Wilton Rugs in Old Persian Designs

That Reproduce Them Not Only in Pattern, But in Color and Weave—in the Rose, Ivory and Blue of the Kirmanshah, and in the Tan, Brown, Terra and Green of the Ferehan-Very Handsome Rugs For Drawing-rooms and Living-rooms.

ERHAPS YOU HAVE BEEN ADMIRING THEM in the Yonge street windows. A group of them is on exhibit there, and in the strong light of these sunny mornings their beauty is as evident as in the more sheltered stretches of the Rug Department. They are very fine examples of Wilton squares reproduced in Oriental designs—splendid coverings for living-rooms, bedrooms and drawing-

Among the patterns are many delightful Kirmanshah effects in medal-

The Fur Cape--So Fashionable This Season

One of the Modish Crazes in New York and Paris the First Choice of the Well-dressed Woman, Who Wears It With Suit or Tailored Gown.

ELERINES, CAPERINES, collarettes—every phase and variety of the cape has come to the fore in the creating of this year's furs. The department abounds in them-from the tiny collarette to the cape which reaches to the waist and is practically a dolman -independent of any coat beneath. Moleskin, Hudson seal, fox and lynx—all these are employed for the purpose with delightful results. Thus:

In Hudson seal (seal rat) is a graceful shoulder cape. Price, \$50.00.

Another neckpiece in the same fashionable peltry, while not so deep, boasts a high collar. Price,

Small cape collars in Hudson seal (seal rat) are featured at \$20.00, \$22.00 and \$25.00.

Muffs in Hudson seal to accompany these neckpieces are in round, canteen and pillow styles. Priced, \$18.50, \$22.50 and \$25.00.

Shoulder cape, in black lynx—a particularly beautiful model—is \$68.00.

A shoulder cape in black fox is \$82.00. And in moleskin, a superb set of shoulder cape and muff, faced inside with ermine. Price, \$375.00 the set. -Third Floor, Yonge St.

Girls Will Like These Corduroy Frocks

ASHIONED of cordurey velvet, in twopiece coat middy effect, the coat middy is slashed around the bottom and has large square collar of plain flannel, with three rows of colored stitching, large round buttons of velvet having flannel tops. The sleeves are finished with cuffs and a wide belt finishes the waistline. The full gathered skirt is attached to an underwaist. Colors are brown with brown collar, navy with royal, green or red, and red with red collar. Sizes 8 to 14X, Price, \$6.50.

Dresses made of fine black serge, in one-piece style, in high-waisted effect. There are two side pleats on each side of the front of blouse and six black bone buttons. The collar and cuffs are bound with black braid, and the full skirt has two cascade pockets. Black only. Sizes 10 to 14. Price, \$8.00.

Girls' coats, made of chinchilla, in two shades of collars, which can be worn close fitting or open cape effect, smart double belt fastened at each side with two buttons, two fancy round pockets and double cuff effect. Black buttons adorn the front, also belt and pocket. They are lined throughout with black sateen. Sizes 6 to 14 years. Price, \$8.95.

receipts when such a contrivance is installed.

As for the cupboard with the glass doors—it would provide an excellent excuse for bringing some of the chintz to that side of the room. Gather it on a rod or a tape, top and bottom, so that it can be pulled down flat and smooth. Good luck to you!

"Voter." — Yes, one agrees with you. New privileges make unexpected demands. Joseph Pennell, in that last book of etchings, "War Work in England," tells of visiting a munitions factory, and of seeing a lady workman in overalls set down her wheelbarrow and come up to the man in charge. "Mr. Superintendent," she said, "a boy has been extremely rude to me. What shall I do?" "Why, laidee," replied the Superintendent, "it 'im over the 'ed with 'af a brick out cher barrer!"

Which is a far call from the

which is a far call from the rug question, isn't it? What I should suggest would be a medium-size Kazak in coppery brown, blue and ivory, with a dash of orange in it if possible. With ordinary care it will last a lifetime, and serve alternately in living-room, hall and that big square window space in the dining-room. There is a splendid group of them, running from \$75.00 to \$150.00—really exceptionally fine specimens.

"Sixteen."—Are you going to knit your sweater with a single or double thread? It will take 6 skeins for the one, and double quantity, of course, for the other. Columbia Shetland floss at 40 cents a skein is the popular yarn for the purpose. There is also a teazle wool at \$4 a pound (requires % 1b.), and a thinner Shetland floss at 15 cents a skein. They are all to be had in the usual run of fashionable greens, pinks, blues and yellows.

Ethel.—Taking due thought of low ceilings, low funds and all other opposing forces, this is what we would suggest: Plain blue oatmeal walls (that clear willow blue), white woodwork, your shabby chairs, table and sofa painted black, and curtains and coverings of a certain blue.

"THE DWELLING PLACE OF LIGHT" is concerned with problems of modern industrial civilization in a typical New England manufacturing city with a polyglot foreign popula-tion, and is chiefly concerned with the life of a family de-scended from old Plymouth stock, but caught in the trap of poverty, and obliged to work in the treadmill of a dingy round. What life is to American factory hands, to women bound to toil and beset by temptations, the spirit that lies under the unrest of "the People," the sacrifices, the penalties-these things written about strongly and dar-ingly in "THE DWELLING PLACE OF LIGHT." Serge, Silk, Satin and Georgette Crepe Dresses For Morning and Afternoon Wear - Many Less Than Half Price.

ON SALE THURSDAY, 10.30 A.M.

MMENSELY SMART PRODUCTIONS, including a number of Paris models, make up this interesting clearance of morning and afternoon dresses. All are distinctly modish, the collection consisting of gowns in serge, crepe de Chine, satin, and Georgette crepe, one model of black velvet being combined with flesh color broadcloth. The graceful, draped skirt is shown on a few; others are fashioned on straight lines, with quaint boleros or the more modern "chemise" bodice. Necks are variously designed in round, square or V-shape, and collars may or may not appear, according to the fancy of the designer.

Lavish silk and bead embroideries adorn a few; others find distinction in combinations of delightful shades or materials. Serge is combined with satin or crepe in fascinating manner, or used alone, forming pleasing frocks for morning wear. Those of silks, satins and crepes in charming afternoon styles. Colors include taupe, grey, navy, ivory, flesh, Burgundy, brown, and a few black suitable for mourning wear.

Promptly at 10.30 Thursday morning they will be placed on sale at the greatly reduced price of \$45.00. -Third Floor, James St.

your shabby chairs, table and sofa painted black, and curtains and coverings of a certain blue and tan striped linen, which has a little stiff pink rose lying on the edge of the stripe. Then, by way of finishing touch, we would fill the corners of the two sofas with silk and velveteen cushions of the same deep pink shade as the rose aforementioned, with a couple of blue and black ones to bear them company. And the shades on the lamps would probably be rose, too, though experiment might possibly prove that something of the painted Japanese order would be more interesting. A plain blue bandborder Axminster (see the write-up on the same in the lefthand column) might be a happy idea in the way of rus. If you can manage a couple of Orientals with old blue in them, all the better, but one would be careful to select those of the deeper, coarser weave—a Mahal, Muskabad or Indian carpet.

Some Had Quota of Cases Heard Before

as a consequence there is a great difference in the time taken in hearing the cases allotted. Yesterday several of the tribunals had disposed of all their business before meon, while others took the whole day until five o'clock to complete their hearings.

Several of the tribunals are awaiting precedents. Some of the cases which come before them are difficult to decide, and in several cases the tribunals defer decision until it is seen how others are dealing with similar cases.

lar cases.

Eleven men who had failed to report for service or to apply for exemptions before Saturday night appeared at the Armories yesterday and were given examination. Three of were given examination. Three of these were in class A, and these were immediately drafted into the army. The men other than those of class A were taken before tribunal 353, in which Judge Coatsworth and William

Nine men in class A appeared yesterday before tribunal 368 and each one got exemption. It is understood that the military representative will file appeals in several of the cases.

"The number of young men who are proving that they have just reasons for staying at home, a very high percentage being physically unfit, and many of the Amen having larger families to support than lots of married men, does away with the belief which has been prevalent in Toronto that there are many slackers in this city," said one of the members of tribunal 360 yesterday.

Economy and Duty -- Use More Milk

We can all help to win the war. We must all help. We at home can help by using less meat and substituting milk. This will make it possible for more meat to be sent to the men who are bearing the brunt of the battle at the front. Serve your country by eating less meat and using more milk.

Your Family Will Benefit by the Change

You will be well repaid for the step you take, for while helping your country you will be benefited yourself---especially if you use the Farmers' Dairy milk. This milk is richer in cream (body-building butterfats) than ordinary milk. It is pure and fresh. By drinking much of this milk your children, particularly, will be made healthier and happier. You will be surprised at its food value. You will find that it satisfactorily replaces other food. And it costs less, too. It is the same price as ordinary milk.

WEDNESDAY MORNING, NOV. 14.

The Young Man Drafted Yesterday.

Every day now young men have to face life permaps for the first time as a serious, earnest considera-They have probably been having a fairly good They have attended the usual duties of the and have thought that to be sufficient. They Ignored the war as a bad, unpleasant business. There were other matters more agreeable to think about. Perhaps that was the chief difficulty; they had not thought so much about the war as they had about themselves. They were good citizens as they understood citizenship. They may have been especially dutiful to their parents, forgetting that there were other duties as well as to parents. Or they may have gone in for the vicarious forms of sport-sport by proxy. They may have been of the thousands who in the last two or three years sat on the bleachers and yelled when the real sports on the field or the ice played the game with all the spirit, all the pluck, all the dash and skill that they took over the seas and put into the great game there.

We do not find fault with a man because he is not something different, but we do find fault with a man for not getting the best out of himself. The men who have failed to volunteer for three years past find it harder today to face their military duty than it would have been at first. But they are to be congratulated that their chance has come. What they need to know is that they are men, not cowards, not vellow, not likely to do anything to be ashamed of, but men fit to follow in the footsteps of the gallant boys who have gone ahead and shown the way.

Perhaps the decision of the tribunal that they could not be exempted came like a blow. They may have staggered at it, felt sick at heart. It is not the man, but the animal in one, that turns faint. It is a sign of sensitiveness, of a responsiveness, which may be called on and depended upon when the time come to answer to the call of the trained and disciplined man, and yield all the energy and intrepidity that the an needs.

It is a word of congratulation that the drafted men eed. They are going to find in themselves unsusected depths of courage. One is not born into a great race for nothing. All the blood of a thousand years rises in one, Briton, Saxon, Dane, Norman, noble strains all, mingled in one stream in which the ncestral self bathes in the great baptism of life. When men stand shoulder to shoulder with their fellows, and discipline and drill sift out the soft things eaknesses, gradually there rises in the man's heart the new knowledge by which he realizes that he is not his own, but bought with a price.

For this all our fathers fought and fell, toiled and wrought, built and plowed. For this our brothers have gone out day by day for more than three years and given their blood and their lives. No longer does a man who knows feel that he dare stay at home when other men are shedding their blood for him. But he cannot know while he hesitates, and makes more of his body than of his soul. Congratulations to the young man who was drafted yesterday and looked in the wonderful face of freedom.

War Bonds for Small Investors.

It was announced yesterday that an arrangement had been made with the banks whereby those who desired to save would be able to buy one of the Victory War Bonds, paying the first deposit of ten per cent. and a dollar a week thereafter on each \$50. In a year the fifty-dollar bond will be paid for and drawing interest. If there is anything more than another that Canada has needed in the last three years it is thrift. It is quite true that there has been thrift to a large extent. Sir Thomas White has stated that last year's private savings amounted to \$750,000,000 It is obvious that with this record there should be no difficulty in finding purchasers for \$150,000,000 worth of war bonds. If the whole \$750,000,000 was lent to the government the lenders would be in the securest possession of their money.

It is probably not sufficiently well known that the bonds are the greatest security to be had in Canadabetter even than mortgages. Mortgages at 51/2 per cent. are regarded as good security by the trust companies; and while higher rates of interest are paid, the higher the rate becomes the greater is the risk accompanying it. Mortgages are regarded as the best investment, but they are liable to default of interest; and while the principal may be well secured, it is often a great inconvenience to a small investor to have to take foreclosure proceedings and perhaps become possessor of undesired property with its burden of taxes and the difficulty of sale in hard times without loss

No such contingency is possible with a war bond. The security is better than a mortgage, for it is a mortgage on the whole country. There will be no default in the interest, and the bonds are not taxable. What can be better than a security for which the whole government stands sponsor, which cannot be taxed, and the interest on which is higher than any other gilt-edged investment? When these bonds are procurable in denominations of \$50, \$100 and so on, on payment of a dollar a week, there is no excuse for servone not to help the government, which is the country, and himself by investing his savings in this

A great many people are afraid to trust their money to any form of security whatever, as they think, yet they gladly accept paper money, which is merely a government security, a promise to pay gold or silver, as the case may be; and there is no interest paid the people who hoard up their bills. They are afraid to put them in the bank lest the bank should fail. They are afraid to keep their money in the house lest robbers steal it. They are afraid to carry it about with them lest they be murdered. They would avoid all these difficulties by just putting their money into government bonds, which are exactly on the same security as bank notes or greenbacks, with the exception that they bear 51/2 per cent. interest.

It should be noted that the big financial institu-

tions, the banks, the railways, the insurance companies, the millionaires, are putting their money into bonds by the million. The small investor need not fear to put his \$50 where the capitalist is not afraid to put his \$5,000,000.

Not only are the bonds as good as cash, but they are the same as ready cash. They can be converted into ready money at any time. Many storekeepers are already offering to take them in payment for goods. The question of security should never trouble the small investor who can buy a Victory Bond.

The Jugo-Slave.

Serbs, Croats and Slovenes are known in south astern Europe as the Jugo-Slavs, of the Southern Slavs, and they form a compact population of 5,000,-000 in Serbia and Montenegro, 7,000,000 in the Jugo-Slav provinces of Austria-Hungary, 40,000 in the Italian district west of Gorica, a total of 12,040,000, with 800,000 more emigrants overseas. They aspire to form an independent state and to be free of all foreign domination, whether Turkish, Venetian or Austro-Hungarian. They form one of the most complicated of the Balkan problems. It was out of Serbia, of course, that the war cloud first arose.

These Jugo-Slavs wish to form an inde state on the lines that have already been approved in principle in the declarations of the British Government and their allies. The Crown Prince Regent of Serbia announced the policy of liberating and unifying all the Jugo-Slavs in official declarations at London and Paris in 1916, and the Serbian Parliament has endorsed it. Montenegro, Bosnia and Herzegovina are included in the plan.

A bulletin is issued monthly in London to circulate information of interest to the Jugo-Slav races. These people have found the Hapsburgs as false to their promises and undertakings as the Hohenzollerns are in character. They especially resent the suggestion in the recent Vatican pronouncement that the central powers make concessions to the western powers "in order to be able to claim substantial compensations in the Balkans and the east." It is no crime to these advisers to rob and slay the Jugo-Slavs, the Armenians, and other weak races, in order that the against elect Austrians may be benefited. They cannot understand that to a Briton one man's life and one man's soul is just as good as another. Perhaps there is a ter need that this principle be emphasized and kept before the people. There is a possibility that we may of course, a condition attached to the recognition. It is that those who wish to be regarded as on the same level as other human beings should act like men and

April 25 the Bulgarians entrained 8,000 children et from twelve to fifteen years of age in Belotinci and sent them to Constantinople. Many of these children jumped from the train and were killed, so escaping a worse fate. In Arad alone 3,400 interned Bosnians have died of starvation. Horror is piled on horror thru these records. The Emperor Charles on Sept. 13 stated that "all idea of change in the present dualist form of the monarchy is excluded from his majesty's intentions." This the Jugo-Slavs take to be a precise declaration that no reforms are to be expected. They ought to know.

As an illustration of Austrian standards and methods a case is instanced where a highly respected Serbian peasant, president of the commune of Knin, by name Onisim Popovic, was, on the strength of information laid against him at the beginning of the war, court-martialed and shot. Two months later the man who had falsely accused him was taken dangerously ill and confessed his crime. The Hapsburg officials decided that some reparation was due to the dead man. This was their idea of it. The regimental band marched to his grave and there played the Austrian imperial anthem!

Conscription and the Foreign Element Conscription and the Foreign Element.

Conscription is now the law of the land and no doubt all the eligibles will be in soldiers' uniforms unless there are enough reinforcements for the boys at the front in the first and second drafts. Are we men who will be conscripted going to allow the aliens to stay at home, taking the place of the Canadians, and earning the big money, while the boys are up to their neck in mud to protect them? Conscript the alien. If they are getting their living here, make them share the burdens of the country in the same proportion that we Canadians have to or will have to. If they, the aliens, are getting a good living here in Canada, it certainly is worth fighting for. If they won't fight send them back to their respective countries. Did our women of Canada go thru the trials and tribulations that come of the sacredness of motherhood, and watch them—from babyhood to boyhood and on to manhood, when conscription claims them to be sent as occasion requires them, which is as it should be, and rightly so—did our women do this far our friends, the rightly so—did our women do this far our friends, the aliens, in order that they, the aliens, may stay at home and live in comfort while the boys are going thru suffering and hardship? Not on your life, sir. Is it fair to the women who have borne the men, and the men themselves? The men and women should protest to the

government as one body.

Amend the Military Act and insert a clause that conscripts shall mean both Canadian and alien, excepung the enemy alien, of course. The cry is, more man power for the allies. Why in the name of heaven don' power for the allies. Why in the name of heaven don't the government either make the allens fight or send them back to their respective country. I have worked with some aliens and they have openly laughed and sneered at me. "When conscription comes, you go fight, me take your job," and they, the aliens, quite saw the joke. Have we got to take that kind of stuff? Not if I can avoid it. Are we Canadians going to allow the alien to put it over on us? I may add that I tried to enlist last October, 1916; but got turned down twice. I should be glad to hear from any gentleman or gentlemen who would take this matter up and make conscription affect the alien as much as we Canadians.

to take up the question as to whether it is possible to prevent the erection of any more such buildings.

The estimates for 1918 are approxi-mately \$881,000, about the same as was required for the present year. Col. Grasett explained that this amount would provide for the purchase of more motors. "This may help to make up for the shortage of men who have gone overseas." said Chief Grasett. "I don't know what will be done if some more of the men are drafted. Consignment of Wet Goods From Chicago to North Country Arouses Suspicion.

The Cutario License Board is en

gaged in the investigation of an in-teresting case which was recently re-ported. A consignment of five cases of liniment has been shipped from Chicago to an individual, suspected of keeping a "blind pig" in the vicinity of a northern Ontario lumber camp. A cursory examination of the iniment reveals nothing of a suspicious nature. It is composed of 60 per cent. alcohol, and also contains chloroform and ammonia. The reccipt of such a large quantity in the particular district has aroused the suspicions of the board, and the theory is advanced that the con-signee can, with little difficulty, evaporate the chloroform and ammenia and serve the alcoholic restal due mixed with soft drinks as a beverage to his customers.

THIS IS YOUR SECURITY!

The whole property of every person in Canada is pledged to secure Victory Bonds-both principal and interest.

The security behind Canada's Victory Loan consists of all the resources, developed and undeveloped, and all the assets of all the people of Canada, supporting Canada's promise to pay.

Can you imagine any security more rock-ribbed in its soundness than the signed pledge of the Dominion of Canada, backed by all its boundless resources?

There is no security so secure; for in it are embraced all other securities. Every farm, every forest, mine, factory, bank, business, every conceivable kind of wealth that exists within the borders of this great Dominion—all this is the security behind Canada's Victory Bonds.

With this security buyers of the Bonds receive interest at the rate of 5 1-2% per annum. In ordinary times such an investment as Victory Bonds would be an opportunity. It is an opportunity now.

But now—Victory Bonds are more than an opportunity. To buy them is a duty and a privilege. Canadians at home will merely lend their money—and at good interest. Canadians at the front are giving their personal services. The money you lend will be used in Canada to purchase food and equipment for those Canadians.

Can you he sitate? Of course you are willing to deny yourself—even to borrow—to buy Victory Bonds. Then send in to the Victory Loan headquarters an application to

Whith, Nov. 13. — South Ontario Liberals rejected union proposals with po uncertain sound at a largely attended meeting in the town hall this afternoon and placed W. S. Sinclair, parrister of Oshawa, in the field as the Laurier candidate. It was one of the most pronounced straight party meetings ever held in this riding, and almost every mention of Sir Robert Borden and union government was met with jeers and heckling.

Those who attempted to lower the party wall and who urged a resolution calling for a union meeting on Saturday were absolutely snowed under, altho eloquent appeals were made by F. L. Fowke. Dan Haliday, J. F. Grierson, chairman, and G. D. Conant. When Mr. Sinc'air accepted the momination, one woman of several in the audience, all of whom were outand-out unionists and win-the-war enthusiasts, broke into tears and between heart-breaking sobs declared. "Mr. Sinclair has broken my heart today."

"Mr. Sinclair has broken my heart today."

All appeals for co-operation because of the seriousness of the military situation were taboo and a resolution proposed by Secretary Conant and supported by Graydon Goodfellow endorsing union government fell flat by a large majority.

Considerable Heckling.

"It costs me more than any other man here today to speak against Sir Wilfrid Laurier," said F. L. Fowke. "It is not a Conservative government, it's a union government."

Cries of "No, no—Conservative, Conservative," greeted this remark.

Statements Resented.

R. W. Mowbray, Pickering, said he resented the statements of Mr. Fowke, and that every man had a right to his own opinion. "I am not in favor of union government, and I won't be classed with the Russians."

"Hear, hear," from the audience.

Mr. Mowbray brought the meeting back to the business in hand, that of deciding as to the advisability of holding a union meeting, by saying he did not favor such a thing. A majority of the audience agreed to this remark by its applause.

Criticize Laurier.

Dan Haliday referred with emphasis to the fact that Canada was passing thru very troublesome times. He said the reason Sir Robert Borden attempted to form a union government was because every paper demanded it. He criticized the attitude of Sir Wilfrid Laurier in not offering an alternative Laurier in not offering an alternative to the Military Service Act and in not helping to raise sufficient men by the voluntary system. Question of Conscription.

Voluntary enlistment had worked well in Canada up to the time when greater reinforcements were needed than could be secured in that way. A reasonable selective draft was then deemed necessary. Referring to his knowledge of the situation he said he was convinced that Sir Robert Bor-

ed that the situation of necessity could never be met by voluntary en-listment, and had to be met, if it was to be met, by a selective system, and equally convinced that that could best be carried out by bringing the power of a united Canada, that from that day to the present he honestly single-mindedly and indefatigably worked for a true and honest and genuine union of parties to get behind this war, and he is working for it and with

Oats gained ½c to 1c, and provisions 10c to 37c.

Bears had the advantage in the corm market until the last hour of the session. Setbacks to values of securities at New York appeared to be responsible for much of the selling here, but absence of any immediate prospect of seasonably cold weather operated as something of an offset. Besides, considerable hesitancy developed, about pressing the bear side in the face of a government minimum on hog prices and the consequent likelihood of sustained demand for corn to feed on farms. Decreasing supplies made shorts yet more uneasy toward the last of the day, and no great amount of buying was needed to lift the market quite briskly at the finish.

Demand from houses with seaboard connections put strength into oats, althout first weakness prevailed, owing to the temporary bearish action of corn.

A bulge in hog quotations hoisted provisions. Realizing sales followed, but had no lasting effect.

President Denison Presents Trading Becomes Quite Listless at New York-C.P.R. Declines. New York, Nov. 13.—Foreign conditions brought fresh disturbance to the stock market today. Further selling was induced by the British Premier's Paris address and Secretary of War Baker's warning that strategic changes in the conduct of the way was result from the war Loan. MONTREAL STOCK EXCHANGE.

conduct of the war may result from the Russian revolution.

Added reason for concern was furnished by the weakness of rails, Canadian Pacific falling 3½ points, to the new minimum of 130%, and St. Paul making a new low record at 36, both railying moderately later.

Trading became listless after the first hour, the total of 510,000 shares being the lightest turnover of recent days. There was a moderate revival of activity in the last hour, but the heaviness of Marine preferred acted as a deterrent to improvement elsewhere, the list closing with a preponderance of losses.

Nothing in the day's operations warranted specific comment, all the leaders moving within two to three point limits. United States Steel sold up to 93½, and down to 91%, closing at 92%, off % of a point. Other industrials and speculative issues generally denoted the immediate views or caprices of the professional element.

neld in the King Edward Hotel yesterday afternoon.

The report stated that development of the mine showed a body of miling ore of considerable width, and that extensive cross-cutting, raising, sampling and assaying was required. The mine superintendent had been authorized to extend the plant so as to obtain a capacity for treating 110 tons per day. It was estimated that this would cost \$30,000, and in addition substantial sums per month were required to carry on mining, milling and cyaniding. After a reference to the failure of the bond issue of \$350,000, which was left on the hands of the underwriting syndicate, the statement was made that it was believed the new plan decided upon would prove attractive.

The financial report for the fiscal year ended on Aug. 31 last showed expenses of \$137,352, less income from operation, amounting to \$31,896, leaving an adverse balance of \$105,456.53. The net imparament at the end of the fiscal year was \$261,926, as against \$156,484 for the corresponding period a year ago.

The following officers were re-elected: Cras. L. Denison, New York, president; Rot. W. Pomeroy, Buffalo, vice-president; A. D. Crooks, Toronto, secretary; H. C. Clarke, treasurer; Albert W. Johnston, New York, and J. F. Thompson, New York, directors. ing period a year ago.

Montreal, Nov. 13.—The only feature of today's session of the Montreal Stock Exchange was a decline of one point registered by Dominion Iron, which sold off to 52½, Iron opened the session at 53½, down ¼ from yesterday, and then sold off to 52½ on moderate offerings. Steamships, voting trust, was fairly active, 300 shares being traded in, but the price was unchanged at 25, as was Civic at 68½.

There was still a good demand for broken lots at the minimum prices, Brazillan, Macdonald, Dominion Bridge and Lake of the Woods all being dealt in.

Smart-Woods was not affected by yesterday's dividend announcement, No sales were recorded, and the only quotation was 61 asked, 54 bid, Maple Leaf also falled to reflect the good news, being quoted at 100 bid,

Also Reacts.

Slightly reactionary tendencies in Hollinger, Dome and McIntyre were features of yesterday's listless trading on, the Standard Exchange. Holly was in more liberal supply than usual, nearly 1800 shares changing hands, and it sold back to \$4.55, the lowest level of the recent downturn after a steady opening at \$4.65. Dome was 18 and it sold back to \$4.55, the lowest level of the recent downturn, after a steady opening at \$4.65. Dome was dealt in to a limited extent at \$7.00 flat, a higher quotation than the Monday closing at New York, but slightly under the Toronto closing of Monday. McIntyre, which exhibited decided firmmess on Monday, finished the day at \$1.32, a loss of two points. It is stated unofficially that a new yein has been found on the McIntyre at the deepest level and that the ore is of exceptionally high grade. Porcupine Crown, Vipond and Dome Lake than 20 pounds. It is feared that this will act as a ban against the carton trade, and render inactive an enormous quantity of machinery which has been installed to supply the demand for this class of goods.
