Manufacturers Claim New Wage Demands Are Unreasonable.

Rome, Sept. 7.—Positive contradiction of "biased rumors" spread in foreign countries respecting the situation in Italy" is contained in a semi-official note issued this morning. The note adds: "With the exception of the action of the metal workers, life is proceeding normally here, it is hoped we can find a settlement of this question, and even the workers' organizations are cooperating to this end. Premier cooperating to this end. Premier Giolitti is still helidaying at Piedmont, and intends to go to Les Bains September 12 (for his con-ference with Premier Millerand, of France), and the king is at his sum-mer residence in San Rosser."

Rome, Sept. 7.—Strikers in this city elieved last night that an effort would

be made by the police to take possession of some plants that had been occupied by workers. They sounded an alarm with sirens and immediately crowds of women and children rushed crowds of women and children rushed to the occupied plants to join relatives. This, according to the police, appears to indicate the strikers have agreed, in case of an attack upon them, to protect themselves by the presence of women and children. All night armored cars and armed cyclists patrolled the streets, and armed cyclists patrolled the streets, and armed cyclists patrolled the streets. and armed cyclists patroned the streets, and machine guns were placed in dominating positions along thorough-fares, while the idly curious were driven from the streets by carabineers. The dead and injured were members of a party of tourists just completing a tour of the cave. With a guide leading, the party was in the middle of one of the four bridge in the cave when the silde came. Its noise was drowned by the roar of the cataract. The guide was not touched by the slide, and his first intimation of it came from the screams of the women of the party.

To recover the bodies of the dead it was necessary to take a rowboat from the Maid of the Mist steamer, which had run up as near as possible to the Falls and cave. It was a hazardous venture, but the rowboat crew finally brought the bodies out or the pool and regained the steamer.

The accident is the first of the kind that has occurred in the cave since the stairway was built in 1883. There has been slides before, but only in the winter or early spring.

Meeting Will Likely Be Held Very nortly to Discuss Belmont

Belmont, Sept. 7.—Although citizens Belmont and farmers residing along to town line are still without a suppy of natural gas, there are indicatons that the trouble will be settled shortly. A telegram just received from Hon. H. Mills at Toronto states that he is making every effort to have the service resumed. It is understood that a meeting is to be called as quickly as possible between representatives of the gas company and citizens, and that a new and higher rate will be submit-ted. There is a very strong feeling among the people of the village and district that shutting off the gas without any warning was unjustifiable and a mean piece of business This matter will, it was stated to The Advertiser, ought up at the meeting

Superintendent C. F. Forrester of the local division of the G. T. R. commented on the exceptionally heavy traffic.

Officials of the C. F. R. stated that they simply could not handle the crowds. Several of the trains are heing run in two sections. No one seemingly could account for the increases in business. "It seems" one official in business. "It seems." one official said, "that the traveling public has gone travel mad."
With the freight business unprecedentedly busy the cry of the roads is for experienced trainmen. The acting assistant superintendent of the C. P. R. said this morning. "If you want to do us a favor send us experienced trainmen. We can use all we can find."

TUBERCULOSIS GAIN **DUE TO FOREIGNERS**

Influx of Immigrants Causes Boost in Big State Cities.

Lansing, Sept. 6.-There has been considerable increase in tuberculosis in large industrial centres of the state. That is the Labor Day message of the Michigan Anti-tuberculosis Association. While not a pleasant one, it is a situa-tion that must be met fairly and openly if it is to be corrected, the association

declares.
One of the reasons for the increase of the disease among the labor class is that the tuberculosis death rate of other countries is considerably higher than that of this country. Consequently, with the influx of large numbers of foreign workers, the total rate has been considerably increased.
While this is but one element in the cause of the increase, it is not an unimportant one. Each year a new crop of people must be taught the fundamental facts that will help them to fight this disease, and each year as the population disease, and each year as the population of the state increases, the task becombigger of keeping the anti-tuberculo message ever in the public mind.

Premier Says Without Cartier Would Have Been No Confederation.

QUEBEC, Sept. 6.—(By Canadian Press)—The unveiling of a monument firm the interview printed in the Times.

Address description of the eighth conferto the memory of Sir George Etienne Cartier, one of the most distinguished fathers of Canadian Confederation, here today was marked by a noteworthy ceremony which will go down in history as a striking event in the political

annals of Canada.

Considerable significance was lent the event by the presence side by side on the platform of Hon. Arthur Meighen, prime minister of Canada, and Hon. L. A. Taschereau, prime minister of the province of Quebec, as well as His Eminence Cardinal Begin archbishop of Quebec, and the Very Reverend Dean Shrieve of Quebec, representing the lord bishop of Quebec.

A detachment of the 22nd Battalion formed the guard of honor for the oc-casion, commanded by Major Dupuis. while the R. C. G. A. band was also in attendance under the direction of Capt. Charles O'Neill.

Site of Parliament The monument has been erected on the site of the old Parliament Buildings, and a stand was erected adjoining if from which the various speakers addressed the large crowd assembled for

the occasion. Hon. L. A. Taschereau unveiled the The speakers of the occasion were: Mr. Victor Chateauvert, Hon. Antonin Galipeault, minister of public works, Ferdinand Roy, K.C., batonier of the Quebec Bar, C. H. Chan, K.C., E. W. Villeneuve, and Hon. C. . Doherty, minister of justice.

Hon. Arthur Meighen, who was given cordial reception, spoke as follows:

His was a genius not so much for leadership as for command. He was ing will, a man of ideals and vision, but more emphatically, a man of sane and practical talent in the everyday work of statesmanship. His industry and perseverance, his patient preparation, his dauntless resolve, his inmitable patriotism were unsurpassed

On these fundamentals he laid hold and by them he stood unfaltering throughout his life.

"Fifty years ago there were public men in Great Britain who regarded the colonies as a burden and sent forth invitations to the Dominions to erect themselves as independent states. Cartier's vision was larger than theirs, and at his hands these men received at Washington was carried unanimously.

London, Ont., Tuesday, September 7. THE LEAGUE SLOW BUT SURE.

Some of the enemies of the League lations in the United States are sneering at its failure to act in Poland or elsewhere. Perhaps the non-adherence of the United States is itself one reason for the failure. But there are

France from the outset has, officially shown itself hostile to the league idea. Premier Lloyd George is hampered by the ultra-radicals who denounce his league as not democratic enough. Some people won't be satisfied with anything short of a star, even for a beginning, so their wagon or chariot of fire leaves the practical earth. Then there is Japan, a very wideawake oriental, perhaps just about as Christian

Altogether the league, scarcely born yet, with its machinery not yet devised in actual working detail, has a poor time of it in the storm. But children often get a bad start and show surprising strength later on. The league idea is a good one, and more than that it is simply inevitable. All the chicanery of Republican managers or the cynical nationalism of France will not be able to defeat the League of Nations. It is the child of sheer necessity and is bound to

GIRLS AND UNIVERSITY.

Probably more young women will begin university course this fall than ever before. The war and its activities, suffrage now fully attained in English-speaking countries, the new business, professional and even sporting activities of women all urge the girls to equip themselves equally with the boys for the arena of

There is perhaps a tendency among the young men to choose technical course in applied science or medicine or law or business administration rather than the old pure Arts of "liberal studies" at the university. Formerly the university student looked for a general course in languages, mathematics, history, phil- experts, osophy and a little science out of the book, the kind of course that would enable him to enjoy life, letters and art, to feed his mind and soul to vote intelligently and to be a gentleman. But now most of the young men are eager for laboratory and special training to fit them more now coming to university. They also are keen for a career. But it is doubtful whether they will or should go so far as the men in speciali-

For both these professions the the idea of hospitality should have yielded before university preparation must be very little difterent from the general education of a lady or an and a useful citizen. But far more rtant even than these noble professions is of motherhood. To this every norvoman is in a sense called, and if social worker. For motherhood, with duty of intelligently and effectively exerfranchise, the university training, in rticular the old liberal course in the humanimore laboratory work, civics and stic science, is recognized increasingly year an essential preparation.

change coming over their daughters' whole attitude to life. But now with adult suffrage an accomplished fact there is no excuse any longer for neglect of a girl's education. She requires as full and expensive training as her brother. A sort of transitional stage is seen in the custom of some young ladies who come to the university and play around at a few "special studies." This is sometimes worse than nothing as encouraging the dilettante way of life. Purposeful pursuit of a solid course leading to degree will give a girl discipline, independence and a real economic and personal equality with Girls need the university Arts education even more than boys, because their experience of the rough university of the world's affairs must be more restricted. In the laboratory and in the world of art they can give their male competitors a race.

GERMAN INDUSTRIAL DEMOCRACY.

An interesting political development in Germany is the establishment of the Imperial Council, which in a provisional form held its first meeting on June 30 in Berlin. This Council consists of 326 members, 68 representing agriculture and forestry, 68 industry, 44 ce, banking and insurance, 34 railways, etc., 30 the consumers, etc. Three principal groups have been formed in the council, em-

ployers, employees and consumers. For six months of the year an employer is president, for six months an employee. Employers and employees as such have an equal representation in the whole body. It is a Soviet, but with-

out the political power. The German Economic Council is the superstructure of a system of District Workmen's and Factory Councils and corresponding District Councils of Employers, legally empowered to co-operate in the regulation of wages and other conditions affecting the progess of production. It will have the function of preparing economic or social bills and submitting them to the Reichstag, or advising the Government with respect to such measures, which must all be discussed by the council before they are taken to the Reichstag.

Its work will be done mainly by committees, the council itself holding comparatively few regular sittings. Two standing committees will be the Economic and the Social Political, each of thirty members. The council has power to invite experts who are not members of it to attend and speak at its meetings.

Anyone can see what huge power such committee will soon have and wield. Representing employers, employees and consumers, it will be able to get these sections of the nation together and smooth away by compromise the angry frictions that everywhere prevail. Taxation, cost of living and labor questions can be solved and it will be the Reichstag's business to see that the Government carries into effect the solutions arrived at by the council and itself. Any profiteer-ridden country might benefit from the deliberations of such a body, which at the same time cannot institute a tyranny on Bolshevik lines. Its committees would take the in her policy as the Christian states, but no place, perhaps, more satisfactorily, of our etersuch correlation of territorial parliament and occupational duma was favored by Bertrand Russell in a recent book. We shall watch the working of the scheme in Germany with real democratic interest. If it can work out democratically even in that land of oligarchy and militarism, it should have all the better chance in a country long used to freedom.

THE SIMPLICITY OF WOMEN. [London Daily Chronicle.]

In the mass woman has remained more primitive than man, and so more simple, and her unexpected simplicity so baffles our able young novelists tha they mistake it for subtlety. In general, she is neither simply bad nor simply good, and when she s most simple, and so most unlike the woman of tradition, she seems to them most complex, because they are not prepared for that. Women may be deceitful, wicked, cruel; but their cruelties, wickedness, deceits are nearly always transparent, and it s the very ease with which he can see through them that worries a man with suspicions that there must be more than he can see. The only men who are really deceived by women are the temporaril infatuated and the permanently foolish.

HOTEL LIFE OF THE FUTURE

[Sun and New York Herald.] Since Joshua's spies sought out the promised land and put up at the Rahab house in Jericho mankind has been speculating on the necessary qualifications of an ideal home. In the Middle Ages vision for travelers was regularly made in m teries and baronial halls, but with the growth of a nore complex state of society travelers were not or the landed gentry content to rely on the church for their food and lodging. Inns sprang into exist ence where the traveler could order what he wanted the provincial prohibition act providing for governoffending his host's feelings, and where he could refresh body and spirit in company other wayfarers. Falstaff insisted that he be allowed to take his ease at his inn, and posterity the busy life of New York few people go to a hote within a few years hotels will no longer be considered as mere eating and sleeping houses, but as the backbone of our civilization. They will constiute in themselves complete civilized communities, offering stores and shops of all kinds, lectures and employment bureaus to provide both mental and physical work for transients. Above all, personal service will be entirely supplanted by an laborate conveyer system capable of satisfyir every legitimate want. It is a bold conception, and there may be some hotel proprietors who its care of children and of the home and now its to see it realized, but does it represent the very perfection of the innkeeper's art? Times have changed since the Canterbury Pilgrims clattered out of the courtyard of the Tabard Inn under the charge of the proprietor, but human nature remains nuch the same. The ideal hotel of the future will be the one in which mine host has not been relegated to the background by modern conveniences, and where the human equation still counts. In the especially in New England, there still lingers a proper sense of proportion, and the ideal machinery, but with the most hospitably inclined

THE CITY OF BEAUTIFUL CHURCHES.

[Washington Star.] At the present rate of development Washington will in a few years be noted throughout the world as the city of beautiful churches. There will be in the next decade several notable additions to the cclesiastical architecture of the capital, the latest projected of which is the great Church of St. Sofia t the corner of Eighth and L streets. This building will be of Byzantine architecture. A recently Here in Canada many parents have been a constructed building that has added strikingly to little slow to realize the enormous extent of the Vernon Square. The Catholic University grounds will in a few years be the site of a remarkable creation, the Shrine of the Immaculate Conception hich will be one of the notable church buildings in America. The corner-stone will be laid next month. Slowly developing, but soon to assume a form that will disclose its rare beauty of design and commanding situation, the Episcopal Cathedral of SS. Peter and Paul already marks the new era in capital church building. Other denominations plan notable structures for future erection. In ecognition of the importance of this city as a national and an international centre, those wh are planning these new buildings recognize that much is due on the side of architectural fitness and funds have not been lacking, nor will they be n the future, for the proper execution of lesigns, the completion of which will make Wash indeed a city of wondrous vision.

word "compromise" lies the secret of mperial harmony. With it, everything is possible to the Empire. Without it, all the talk of our farlung greatness is but as the crackling of thorns or a vast, involved and intricate question which the common sense of great numbers of men suspicion. General Smuts says in effect that the imperial machine can only maintain its world momentum when there is ample and voluntary give and take between its component parts. AFTER THE PEACE.

[Westminster Gazette.]

We attach little importance to the rumors of secret treaties between Germans and Bolsheviks, but that they are in the air is a symptom which cannot be quite disregarded. The dream of joining up with Germany and defying the Allies and frustrating their blockeds by a joint exploitation of up with Germany and deriving the trating their blockade by a joint exploitation of Central and Eastern Europe must be in the minds of ambitious men both in Germany and Russia. It may serve at least to remind us how very frail is the diplomatic structure which has been raised in may serve at least to remind us how very frail is the diplomatic structure which has been raised in the last two years, and what are the dangers of a mere blind policy of exploiting victory, without thinking of settlement or reconciliation. For that we have a heavy price to pay; and if we are to avoid catastrophe, we must pull together and look facts in the face.

For ears now the public have been shown the great easing difficulties in running them, and reases in subscriptions and advertising rates. But papers have brought to the notice of the public by the proceedings of the Imperial Press Confernce. Such questions will be discussed as the cable communications to rates, and secure the fullest interchange of news and opinion within the British Empire the postal rates, government subsidies towards news services, interchange of the staffs of newspapers, and the pressing matter of newsprint. He requested that his ashes be sent to you as a memento."

Mrs. Messinger was skeptical. She applied to the Jewish board of charities to ascertain the truth of the matter. The society wrote to its Denver branch and the branch turned the case over to the state humane officer. He found Messinger at 2370 South Adams street. Denver, "feeling quite well, thank you."

Messinger protested in vain against being arrested for sending "his ashes" to his wife. He maintained he wanted to return immediately to his home in this city, and had intended to leave Denver for Boston.

"It's a joke of someone, I guess," he told the police. "I didn't know anything about it until some of my friends told me about the stories."

told me about the stories."
The police, however, arrested Messinger and he is being held.
Mrs. Messinger, when seen at her home, appeared greatly relieved to learn that she had not become a widow. She refused in the face of her husband's arrest to believe that he perpetrated the hoax and blames some practical joker.

CONQUERED AND CONQUEROR

BILLIE MISKE.

The heavyweight champion came back yesterday, a little over a year after he won the tile, and knocked out one of the press-inflated challengers in decisive fashion. It took Miske nineteen rounds to come to the conclusion that Dempsey is unbeatable—three yesterday and sixteen rounds before that. It didn't prove much, except that Miske got \$25,000.

RINGSIDE, Benton Harbor, Mich., Sept. 6.-Jack Dempsey, heavyweight champion of the world, today demonstrated that he still retains the terrific punch that won him the title. He knocked out Billy Miske of St. Paul, a fighter as big and as game as himself, in the third round of their ten-round match. Three hard smashes

in fourteen months, Dempsey peeled off the same worn and patched red sweater that he wore when he knocked out Jess Willard. His face wore the same fighting frown, he danced about the ring with his old-time light footedness and finished up by taking the fight in the third round just as he did at Toledo. The third round went one minute and thirteen seconds Miske went down three times in the two and one-half rounds of fighting. In the second he meassured his length on the floor for the count of five. In the fatal third, driven to his corner under a rain of lefts and rights to the stomach and chin, the challenger took the count of nine and had just carefully measuring his distance, finished the bout with a right.

hand punch to the chin. Miske was pale, his forehead wrinkled and his lips pressed tight as he sprang to meet Dempsey with the opening gong. He landed the first blow. Both challenger and champion measured each other with a cautious tattoo of lefts and rights, none of them seeming to punish much. The crowd yelled at Dempsey to speed it up and Miske grinned. Dempsey crossed a left to the jaw and followed with a right to the stomach that fairly boomed. with its solid impact. Miske backed away and covered up, without showing signs of distress. Dempsey finished the session by feinting with a left to Miske's wind and following with a right to the head.

Second Fast. The second round opened fast with he champion trying hard to rock Miske's head with his left. Dempsey found his opponent's jaw with a terrific left that snapped Miske's head back and left him dizzy, and before Won. Lost. He floored Miske with a right-hand punch and the challenger took the count of five. Miske fell into a clinch to protect himself. Dempsey landed three lefts to the jaw on the break-away, and a half dozen hard rights to the body. The champion missed a right swing to the head,

ner, hooking him with a left to the chin. Third Round-Dempsey danced around the ring and hooked a hard right to Miske's body. Miske landed a left to the jaw, and Dempsey swung a right to the jaw, knocking Miske down. When Miske started to his feet, Dempsey swung over the finishing blow with a right to the chin, and Miske crumpled in his own corner, completely knocked out.

GRAIN.

Chicago. Sept. 7.—Persistent buying on the part of export interests had a strengthening effect today on the wheat market. Besides, the government crop market. Besides, the government crop report tomorrow is expected to show a sharp reduction of the estimated yield of spring wheat. Opening prices, which ranged from ½c decline to 1½c advance, were followed by slight gains and then something of a reaction.

Liberal receipts weakened September delivery of corn, but later months sympathized with wheat strength.

Oats were governed by the action of corn.

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. . It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

AST aside the cow. There are many things in which man can improve over nature, and one is the making of a covering for furniture. Mr. Karpen learned this from experience in the line in which he is a specialist. For upholstery Fabrikoid looks better, is more sanitary, and, above all, does not deteriorate or absorb water or grease. The life of Fabrikoid is practically interminable—it outlasts the furniture itself in many cases. This is proof of its economy.

The best you can get in leather upholstery is most likely "split" leatheruneven in thickness, irregular in texture, full of soft spongy spots, or hard brittle ones that crack. Craftsman Fabrikoid is pliable, even, richly colored, dyed if you wish, and without waste.

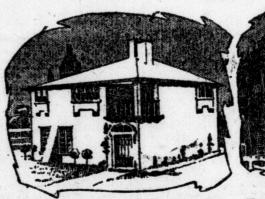

When buying new furniture, or having the old recovered, insist on Craftsman Fabrikoid. Your dealer can supply it, and the appearance and the saving will surprise you. Our free booklet "Fabrikoid in the Home" will give you a few hints about many things that can be done about the home with Fabrikoid. Write today for a copy.

Waterproof-Absolutely

Look for Our Exhibit at the Canadian National Exhibition

This will be one of the most interesting exhibits at the great Canadian National Exhibition at Toronto this year. It will interest all those who intend to build houses or factories, garages or barns. It will interest those who are furthering the good roads movement. It will interest those who have anything to do with bridge-building, dam construction harbon improperates. It will interest anythody struction, harbor improvements. It will interest anybody and everybody who intends to do any building of any kind.

Demonstrations

This exhibit will demonstrate the wide variety of uses for the new Super Cement, which was discovered by an English engineer and used with great success in waterproof construc-tion work for the British Government during the war. The remarkable tests made in Canada with Super Cement will be repeated at our exhibit. They will prove conclusively the absolute waterproofness of Super Cement. The tests will show that a concrete of Super Cement will withstand a water pressure of 200 lbs. per square inch and a gasoline pressure of 120 lbs. per square inch. The magnitude of the gasoline pressure may be better understood when it is considered that 120 lbs. per square inch is equivalent to the pressure at the bottom of a column of gasoline 372 feet high, or more than twice the height of Niagara Falls, and this on a surface that is only %-inch thick. The tests will show that Super Cement is not only superior to ordinary Portland Cement in waterproofness, impermeability and density. It also has greater compression strength, greater tensile strength and greater adhesion. The discovery of Super Cement has broadened the market for concrete construction work. Architects, engineers, builders, contractors, dealers and public are cordially invited to see these Super Cement

tests and the Super Cement Exhibit,

Fair. Make it a point to see this interesting exhibit.

The Exhibit is to be Located just north of the Grand Stand, near the Government's Good Roads Exhibit. Make a memo. of this in your note book, or clip this advertisement and take it with you to the Toronto

vantage with Barrett. Rovers forced matters into Utilities' territory, and things at time time looking promising, but proved abortive. Another corner was granted Rovers, the sphere being well centred by J. Robinson, who took the kick, Utilities' crack back, Dennis, clearing well. Utilities' halves got the sphere and passed to Leigh, who sent the ball rather wide. The railroaders pressed at this time, but Hunt and Dennis were right on the job, and gave the sphere at this time, but Hunt and Bennis were right on the job, and gave the sphere the right about. Utilities were granted two corners in succession, nothing re-sulting from the kick. Rovers drove the ball into the visitors' penalty box, trying hard to locate Utilities' net, but Alf Whitworth their custodian, saved All Whitworth, their custodian, saved and cleared in magnificent style.

Mr. J. Farr refereed the game and performed the job satisfactorily, as he always does. The line-up:

At St. Thomas, the predominating sport feature on Labor Day was undoubtedly the exhibition soccer game staged between Public Utilities of London and St. Thomas Woodworth Rovers, winners of the St. Thomas City Council Trophy, emblematic of the city league championship. The Londoners won, 2—1. The game was played on the Armory grounds in ideal football weather before 1,000 enthusiastic fans, with the usual allotment of fanettes present.

Utilities, who had traveled twice in succession to the Flower City, meetters and restricted to the post of the core was evened ten minutes after play began in the second half. The deciding goal was scored by Gilvear soon after the overtime period to the core product of the core was sevened to minutes after play began in the second half.

Millions of people employ it. And the glistening teeth seen everywhere show what it means. See what it means to you.

A film combatant Most tooth troubles are now traced to film - to that viscous coat you feel. Film clings to teeth, enters crevices and stays.

The ordinary tooth paste does not end film. So the film remains—much of it—and may do a cease-less damage. Nearly all people suffer from it, more or less. It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid

in contact with the teeth to cause decay. Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. So, despite the tooth brush, all these troubles have been constantly increasing.

New methods now Dental science, after years of searching, has found new ways to fight film. All have been proved

pany of players next Monday, Tuesday and Wednesday evenings to the Grand will indicate how quickly the motherland is falling back into powerful pursuits, and her people again dispersing to all points of the compass in the lanes of commerce, art, finance and entertainment. The star aggregation to play here in-

cludes Frederick Compton, one of the late Sir Richard Mansfield's leading men and a captain in the Royal Irish Lancers, bearing the scars of serious wounds and possessor of the Military Cross; Gerald Rodgers, late of Sir Herbert Tree's company, also with Sir George Alexander, and Gerald Du-Murier, a lieutenant in the Royal Garrison Artillery, while Bailey Hicks of Maude's original cast in "Grumpy" was a commissioned officer in the Princess Pats. These gentlemen are leading London thespians and are well known all over England. They have very important roles in the aphing presentation of "Grumpy" at the Grand, and will be of the first overseas residents to play here since the war. Ticket sale will be open to-

The picture is one of the great Northland, where the smell of pines is always present, and where the inhabitants must be persons of courage and preserverance to endure.

James Hilgrade, disgusted with his son Tommy's mode of living, sends fim to this land to see if hard work and clean living will make a man of him. Marion, Tommy's sister, insister, in accompanying him to aid in the reforming process. At the Lone Pine saloon, Tommy goes from bad to worse. The hotel is supposed to be owned by one Pierre, but is really the property of Jack Macy, Hilgrade's lumber foreman, who has designs on Marion.

Marion, crossing a frozen river, falls through the ice and is rescued by Jules Bonnivet, a young French-Canadiadn who owns vast tracts of timber which he refuses to sell to the Hilgrade interests. Macy, Jules' enemy, witnesses Jules bathing Marion's foot with snow and his enmity increases. He tells Marion that it is through Jules that Tom is on the downward path, claiming that her rescuer has been fleecing her brother at cards.
