Annual Report, containing an exhibit of the business transacted during the past year, and showing the financial position of your Company as at the 31st December, 1885.

Our total receipts for the year amount to \$270,697.44, being \$237,665.32 for premiums, \$33,032.12 for interest on investments.

The applications for assurance granted during the year amount to \$1,867,950 under 1,355 policies, and the total number of policies in force at the end of the year is 6,381, covering assurance for \$8,259,361.71 on 5,867 lives, being an average of \$1,408 on each life. We also received 54 applications for \$74,500 from persons whose health was not up to our standard, and were therefore declined. Our net assets are \$660,617.05, showing an increase of \$96,716.80; and our total assets are \$753,661.87, being an increase of \$101,000.11.

The death losses are considerably in excess of the previous year, an unusual proportion of large policies having become claims, but the number of deaths does not indicate any abnormal increase in the rate of mortality.

Our expenditure shows a reduction of \$8,639.83 in the cost of management, and the ratio of expense to income has been reduced from 26½ per cent. 21½ per cent. This enables us to continue the same distribution of surplus to policy-holders for 1886 as last year, after making full provisions for the payment of our death losses, and adding \$107,471.10 to reserve.

The detailed statement prepared and duty certified to by your Auditors is herewith submitted for your information.

You will be called upon to elect four directors in place of Frank Turner, I. B. McQuesten, B. M. Britton and John Marshall, whose term of office has expired, but who greatl eligible for re-election.

On behalf of the Board,
ISAAC E. BOWMAN,
President.

We beg to report that we have carefully examined the books and accounts of your Company for the year ending 31st December, 1885, and that we find the same correct and in

Surplus December 31st, 1885.... \$38,892.69

accordance with the foregoing statement.

We have also examined the Mortgages, Debentures and other Securities held by your Company, and we hereby certify that they are correctly shown upon the statement submitted herewith.

H. F. J. JACKSON, Auditors. J. M. Scully,

Waterloo, March 4th, 1886,

ADOPTION OF THE REPORTS.

In moving the adoption of the Directors' Report the President said;

That the volume of new business for the past year is not quite equal to that of 1884, owing partly to the general depression in trade throughout the Dominion, partly to vacancies and changes in our agencies during the year, and also to some extent to the unusual competition from the Co-operative Association, whose activity has somewhat interfored with the regular Life Assurance companies among the workingmen, which, however, will be only for a short time, until the public has had an opportunity of testing by practical experience the insecure basis on which these associations stand.

During the first three and a half months of 1886, we issued new policies covering \$110,-250 more than the amount issued during the same period of 1885, which shows that public opinion is again rapidly changing in favor of sound Life Assurance, resting on a solid reserve, such as the Ontario Mutual possesses in its interest bearing investments.

Owing to the unusually heavy death claims for the past year, our surplus has been slightly reduced. The reduction, however, is not sufficient to necessitate a change in the

division among the policy-holders, and therefore the Board has authorized the same distribution as last year.

Our death losses since the first of January, 1887, are only about one half of what they were for the same period of 1885, so that we have good grounds to expect that the surplus available for distribution will again be considerably augmented during the current year.

Our investments have earned a fair rate of interest for 1885, as the following statement will show:

The amount of interest bearing assets, consisting of Debentures, Mortgages, Policy Loans and Liens on hand first January, 1885, was \$524,513.65, to which was added during the year \$86,529.89; but as a large portion of this sum was invested towards the close of the year, it did not bear interest for more than an average of six months or half the sum (\$13,-264.99) for the whole year.

The interested collected is \$33,032.12, and the increase in the amount accrued is \$5, 307.93, making the total amount carned \$38,340.05 on a capital of \$567,778.64, which is equal to a rate of 64 per cent. on the amount invested.

Our Superintendent of Agencies, Mr. Hodgins, has, during the past few months, ap-pointed a number of new local agents, who have now got fairly to work, and nearly all our old agents have during the same period met with such encouraging success in obtaining new work that we confidently predict a large increase in the business of the Company for 1886.

The adoption of the reports was seconded by several prominent policy-holders, who expressed eminent gratification with the present standing, popularity and prospects of the Company, and hearty congratulations were tendered to the officers, directors and agents on the results of the past year's business. fact that so large a sum as \$113,313.00 was paid to policy-holders or their representatives during 1885, was pointed to to show the ability of the management to meet promptly all legitimate claims on the funds of the Company, without impairing in any way the stability of the Company and with so very trifling a diminution in the net amount of surplus, as compared with that of the previous years. The principles on which the Company rests were sound and reliable, and the management of its affairs was characterized by energy, prudence and economy, consistent with efficiency and a healthy development of the Company's business. Among the speakers who supported the adoption of the reports were Messrs. Morrow, Sipprell, Hughes, Lee, Fennell, McQueston, Allison, Williamson and others.

On motion Messrs. George Wegenast and C E. German were appointed scrutineers to receive the ballots for the election of four directors. A number of eligible nominations having been made, the balloting was proceeded with, resulting in the election of Messrs, B. M. Britton, I. B. McQuesten, John Marshall, and Jonn Fisken, jr., for the ensuing term of three years.

On motion, Messrs. Henry F. J. Jackson and J. M. Scully were appointed, by vote of members present, auditors for the current year.

Votes of thanks to the President and Direc-

tors, to the Manager, Secretary and official staff, to the Agents, Medical Examiners and Referce, having been tendered and responded to, one of the most enthusiastic, representative and harmonious meetings the Company ever held was brought to a close.

After the Annual Meeting the Board met. when I. E. Bowman, Esq., was re-elected President, and C. M. Taylor, Vice-President, for

the ensuing year.

Correspondence.

"FAIR PLAY" AND "REFORM."

The Editor of The Journal of Commerce:

Dear Sir.—It is said to be, under some circumstances, a severe form of punishment to reproduce a man's own words against him, just as it may be a punishment to gaze at one's self in a mirror. I have no desire to be severe, but there is no escape from reproducing a portion of the letter of "Fair Play" published by you on the 23rd. I would first remark, however, that I have reasonable doubts, from the internal evidence it affords, as to its authorship being the same as that of the first letter over that nom de plume.

The writer says :- "When twelve absol-" utely independent and disinterested men " solemnly sworn to do justice, unanimously " render a verdict for the plaintiff (though " nine of them would have sufficed), and an " irresponsible correspondent wantonly makes " such charges against them as "Reform" did, " he is guilty of more than incorrectness and " unkindness. He is guilty of simple imper-" tinence. For instance, he says that some of "the jurors were saloon-keepers, and that "they were influenced by a desire to gain favor with Mr. Mooney because he is an " alderman, and they wanted renewal of their "licences. Everyone knows that aldermen " have no more to do with granting licences " than insurance managers have, and such an " insinuation is contemptible."

As I have not made any insinuations or charges against the jury in the Mooney case, other than questioning their capability to deal with so important a matter, or referred directly or indirectly to Mr. Mooney's influence over any of them in the matter of their tavern licenses: as, in fact, my only personal reference to the jury, which is to be found in my letter of March 5th, which "Fair Play" or the original "Fair Play" attacked, reads as fol-

"The jury, trained in mental philosophy "and the laws of testimony—otherwise, this "being a civilised country, they would not have been made peers of such weighty matters—seemed to me to judge from a different line than that which they would employ in their own affairs of everyday life; seven of them, I believe, were tavern keepers. "Any of them I suppose, buying a quantity of a standard brand or article in his trade "would object to have another which he considered inferior imposed upon him, and would object to arguments that the inferior "was superior. So the grocer, so the dry "goods merchant, and they would be sup-"ported in their objections, but an insurance of company has no right to any standards, not "even that of a tammery."

The absurdity of "Fair Play's" invectives, based upon such constructive charges as he makes up, and the character of his play must strike every-one who has followed this controversy.

I would have but to reproduce the whole of his letter in order to secure the condemnation of it in its entirety. But it is not necessary. And as I must decline to retaliate or in any way recognize the bad temper "Fair Play" labors under, I must leave the matter so far as it rests between him and me to the judgment of your intelligent readers.

I would not like, however, to see the important points, my reference to which led to this side controversy overlooked in the mist which "Fair Play" has raised to envelop and conceal them.

and conceal them.

I still think that the position which an ansurance contract holds before the law is

both peculiar and unfair as compared with other kinds of contracts, and that the public are the final sufferers, directly in the first instance, and indirectly through the disabilities thrown upon insurance managers in the second. Under the law as it stands or is now interpreted, insurance capital cannot apportion rates on different risks according to their merits, neither can insurance managers reduce the practice of Fire Insurance to an art based upon positive and ascertained experience.

If a merchant buys a quantity of a stated standard brand of any article, say flour or champagne, law will give him the brand he purchased even though one said to be better is offered to him.

In the recent case of the Exchange Bank vs. Gault, our courts held that the party guaranteed by the surety bond in question having been raised from the position named therein, to a higher one in the service of the Bank, there had been an alteration in the contract of indemnity and the surety was relieved.

In a case where a frame building had been leased as a dwelling and was used in part as a dwelling and in part as a small carpenter's shop, the terms of the contract of lease were respected though it was shown the value of the building would be enhanced if used as a shop.

And so it is throughout all contracts except those of Fire Insurance; strictness of terms is allowed and departures punished. But in Fire Insurance, so-called immaterial changes are sanctioned, and not only so, men that have had no experience to guide them and frequently have no capacity, are allowed to have the say as to where immaterial changes end and material changes begin. Even in an ordinary arbitration a defendent is allowed to have a representative expert in the peculiar interests involved, but who ever heard in an insurance case, of a man of insurance experience being placed upon the jury.

I am interested in the Mooney case to the extent of inquiring, supposing that the loss has to be paid by the companies, whom will they have to pass the hat round to for contributions. To the insuring public (?) including the "twelve absolutely independent and disinterested men, solemnly sworn to do justice." or to tanners only, or to cotton men only, or to tanners and cotton men jointly; I very much fear the last must be passed to the insuring citizens of Montreal, limited to the honest ones among them who have sense enough to know that if they change the character of their risk and effect any alteration in its uses, the consent of their companies should be obtained. In the Mooney case no consent was asked, and the jury in their reply to the court declared an alteration of use had been made. Then, if to the public, or the portion of the public mentioned, surely they should respect the efforts of the insurance companies to protect them against higher rates.

It is true, as "Fair Play" says, some companies may have consented to pay in this case; this may be either to gain an ephemeral popularity of no value to themselves or the public, or because of over-balancing cotton interests, but the public will appreciate the position of the companies whose sole object is to keep down general rates of insurance by honorable resistance to claims which neither equity nor law, soundly administered, can establish.

I have but one more remark,—Will some one of the intelligent merchants who "Fair Play" says unanimously confirm his statements as to the litigiousness of insurance companies, kindly produce his proofs? I find from the Government statements, that during the years 1869-1884 inclusive, the companies who have

offices in Montreal, have paid in Canada for losses \$40,591,145.00, and that the sum of losses legally resisted during the same period amounted to less than \$500,000.

My last manuscript was in your hards several weeks before you found room for it from which fact "Fair Play" judges my "incubatory" processes are slow, and that my "brooding" propensities are too massy for timely parturition. Kindly utilize this not later than your next issue.

Yours,

REFORM.

FIRE RECORD.

ONTARIO-Shelburne, April 6-Royal Block, owned by Wm. Jelly, loss \$15,000; insured for \$5,000 in Waterloo Mutual. Jessup & Hogg, loss \$7,500; insured for \$2,000. MONTREAL WHOLESALE MARKETS.

Thursday Evo., April 29, 1886.

Another quiet week's business has to be reported, due in part to the Easter holidays. Trade though undoubtedly slow is not below the average for the latter part of April, in recent years, and when navigation is fairly opened there will be a decided change for the better. In several important departments of trade, stocks damaged by the flood have been forced on the market at low prices and this has blocked regular operations, for the moment, to some extent.

BOOTS AND SHOES.—But little has been doing during the past week. Those manufacturers who suffered by the flood have been getting their factories into order and getting their hands back to work again. Travellers on the sorting-up trip report but few sales and prices keep fairly steady.

CANNED GOODS.—A good movement has been effected at steady prices. Tomatoes are

thrmer at \$1.55 @ \$1.65, and lobsters and mackerel are more active. Fruits have also met with increased demand.

.Com and Wood.—A quiet trade is reported at former prices. Wood is expected to decline 25c to 50c per cord in about a week. We quote: stove, \$6.50 to \$6.75; chestnut, \$6.25 to \$6.50; egg and furnace, \$6 to \$6.25. Lower ports steam, \$4 to \$4.50; grate, \$5.50. Seotch steam, \$5.50 to \$6; grate, \$6 to \$6.25. Cordwood—Yard prices per long cord (cartage 50c extra) are as follows:—Maple, \$6; birch, \$5.50; beech, \$5; tamarac, \$4.50; hemlock, \$4. Coke, \$2.50 per chaldron of 36 bushs; crushed coke (stove or egg size) \$3.30 delivered.

Dancy Produce and Provisions.—The supply of new butter being greater, prices have had a declining tendency. At the close, 24c was about all that could be made for best Townships. A lot of new Western realized 18c. We note sales within the range of 20c@24c for Townships, and 18c@20c for Western. Cheese has ruled very dull, and, until the new season opens, no extra stir is hoped for. Liverpool was 1s lower at-50s. It is reported that some flood damaged cheese will be sold at auction. Hog products have sold in small lots at quotations. Eggs, 121c@13c.

Day Goods.-A steady business has been done in staple lines and orders are coming in fairly well. The warm genial weather has had a most marked effect on the retail trade, and spring fabrics have moved freely." In the millinery and fancy goods lines the spring rush continues and some of the largest houses report the best business done for years. The recent floods caused far less damage than was at first supposed, and, as in most cases, the damaged goods brought comparatively good prices, but little weakening of the market has been experienced. The marked diminution in the number of failures and the steady improvement in remittances is giving a more buoyant feeling to the trade, and when the usual influx of country buyers takes place, a more animated market is expected. In the States there is very little doing and there is little prospect of the realization of earlier hopes for a good spring business. The labor troubles which have spread like an epidemic, have seriously interfered with business at first bands, though local jobbers are naturally less affected. Goods adapted to the West and Southwest are especially slow and in some cases agents' sales for April show a falling off from last year in consequence

Figu. Our and Salt.—The demand for fish has been small and prices are unchanged. Oils are unsettled in view of expected arrivals. Newfoundland cod has sold in a small way at 54c. Steam reflued seal 40c@56c. Owing to the losses by floods salt has been bringing higher prices, elevens having sold at 60c. Receipts will soon cause lower values.

FLOUR AND GRAIN.—The local markets have exhibited no material change. Peas are easy at quotations. Outs have sold at 33c. Wheat nominally higher. Ungraded Canada barley has sold in New York at 78c. Flour has been steady. Medium patents were taken for the lower ports at \$4.25. Manifola strong bakers have sold at \$4.75, superior at \$4.021 and extra at \$3.85. The grain rate to Liverpool is 28 9d to 3s nominally. The cables advised steady to firm grain markets, without quoting any change in values or in the general condition of trade. The market for cargoes in wheat or corn in all positions was

THE

UNEQUALLED

The following highly complimentary latter, coming from such an eminent musician as Ernest Wertherm, Berlin, Germany, shows how highly our organs are appreciated in cultured Berlin:

Messrs, W. DOHERTY & Co., Clinton, Ontario, Canada.

GENTLEMEN,—It affords me great pleasure to express my entire satisfaction at the results embodied in the favorite Doherty Organ. The workmanship, both of the exterior and interior mechanism is of the most careful and thorough description, whilst the most varied meances of tone, and, when desired, a wonderful volume of sound are at the disposal of the performer. These organs only require to be known to be appreciated and sought after.

ERNEST WERTHERM, R. A. M.
K. K. Conservatorium, Berlin, Germany.

LAURETT, LAFORCE & CO., Montreal.
J. E. ROY & CO., Halifax, N. S.
FESSENDON BROS., London.
R. W. MARTIN & SON, Ottawa.

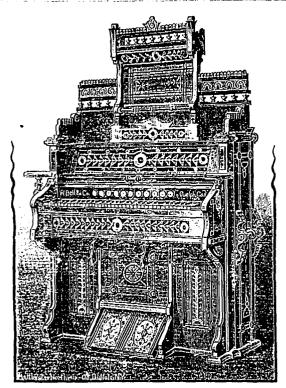

BERNARD & ALLAIRE, Quebec City.

firm, while at Mark lane a steady feeling prevailed. The country markets in England were the turn dearer, and in France firm. In Liverpool, wheat was quiet but steady, with a fair demand while corn was strong and 1d per cental dearer at 4s 31d. Canadian peas were unchanged at 5s 6d. The imports of breadstuffs into the United Kingdom last week show a decrease of 60,000 quarters wheat, a decrease of 70,000 quarters corn, a decrease of 110,000 barrels flour, compared with the previous week, and a decrease of 290,000 quarters wheat, a decrease of 70,000 quarters corn, and a decrease of 200,000 barrels flour compared with the same date last year. The wheat market at Chicago was irregular and lower, although there were reports of renewed export buying. The temporary bull spasm has passed leaving the market in the same condition as it found it, except the short interest. is well liquidated after having made big

Funs.-Offerings of raw furs have been chiefly muskrats, which sold at about 17c. Prices unchanged.

GREEN FRUITS, &c .- Apples easy: winter- . packed 75c@\$1.50; fall-packed \$1@\$2.50. Oranges are higher at \$7.50 per case. Lemons firm, \$5@\$5.50 per box, \$6@\$7 per case. Cocoanuts, \$560\$5.50 per 100. Fancy Eleme figs, 1-lb to 10-lb boxes 11c per lb. Canadian-onions in brls., \$3.50. Evaporated apples in 50-lb boxes. 8c@84c for new, 61c@7c for old; Brazil nuts 10c. Box dates, new, 6c@64c; golden dates, in frails, 34c@4c. Yellow bananas,\$2@\$3 per bunch; red ditto, \$1.50@\$2; pincapples, 20c@25c each. New maple syrup, 60c@75c per tin. Maple sugar, 7c@9c per lb. Honey, 9c per lb. in brls.

GROCERIES.—The opening of navigation will stir things up a little, as buyers have been placing orders for shipments by water. Steamboats were run to Quebec on the 25th inst., whereas last year the first vessel was as hat, whereas has year the first vesses was as late as May 6th. The principal interest has been in sugars, which have ruled firm and fairly active. The strikes among refinery hands in New York sent prices up there &c@ c. The chief European countries where beet s grown, are contemplating the reduction of drawbacks on sugar exports, and this to some extent will discourage the growth of beet and assist in imparting greater stability to the market. Granulated has sold at 7½ from first hands and yellows at 6c. Molasses firm; advices from Barbadoes afford encouragement to holders. From 321c@331c is the price here, but new crop could not be laid down under 34c. Teas dull. Some blacks have sold on English account at 10d@1s 1d. The Yokohama market opened at \$37@\$45 per picul, with the new crop looking well. The following was received from there by mail:-Only a moderate demand has existed for tea, and, with the exception of a limited business for California account, nothing of special interest has occurred in our market. Good common to good medium grades have comprised the bulk of purchases at about previous prices, which remain firm as last quoted. Settlements for the interval amount to 700 pienls and with light receipts. Stocks are further reduced to 1,000 piculs. Total settlements at both ports to date amount to 307,175 piculs, against 275,400 piculs at same time last season. The weather thus far has been favorable for the coming crop, and should same continue, first receipts will probably come forward a few days earlier than last year. The N. Y Journal of Commerce says:—Late advices report that the weather has been fine in Japan for the growing crops, and the season will, therefore, he much carlier than

BELL

HAMILTON, ONT., ST. THUMAS, ONT., AND LONDON, ENG.

usual, and supplies, it is reported, promise to be very large. About 300 packages of tea have already been shipped by the steamer leaving April 24. The shipments by the two following steamers promise to be much larger than host year. The rate of freight by the steamer of May 4 being only 4c, instead of 5c last year, this steamer, it is said, will probably bring all the tea procurable at that date—about 5,000 packages. Dried fruit has continued quiet, but steady. The supply of Valencia raisins is light and prime lots command 9c, with sales of good Elemes at 8½c. Currants are quiet at 7c for the best lots. The decline in pepper has been arrested and nutmegs and cloves are higher.

Hay, Stram and Feed.—The receipts of hay were light, but large arrivals are now looked for. We quote choice timothy at \$13 and inferior at \$11 per 100 bundles. In pressed hay there has been very little doing at steady prices. We quote No. 1 at \$14, No. 2 at \$13, and No. 3 at \$12 per ton in large quantities. The offerings of straw were light, for which the enquiry was slow at \$4@\$7 per 100 bundles, as to quality. Pressed straw was quiet and steady at \$8 per ton. The demand for moullie is slow at \$23@\$\$25 per ton. Bran is lower at \$15@\$16 per ton, and shorts steady with little inquiry at \$17 per ton.

lines and Tallow.—Local hides have been coming in more fairly of late and business is fair. A car load of Toronto sold at 91c for No. 1, and 85c for No. 2. A good many hides were submerged by the flood and had to be worked over to prevent damage. Receipts of caliskins have been larger, with sales of in-

spected at 15c, 13c and 11c for No. 1, 2 and 3, with uninspected at 12c. Green butchers' bides have been fairly active at steady prices. Packer's steers in the West have sold at 9½c, which is about the lowest point this year. Tallow easy at prices current.

IRON AND HARDWARE.-A certain proportion of Canada and fin plates, damaged to some extent by the flood, have been on the market at lower prices. Business is quiet all round. Direct importations are expected next week, and receipts will reach a comparatively bare market. Cable advices contain nothing of importance. A Liverpool firm writes:—The iron trade continues depressed in all departments, and the rainously bad prices now existing seem to have the effect of still further limiting demand. The spring orders are so for below the average, though several of our rolling mills have received sufficient specifications to give them a temporary activity Quotations have now been forced down to the lowest point known for many years, with no chance of further relief in the cost of either raw material or labor. That lowest prices for finished iron will be seen few believe; at the same time there are no immediate prospects of our emerging from the apparently hopeless rut in which we are stuck. Several attempts nt a combined reduction of make have so far fallen through, and the stock of pig iron now estimated at two quarter millions goes on increasing from week to week. The impossibility of standing for an indefinite time the serious losses which present values now cause, will sooner or later lead to the closing up of many establishments, and this slow and lengthened process seems to be the only remedy. The wealthiest and best equipped concerns are inclined to take the opportunity of weeding out their smaller rivals whose financial necessities perpetuate and increase the already overstrained position. The production of tin plates is being gradually curtailed owing to further stoppages and failures. Iron has ceased almost entirely to be used, and steel plates are being indiscrimately sold cither as cokes or charcoals, according to the amount of tin used as a covering, and which in many cases is reduced to an almost infinitessimal amount. In many cases this does not amount to more than 3 lbs. per box, and 3 lbs. of tin spread over 6,300 square inches speaks for itself. The result is there is now a reaction towards the better tinned plates, it having been found that while roofs which have been covered twenty years back are nearly as good as when first put up, others that have only been in existence five years are often roasted and full of holes. The exports for the first quarter of the year compare unfavorably with 1885 and 1884, with the exception of tinplates, which show a marked increase, the shipments to the undernoted reaching :---

Freights from Liverpool to Montreal by direct steamers, 12s 6d and 10 per cent.; Hamilton, Toronto, etc., usual difference. South Wales to Montreal, 16s and 10 per cent.

LEATHER. - The recent floods have completely stagnated the leather market, so that it may be said but little trade has been done of any hind. Boot and shoe men seem to be all engaged in getting their factories into shape after the inundation, and in getting their hands back to work again. Prices are nominally unchanged, but, to effect any sale of common splits on the cheaper measured leathers, a considerable concession would be made. At the same time, prices for better class goods remain firm and are well-sustained. There is a growing demand for Canadian splits in the English market, and some good shipments have been made both from here and Quebec, which will materially relieve the glut here. In the States the market has been quiet and firm, but purchases have been curtailed owing to the uncertainty ahead, and it seems as if it would be wise to curtail production somewhat and thus strengthen the market. Prices are not expected to rule any lower, however. At present rough calf continues dull and nominal; sole leather is fairly firm; heavy waxed leather is not very plenty, and quite firm.

LIVE STOCK.—Export cattle have sold at 5c@5\(\psi\)e per lb. live weight. The SS. Ontario, sailing from Portland, takes 370 head Canadian cattle. The offerings of butchers' cattle were light and the enquiry slow at 3\(\psi\)coloned4\(\psi\)e per lb. as to quality. Sheep firm at 4c@5\(\phi\)per lb. There was a good demand for lambs at 5c@5\(\psi\)e. per lb. Calves were scarce, selling at from \$\frac{5}{2}\omega\)\$\(\pri\)10. There was a larger run of hogs, which induced easier prices; sales were at a decline of \(\psi\) e at 5c\(\omega\)5\(\psi\). The first cattle steamer is expected to leave Montreal about May 6th.

Serus.—Trade fair. Canadian timothy \$3 \$\mathscr{a}\mathscr{a}\mathscr{c}\mathscr{a}\mathscr{c}\mathscr{a}\mathscr{c}\mathscr{a}\mathscr{c}\mathscr{c}\mathscr{a}\mathscr{c}\mathscr{c}\mathscr{a}\mathscr{c}\mat

Wood.—The wool market is quiet and a weaker feeling is apparent. Manufacturers are holding off, waiting for the new clip and

Manufacturers of all kinds of FIREWORKS

Send for illustrated catalogue.

last year's fleeces, many of which could have been sold last fall at prices fully two cents per lb over what they would now bring, are pour-ing in rapidly and flooding the market. The bottom is completely out of Cape wools; they have been offered in New York at 11c per band would probably not fetch more than 12c@13c here. This result is partly due to the large importations now here, or on the way, and partly to the decline in English prices. We do not quote extra-super, B, or C, as not a pound of these wools is in the market. The stock of pulled wool is very small and firmly held, and this tends to help the market somewhat. In the States the market continues in the same unsatisfactory position, and prices have apparently fallen to the lowest possible point. There has been some little inquiry during the week, and the market has been visited by a number of buyers who usually purchase Australian, but, although there has been considerable inquiry for foreign line wools, purchases have been limited.

TORONTO WHOLESALE MARKETS.

(Revised by Telegraph.)

Токохто, Аргіі 29, 1886.

Wholesale trade has been quiet this week. There are no material changes in prices, and a good deal of confidence still exists. Payments are rather backward. The money market is quiet and rates unchanged. Call loans on bank stocks, 43/0053 per cent., and on debentures and first-class miscellaneous shares, 3100 4. Time loans, 5@G per cent. Commercial paper in moderate offer; prime is discounted at 6 and ordinary at 7 per cent. Sterling exchange quiet and firm; 60-day bills, 109 7-16 @109 9-16 between banks, and demand bills, 1093@1093. The stock market has been quiet but firm, with the chief advance in Montreal. An exception was Ontario, which sold down from 116 to 114. The following are prices bid for stocks to-day as compared with those of last Thursday:

Banks.	Bid April 22	Bid Apl 29.	Lonn Cos.	Bid Apr 22.	Bid Apl 29.

Correspondence Solicited,

HAMILTON, ONT.

BUTTER.—Receipts show a light increase, and prices somewhat easier. Transactions confined to jobbing lots of new; best tub sells at 22c@23c, and large rolls in boxes at 20c@21c. Eggs are plentiful and prices easy; dealers pay 11c and sell at 12c per dozen in case lots. Cheese quiet and steady at 93c@10c for small lots of the best and at 9c for ordinary quality.

Draces. — There is a fair trade at steady prices. The only change reported is a decline in Turpentine from 75 c to 70c.

FLORE AND GRAIN.—The trade in flour is limited, and prices about steady. There have been sales of superior extra at \$3.65, and of spring extras at \$3.35. Extras are quoted at \$3.55, and patents at \$3.90@\$4.25, according to quality. Wheat is dull, and prices unchanged; the offerings are limited. On Monday, No. 2 fall sold at \$4e, and No. 3 spring at \$2e f.o.e., No. 2 red winter and No. 2 spring are nominal at \$4e@\$5e. Barley dull, and prices nominal in absence of transactions. Outs are in moderate demand, and prices steady; sales are being made at \$5c@36e on track, the latter for choice white. Peas are nominal at 59e @\$60e for No. 2. Outmeat is quoted at \$3.75@\$53.80 in car lots, and \$4@\$4.25 in small lots. Bran dull, and lower at \$10 for car lots.

GROCEMES. — Quiet, with the movement chiefly in sugars, which are firm. Granulated is quoted at 7½c@7½c, and Canadian refined at 5¾c@6½c. Syrups steady. Fruits unchanged, and fish quiet. Teas in moderate demand, with no change in prices, but the feeling easier. Payments fair.

HARDWARE.—The demand continues fair, and prices show no change.

HIMES AND SKINS.—There is no change in this market. Hides are still firm, with dealers paying 9c for No. 1 green steers and 8½ for No. 1 cows. A car of the latter, cured, sold at 8½c. Calfskins are unchanged, green bringing 11c@13c, and cured selling at 14½c. Sheepskins in light supply and firm, the best bringing \$1.15 @\$1.25, and ordinary \$1.00. Lambskins are offering to a limited extent, and bring 15c@20c. Tallow remains dull, and prices unchanged at 2½c for rough and 4¾c@5¼c for rendered.

LEATHER. — There is a moderate business doing. The demand is for small lots chiefly, and prices are about steady.

LIVE STOCK.—The receipts of cattle show a decrease, being about 300 head. Prices ruled steady at 4½cm5c for choice to extra steers, and at 4cm4½c for heavy stockers. First-class butchers' cattle sold at 4½cm4¾c; second-class at 3¾m3¾c, and inferior at 3¼c per lb. Lambs and sheep casier at \$4.50m\$6.50 a head, the latter for the best. Spring lambs bring \$2m\$54 a head. Hogs from, prices ruling at 4½cm5c per lb.

Provisions, &c.—Little' doing, and, it anything, prices are a shade easier. Bacon dult at 7c for ton lots of long clear, and at 7½c for case lots. Cumberland cut is quoted at 6½c to 6¾c. Mess Pork sells at \$13 to \$13.50 for small lots. Hem: steady at 11c to 11½c for smoked, and at 9¾c to 10c for pickled. Little dull at 8¾c to 9¼c per 1b, according to size of package. Hogs are firmer, with sales of a few small lots to butchers at \$6.25 to \$6.50. Pota-

ees are quoted at 50c a bag for car lots of ordinary quality, and at 55c to 60c for choice. Onions scarce and steady at \$3 to \$3.50 a barrel. Beans unchanged at \$1.20 to \$1.25 a bushel for hand-picked. Dred Apples dull; country lots bring 3 to 3 to, and they job at 4c to 4{c; evaporated 7c to 74c.

Woon.-There is a dull and easy market. No fleece offering, and prices nominally unchanged at 17c to 18c for ordinary fleece, and at 20c for selected. Super sell at 22c to 23c and extras at 25c to 26c.

THE AMERICAN MARKETS.

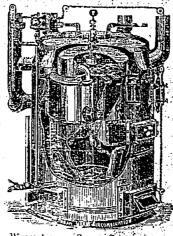

Bostos, April 28.—Flour, moderate demand. stocks light, prices firm; superfine quoted \$3.10 to \$3.40; extras \$3.60 to \$3.90; medium extras \$4.00 to \$4.25; choice extras \$4.25 to \$4.50. . Cornmeal, in fair demand at \$2.20 to \$2.25. Oatmeal firm, and quoted at \$4.75 to \$5.30 fine, and \$5.75 to \$6.00 cut Hay firm, sales of choice \$20.00 to \$21.00; fair to good, \$17.00 to \$19.00. Butter quiet and declining; sales of extra creamery at 22c to 24c; extra dairy 20c to 23c. Cheese dull, prices weak, sales of extra at 10 to 11c, good to choice 9e to 10c, lower grades 5e to 8c. Canada Peas dull at 65c to 95c.

SPECIAL NOTICES.

The use of road machinery for the repair and maintanance of streets and roads is now becoming so general that it is hardly necessary to speak of the many advantages of using improved machines instead of depending altogether on the old system of hand labor. The American Road Machine Company, whose main office and works are at Kenneth Square. Chester Co., Pa., with agencies throughout the United States, succeeds to the business of the formerly well-known firms of S. Pennock & Sons Co. and G. W. Taft; all infringement suits and counter-suits being now at an end. To meet the growing and diversified demands for road machinery, several new machines have been introduced, and for description and prices application should be made to the head office of the company. Full directions are given on how o make and how to keep good roads, the proper form of road bed, etc., and turnpike companies, road commissioners, and others desirous of making practical tests will find the company prepared to offer them liberal terms.

T. & A. B. Snider, previously referred to as joint proprietous of the Grand River Mills. Doon, Ont., also own the Champion Roller Mil's, established 1805, at German Mills, Ont. These latter : re claimed to be the first mills established in Canada. The annual turn-over established in Omaca. The armon turn-over is stated to be \$250,000, disbursements in local grains, \$80,000 to \$100,000, and the yearly pay roll, \$35,000 to \$40,000. The Champion Mills employ forty to fifty hands, and ship something like 250 brls, of flour per week. This tirm, it might be stated, have one of the largest stock raising farms in Ontario, where may be seen some of the finest horses reared in Canada.

The Lorne Roller Mills, Heidelberg, Ont., established in 1878, now claim an annual turn-over of \$150,000. They are fitted throughout with all modern improvements, and the product finds a good sale in all parts of the Dominion. The capacity is 150 brls per day.

SWEETHAM & HAZELTON, Sole Manufacturers.

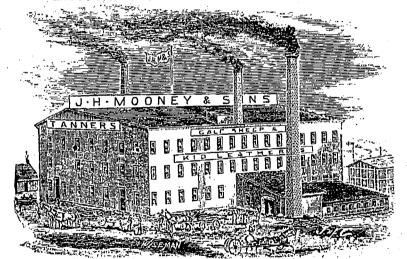

INGLIS & HUNTER,

TORONTO.

- Manufacturers of CORLIS AUTOMATIC CUT-OFF ENGINES, the most economical Engine built.

SONS,

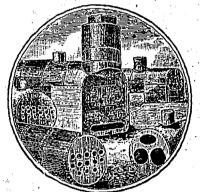

Works at VERDUN, P.Q.

OFFICES:-30 Lemoine St., MONTREAL, P.Q.

PETAIL MERCHANTS, who wish to keep abreast of the times, and have a continual and reliable guide to the leading markets should subscribe to the CANADIAN JOURNAL OF COMMERCE. The Market Reports in the Journal are unequalled for comprehensiveness and correctness of detail. No Merchant or other business man can afford to do without it. Published every Friday. Subscription to all parts of Canada, except Montreal, \$2.00 a year. Address,

CANADIAN JOURNAL OF COMMERCE, Montreal.

HENRY McPHILLEMY, CHATHAM.

Boilers, Castings, Mouldings, Etc.

ORDERS SOCICITED.

STEAM PUMP WORKS

No. 13 St. Catherine St., St. Thomas, Ont.

JOHN OLIVER, MANUFACTURER.

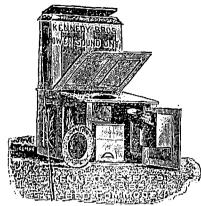

All Kinds of Wooden Pumps made and repaired.

Chain Pumps and Force Pumps.

Orders by mail promptly attended to.

First Prizes were awarded to these Pumps at the Southern Counties Fair in 1880 and 1881; also First Prize at West Elgin Fair in 1880, over all competitors,

KENNEDY'S PATENT IMPROVED EARTH CLOSETS AND BEDROOM COMMODES

свещиом боммове.

Were AWARDED THE FIRST PRIZES at the Dominion Exhibition at London, 1885, in competition with the much boasted Putent Dry Earth Closets claiming 18 First Prize Medals in different countries of Europe and America, including Gold Medal at Amsterdam in 1883, and Special Silver Medal at Toronto, 1885.

The London Pair is the only one at :wh Kennedy's Patent Closet has yet been exhibited.

Don't be duped with large and load advertisements. We have many bitter complaints from persons who by such have recently been humbugged into buying unsatisfactory Earth Closets, some of which have already been cast aside and ours bought to replace them.

Provincial Patent Rights for Sale.

Confederation Life Association.

The SECURITY offered to Policyholders is UNSURPASSED by any Company doing business in the Dominion.

Its PROGRESS HAS BEEN UNEXAMPLED in the history of Insurance in Canada.

"" He policies are INDISPUTABLE after three years and NON-FORFEITABLE after two years.

He PROFITS ARE DISTRIBUTED upon an equitable basis, resulting in very much larger returns to "Ten Payment Life" and "Endowment" Policyholders than under the Uniform Bonus Plan pursued by some Companies.

Intending insurers will find it for their interest to EXAMINE CAR FEULILY its system and terms before insuring elsewhere.

DEALED TENDERS, addressed to the under-signed, and endorsed "Tender for Indian Supplies," will be received at this office up to noon of TUESDAY, 20th APRIL, 1886; for the delivery of Indian Supplies during the fiscal year ending 30th June, 1887, consisting of Flour, Bacon, Beef, Groceries, Ammunition, Twine, Oxen, Cows, Bulls, Agricultural Implements, Tools, &c., duty paid at various points in Manitoba and the North-West Territories.

Forms of tender, giving full particulars relative to the Supplies required, dates of delivery, &c., may be had by applying to the the undersigned, or to the Indian Commissioner at Regina, or to the Iudian Qflice, Winnipeg.

Parties may tender for each description of goods (or for any portion of each description of goods) separately or for all the goods called for in the Schedules.

Each Tender must be accompanied by an accepted Cheque in favor of the Superintendent-General of Indian Affairs on a Canadian Bank for at least five per cent of the amount of the tenders for Manitola and the North-West Territories which will be forfei ed if the party tendering declines to enter title a contract when talled upon to do so, or if he fails to complete the work contracted for. If the tender be not

Tenderers must make up in the money columns in the Schedule the total money value. of the goods they offer to supply, or their tender will not be entertained.

Each tender must, in addition to the signature of the tenderer, be signed by two sureties acceptable to the Department, for the proper performance of the contract.

In all cases where transportation may be only partial by rail, contractors must make proper arrangements for supplies to be forwarded at once from railway stations to their destination in the Government Warehouse at the point of delivery.

The lowest or any tender not necessarily accepted.

L. VANKOUGHNET,

Deputy of the Superintendent-General of Indian Affairs.

Dep't of Indian Affairs, Ottawa, 3rd M: reh, 1886.

CENTRAL CANADA

The proprietors of the above works beg to intimate to mill owners and manufacturers generally, that having taken charge of their extensive machine works, on the expiration of the late lessees' term, they have decided to operate the same to their utmost capacity.

Our large plant and mill staff of good mechanics will enable us to compete with any machine works in the Dominion, either in terms or in quality of work.

We are prefared to give estimates and erect mills for all purposes, furnishing the machinery. We are also prepared to make steam engines, water wheels, shatting, gearing, hangers, pulleys, double edgers, butters, lath, shingle and carding machines, stumping serews, drop hammers, etc. Good material and workmashing guaranteed.

norman anners, etc. Good material and work-manship guaranteed.

A stock of engine brass fittings, gas and steam pipe, packing, belting, etc., etc., kept on hand.

Parties requiring any thing in the machinery line would do well to call and examine our stock of patterns

women to wen to be an analysis of all kinds promptly executed. For further particulars apply to

(CHIEF AGENTS FOR DOMINION.

Mutual The London FIRE INSURANCE CO'Y OF CANADA.

The Successful Pioneer of Cheap FARM AND RESIDENCE Insurances. Financial Statement 31st December, 1884, shows Assets, \$36, 11.32.

Nearly 15,000 Policies issued in 1884. Over 41,000 Members. The only "Fire Mutual" licensed by the Dominion Government. Takes risks on Farm Property, and on Private Dwellings in City, Town or Village, on more favorable terms than any other Company.

Head Offices: 438 Richmond St., London, Ont. ISTRONG, M.P., President. - LAMES GIGANT, Vice-President, C. G. Copy, Fire Impector. JAMES ARMSTRONG, M.P., President. W. R. VINING, Treasurer.

W. R. VINING, Treasurer.

C. G. COPY, Fire Inspector.

The!" London Mutual "does a larger business in the Insurance of Farm Property and Private Residences than any other Company in the Dominion. AND II.AS DONE THE SAME FOR NOW OVER A QUARTER OF A CENTURY.

Parties intending to insure should give this "old and tried" Company the preference, for, until it was established, the stock companies, having all their own way, charged the owners of farm property and private residences high rates to make up for their losses on more dangerous classes of property; this is changed now, through the efforts and working of the successful "London Mutual." For reports or lasturance apply to any of the Agents, or address the Head Office.
