MAKE IRISH LAWLESSNESS "TRULY UNPOPULAR"

Government Plans to Inflict General Hardships and So Stop Crime

Sinn Fein movement in Ireland say they regard the speech made at Carnarvon, Wales, on Saturday, by Premier Lloyd George as almost a "declaration of war on Ireland," says the Dublin correspondent of the London

correspondent, that the executive department in that city intends to bring matters to a head as quickly as pos-sible by a concentrated attack against disorder, which, by inflicting general hardships on the country, may make crime and lawlessness "truly unpopu-

Projected measures are said to in-Projected measures are said to include complete stoppage of the Trish railways, drastic reduction of the postal service until all railway workers agree to return to duty, and until there is a cessation of raids on the

TWO ATTACKS ON POLICE.

Balinderry, Ireland, Oct. . .- Con-stables Kenny, and Crawford were shot dead and a sergeant and two other constables were badly wounded when a police motor car running between Roscommon to Ballaghadereen, county Mayo, was fired upon this morn-

An attack on a military lorry in the Mallow district of Cork vesterday morning resulted in the death of the driver and the wounding of three sol-diers It developed into another fight

London, Oct. ... Leaders of the | between soldiers hurried to the scene and the attacking party, which, ac-cording to a military headquarters re-port, numbered 150 men. It is said they were armed with machine guns, rifles and bembs.

Unlike Saturday's engagement at Newcestown, yesterday's conflict was a long-range affair, and it is not be-lieved there were any casualtics which are not already reported. The scene of the ambush was near the town of Kanturk, the residents of which late: closed their houses and shops and fled to the country, fearing reprisals.

THREE KILLED HERE.

Dublin, Oct. ... While arrests were being made during military raids in Drumcondra, County Meath, two officers were shot dead, one non-commissioned officer was wounded and one shill one would be and one and the state of the st civilian was killed and another wound ed, according to an official report of the affair made public to-day. Unofficial reports received later

stated the shootings occurred while the military was raiding the home of Professor Carrolan of Al!-Hallowes College, in search of two young men, who had been staying at the house. Just what occurred is not explained, but there appears to have been a minature rifle battle lasting half an hour, being fired from both inside and outside the house. Professor Carrolan is reported to have been seriously wounded. His wife was in the house during the fight.

Conditions in South Russia Look Blue for the Soviets

London, Oct. -- Conditions along the South Russian front have assumed a serious aspect for the Russian Soviet Government, according to advices received here. General Baron Wrangel's troops are continuing to advance north of Crimea and the Sea of Azov, and Nikolaiev, the principal Russian naval station on the Black Sea, is said to have been captured by anti-Bolshevik insurgents. In spite of the fact that an agreement looking to an armistice has been reached with Poland, and large numbers of Soviet troops are in a position to be rushed to South Russia, the Soviet Government is reported to have made peace proposals to General Wrangel.

A JEWEL IN THE ROUGH

his ear, "unless you can find a piatol, and be ready to shoot;" and she pushed him within the door again.

She stood as before, in an even line with the red bull's-eye of the stove, and listened; there was still a scraping of feet and muttering of voices outside, but not so near the door, and she won dered if the enemy were going round the cabin to attack it from another cide. Suddenly a shot rang out in the stillness outside, then another, and the ball came through the window behind her, and passed over her shoulder; there seemed to be a rush and stam pede toward the door. She turned and faced it, raising both revolvers, and as she heard the wood of the fallen door split under the trampling feet, her fingers had almost drawn the triggers to welcome the incomers, when out of that cold blackness beyond the door came a slight cough. Katrine's hand dropped to her side, a sick, cold horror came over her as she realized what she would have done in the next instant That was Talbot's cough. One second more of silence, one more step forward, and her shot would have found his heart. She reeled where she stood against the wall, with the sickness of the thought. She could not shoot again now; he was there outside among them
—and Stephen, was he here too, or inside? Talbot, she supposed, roused by the noise, had come out and attacked them between the two cabins. Then what she had said to Stephen recurred to her. Suppose he had searched and found a gun and should come out from the inner room, he would not count up on Talbot's presence any more than she had done; he would naturally shoot at the first who crossed the threshold. as she herself had done; he would shoot in the dark, by her orders. The thoughts flashed quicker than lightning through her brain. The horror of the situation, this uncertainty, this killing blindly in the confusion and the darkness, was too great to be borne.

The danger now was greater than even the light could bring. She dropped the pistols on to a stool beside her drew a match from her pocket, and heedless of the perfect mark she her self offered now, struck it and held i over her head. In a second the body across the hearth, the wrecked door, and two pale faces looking in at her from the opening, leaped into sight; the enemies, the living ones, were gone. A pool of blood beyond the threshold, and blood on the splintered wood, and their dead companion. only remained. For a moment the three if he could," she answered. "You faces all pale with fear and anxiety, not for themselves, but for each other, stared nervously into each other's eyes be tries to kill you, that's quite lair." Then Katrine broke a laugh, and brought down the match from over her head and put it to the lamp on the table.

"Oh, you frightened me so," she said as she turned up the wick and made it burn, and the men stepped over the door and came in. "I thought I might

lamp-light, as if to reassure herself they were really there alive. Talbot laid his six-shooter or the

"You frightened me," he returned jestingly. "I wouldn't come under that straight fire of yours for any thing. The men outside were easier

window and came round to me; but the first shot had already wakened was getting my clothes on answered Talbot when he came, answered land, walking over to where the dead man lay between the hearth and the door

DODD'S KIDNEY 1087 THE PRO

"Go back," she said, with her lips on its ear, "unless you can find a pistol, and be ready to shoot;" and she pushed him within the door again.

She stood as before, in an even line with the red buil's-eye of the stove, and istened; there was still a scraping of theet and muttering of voices outside, but not so near the door, and she wonlered if the enemy were going round the cabin to attack it from another dide. Suddenly a shot rang out in the

Stephen had crept in, pale-faced as the corpse itself, and stood now star-ing at it in a dumb horror. He could understand how Taibot and his

citement turned her brain, he wondered, and looked at her apprehen-sively; but katrine gave no sign of mental or paysical collapse. She looked amiling and well pleased with hereof, and was stirring the fire and settling the coffee-pot over the flames as if nothing the least starting or as if nothing the least starting or disconcerting had occurred, as if no cold body was lying stretched there by the threshold. Stephen reassured for her, let his eyes travel to the corpse, and then, with a groom of horror, sunk back on a chair with his face covered in his heads. Kathan the control of the rine looked up quickly from the fire, and then went over to him, putting an arm softly around his neck.

arm softly around his neck.
"What is it, Steve, dear? You weren't hurt, were you?"
"Oh, to have kitted him! To have killed a man—how horrible!" muttered Stephen, without lifting his

hatrine looked amazed. "But a maraerer!" and Stephen shuddered.

one lest the shiver of horror under her hand. "isn't it better to be a murderer than murdered?" she asked, with a little smile, feeling she had an unan-

swerable argument.

swerable argument.

"Murdered, your body is killed; murderer, your soul," came back in the same stifled voice.

Katrine was silent. She was thinking what a nuisance it was to have a soul that needed so much looking after, never seemed to do any good, and was always obtruding itself and spoiling your best moments of fun in this life.

"We'll take him away," she said.

'We'll take him away," she said.

thing. The men outside were easier to deal with, they got so scared with you shooting in here and me shooting in their rear, they thought we were a band of a dozen at least."

"I'd no idea you we're there." murmured Katrine, shuddering still, as she moved from the lamp to the fire and began drawing the half-burned logs together.

"Stephen climbed out of the back window and came round to me; but the first shot had already wakened."

"We'll take him away," she said softly, after a minute, noticing that softly after a minute, not

"Might this be useful?" said Talbot. stooping over the man and half drawing the second large revolver from ing the second large his belt.
"No, take nothing," answered Kat"No, take nothing," answered kat"No, take nothing."

"No, take nothing," answered katrine, hastily; "we want nothing."
Talbot let the weapon slide back to
its place, and they both bent down
and lifted the corpse between them.
Talbot walked backward over the
cabin door behind him. It was dark
outside—a thick, pitchy darkness, with
only a gray glare close to the ground
from the snow.

from the snow.

"Let's take h'm to the guich,"
whispered Katrine, "and send him
down it. It will worry Stephen so if

he sees him again."
It was only a few yards to the edge of the ravine. They moved toward it cautiously and stopped upon the brink.

"Are you ready?" Talbot asked in a low tone, and Katrine whispered back,

There was a havy thud, then a oft, rolling, sound, and then silence. I the drift-snow in the bottom of

the guich received and closed over its gift. They waited a second, then Taibot stretched out his hand toward bet, found her arm in the darkness, and they both waiked back together.

"It's a pt' Steve is so sensitive," said Katrine, plaintively. "I just saved him and his house and his precious gold, and everything, to night and he does not like me a bit for it."

"I think 'u are a very brave little girl," said Talbot, softly.

"Do you?" returned Katrine, in a pleased voice; and Talbot felt that she turned her face and looked up at him in the darkness. "Steve and I don't fit ver, well, do we?" shettded with a sigh; "and he does not fit this life. Somehow I don't believe we shall ever leave this place alive—I have a presentiment we cha'n't. You will—you'll make a success and go back—bet make her in the service of the servi you'll make a success and go back-but we sha'n't."

Talbot did not answer, as they wer Stephen met them at the door as they came in, with a white, stricken

"Where have yet put it?" he asked in an awed, trembling whisper. "Down the gulch," replied Katrine, composedly. "Now, Steve, you've not to vorry about it any more—it was a

that Stephen had been too much shaken to think of putting it in order. The coffee-pot stood where she had left it, and the coffee was boiling over and wasting itself in the fire. She ran to it, took it off, and began pouring it into the cusp on the table; as she did so, the men noticed blood dripping from her wrist into on of the saucers. "Oh, yes," she said, indifferently, in answer to Stephen's startled exclamation, "I thought I fe't my sleeve getting very damp and sticky; there's a graze on the shoulder, I think, and the blood had been crawling slowly down my arm, tickling me horribly. Let's see how it looks!"

She unfastened her bodic, and took that Stephen had been too much shak-

She unfastened her bodic and took She unfastened her bodic, and took it off, seemingly unconscious of Talbot's presence. He stood silently by the hearth, watching her, and thought as he saw her bare white arms and full, strong white ne k, how well she would look in a London ball-room. Stephen, all nervous anxiety, was examining her shoulder. A bullet had gone over it, leaving a furro in the flesh, where the blood welled up slowly Katrine turned her had aside, and regarded it cut of one eye as a bird regarded it cut of one eye as a bird does. Stephen 'en over her and kissed her, murmuring incoherent words of remorse'ul sorrow. Katrine flung her arms rould him and laughed. "Why, I am delighted! It's been

quite worth it—the fun we've had to-night. That's all r' ht; 't will be healed in a couple of days Just tie it up with your han kerchief."

... was an easy place to bind, by pas-

sing the bandage under the arm, and this, by Katrine's directions, Stephen with trembling fingers. had turned away from them, and occupied himself by fixing up the door and stuffing the chinks where the wood had bro en. When this was done and the bandaging finished, Stephen brough, a simple from the other room and wrapped it round the girl's choulder, and they all drew in round shoulders, and they all drew in round the fire in a close circle with their cups in their hands.

Their com.no. danger and the sudden realization c. how much they were, each of this lorely tho, to the other; how easily any one of them might have been taken from the circle that sht, an_ 'cw irrorrable would have en the k s, drew them all closer together as they had n ver been before -that delicious chord of sweet human sympathy that lies deep Gown. but ever present, in the human breast vibrated strongly in their hearts, and they sat round the cheery blaze, talk-ing and saughing softly, and looking at one another, and then smiling as their eyes met, for mere light-hearted-

CHAPTER VI.

This little excitement quite delighted and pleased Katrine. She had spoken just the truth when she said she wish-ed something like it would happen every day; and the only thing that epoiled the an of it was Stephen's de-jection and the persistently depressed way he looked and felt over it. After having something worth hving for passed away again, and the time seemfollowed day in a dreadful monotony and the girl visibly lost health and spirits. She changed a good deal, and

THIS WOMAN'S MISERY

Ended by Lydia E. Pinkham's Yegetable Compound. Remarkable Recovery of Mrs. Church.

Smiths Falls, Ont.—"I suffered with falling of my organs, pains around my heart and in bowels and down my lege, neuralgia in my face and head, and that terrible sinking feeling. I felt that I could not live and would fix my house in order every night so there would be no trouble if I dropped off in the night. My husband went to the druggist to get the best remedy he had and he gave him Lydia E. Pinkham's Vegetable Compound. I took six bottles and felt a lot better. I will always recommend the Vegetable Compound, and you can use these facts as a testimonial."— Mrs. J. O. Church, Box 846, Emith. Falls, Ont.

J. O. Church, Box 845, Smiths Falls, Ont.

The success of Lyca E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

If there are any complications about which you need advice write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

ooth men netteed it. She lost wonderful sweetness and evenness o emper and her bright smiles, and be temper and her bright smiles, and became fretful and irritable, discontented,
and sharp in her replies. In the long
winter mornings new she would not
spring up in the early darkness as
formerly, bu! try to fall askeep again
after waking, and put her arms across
Stephen and tell him there was no use
getting up, that the day was long
enough anyway, and it was too dark
to do anything; and then she would
abuse him if he insisted on getting up
in spite of her, and let the breakfast
walt so long that after a time the men in spite of her, and let the breakfast wait so long that after a time the men drifted into the habit of having it alone, and going out without seeing her. Katrine had grown to hate the day, to hate every minute, in fact, when she was not sleeping, and to try to make the night last as long as possible. Stephen noticed all this, and spoke to Talbot about it in distress.

Talbot merely said, "Perhaps it's her health. You'd better ask her."

Nothing Like It For Bronchitis And Weak Threat

(To be continued.)

Rer ... ble Cures in the Worst Cases Reported Daily

CURES WITHOUT USING DRUGS.

new method for treating bronchitis and irritable throat. Stomach dos-ing is no longer necessary.

The most approved treatment consists of a healing vapor resembling the pure air of the Adirondacks.

This soothing vapor is full of germ-destroying substances, and at the same time is a powerful healing agent. It is sent to the bronchial tubes and lungs through a skilfully devised in-haler that can be carried in the vest Simplicity itself is the key-

note of this splendid treatment.

CATARRHOZONE is the name of this wonderful invention that is daily curing chronic cases of weak throat, bronchitis and catarrh. Every breath through the inhaler is laden with snothing healing substances that with soothing, healing substances that destroy ail diseased conditions in the breathing germs. It can't fail to cure because it goes where the trouble really exists, and doesn't attempt to cure an illness in the head or throat by means of medicine taken into the Catarrhozone is a direct

stomach. Catarrhozone is a direct breathable scientific cure.—
There is no sufferer from a grippy cold or a winter ill that won't find a cure in Catarrhozone, which is employed by physicians, ministers, lawyers and public men throughout many fereign lands. Large size lasts two months and costs \$1.00 and is guaranteed: small size 60 cents, sample size teed: small size 50 cents, sample size 25 cents; all storekeepers and drug-gists, or the Catarrhozope Co., King-

A TOUTH SEA LEGEND.

One of the most picturesque legends the islands of the South Pa cific, where numbeams are known as "the ropes of Maul." It is related that in former times the sun god, Ra, was not so regular in his habits as he is to-day. In fact, he caused the South Sea islanders much annoyance by set ting in the morning, or at noon, or at other inopportune times, just when his light was needed for the daily tasks

The great hero Maui undertook to cure him of these erratic habits, and the first step was to make the sun god prisoner. This was accomplished by laving a series of six snares, made of path in the sky. When the deity next rose from Avaiki, or the land of ghosts, the first noose encircled him, but slipped down and only caught his feet; the second slipped, too, but caught the sun god's knees; the third caught around his hips. Still Ra pressed on, scarcely ham-

pered by these contrivances. The fourth noose tightened around his waist, the fifth under his arms, and finally the sixth and last caught him around the neck and almost strangled him. Then the sun god confessed himself vanquished and, in fear of his life, promised Maul that he would in future adjust his daily journeys more in accordance with the comfort and

onvenience of mortal men.
Ra was then allowed to proceed on his way, but Maui prudently declined to take off the ropes, which may still be seen hanging from the sun at dawn, and when he descends into the ocean at night. Hence the islanders say, when they behold the beams ra-diating from the sun, "Tena te Taura - dee the ropes of Maui. Phiadelphia Enquirer.

His Mind in the Clouds.

Rev. George Harvest was to have been married to the daughter of Bishop Compton, of London, but on the morning fixed for the ceremony for-got all about it and went off fishing. Much indignation was belt by the bride and her friends, and the en-gagement was broken-off. But the reverend gentleman's second engage ment was equally unsuccessful. Once more he forgot to come up to the church and lost his expectant bride

Jenny Lind, commonly called the Swedish Nightingale, was born in Stockholm on October 6, 1820. She was the daughter of a lace manufacturer, and the discovery of her marvelous musical voice was due to Mile. Lundberg, an opera dancer, who induced her mother to allow her to be educated for the stage. At seventeen years of age she was singing in Grand Opera, and in 1841, at twenty-one years of age she went to Paris, she had already become identified with nearly all the paris in which she afterwards became famous. Her celebrity in Sweden was due in a great measure to her wonderful histronic ability, her wonderful vocal art being only attained after a year's hard study under manuel Garcia, who had to remedy many faults that had caused exhaustion in her vocal organs. On the completion of her education, she sang in Paris, Berlin, and all the great cities of Europe.

in Paris, Berlin, and all the greatcities of Europe.
In 1847 she was induced by Lumley,
the manager of Her Majesty's Theatre, to come to England, where her
advent created an unprecedented furore. Her triumph in London exceeded
everything of the kind that had ever
taken place there or anywhere
else. The crowds of admirers who
stood for hours to gain entrance to stood for hours to gain entrance to the pit, have become historic. She appeared in opera in all the great cities of England and Scotland, her

tour being a triumphal success.

In 1850 she was brought to the United States by the late P. T. Barnum. Her first concert in old Castle Garden is one of the famous events in the musical and operatic history of New York City. The famous singer gave her entire share of the proceeds of the concerts, which amounted to over \$10,000 to the various charities over \$10,000 to the various charities of the city. She remained in the United States for nearly two years, being for the greater part of the time engaged by Mr. Barnum. While in Boston, she was married, on Feb. 5, 1852, to Otto Goldschmidt, whom she had met at Lubeck in 1850. She returned to England, which she made her home for the rest of her life; and appeared in oratorios and concerts, where her dramatic instincts were as strongly and advantageously displayed as they

had been on the stage.

Her whole life was one of great nobility, and she was distinguished for her generosity. She gave largely of her means to promote the hampi-ness of humanity, recognizing that her voice was a great trust, which was not to be used merely for purposes of personal fame and aggrandizement

The Flowing Tide.

No one, however great his genius or high his position, is all-important to the world; its work will go on with-out him. There may be ripples and disturbances in the current for a time where he sinks out of sight, but the tide will soon be flowing on as before This truth may be painful to personal vanity, but it is comforting to every that care others than for self.

RHEUMATIC PEOPLE

CAN ONLY FIND RELIEF BY EN-RICHING THE BLOOD.

Rheumatism is a disorder of the kneumatism is a disorder of the blood. It attacks people when the blood is overcharged with acid and impurities, thus settling up inflammation in the muscles and joints. Wet weather or cold weather may start the tortures of rheumatism, but is not the cause. The cause is in the blood and the blood only. Victims of this malady have every reason to fear the first dull ache in the limbs and joints, followed by sharp pains through the flesh and muscles; these are the symptoms of poison in blood which will shortly leave the victim painracked and helpless.

There is only one way to cure rheu-matism, and that is through the blood. Liniments, hot applications, and rubbing may give temporary and running may give temporary ease, but cannot possibly root the trouble out of the system. That can only be done by the rich, red blood which Dr. Williams' Pink Pills make. This new blood drives out the poisonous acids and impurities, and rheumatism disappears. If you are a sufferer from this painful malady begin the use of Dr. Williams' Pink Pills and see how soon the pains and stiffness of the joints fade away, leaving behind new energy and You can get Dr. Williams' Pink

Pills from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

Once Thought to be Worthless.

The shark is found to furnish about 11.9 per cent. of hide, 31.3 of edible food, and 44.7 of fertilizer material, and a ten pound liver yielded three quarts of oil. The oil, fairly free from fishy odor, is well adapted for tanning and paints. The dried fertilizer material carels about 20 per center of the control of the contr terial equals about 20 per cent. of the total weight of the shark, and contains 18.3 per cent. of nitrogen. The stomach may be utilized for leather.

THE MAORIS.

ants of New Zealand A Dying Out.

When Captain Cook, the famous navigator, landed at Poverty Bay, New Zealand, in October, 1769, the native took his ship for a gigantic bird and were struck with the size and beauty of its wings. He spent nearly a year cruising around the Islands and cultivating friendly relations with the inhabitants.

cruising around the islands and curvating friendly relations with the inhabitants.

They appeared to be aminble and exceptionally intelligent; yet infanticide was commonly fracticed, and cannibalism was an established habit. The Maoris thought nothing of making an armed descent upon a distantisland, rounding up its people, and accomplishing a thorough clean-up by eating them all in leisurely fashion.

Captain Cook estimated their number at 400,000. To-day there are not more than 40,000 left alive. Like other native races all over Oceanis, the Maoris are dying out. They carned the admiration of Europeans by the skill and bravery with which they defended their country in a long series of wars against the white it vaders. At one time the British h 10,000 soldiers in New Zealand.

The origin of the Maoris is untain, but they are presumably of lay stock. They have a tradition of the islands were first settled by anctors of the ra who came from a distantiand in fourteen canoes. Most chesished of their ancient weapons are war-clubs made of translucent and very heautiful green stone. A British he would take in exchange for his club, and the reply was "Your ship."

The chief explained that the lifetime of one man was required to make such a war club. Very likely this was true. For when an attempt was made to turn out clubs of like pattern from

true. For when an attempt was mad to turn out clubs of like pattern from the same material with the help of ma chinery, the result was failure, owing to the extreme hardness of the stone

Anaemic Paleness Quickly Changed To Rosy Cheeks

Chlorosis or anaemia is simply thin-

less of blood.

If confined too much indoors, anaemia develops, because the lungs are insufficiently supplied with oxygen, and the blood is consequently ill-nourished and half-starved.

But there is a cure!
Dr. Hamilton has solved the problem in his famous pills of Mandrake
and Butternut; as a blood enricher
their equal is not known.
All the functions upon which life
depends are helped by Dr. Hamilton's
Pills.

Hichness and purity are instilled with wonderful promptness into the vital fluid.

Healthy color supplants the pallid,

Healthy color supplants the pallid, ashen face.
Better appetite, strong digestion and dreamless sleep, are sure to follow, because of the increased blood supply furnished by Dr. Hamilton's Pills.
Think it over.
Will it pay you to look and feel half-dead, to lack color and spirit, when all can be changed by Dr. Hamilton's Pills.
Better act at once.
Your case is more curable now than later on.

rour case is more curable now than later on.
Dr. Hamilton personally guarantees his pills of Mandrake and Butternut.
Their merit is unquestioned.
Thousands of anaemics they have cured and kept well.
They will do just the same for you.
Try Dr. Hamilton's Pills, 25c per boz.

THURSDAY, OCTOBER 14, 1920

BAD FIRE NARROWLY AVERTED THURSDAY EVENING.

What might have been one of the most disastrops fires in the history of the town was narrowly averted near B. A. Evans' oil and gas tanks last Thursday evening, when C. W. Robeson extinguished a blazing milk can partly filled with gasoline. Parties who desired some gas for use the following day drove to the yard after dark to have the can filled with gas, and Mr. Conroy was measuring it out when the gas took fire from a lighted lantern on the rig. The flames shot high in the air and the alarm was given. The village chemical and water -pump were hauled to the scene, but as usual, C. W. was there first with his chemical extinguisher and had the fire out. Mr. Robeson has saved Hammond many fires by his prompt action with this extinguisher and deserves much praise. He is a regular fire-eater. There are a few of these two-gallon extinguishers now in the village and they have demonstrated their value time and again. For the cost of the thing every business place, house and barn in the town should have one. Its use once may save hundreds of dollars and perhaps life.-Hammond Advertiser.

Catarrh Cannot Be Cured with LOCAL APPLICATIONS as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts through the blood on the mucous surfaces of the system. Hall's Catarrh Medicine was prescribed by one of the best physicians in the country for years. It is composed of some of the best tonics known, combined with some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catharral conditions. Send for testimonials, free.

WIFE AND FAMILY

Wedding Bells

Shea-Cauley.

The marriage took place on Tuesday morning, October 12th, in St. Philip Neri Church, Toledo, of Miss Anna Loretta, daughter of Mr. and Mrs. John Cauley, and Bernard Johnson of Mr. and Mrs. E. J. Sheaf, of Athens.

Rev. Father McDonald officiated at the nuptial ceremony. Miss Rose Shea, sister of the groom played the wedding march, and the choir rendered several selections during the service. The church was artistically decorated with asters and ferns.

The bride, who was given in marriage by her father, was attended by her sister, Miss Lucie Cauley, of Ottawa, while little Miss Leona Myers, niece of the bride, was flower girl. The groom was assisted by his cousin, Mr. Herman Shea, of Athens.

A lovely costume of navy blue Duchess and Georgette with black hat was worn by the bride, who carried a bouquet of American Beauty roses. The bridesmaid wore a navy satin costume with hat to match, and also carried roses. The dainty flow-er girl was attired in pale blue silk.

The groom's gift to the bride was a platinum lavalliere, with diamond and peridot setting, to the bridesmaid a silk umbrella, to the flower girl a gold bracelet, and to the groomsman a pair of engraved gold enff links. uff links.

After the ceremony a reception was held at the home of the bride's parents, where the wedding dinner was served in the presence of their immediate friends.

The bride was the recepient of many beautiful and costly gifts, including several cheques. The bride travelled in a suit of navy blue broadcloth trimmed with opossum

Paint Protection vs. DECAY

Any surface that is covered with Glidden Endurance Paint is well covered and will not decay easily, for Glidden protection is good protection and saves the cost of frequent repairs.

Glidden Endurance Paint prevents decay, keeps out moisture from the wood and resists wear from changing weather conditions without scaling or cracking.

Glidden Endurance Paint stays fresh and bright for a long time, wears well and looks well-and because of its durability is the cheapest paint you can buy.

For everything about the home or farm that needs to be painted, stained, enameled, varnished or finished in any way, there is a Glidden product made especially for that purpose.

We have them. Color cards free.

ANINERSARY SERVICES

PLUM HOLLOW BAPTIST CHURCH

SUNDAY OCTOBER 24, 1920

Rev. H. C. Bryant of Smith Falls, will speak both Morning and Evening, assisted by Mr. Staff the Blind Singer.

MONDAY EVENING

October 25, there will be a Lecture, entitled "THE FOOLS VINEYARD"

Selections by the Smith Falls Male Quartette and other numbers.

COME AND BRING YOUR FRIENDS

Admission: Adults 25c

Children 15c

MRS. ASQUITH AND GEN. BOOTH

Queer Beginning of a Firm Friendship

In Dialogue in a Railway Train.

The friendship of Mrs. Asquith and General Booth began through a chance meeting in a train, and the meeting and the conversation which ensued are characteristically described by Mrs. Asquith in the penultimate instalment of her autobiography.

Jumping into a moving train at Paddington, sne glanced at her fellow-travellers and found that one was a "beautiful old man" in a roomy bine overcoat sitting near a window.

"He had a beard of black and silver, and curling black and silver, and curling black and silver, and thin, large, aquiline nose. An inworldly-looking youth sat next to him arranging papers and letters in elastic hands.

anworldly-looking youth sat next to bim arranging papers and letters in elastic bands. The empty seat on his side was piled up with letters, news-paper cuttings, and documents of every description. The young man was in great awe of the old gentle-man."

Noticing that the compartment was reserved one, Mrs. Asquith apolo-ized for her intrusion, explaining that t would have been a serious matter to her had she missed the train. The old gentleman (threateningly):

What are you going to do?

Margot: I am going to try horses
for myself and my brother-in-law. What are you going to do?

He (very deliberately): I am going

to save souls.

Margot: You are sanguine.

He: Don't you believe in saving

Margot replied that she thought there was something morally vulgar in trying to get too familiar with men's souls.

men's souls.

He (indignantly): When you are dealing with the drunken and deprayed, you must not be morally are astocratic. You know nothing of real life.

What do you know about drink? You have probably never seen drunkenness in your life.

Margot: Oh, haven't I just! I am Scotch.

He: Do you believe in hell?

Margot (decidedly): No, nor do
you. . . . You think you do, but you
don't. Holding hell over the heads of

don't. Holding hell over the heads of the drunken and depraved is playing down to the lowest side even of these poor people. This is the weak part of your teaching—you excite fear, and a sort of spiritual fever.

General Booth: If you were not a rich, idle, self-indulgent young lady you would see that what you call spiritual fever I call spiritual hunger; this does not belong to the lowest side of humanity, but the highest—spiritual torpor is hell.

Margot: If this is the kind of hell

tual torpor is hell.

Margot: If this is the kind of hell
you mean I do believe in it. I have
always thought hell is within us, just
as I think heaven is, and as certainly
as I think God is above us.

General Booth: There is a great
deal of nonsense in that kind of talk.
Good is good, evil is evil, God is God,
heaven is heaven, and hell is hell.
Don't be equivocal and ecclesiastical,
but be frank with your faith. Do not but be frank with your faith. Do not

betray like the High Churchmen. I believe in hell and I believe in heaven. Margot: Fear of hell is not a good incentive. Threats would have, no ef-fect upon me! I would much rather feel that my nature responded to love than to fear

I asked him if his wife believed in

General Booth (guardedly): I think she would have agreed with you about General Booth: Do you say your

Margot (gravely): Certainly, if you would like to.

General Booth: Would you like to Margot (gravely): Certainly, if you would like to.

General Booth was unprepared for this answer (the autohography con-

this answer (the autobiography continues). He had made up his mind that I was a fearless, frivolous female. He had been baulked in his scheme of conversion by a conversational digression, and was anxious to return to the charge. For a moment neither of us spoke; then, with a courteous movement of his hand to me, he said:

Let us kneel and pray."

The young lieutenant, myself, and the General knelt down in a row with our elbows on the opposite seats of the carriage. He opened by exhorta-tion—would God "bless and be near this our sister." He was not censorthis our sister.' tous, but I noticed he emphasized the word "quietness" in quoting St. Paul

FREE SEED GRAIN

Annual Distribution by Experimental Farms.

(Experimental Farms Note.) The annual free distribution of samples of seed grain will be conducted as usual at the Central Experimental Farm, Ottawa, by the Dominion

Cerealist.
The following kinds of seed grain will be sent out this season:
Spring wheat (in about 5-lb. samples); white oats (about 4 lbs.), bar-ley (about 5 lbs.), field peas (about 5 lbs.), field beans (about 2 lbs.), flax

(about 2 lbs.).
Only one sample can be sent to each

Applicant.
Applications must be on printed forms which may be obtained by writing to the Dominion Cerealist, Experiental Farm, Ottawa, at any time

after Sept. 1st.

As the stock of seed is limited, farmers are advised to apply early to avoid disappointment. Those who ap-plied too late last season are particularly requested to send in their names at once so that application forms may be frowarded to them. No application forms will be furnished after Feb. 1st, 1921.—C. E. Saunders, Dominion Cerealist.

BT a woman ease your suffering. PLANT FOOD

Nitrate of Soda Vs. Sulphate of Ammonia.

(Experiment Farms Note.) Nitrogen is one of the three main elements absolutely required for the production of good crops, and its im-

portance is everywhere acknowledged. Usually it exists in soils in connection with humus or vegetable matter and, through excessive cultivation in grain or in timothy, also by surface washing, its loss has been going on washing, its loss has been going on for a long time in the older settled parts of Eastern Canada. This is why, at many places, it is the limiting factor to profitable farming. Nitrogen bearing fertilizers are eith-er organic, when they are derived from animal and vegetable by-products such as tankage and cottonseed meal, or non organic when derived from salts such as nitrate of soda and sulphate

such as nitrate of soda and sulphate of ammonia. It is easy for the man producing crops of a high commercial value, like fruits, vegetable or flowers, to use large quantities at a profit, but the question demands more careful consideration from the farmer who raises staple crops of a much lower

valeu per acre. In 1915, an experiment was started at the Cap Rouge Experimental Station to compare nitrate of soda with sulphate of ammonia on a three-year sulphate of ammonia on a three-year rotation of potatoes, oats and hay There were six plots and the respective quantities of seed were 900 pounds potatoes, 85 pounds oats, 12 pounds red clover, S pounds timothy 2 pounds

alsike per acre.
The six plots were of one-fortieth of

an acre each; three received nitrate of soda at the respective rates of 133, 100, 66 pounds per acre; whilst the three others received sulphate of ammonis at the respective rates of 100, 75, 50 pounds per acre, the quantity of nitrogen thus applied being equal to both cases. With each of the different forms of nitrogen there was an application of phosphorus and potassium at the repossibly in sufficient quantity for op-

imum production.

For the crop immediately following the application of fertilizers, which was potatoes in this case, the results

are strongly in favor of nitrate of soda, as it gave a yield 38 per cent. larger than the one obtained with sulphate of ammonia. The crops of the two following years, however, oats and hay, were about the same with each of the two fertilizers, which would tend to show that their recidual effects were

to show that their residual effects were about similar.

It is interesting to note, in passing, that when the application of nitragen, in either form, was decreased, the grops of potatoes and of hay also decreased, though the crop of oats did not seem to be influenced. The increase in the yield of hey leads to be crease in the yield of hay leads to believe that there is a residual effect even for such a quickly available and easily leached away form of nitrogen as ni-trate of soda.—C. A. Langelier, Superintendent, Experimental Station, Cap

DAILUARD GEADING Light Stuff Alone is a Detriment. A CONTRACTOR

Most of us like something easy to read, something that makes no tax on our mental muscle, something that interests us, and perhaps charms us, but with a minimum of mental effort. And we read so much of this kind of material that when a writer treats us as thinking beings and writes in such a way that it requires his meaning, we unceremoniously throw him aside with the expressive verdict,

Rive in Wholesome, Cleansiag, Refreshing and Healing Letien—Murine for Redron ness, Soreners, Granula-YOUR EVES of the Eyes or Eyelids:
"2 Drone" After the Movies, Motoring or Gol will win your confidence. Ask Your Drugges for Murine when your Eyes Need Care.

Murine Eye Remedy Co., Chicasco

dry." And yet, in refusing to read anything but "easy reading," we are robbing ourselves of needed mental development, and cutting ourselves off from any possibility or improvement beyond a certain narrow limit. Not very long ago Sir John McClure was addressing the Congrega-tional Union at Bradford, England and, speaking as a layman to minis-ters, he said: "It may be necessary to spend time over newspapers and the popular books of the day, but it is much more important that time snould be found, day by day, for hard reading and vigorous thinking, as well as for meditation and prayer. The value of the help you can give to oththe mend made strong by knowledge and regular discipline—and not only upon experience and sympathy. The problems of the future in church life and in national life will not be solved by benevolent ineptitude or altruistic rhetoric, but only by 'mind and soul according well,' the enthusiasm of love directed by knowledge and un-derstanding."

FOR POULTRYMEN

Expert Advice On Preparing for Winter.

(Experimental Farms Note.) Do not leave the preparations for r too late

Get the pullets into winter quarters before they begin to lay so that they will not receive a set back, but do not bring them in early is the fall unless they are well developed, as young stock on range will develop very rapidly during the bright, cool fall weather.

Before bringing the pullets in, see that the houses have been put in or-der, thoroughly cleaned, disinfected, and all cracks in walls or roofs carefully stopped, so as to avoid drafts or dampness. All broken glass should be renewed, and the cottons either nended or renewed, so that they will be ready to use when required. This, however, does not mean that when the pullets are put in the windows

should be closed; far from it.

When the birds are put into winter quarters the conditions should be made as nearly as possible similar to range conditions. Keep the front

of the house wide open so as to allow all the fresh air possible, and keep it that way as long as weather conditions will permit.

When the stock was on range it was supplied with grains, both whole and arge quantities of green feed, grass and other tender vegetation, animal feed, grasshoppers, bugs and insects, and mineral water, small stones and, possibly, small shells. See to it that, when the stock is confined all these feeds are liberally supplied. Section feeds are liberally supplied. Scatter grain in the litter morning and evening. Keep hopers of dry mash constantly before them, also hoppers of beef scrap to replace the bugs and insects which they formerly picked upon range. To replace the green feed which they were able to gather, sup-ply rape, mangels, cabbage, sprouted oats, clover and any similar feed that is tender and appetizing. This green feed is of especial importance at this time of the year, and if not liberally supplied the sudden change to a heavy diet is liable to result in liver de

rangement.

Use judgment in feeding and handling. See that the flock never wants for clean water. Feed sparingly with scratch feed in the mornings so that the flock will continue active through-

out the day.

Look carefully after the flock, supplying dry, bright, well ventilated cuarters, with feed as previously sug-gested and your poultry will prove one of the most paying branches of

LARGE VS. SMALL HIVES. (Experimental Farm's Note).

contain the combs in bey-hives, the Langstroth frame measuring 17 5-8 inches deep has for many years been the size employed by most beekeepers. Some yez.s ago ii was the keepers. Some yez.s ago ii was the fashion to use a small airy holding only eight of these frames. The strame hive, however, does not provide room enough for the eggs that can be laid by a prolific queen, and the 10-frame hive has been found more satisfactory, especially where Italian bees instead of black bees are kept, and extracted honcy instead of comb honey is produced. A movement to use a still larger hive is row making progress. These larger making progress. These larger usually contain either ten frames of Jumbo size, which is two inches deeper than the langstroth or twelve Langtroth frames, the latter making a square hive. Colonies in such large hives retain more stores for winter, and this is an advantage where they are unwholescent. winter, and this is an advantage where they are unwholesome. These large hives help to prevent swarming to some extent, but they are apt to be unhandy and cumbersome, and heavy to lift or move about. Comparison between the "O-trame Jumbo and the 12-frame Langstroth hives at the Central Experimental Fahm. Ottawa, for one year has shown the former to be more satisfactory on the whole; the bees winter better 'n the Jumbo hive and it takes the regular supers, covers and floors of the 10-frame Langstroth hive, while the 12-frame hive requires a specially large frame hive requires a specially large size of these. A super containing twelve Langstroth frames when full of honey is heavier than many reople care to lift. Combs deeper than the Langstroth frequently give better re-

Ingstroin frequently give weeter to sults in wintering.

The question of large hives, is however, chiefly one for the begin-ner, and those who intend to enlarge apiaries. Those who already 8-frame hives can make them satisfactory by using two chambers instead of one, that is to say, a recond hive body placed as ... per over the regular brood chamber, for brood rearing and even for winte.ing. Thos

DR. MARTEL'S PILLS FOR WOMENS AILMENTS Thomsands of more have testified in the least El-years remaiding the healing qualities of Da. MARTELS FIRMALE PILLS. who have the regular 10-frame size and consider it not large enough can use a shallow super 5 1-2 inches deep, over it. There r.e, in fact, some important advantages in having two shallow chambers for brood rearing and wintering. One can usually tell when a colony is preparing to swarm by simply prying up the upper chamber and looking for queen cells containing larve along the bottom bars of its frames. If such cells are present, the colony will probably swarm within a week, and it will be advisable to treat it without

delay.

The capacity of combs for brood rearing is often reduced by the stretching of the upper parts of the combs. This stretching may be prevented by using diagonal as well as the horizontal wires for supporting the foundation in the fraces. A little space can also be gained by having the top bars of the frames 5-sinch instead of 7-8 inch thick.

While experiments with the larger hives will be continued, and we are favorably impressed with the

favorably impressed with the 10-frame Jumbo for certain condi-tions, we have not yet sufficient data to modify the general advice that has been given to beginners to adopt the 10-frame Langstroth hive.—F. W. L. Sladen, apiarist.

#100 1 h NOTES.

Pea hay is so palatable and nutritious that it is worth all the effort it requires to curt it. Live stock are fond of it and it will keep them in good condition with little grain and

To keep the harness supple there is nothing to equal Neatsfoot oil, with a little lampblack added for black harless has been thoroughly cleaned of or soft soap and hot water, this recipe is invaluable.

Buttermilk, free from salt, is fully qual to skim or separated milk in the feeding of pigs, but is less suitable for calves. It is especially valuable for young growing pigs. Whey differs es-sentially from separated milk and but-termilk, in that it contains practically no fat or albuminoids (flesh formers) the solids in whey are mostly sugar. It is better adapted for feeding to pigs than to calves, for pig feeding its value being about half that of skim

milk or buttermilk. Many farmers do a great deal of their own painting, interior and ex-terior. An amateur painter cannot avoid getting some paint on the hard-ware, such as locks, hinges, handles, pulls, etc. If before beginning to paint the wookwork, a coating of vase paint will come off with it. This insures a neat, clean job.

"French Leave."

This expression arose in the early art of the eighteenth century. hrough certain guests, in the salon of France, not aware of the higher acts of courtesy, leaving without say ing good-bye to the host or hostess The practice spread to society in this country. Therefore, if a man left without saying good-bye to his host, it was said he took "French leave."

Tree Registers Anger.

A species of acacia tree grows in Idaho which has many peculiarities. The tree attains a height of about eight feet. When full grown it closes its leaves together in coils each day at sunset. When the tree has thus set-tled itself for its night's sleep it will flutter violently if touched ,and if you shake the branches it will emit a nauseating odor strong enough to bring on a headache. The natives call it the "angry tree," and it is said that it was discovered by some men who were making a camp for the night, and placed one end of the canvas covering over one of its sensitive branches to use it as a support. Immediately the tree began to jerk its branches sharply. The motion continued with increased "nervousness" until at last there came a sickening odor that frove the tired men to a more hospitable camping place.

Minard's Liniment For Distember.

Oct. 24, 1920 SON IV. What the King Requires. Matthew 15; 1-10, 43-48.

COMMENTARY .- 1. The Beatitud COMMENTARY.—1. The Beatitudes (vs. 1-3). Seeing the multitudes—Christ's preaching and miracles had attracted great crowds. He saw them in their needs and knew the truths that would do them good. He did not allow the opportunity to pass unimproved. Into a mountain—It is generally believed that this was "The Horns of Hattin," an elevation about sixty feet high seven miles southwest of teet high, seven miles southwest of Capernaum, and two or three miles west of the Sea of Galilee. There are two hills rising above the level plain which have been thus designated. 2. Opened his mouth—This expression indicates the importance of what was to be uttered. Taught them—Chirst's teaching, giving instruction, saying— This and the two following chapters

tive us the substance of what Christ aid upon this occasion.

2. Blessed—This is the first of nine verses beginning with the word bless-ed. This group of "blesseds" has been called the Beatitudes, as each one begins with the Latin word "beati," meaning happy. The English word happy, however, is not strong enough to express the thought. Blessed implies a joy that is spiritual, whose source is divine, "produced by God's sunshine in the soul." Poor in spirit— The poor in spirit are those who realize their need and feel their spiritual poverty. They are penitent and hence are in a condition to receive the pro-mised blessing. Thohe who are proud and self-satisfied are far from being por in spirit. Those who humble themselves and repent of their sins are candidates for the blessing attached to this condition. Kingdom of heaven—There is a sharp contrast be-tween temporal poverty and the possession of a kingdom, so there is a sharp contrast between spiritual pov-erty and the possession of the kingdom of heaven. Christ comes into the erty and the possible of heaven. Christ comes into the heart and sets up His kingdom, which is "righteousness, and peace, and joy in the Holy Ghost," and reigns there

4. mourn—Here is expressed a want, a longing. They mourn be-cause they have sinned. This does not refer to wordly or temporal sor-It does not mean mourning for lost health, wealth or friends, but god ly sorrow that "worketh repentance not to be repented of." 5. meek—"Of gentle and long-suffering disposition; of peaceable temper; submissive, complaint yielding." When this due complaint yielding." When this due composure of mind has reference to God, it is termed resignation;" when it is exerted toward men, it is "mildness and gentleness;' when we consider it with regard to ourselves, we style it "patience."—Wesley. inherit the earth—The land; an expression the earth—The land; an expression frequently used by the prophets to signify the land of Canaan. Under this figure our Lord promises the abundance of spiritual good provided for in the gospel. The Canaan of per-fect rest and joy and peace is the in-heritance of those who are truly meek.

Hunger and thirst-These strong

expressions set forth the longing of

the soul for spiritual good.

7. blessed are the merciful—Those who feel for the woes and distresses of others, whether friends or enemies and open their hands for their relief and open their hands for their remea. "The merciful," says Erasmus, "are those who weep over the calamities of others, who feed the hungry and clothe the naked, adminish those in error and pardon the offending." error and parton the offending. Obtain mercy—He shall be dealt with in mercy by God and man. The exercise of mercy brings its own reward. "It blesseth him that gives, and him that There is genuine satisfaction in being merciful to others, and God and our fellow men repay us in addiby being compassionate toward We are able by nature to extend by to others, though this ability is greatly enhanced by grace. 8. blessed are the pure in heart—Paul says,
"Now the end of the commandment is charity out of a pure heart" (1 Tim. 1: 5). The purpose of the gospel is to make the heart pure. To be pure in heart is to have all sin removed, and John says, "The blood of Jesus Christ his Son cleanseth us from all sin" (1 John 1: 7). Man can nto make his heart pure, but God can. shall see hearts are God-Only those whose

pure have correct spiritual eyesight. 9. Blessed are the peacemakers-The peacemaker is one who is peaceable himself and seeks to promote peace wherever his influence extends. Jesus is the great example of this class. He came to bring peace to earth, yet he was always opposed to unrighteousness, and severely denounced hypocrisy and other forms of sin. Cuildren of God—God is spoken of in the Bible as the God of peace. Those who follow peace with all men" (Heb. 12; 14), are like him and are called his They become such by being born of the Spirit and adopted into the family of God. 10. Persecuted for righteousness' sake—Pursued, cruelly hounded, because they maintain and practice righteous principles. They seek to make the world better and are hated by evil-doers. 11, 12. It is the lot of those who are truly saved to be reviled and persecuted, but the Lord's gracious presence and blessing are bestowed, and these more than compensate for the suffering endured.

11. The disciples' influence (vs. 13-16). The followers of Jesus are a force in the community where they live and in the sphere of their activities. They are compared to salt, the two principal qualities of which are, to render the food to which the applied more palatable and to preserve food. Any commenty is better for having Any connectify is better for having in it the presence of Christians, and is a more fractable place in which to live. The presence of Christians on the earth nois his a preservative. If there had been more righteous persons in Sudem, the Lord would not have destroyed the city. Chirst's followers are the light of the world Light is one of the most useful and necesis one of the most useful and neceseary agents in nature, and fits the eye, which is the instrument of vision. The world has a spiritual sense and is cap-the of illuminating by the light that

Murver, what makes you so cross ? Poor mother, has backache, dizzy spells, headache and is nervous, which are all symp-toms of woman's trouble. Most women neglect their health, and for this neglect they pay the penalty. Any woman who suffers thus will find that she loses flesh faster than Nature can put it on. She will find that neglect does not pay. A little more attention to health would brighten up her life and make her worries fewer. If she asks her neighbors she finds that Dr. Pierce's Favorite Prescription benefits a woman's whole system. It not only acts upon the troubles and weaknesses peculiar to women, but is an all-around vegetable tonic that braces the entire body, relieving nervousness, sleeplessness, headaches, dizziness and a run-down condition. Dr. Pierce put his Favorite Prescription in the drug stores in 1870. For fifty years it has stood the test, and thousands upon thousands of women everywhere in Canada can testify that this non-

alcoholic tonic made them healthy and well. Send ten cents

to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial

package of Favorite Prescription tablets.

emanates from genuine Christains. III. Jesus fulfilling the law (vs. 17-42). Jesus did not come to destroy the law, but to fulfil. He not only taught that one should not kill, but that he that one should not kill, but that he should not hate or despise another. He showed that sin consists not alone in the act itself, but more particularly in the intention or desire. He warned his hearers against taking oaths and told them to let their yea be yea and their nay, nay. They should tell the truth and let no one have any ground to suspect that they were guilty of de-ception. Jesus declared that one should suffer wrongfully rather than be revengeful.

Standard of Christian charac-1v. Standard of Christian charac-ter (ys. 43-48.). 43. love thy neigh-bour—This is quoted from Lev. 10: 18, which reads, "Thou shalt love thy neighbor as thyself." The Jewish teachers interpreted "neighbor" as meaning only Jews, but Jesus would have the word include all who are have the word include all who are within the sphere of our influence. 44. love your enemies—This is a command beyond the reach of multitudes in their present condition. Who can obey it? Only those who have hearts filled with the love of God. 46. what reward—It is not a virtue to love those who are amiable and who love us. 47 .- salute-The Oriental salutations are profuse and much time is occupied with them. The usual salutation is "salaam," peace. your breth-ren only-Jesus would break down the custom of showing respect to only those of one's own class or kind, more than others—The Christian should surpass in gentleness, kindless and love those who are not followers of Jesus. 48. perfect—The standard is perfection in love and moral purity. We are required to be perfect Christians. The prayer of Paul for the Thessalonians was to this end, "The very God of peace sanctify you wholly" (1 Thess, 5: 23). Read also 1 John

Questions-Where and when was the sermon on the Mount preached? Give the meaning of blessed. What is meant by being poor in spirit? By the kingdom of heaven? Who are the real mourners? What are the meek? Who are the merciful? How is the heart purified? Whom should we love? What is the standard of Christian character?

PRACTICAL SURVEY. Topic-The character which Jesus

1. The Beautitudes.
11. The application. period of several weeks interven-A period of several weeks interven-ed between the incidents of the pro-vious lesson and this. After his great Sabbath of preaching and healing at Capernaum. (Luke 4: 33, 34), Jesus had gone forth with his disciples through Galilee. Teaching, preaching, healing constituted the order of his ministry. With this tour began the training of his disciples for their work. It was a new step in the progress of his kingdom, which knows from experience how useful it is.

no territorial limits nor distinctions of race or place. The heavenly power which he would not use in his own bewhich he would not use in his own behalf flowed unstitutedly in blessing, though the only specific incident recorded is the healing of the leper (Luke 5. 12-15). Returning to Capernaum after a hight of prayer in an adjoining mountain, he called to him of his followers "whom he would." He provided his church with the teach ers who were to guide them, and in the Sermon on the Mount, the doc-trines which they were to preach.

1. The Beatitudes, The Beatitudes, "Blassings," constitute the introduction to the discourse which follows. It is an epitome of the principles of which the sermon is an unfolding and application. They are nine in number, six having reference to personal the rectain of the remainder. character and reward, the remainder to outward relations and conditions The former follow an intimately con-The former follow an intimately connected progression in moral significance and statement to a climax in both character and benediction. "Blessed are the pure in beart: for they shall see God." "The Beatitudes are the diatonic scale in heaven's music. They keynote is blessing, the upper octave, joy." In Christ's conception of the blessed life, goodness and reward are inseparable. "The flower brings its own odor." The "poor in spirit," have the kingdom already. ready

ready.

11. The application. Obligation follows blessing. After the Beatitudes comes law. The former reveal the nature and constitution of the kingdom in relation to itself. The sermon discloses the same kingdom in its re-lation to the world, and together they, sweep the whole circuit of human obligations. God's people are the pre-serving, illuminating agencies of the world. Salt and sunlight are the great essentials which keep the world alive and pure. If the savor be lost, worth-lessness and dishonor result. The new commandments of the Mount of Beatitudes do not abrogate, but complete, the Sinaitic law. The enternal dis-tinctions between right and wrong underline both. Jesus obeyed and ful-filled both. He requires not the os-tentatious and exaggerated scrupulos-ity of pharisaic ceremonialism, but a surrender of the heart and will to the surrender of the heart and wan spirit of the commandments. The spirit of transgression is in the disposition. In angry feelings in the germ of murder; in a lascivious look, that of adultery. Better be maimed and blinded than destroyed. God's providence sends sunshine and rain on all. The closing verse of the lesson developes the Christian ideal of character. The word "perfect" signifies completeness in all its parts Christian perfection is an evangelical perfection. "Ye are complete in him." It means sincere compliance with all the divine precepts, through the virtue and power of the atonement

ure keeps buried 'neath his wos hink and act alone for others eaving self to lag behind; 'reat mankind as sisters' brothers, e "ye pitiful and kind."

GLEANINGS.

It is all right to try, try again, but it is better to make good the first

knocks at your door—to be told you are not at home.

You call God: He often descends and

You find people ready enough to do the Samaritan, without the oil and twopence.—Sydney Smith.

The body might as soon thrive in a fever as the soul prosper when burning with contention and strife. Overturn a man's wring-doing, but do not overturn him unless it must be

done in overturning the wrong."-Lin-The most valuable asset of an employee is his spirit—cannot be bought with so cheap a thing as money. It must be won.

The grand essentials of happiness are something to do, something to love, something to hope for. Christ of

Room for pleasure. Room for bus-iness, but for Christ the Crucified, not a place that He could enter, in the

eart for which He died."

What an oportunity is prayer! It is laying hold of Almightiness, Omniscience, and Omnipotence at one and the same time.—Dr. Talmage. Never criticize the Church in any

point until you have done your best to remedy that defect; and after that you will not want to criticize.

THE BIGGEST THING.

The biggest thing in the world, without any question, is Christianity Christianity, however, is the establish ment of God and therefore ought to

be the biggest thing in the world.

After Christianity, the biggest thing in the world is Faith. By Faith I mean, taking Jesus Christ for all He claims Himself to be and able to do all He has premised. The Faith off-times is how reverse and attains its times is born, grows and attains its full potency amid doubtings and ques-

Faith makes men. Faith to men is what a mother's presence is to her child. He who does not possess Faith though he may have almost everything else, lacks the one big thing. What did Jesus have in mind when He said to the rich young fellow in His pre-sence, "One thing thou lackest"? When a man loses Faith, he loses

everything. Men may dream, plan and scheme, yet what is ever accomplished without Faith? Three men are entrusted with talents. Two increase their talents one hundredfold, only as far as I can see, because of Faith The old, old story of bloodshed and devastation is nothing else than jeal

ously and distrust.

Take men of Faith out of the world and at once everything goes to smash. Faith made this nation, Faith is the bulwark of the Nation and if anything will save the Nation in the hour of it is the oldtime simple trust

"Think you when the Son of Man cometh shall He find plenty on earth?" Though He find plenty of everything else and not find Faith, would He be

Hang in hand with Faith go Reverence and Courtesy. These three are supports of Christian civilization. Only Faith uncovers and bows the head in he presence of Almighty God with that revential awe always due Only he who reveres God will honor the laws of the nation. Only Faith enables a man to hold himself in control and to live with due regard for

rights and feeling of others. If our Christian civilization, which seems to be threatened, is in any way leonardized, it is because Reverence and Courtesy to a very large degree are spurned. If now Faith be cas the crash, as of Greece and Rome, is inevitable.

LIGHT.

She thought by heaven's high wall that

she did stray,
Till she beheld the everlasting gate;
And she climbed up to it to long and wait, Feel with her hands (for it was night),

and lay Her lips to it with kisses; thus to pray
That it might open to her, desolate.
And lo! it trembled; low! her passionate
Crying prevailed. A little, little way
It opened; there fell out a thread of

light,
And she saw winged wonders move

therein. Also she heard sweet talking, as they meant
To comfort her. They said, "Who comes

to-night Shall certainly an entrance win." Then the gate closed, and she awoke content. -Jean Ingelow.

Health cannot be looked for in the child that is subject to worms, because worms desirey health by creating in velopment and cause serious weak-ness.. Miller's Worm Powders ex-pel worms and are so beneficial in their action that the systems of little sufferers are restored to health-fulness, all the discomforts and danworm infection are removed. and satisfactory growth is assured.

The ostrich hides its head in the sand on the same principle that in-spires the fellow who is head over ears in debt to feel out of sight.

In Rash All Over Bedy. Burned And Itched. Could Not Rest.

"My little siche had enseme all over her bedy. It came like a mah, and was burning and inching. She could get no rest, and we would have to wet her clothing to take it off. She was soots and trainble, and the breaking out seasond disfigurement." She had the asseme about five-montas when we tried Cuticura Scap and Olotment. We could see the was getting relief, and we just uned one sake of Cuticura Coap and one have of Cuticura Coap and one box of Cuticura College when she was healed." (Signed) Miss Jessie Campbell, Sunny Arae, Nova Scotie, Johanny 16, 1910.

EMPIRE IS ONE **MUST REMAIN SO**

For Any Unit to Secede Would Be Great Wrong.

Under-Secretary of Colonies Talks Plainly.

London, Oct. ... -Col. Amery, Under-Secretary of State for the Colonies, speaking at a meeting to-day of emigration agents, said he doubted if responsible dominion man would endorse what had been said in the Irish controversy that the essence of the dominion status copsisted in the mor-

dominion status consisted in the mor-al right of peaceful secession.

If the people of the dominions were willing to sacrifice their privileges and abjure the duties and responsibilities of world-wide Britisk citizenship, there was no power here to prevent them, and, in the same way the Home Country might secode from the Empire, but this power did not constitute a right to do so, however bloodlessly it might be accomplished.

The secossion of anyone of me said.

It might be accomplished.

The secession of anyone of us, said, would still be a revolution, an unconstitutional act, and a profound moral wrong to the rest of the commonwealth and to all humanity.

Col. Amery concluded: "Let no more be heard of a moral right to destroy the unity of the British Empire and impair the heritage of our own citi-zenship. The Empire is one and will and must remain so."

GUARD THE CHILDREN FROM AUTUMN COLDS

The Fall is the most seevre season of the year for colds — one day is warm, the next cold and wet and unless the mother is on her guard, the little ones are selzed with colds that may hang on all winter. Baby's Own Tablets are mothers' best friend in preventing or banishing colds. act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose of the Tablets will prevent colds, or if it does come on suddenly their prompt use will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Economical Ash Barel.

Take a barrel, saw it in half, leave one half as it is, the other on the end sawed, nail one-half inch mesh netting, so only the dust falls through. about three inches from top for a lid. Nail four sticks on side for first half, so when second half is placed on it can't slip off. Put your ashes in the top and dust will fall through. When feeding furnace or stove, use ashes left, in the top, mixed in with your other coal, and by doing so will find they will burn as well as fresh coal, and will only use half the amount and get the same heat.

Relieves Asthma at Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. dealer can supply it.

When Love is Young.

They were standing at the front gate. "Won't you come into the parlor and

sit a little while, George, dear?"
"N-no, I guess not," replied George hesitatingly.
"I wish you would,' the girl went on.

"It's awfully lonesome. Mother has gone out and father is upstairs greaning with rheumatism in the legs."
"Both legs?" asked George.

"Yes, both legs.
"Then, I'll come in a little while."

For Asthma and Catarrh.--It is one of the chief recommendations of Dr. Thomas' Eclectric Oil that it can be used internally with as much success as it can outwardly. Sufferers from as it can outwardly. Sufferers from esthma and catarrh will find that the Oil when used according to directions will give immediate re'.f. Many suf-ferers from these aliments have found relief in the Oil and have sent testi-

Children Cry for Fletcher

STORI

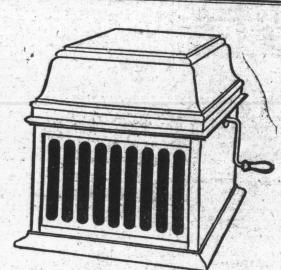

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric,
Drops and Soothing Syrups. It is pleasant. It contains
neither Opium, Morphine nor other narcotic substance. Its. neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.
